Morning Times

PETERBOROUGH, JAN. 31, 1903.

DEVELOPING WIRELESS TELEGRAPHY

Signor Marconi is of the impression that he will be able to commence a regular commercial service with his wireless system in three months. The young inventor proposes to fit a station at Poldhu in the immediate future for communication with Canada. More powerful generators will be placed at Cornwall, and other appliances should add materially to the effectiveness of the service. The next development of wireless telegraphy will be to connect England with South Africa.

Experimentating is developing many things which formerly puzzled Marconi. The inventor believes that the electric waves conveying aerograms follow the surface of the earth. Whether these waves go above or below the earth has not yet been determined. But in sending his messages, Marconi will calculate the distance to a certain point of the globe directly opposite his station by taking the semi-circumference of the earth.

The interesting fact is developed, that in sending aerograms, more power is needed by day than by night. The fact that the sun may be shining or that the day may be cloudy appears to make little difference in the effectiveness of the messages.

When Marconi received word at sea from Poldhu last summer, the wiseacres who were predicting that wireless telegraphy would never be used for commercial purposes made much of the fact that a few of the messages were picked up by persons for whom they were not intended. The wireless apparatus has since been tuned for secrecy. The tuning system consists in each receiver being adjusted to "respond only to waves of a prescribed frequency, and the various transmitters being adjusted to develop different frequencies."

In time, the Marconi system will naturally undergo many improvements. As now operated the generator at work for transoceanic services makes a deafening noise, and electrical instruments in the vicinity are greatly affected by the electric current.

CANADA'S CONTRIBUTION

What was Given in Men Money and Subsidies to the to the War

Ottawa, Ont., February 2 — A supplementary report has been issued by the militia department giving the details of the organization and despatch to South Africa of the Canadian division, South African constabulary, the second, third, fourth, fifth and sixth regiments, C.M.R., and the 10th Field Hospital and the services rendered by these corps while in the field, including the third battalion, R.C.R., which relieved the Leinster regiment at Halifax. Canada raised a force of 8,372 of all ranks at a total cost of $[illegible]. The expenditure on the contingents was $1,[illegible], whilst the sum of $[illegible] was paid out in connection with the Third Special Service battalion at Halifax. Of the total force of 7,[illegible] that went to South Africa, 224 died and 252 were wounded, making in all 476 casualties. The number of killed was 63. Thirty-one died of wounds, 127 succumbed to disease, one was accidentally drowned and two were reported missing and believed to be dead. Of the deaths from disease 56, or over [illegible] per cent, were due to fever.

Premier Haultain May Resign

Winnipeg, Feb. 1.—A despatch from Indian Head says Premier Haultain, of the Territorial Government, may resign to accept a judgeship, to be created in the west.

IT SPEAKS FOR ITSELF

Wonderful Results From Taking Dr. Clarke's Little Red Pills

Editor of the Morning Times:

Sir,—I have been a sufferer for 30 years from rheumatism. Tried everything and got no relief. Six boxes of Dr. Clarke's Wonderful Little Red Pills made me as well as ever. I write this solely that others may get relief. James Goodfellow, Sault Ste. Marie.

E. M. Yates, Millbank, Ont., writes: Tried different remedies for stomach trouble without relief. Three boxes of Dr. Clarke's Wonderful Little Red Pills have cured me.

Dr. Clarke's Little Red Pills are a positive and certain cure for rheumatism, asthma, paralysis, coughs, lame back, indigestion, all stomach and liver troubles, female complaints, even when the diseases have been standing for many years; the most stubborn case will yield. Sold by Ormond & Walsh, Peterborough, price 50c. per box.

Dr. Clarke's Sure Cure for Catarrh and Dr. Clarke's Sure Cure for Eczema, same price. $[illegible] will be paid for any case that it will not permanently cure.

THE COUNTY COUNCIL

Balance of the Report of Monday Night's Meeting

The House of Refuge—Legal Committee Work—Orders on the Treasurer

HOUSE OF REFUGE.

Ald. Morrison submitted the following report:

Gentlemen,—Your Joint committee beg leave to report as follows:

1. Your committee had a meeting on January 20th, inst. with the Joint committee of the Council of the County of Peterborough, at which the following resolution was adopted:

"That a sub-committee consisting of Mayor Roger, and Ald. Morrison and County Councillors Johnston and Peck be appointed to enquire into the whole subject of a House of Refuge or some other manner of properly caring for the poor of the Town and County and that the Town and County Councils be requested to make provision for any expense necessarily incurred in the enquiry."

2. Your committee recommend that this action be confirmed and the request of the Joint committee granted and that the treasurer be authorized to pay the town's share of any such expense on the certificate of the chairman of this committee.

The report was adopted as read.

WORK OF LEGAL COMMITTEE.

At this juncture Ald. McWilliams drew attention to the fact that the case of Wm. Hopkins, who had threatened the Town with suit for damages for injuries received by reason of a defective sidewalk on Edinburgh street, had not been definitely reported on by 1902's committee, and he would like to know what power the present Legal committee, of which he was chairman, had in the matter.

Council referred this matter to the present Legal committee, with power to act, which practically meant a settlement with Mr. Hopkins.

ORDERS ON TREASURER.

Ald. Rush moved, seconded by Ald. Morrison, That the treasurer pay the Children's Aid Society $25 on account of any grant that may be made the society this year.—Carried.

Ald. Rush moved, seconded by Ald. Morrison, That the treasurer pay the Trustees of the Nicholls estate $30 interest on balance of account owing the estate by the town.—Carried.

QUESTION OF POWER.

Ald. Morrison moved, seconded by Ald. Rush, That the matter of the petition to the Lieutenant Governor re Niagara Falls power, be referred to the Electric Light and Franchise committee.—Carried.

A LIVE WIRE.

At this juncture Mr. Alex. Reid complained to the Council of uncivil treatment he received at the hands of Police Constable Stewart. He said that at 7.30 last Thursday evening, when driving past the corner of George and Brock streets, his colt was caught by what an investigation proved to be a live electric wire. He at once informed Constable Stewart of the circumstance, but on returning after driving a couple of blocks, he found the wire in charge of a couple of citizens, but no constable on the spot. He hunted up Stewart once more and told him he should give his attention to the live wire in the interests of the citizens, when the constable replied: "Mind your own business or I'll make you." Mr. Reid did not like such treatment from a public servant paid to safeguard the lives and property of our citizens.

Ald. Rush explained that Stewart had informed him that he had at once telephoned the circumstance of the live wire to Mr. Fisk.

Ald. Shortly said the trouble was that Reid thought the constable should have gone himself to keep citizens from running foul of the live wire in question.

UNION WITH THE VILLAGE.

Ald. McWilliams moved, seconded by Ald. Morrison, that a special committee be appointed to confer with a like committee from Ashburnham on the question of union with Ashburnham.

Ald. Best said that he altogether opposed taking over Ashburnham with its present limits.

Ald. O'Connell moved in amendment, that the matter be left in the hands of the Committee on Electric Light and Franchise, as originally intended.

Ald. Best moved in amendment, that the question be referred to a Committee of the Whole Council.

The amendment was carried on the casting vote of the Mayor and a Committee of the Whole Council will consequently look into the question of amalgamation with Ashburnham.

Council then adjourned.

Gem Consolidated Gold Mining Company Stock at 50 cents per share is one of the safest propositions ever offered to investors. The property is located in the heart of a rich section of Eastern Oregon, and is steadily producing—no debts, well-equipped and practically ready to pay dividends.

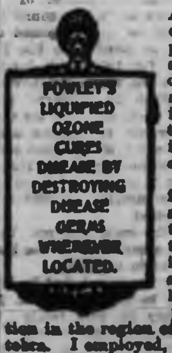
Kidney Trouble Quickly Cured

For Four Weeks, Mr. T. J. Coo, of Toronto, Was Confined to His Bed in a Paralyzed Condition, Unable to Move.

Drug Preparations Did Him No Good, But Powley's Liquified Ozone Soon Destroyed the Disease Germs.

The Second Dessert-Spoonful Gave Him Marked Relief—In Two Days He Was on His Feet and in Less Than a Week at Work at His Office.



After the miraculous cure Ozone performed on myself I feel it my duty to you and to suffering humanity to give you my testimonial regarding your most wonderful remedy.

I lay on my back for four weeks with a most acute attack of kidney trouble. I was so ill that I was unable to move in my bed. I was in a paralyzed condition in the region of the Lumbar Vertebra. I employed, whom I consider, one of Toronto's best physicians, but after four weeks' treatment I was little (if any) better.

While in this condition I read an advertisement about a cure of kidney trouble by Ozone, and decided to try a bottle. After the second dessert-spoonful I felt a marked relief. After using Ozone for two days I was able to stand on my feet for the first time in four and a half weeks, and the fourth day I was strong enough to walk around. On the sixth day I came to my office and have been attending to my business ever since.

I feel that I cannot find words with which to express what Ozone has done for me, and I will be most pleased to meet any person or persons you may wish to send to me in regard to the above.

I have the honor to be,
Yours very truly,
(Signed) T. J. COO,
Mechanical Superintendent Creelman Bros.' Typewriters.

MR. T. J. COO.

Kidney Troubles Cannot Exist Where Ozone is Used. Here is More Home Proof.

Besides being a most prevalent trouble kidney disease is a most dangerous one. Hundreds of people are suffering from kidney disease to-day and do not know what ails them. They know they are in a languid, half-sick condition, but do not know the exact cause of it. Kidney trouble, besides being dangerous in itself, leads to many other complications, and if neglected the entire system soon becomes disarranged. The most perfect safeguard against kidney trouble and the most certain cure is Powley's Liquified Ozone. As in the case of Mr. Coo, it immediately destroys the germs causing the disease, with the natural result that a speedy and permanent cure is effected. Here are a few of the many Canadians who have been cured of kidney trouble by this great drugless preparation:

A VERY DESIRABLE INVESTMENT

THE McLENNAN PAINT COMPANY
LIMITED

BUFFALO - - - NEW YORK

INCORPORATED UNDER THE LAWS OF CANADA

CAPITAL, - - $500,000

Dividends on Preferred Stock Paid Quarterly.

For the purposes hereinafter stated, we offer at par,

50,000 of our 7 per cent. Preferred Treasury Stock Shares, $100.00 each

Payments as follows: 20 per cent. on amount of stock subscribed for at time of subscription; 30 per cent. in 60 days balance in 90 days. Receipts will be issued until full amount of stock subscribed is paid, when certificates bearing the Company's seal, and signed by the President, Secretary and Treasurer are issued. The McLennan Paint Co., Limited, have one of the most modern plants of its kind in the world, occupying 300,000 square feet of floor space. The capital of the Company is a half million dollars. The growth of the business has been phenomenally rapid and conservative. In line with other large industries, the Company propose to establish a branch factory in Canada for the manufacture of their products, which are covered by valuable patents, and which practically give the Company a monopoly, and, for the above purpose, offer at par $50,000 of their 7 per cent. Preferred Treasury Stock.

The McLennan Paint Company, Limited, was organized in 1892 by Mr. C. J. McLennan of the McLennan Dipping Process, and other valuable paint-making machinery. The Company began business in rented premises, in East Buffalo. So profitable was the business, and so rapid the growth, that large factories were built in North Buffalo in 1895. The business again doubled, and another plant was added in 1898. In 1901 the Company invented and perfected a line of reds, or vermillions, permanent in color, and at much less cost than the old line colors. This increased the sale of their products practically one-fourth, making it necessary for them to build a new Color and Chemical Works. This factory is without doubt the largest and most modern in the world. Mr. Charles J. McLennan, the President of the Company, and the inventor of labor-saving machinery, such as dipping tanks, mills, etc., is recognized as one of the most skillful and best known paint manufacturers in the country. The name and fame of this Company, and its products, are known all over the United States and foreign countries, and that they will capture the Canadian market is evidenced by the fact that many of the large Canadian manufacturers are at present using their goods, in face of the heavy duty. It is with a view to saving this 25 per cent. duty and adding it to to the profits of the Company that they have decided to establish a branch in Canada, which will be controlled and managed by the parent Company.

Practical men of means, character and national reputation constitute the directorate and management. Each department is managed by a skilled man; monthly statements rendered and careful audit made semi-annually. The books are always open to the smallest shareholder. The finances of such a concern are guarded as closely as the finances of any bank, and failure is practically impossible.

COPY OF TESTIMONIALS.

A. C. Cornell, Toronto, Ont.: Columbia National Bank, Buffalo, N. Y., Jan. 23, 1903.

DEAR SIR,—The McLennan Paint Co. are good customers of this bank, and I have known them personally for years. All the officers bear excellent reputations, and are considered good business men. Their management is evidenced by the large business they have built up, as careful and conservative. They have met with great success in the past, and I believe that today, theirs is one of the largest and most prosperous concerns of its kind. I have every reason to believe that the stock which they are now offering for sale is a desirable, as well as a safe investment. Yours very truly,

L. H. GETHOEFER, Cashier.

The Merchants' Refining Co., Refiners of Petroleum, Paraffines, Paraffine Wax, Lubricating Oils, Residuum, Napthas, and Gasoline,

A. C. Cornell, Toronto, Ont.: Buffalo, N. Y., Jan. 23, 1903

DEAR SIR,—Your favor of 21st received, and note you are offering for sale $50,000 of the preferred stock of the McLennan Paint Company and ask me what I know of the firm. Would say I have had business dealings for eight years—transactions of many thousands of dollars. I am also doing business with other houses engaged in the same line, and desire to say there is no house in America to-day that stands higher than the McLennan Paint Co. The growth of their business has been phenomenally large, and under the conservative management of the President, Mr. C. J. McLennan, the success of the business is assured in the future. As an investment, in my judgment, nothing could be safer than the stock they offer.

Very respectfully, C. A. SALISBURY, Manager.

A. C. Cornell, Toronto, Ont.: Buffalo, Jan. 26th, 1903.

Dear Sir,—Referring to the sale of $50,000 of our 7 per cent. Preferred Stock, the Prospectus does not elaborate on the proposition, but merely mentions the amount guaranteed. I desire to inform you, however, we could have paid at least 14 per cent. last year, but carried balance to a Reserve Fund, which, necessarily, makes the stock very valuable.

Very truly yours,
THE McLENNAN PAINT CO., LIMITED,
C. J. McLennan, Manager.

P.S.—Having visited this proposition on behalf of some very conservative investors, I can verify all the above. The plant is extensive and modern in every detail; officers and management skilled and very industrious; all the products superior. This is a Canadian Company, Canadian Charter. Having built in Buffalo, in proximity to raw material, by shipping here in ground state and preparing here, will save and add large duty to already large profits. Bear in mind this is not prospective, but a large, rich, going, paying institution. Prospectus, application forms, and any further particulars, and subscriptions, address the undersigned. All cheques or drafts for stock made to the order of the Company, and forwarded to

A. C. CORNELL, Fiscal Agent,
16 Yonge Street Arcade, Toronto, Ont.

REPORT BY EX-SUPERINTENDENT OF MINE

Cecil R. Gold Mining and Milling Co., Los Angeles, California.

Ballarat, Cal., Nov. 1st, 1902.

Gentlemen,—Your request for my opinion as to the "[illegible]" group of mines, and other claims in which you are interested in this territory, to hand, and in reply will say:

The "[illegible]" group, which is located southeast of Ballarat, some three and a half miles, consists of twelve claims, equal to 240 acres. The ledge crops out more or less the full length of these claims, showing the same character and formation of work as where development work has been done, [illegible] shows highly mineralized rock, with [illegible], slate, slate porphyry, gouge, quartz, and [illegible], all bearing [illegible]. Where work has been done, it shows a [illegible] in both quantity and quality of gold-bearing rock. Commencing with the surface, the ore shows much iron and copper stain. All mill tests show rich ore commencing with the surface; in fact, I milled for several days and recovered $[illegible] and over per ton, yet the milling process does not pay, more than two-thirds of the value of the ore, the tailings oftimes running as high as $[illegible] per ton, and never less than $[illegible]. To save the entire value of your ore it will be necessary to install either concentrators or a cyanide plant. [illegible] careful study and frequent examination of the surface of the ground, and down as far as has been opened below the surface, I am highly pleased with the property. It is certainly a fine property, and as good as any I have ever had the pleasure of examining. Considering your mill site, with [illegible] facilities added, water, fuel, and cheapness of mining the ore, the Cecil R. will be capable of paying enormous dividends when your capacity [illegible] is increased to what it ought to be.

Wishing you every success, I remain, Yours very truly,

(Signed) G. W. [illegible],
Ex-Mine Supt. Cecil R. Gold Mining and Milling Company.

Price is now [illegible] cents a share, and we offer [illegible] shares at this price, but it may be advanced by January 1st, 1903, to [illegible] cents a share.

Canadian Steel and Coal Co.

CAPITAL

10,000 shares 7 per cent. Cumulative Preferred Stock, par value $100 each .... $1,000,000 00
50,000 shares Common Stock, par value $100 each, issued and fully paid $5,000,000 00
Total Capitalization $6,000,000 00

Issue of $1,000 000 7% Preferred Stock in 10,000 Shares of $100 each at par.

This Stock is preferred both as to Assets and Dividends.

The shares are entitled to cumulative preferred dividends from the net earnings of the Company, at the rate of 7 per cent per annum, payable half-yearly on the first days of April and October. They may, at the option of the holder, be exchanged for common shares. They are subject to be called in, in whole or in part, by the Company, at 15.00 per share, at any time on or after 1st January 1909.

The total issue of Preferred Stock is only $1,000,000.00, the whole of which is now offered.

Subscriptions for 10,000 shares of $100 each of the 7 per cent Preferred Stock of the CANADIAN STEEL AND COAL COMPANY will now be received at par, that is, $100 for each $100 share as follows:—

5 per cent on application.
25 per cent on allotment.
35 per cent 30 days thereafter.
35 per cent 60 days thereafter.

One share of common, par value $100.00, given with each share of preferred.

The whole of the instalments remaining unpaid at any time may be prepaid in full. A discount of one per cent will be allowed upon the par of each share if prepaid at time of allotment.

Notice of allotment will be sent promptly by ordinary letter.

COAL
PROPERTY IN FULL OPERATION

Company owns 9,600 acres of coal property known throughout the coal trade as the New Campbellton Colliery, located on Bras D'Or Bay, County of Victoria, Cape Breton, Nova Scotia. Mine is fully equipped, producing and marketing 100 tons of coal a day at a net profit of $1.00 a ton. Improvements are now being made that will increase the output to over 1,000 tons a day. On present output, figuring 300 working days in year, the net result will more than pay interest on entire issue of preferred, with output of 1,000 tons a day net result will be $300,000 per annum.

IRON
RICHEST ORE IN THE WORLD

Company owns in fee simple, free and clear of all incumbrances, 4,000 acres of iron ore deposit, located at Natashquan (tidewater) situate on North shore of Gulf of St. Lawrence, in the County of Saguenay, province of Quebec.

Deposits contain 20,000,000 tons of ore ABOVE SEA LEVEL ALONE.

Quality of ore is highest ever discovered, running from 69 to 72 per cent. in metallic iron.

More orders for the sale of this ore have been received by the Company than can possibly be accepted, and at a price netting the Company a profit of $2 a ton F. O. B. vessels at Company's docks.

Send for prospectus giving full information as to earnings, reports, etc., etc.

California-Nevada Mining Co

Owns the VICTOR and ARIZONA Mines

$20,000,000 blocked out ready for The Hoodlum claim which adjoins the mill in the former. $5,000,000 in the Victor 6 claims on Argus Mountain in the latter. All can be mined [illegible] and 6 in Limerick Canyon, all and milled for less than $2 per ton. with big ore veins yet to figure on.

The Greatest Mining Proposition of Modern Times

This company has demonstrated its ability to produce ore at a profit and pay regular monthly dividends under the most adverse circumstances. Only the highest grade could be shipped and cost upwards of $25 per ton. With a mill it can be treated at less than $2 per ton. The company has nearly enough money to pay for the mill, which they promise to have in operation by April 1st, 1903.

WHAT INVESTORS SHOULD KNOW.

Is the management honest and able? Investigate and learn the facts.

A Limited Amount of Stock for Sale.

Present price, $1.00 per share, will soon be advanced again. A 50-ton mill will be in operation at the Arizona mine probably in January and dividends increased. This company will stand the most rigid investigation. Write for prospectus.

STOCK MARKETS

SOME BULL POINTS

New York, Feb. 3.—A bullish factor of primary importance is the changed condition of the foreign market. Two months ago, fluctuations of foreign exchange strongly foreshadowed exports of gold upon the easement of the money market. Money is now far easier than any one anticipated that it would be at this time, yet foreign exchange is one cent in the pound sterling away from the shipping price, and still receding. Some people say sales of bonds abroad are accounted, the real reason is that we have paid much more upon account of our foreign indebtedness than most people imagine. In four months our foreign borrowing has failed to increase, in the meantime our excess trade balance of $400,000,000 for the year has come to our aid. Our exports are increasing more than equivalent to the increase in our imports. We will consequently make as good a showing for 1903 as we have for the year just closed. We are likely to import more gold this year than we export. Great crops have been gathered and are now moving belated to market at excellent prices. Winter wheat never looked finer at this time of the year than it does at present. English spinners decline to buy our cotton, owing to the impression that we had a vast crop. It being now clear that the 1902-03 will be no larger than the preceding one, the consumers of the world are now hurriedly buying cotton from us at high prices, and will continue to do so until a new crop can enter into their calculations. These are most excellent reasons for anticipating an advancing market in the immediate future. Despite the fact that increased wages have greatly increased operating expenses, thereby reducing net railway incomes, Railway net showings for December are better than those for November, and they will show yet still better, as the increase in freight traffic are gradually going into effect, which work has already started. The coal shares have the best outlook they have ever known. It has been calculated that Erie and Reading will by the first of June next have made up all the losses made by them due to the strike. In both these instances a dissolution of the voting trust will bring additional distribution upon their preference shares.

Summary—Practically the same state of affairs existed today as for several days past. The market was strong, but more or less dull. The Wabashes were in sharp demand at advancing prices, owing to a satisfactory settlement with the Pennsylvania railroad as to its entrance into Pittsburg. The steel issues livened up in the afternoon, advancing sharply upon a good volume of business. The common crossed 38 1-2 and the preferred 88. Copper was steady around 68, while sugar was somewhat depressed, owing to the closing of some of the refineries for cleaning purposes. Pennsylvania was steady around 150, while Arbitrage sales against the purchase of Pennsylvania convertible warrants continued. The market remains very firm and activity would bring better prices. Money closed at 2 1-2. Sales 616,100.

INTERNATIONAL ELECTRIC MINING Co.

185 SUMMER ST., - BOSTON, MASS.

A Dividend Payer for the Past Five Years.

12 PER CENT GUARANTEED

Capital Stock, $500,000. Par, $1.00, full paid and non-assessable

Over eight thousand tons of $50.00 ore mined and smelted from this group of mines.

A limited number of shares of the stock of this Company now offered at seventy-five cents per share. This price will shortly be increased to par. Stock registered by the International Trust Company, Boston, who is also the transfer agent.

This Company has a small capital stock.

The International Electric Mining Company owns seven mines and milling plant.

The Brooklyn and New York mines of this Company lie north of and join the Victor and the Hoodlum—two rich mines that are now being worked by California parties. On the west lies the Electric Mining Company's mines. In these mines are millions of dollars' worth of rich ore in sight. On the south, adjoining the Berlin mine of this Company, is the Montazuma and Clipper. From the Montazuma over three million dollars has been taken within 80 feet of the grass roots.

This Company owns free and clear seven mines of twenty acres each, all containing rich ore, located in the Arabia and Trinity mining districts, Humboldt County, Nevada. The Company has worked these mines for the past five years, and is now driving a tunnel to cut out a rich ledge about 800 feet from the surface. The Arabia mining district, in which these mines are located, is a lively district—a great many men being employed there. The tunnel now being driven on the Brooklyn mine has about 800 feet already completed. When the tunnel cuts the main ledge, which has just been reached by the Victor tunnel about 800 feet, the Brooklyn will have about 800 feet stoping ground, which runs high in gold and silver, over $50.00 per ton.

The Company is offering for a short time a limited amount of stock for the enlargement of its plant and the working force at the mines and for the completion of the Brooklyn tunnel.

This Company has thousands of tons of rich ore in sight.

We are not making a lot of talk, because it is unnecessary. What the investor wants is dividends, which we have paid for the past five years. Now if you want a safe 12 per cent. investment, let us hear from you.

INTERNATIONAL ELECTRIC MINING Co.,
185 Summer Street, Boston, Mass.

References furnished upon application.

THE OLD COMSTOCK

A California mining paper has this to say: "Nevada, that grand old stamping ground of mushroom millionaires, who plucked enough wealth from her prolific fields to build mansions, banks and big hotels in San Francisco, and palaces in Paris and London, is again astonishing the world by making more millionaires and by yielding millions in gold and silver from a new field which rivals the old Comstock lode in the days of its pristine splendor. Not only in Tonopah and Arabia districts, where within the past year nearly ten millions have been exposed, are operations active, but in every mining district in the Silver State are operations active, and Nevada will once more take her place among the big producers, the peer of any of them."

Daily Nevada State Journal, January 4, 1903.

Lovelock, Nev., October 6, 1902.

International Electric Mining Co.,
Boston, Mass.

Gentlemen,—If you wish to sell your Brooklyn mine I can get you a good price for it. If it was mine I would not sell it at any price, as you have more than a million dollars of ore in sight.

G. W. OSTRANDER, Supt.

Boston, Mass., December 1, 1902.

Mr. Geo. D. Burton, Treas.,
International Electric Mining Co.,
Boston, Mass.

Dear Sir,—During the six months of October and November of this year I visited the mines of the International Electric Mining Company, situated in Arabia and Trinity mining districts, Humboldt County, Nevada. I found the country remarkably mineralized; in fact, the possibilities of the country as a mineral producing country are yet unknown. For years it certainly has produced well. The work now being done in the Arabia and Trinity districts establishes the fact that they are fine producers.

I also found that there is a great deal of interest being taken in these properties, which have produced a great deal of wealth the past quarter of a century.

M. A. LATHROP, Mining Engineer.

Letters Received From Some of Our Stockholders

Respectfully,
J. W. MARSDEN.

1124 11th St., N. W., Washington, D. C.
January 11, 1903.

International Electric Mining Co.,
Boston, Mass.

Gentlemen,—I received the tenth semi-annual dividend on my shares of stock in your Company and thank you very much.

Yours truly,
MILLIE C. WOOD.

The Company is conducted upon an economical and conservative basis and incorporated with a small capital stock, more than half of which is now in the Treasury of the Company, and with assets in excess of the entire capital of the Company.

GILPIN COUNTY

IS THE OLDEST GOLD PRODUCER IN COLORADO

—In 1902 she produced $4,000,000.00.—
Here is where Hundreds have been made Millionairs.

THE ELECTRIC SPARK GOLD MINING COMPANY

Is in this famous little kingdom, and is surrounded by mines that are making their owners wealthy.

CAPITAL STOCK $100,000 Par Value $1.00

We are working this mine every day doing a great amount of development work which will enable us to commence regular shipping very soon. Our shaft is now 175 feet deep, with a streak of pay ore starting at the grass roots, the vein is over 3 feet wide at the bottom of shaft, and runs from [illegible] to [illegible] per ton, mostly gold. We are only three-quarters of a mile from railroad and have a well traveled wagon road from mine to depot. There are thirteen stamp mills at Black Hawk, three-quarters of a mile from this property. Our company is managed on conservative lines by practical mining men who understand the business and are familiar with this field of gold.

We have placed a small block of this stock on the market at 20 cents per share which will be worth $1.00 in a short time. Now is the time to buy.

Mining Securities Company
805 Temple Court, New York

BUY! WHY?

BECAUSE

THE SOUR LAKE OIL CO.

Has placed four-fifths of its stock in the treasury for development work; and because

Oil is reached in less than half the depth required on Spindletop Heights in Beaumont;

The people in Canada are well acquainted with the management, which is in the hands of HON. JOHN L. BITTINGER, United States Consul General to Canada; F. S. Ashley, Vice-President of the Massachusetts Securities Co., and W. L. Marston, Vice-President of the American Union Oil and Refining Co.

These gentlemen have made a dividend payer out of one company and have raised the value of its stock from 5c per share to par value, or 25c, within a very short time;

The company is operating in the Sour Lake field, where fewer wells will tap the oil than at Spindletop; this insures a greater flow of oil, and it is of a better quality;

This is the first allotment of shares at the present price of TEN CENTS PER SHARE; it is the lowest price at which you can buy, and the time left in which to buy at TEN CENTS is short.

Make remittances and inquiries direct to

Colonial Securities Company,
62 Wall Street, New York City.

Order now at ten cents and make monthly payments.

TOWN AND COUNTY NEWS

DASHES HERE AND THERE BY TIMES' REPORTERS

School Books

Times Bookstore for the best value in school books. Six good large dictation books for 25 cents. A prize with every purchase of 25 cents or over.

Police Court

At the police court yesterday two men were charged with being drunk and disorderly on Friday night. Fines of $2 and costs, amounting to $4.60, were inflicted.

Ontario Bank at Trenton

A branch of the Ontario Bank has been opened in Trenton, under the management of Mr. B. H. Siddall, formerly accountant at Lindsay.

Ladies' Auxiliary Conference

The Ladies' Auxiliary sessions are to be held in the Association building tomorrow and Friday. An interesting programme will be presented at each session and the ladies of the town are specially invited.

A Broken Press

Owing to an accident to our large newspaper press The Times has been late for a couple of days. It is usually issued about four o'clock each morning. Yesterday it was nine o'clock before the entire edition was printed.

The Central Exhibition

The public are again reminded of the meeting to be held this afternoon of those interested in the reorganization of the Central Exhibition Association. Business men especially are requested to attend.

Convention Banquet

In the Association Hall on Friday evening there will be a banquet tendered to the delegates of the Y.M.C.A. Convention. Friends wishing to contribute to the provisions of the same are asked to send in on that day meats, salads, cake, etc.

Board of Trade Meeting

The Board of Trade meet in the Council Chamber to-morrow evening at 8 o'clock. There is considerable business of importance to be discussed, notably the Trent Valley Canal and Beet Sugar Industries. A large attendance of the members is requested.

New Peat Plant

At the annual meeting of the Dominion Peat Products, Limited, held last week, a report of the erection of the Peat Plant at Kensington was given, the first in this country of the "Econo-Jo Process." It is ready for operation as soon as the frost goes.

Valuable Advice to Mothers

If your child comes in from play coughing or showing evidences of an approaching attack of Grippe, Sore Throat, or sickness of any kind, first thing get out your bottle of Nerviline. Rub the chest and neck with Nerviline, and give internal doses of ten drops of Nerviline in sweetened water every two hours. This will prevent any serious trouble. No liniment or pain reliever equals Polson's Nerviline, which is a necessity in every household. Large bottles cost only 25c.

Safety of Bank Notes

The supposition that the notes of chartered banks which fail are not worth face value is not in accordance with the fact. Time was when holders of the notes of Canadian chartered banks lost money when the bank failed. But that is no longer possible. Under a new law each chartered bank in Canada deposits with the government an amount in cash equal to 5 per cent of its note circulation, and this money all goes into one general fund from which the government pays, not only the face value of all notes of the failed bank, but 6 per cent. interest from the time that payment is suspended by the bank. In this way every Canadian bank becomes responsible for the note circulation of every other bank, and the note holder is made perfectly safe.

ROBBED IN DAYLIGHT.

TWO MEN HELD UP ON A PUBLIC HIGHWAY

One Assaulted and Claims to Have Been Robbed—Frank Murphy Arrested and Charged with the Crime

It is alleged by a man named Willot Harris, that while he and a companion were returning from No. 6 Dam on Monday, where he was employed, he was overtaken by a man named Frank Murphy, who assaulted him, and afterwards robbed him of $2 in money.

Murphy, the alleged assailant, is a married man, residing on Smith street, and came with his family to Peterborough from Whitby a few years ago.

The accused has been arrested, and will be brought before the magistrate at the City Police Court this morning.

THE M'LENNAN PAINT.

Branch of the Company to be Started in Canada

Attention is called to the prospectus of the above company to be found in this issue of the Times.

The name and fame of the McLennan Paint Company is known throughout the United States, as well as in foreign countries, and their management is evidenced by the large business they have built up.

The company propose to establish a branch of the concern in Canada, to be controlled and managed by the parent company, and offer at par 50,000 7 per cent preferred treasury stock shares, $100 each. The banking testimonials of the concern are of the best, and their growth in the past has been phenomenal. The stock they offer appears to be a safe investment, and we confidently draw the attention of our readers to the aforementioned prospectus.

The Critical Time of Life

Is between the years of fifty-seven and sixty-two. Nature's power slows down, vitality becomes less, and the process of decay sets in. A means of extending old age and renewing decreasing vigor is to take Ferrozone after meals. Ferrozone keeps up the appetite, aids in the formation of red, vitalizing blood, imparts clearness to the tiring brain, force energy and spirits just when they are needed most. To take Ferrozone regularly means adding from ten to twenty years of life. Large boxes 50c., or 6 boxes for $2.50, at Druggists, or Polson & Co., Kingston, Ont.

Dr. Hamilton's Pills are Certain.

LITTLE LOCAL LINES

—Fenelon Falls' colors were evident on the streets yesterday.

—"A teacher's convention will be held in St. Luke's this evening. Several interesting papers will be read.

—The Y.M.C.A. building will be convention headquarters during the convention and the Oriental will serve as hotel headquarters.

—The Young Men's Guild of St. Andrew's met last evening. An interesting programme was gone through.

—Mr. R. H. Bradburn, manager of the opera house, has been unable to book an engagement for the Boston Ladies' Symphony Orchestra.

—The prayer meeting announced at St. Paul's mission for this evening has been withdrawn. The people are invited to attend the union prayer service in Murray street church.

—The day sessions of the Y.M.C.A. convention will be held in the Murray street Baptist church as follows: Thursday, 2 o'clock; Friday 9 a.m. and 2 p.m. Saturday, 9 a.m. and 2 p.m. Evening sessions in St. Paul's Church at 7.30.

The fact that the Orillia Board of Trade is announcing to the world the fact that the town of Orillia is selling "electric energy at $16 a horse-power per annum, 24 hours to the day," ought to stir up somebody or something.

—Mrs. W. J. Morrow's chorus class of last year, and other lady sight singers, who are accustomed to sight reading, are requested to meet at Mrs. Morrow's studio this evening for the first practice. The musical instruction will be valuable to all.

—By a judgment of the Court of Appeal the Ontario Bank won its action against James Poole, who consequently must pay a promissory note given by him to the bank for $1,500. Mr. Poole was one of the shareholders of the Consolidated Pulp and Paper Company of Toronto, which assigned some time ago. A number of the shareholders, among them Mr. Poole, gave a series of thirteen notes, each for $1,500. The bank made a test case of this one.

C. P. R. Pensions

With the first of the new year the C. P. R. pension fund went into effect, whereby all employees of the road who have been twenty years with the company and reached the age of 65 years, receive the benefit of their faithful services in the shape of a yearly superannuation allowance.

SOCIAL AND PERSONAL

—Ald. J. C. Wells, who has been visiting relatives in Peterborough, for the past few days, left yesterday for home.

—Mr. R. J. Moore, of the Gazette, Fenelon Falls, was in town yesterday and last night with the hockey team from that village.

At the Opera

Still they come! Each performance of the Marks Bros' combination appears to advertise another, for record audiences assemble each evening, no matter what counter-attractions there may be. "Hulda the Mountain Queen," which was the attraction last evening, is a drama of Western life, and, as the atmosphere would suggest, is full of stirring episodes. Miss May A. Bell Marks appeared on this occasion as Hulda, the Mountain Girl. The part does not afford her opportunities her talents deserve, but it is needless to add, she made the most of it. Will Stewart was at home as Jack Truesdale, while Will C. Millard caused much amusement in the part of Herman Sweitzer. J. C. Connolly suffered most from lack of material, but, like the good artist he is, took full advantage of every opportunity. Several meritorious specialty acts were introduced, which kept the audience in excellent humor. The company considerably enhanced their reputation this present visit, and we consider an extension would be profitable.

Georgie ate a watermelon
Which had grown beside the gorge
With ten seeds in his appendix
George's parents planted George.

Mainly About People.

In a case being tried before the United States Court at Topeka, one lawyer said to another, "You are a liar." "Do you mean that personally?" passionately demanded the other.

Among the reminiscences of the class of '93 at Yale is the story of a stout and healthy-looking member, who was told by his tutor that "he was better fed than taught." "You teach me; I feed myself," was the retort.

An Irishman was walking with a friend past a jewelry shop. The window was filled with precious stones. "Wouldn't you like to have your pick?" asked Larry. "Not me pick," said Mike, "but me shovel."

A rag peddler called several times at a Wichita (Kan.) house and found the people away from home. At last he wrote and pinned this note on the door: "Madam: Kindly remain at home tomorrow forenoon. I want to sell you a rug."

A witness called in a case in the King's Bench, says the London "Daily Mail," was asked his name. "John Aubion," was the prompt reply. "Do you spell your name with or without an 'h'?" asked counsel. "With—J-o-h-n," was the unabashed reply.

FENELON FALLS WIN OUT.

Defeat the "Cubs" in a Closely Contested Game Last Night

The Fenelon Falls hockey team of T.V. League played their return match with the Peterborough "Cubs" last night on the Brock street rink, and at the expiration of time, the score stood 6—5 in favor of the visitors. The Fenelon Falls aggregation are speedy skaters and good stick handlers, and a gentlemanly lot of players. They are winners of the northern district of the T.V.L. and will likely compete against the T.A.S., who are likely winners of this district.

The Peterborough Juniors and Port Hope game last night resulted in a tie 5—5.

They Father Consumption

Bad coughs, colds and catarrh are responsible for more consumption than is traceable even to heredity. Catarrhozone cures more quickly than ordinary remedies because it is the only antiseptic yet discovered that is volatile enough to reach the rest of the trouble in remote parts of the lungs and bronchial tubes, and impregnate every particle of the air breathed with its healing, germ-killing vapor. Colds can't last ten minutes, or coughs more than thirty minutes when Catarrhozone is inhaled. It clears nose, throat, air passages at once, stops dropping, headache, and eradicates catarrh from any part of the system. Two months' treatment, $1.00; trial size 25c. Druggists, or N. C. Polson & Co., Kingston, Ont.

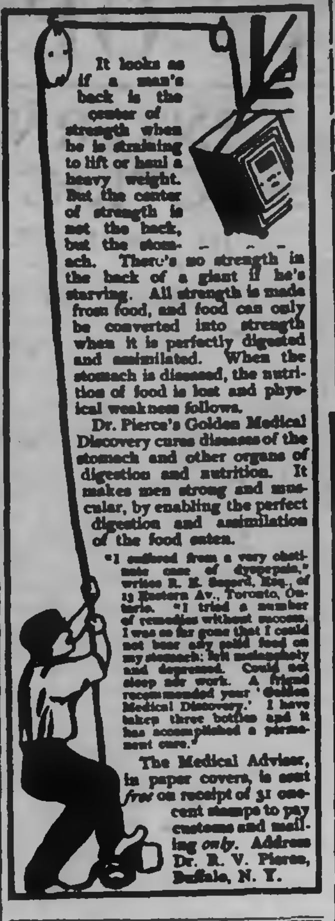
A Considerate Man

A neighboring country editor, who evidently has troubles of his own, is having heart-to-heart talks with his delinquent subscribers. The following is one of the latest: "Good morning! Have you paid your subscription this year? Perhaps you owe for last year, or several years. Now, you understand we don't need money; we have millions—to get. But it is really an imposition and we abundantly able to bear the to let people go on carrying our money around when we are strong and healthy burden ourselves. For this reason we ask anybody who has any of our money in his possession to leave it at the office or send it by mail, freight, express, or any other way. Just so it gets here. Silver and gold are heavy, and it would be a matter of life-long regret if anybody should get bow-legged carrying it around for us."



It looks as if a man's back is the center of strength when he is straining to lift or haul a heavy weight. But the center of strength is not the back, but the stomach. There's no strength in the back of a giant if he's starving. All strength is made from food, and food can only be converted into strength when it is perfectly digested and assimilated. When the stomach is diseased, the nutrition of food is lost and physical weakness follows.

Dr. Pierce's Golden Medical Discovery cures diseases of the stomach and other organs of digestion and nutrition. It makes men strong and muscular, by enabling the perfect digestion and assimilation of the food eaten.

"I suffered from a very obstinate case of dyspepsia," writes R. E. Secord, Esq., of 13 Eastern Av., Toronto, Ontario. "I tried a number of remedies without success. I was so far gone that I could not bear any solid food on my stomach; felt melancholy and depressed. Could not sleep nor work. A friend recommended your 'Golden Medical Discovery.' I have taken three bottles and it has accomplished a permanent cure."

The Medical Adviser, in paper covers, is sent *free* on receipt of 31 one-cent stamps to pay customs and mailing *only*. Address Dr. R. V. Pierce, Buffalo, N. Y.

PRICE TWO CENTS

THE TRENT VALLEY CANAL

What Peterborough Should Do to Have the Work Quickly Completed

ANOTHER MONSTER DEPUTATION NECESSARY

The Times is of the Opinion That Any Other Method is Useless—Must Show Government We Are in Earnest

Once more action is to be taken to secure the early completion of the Trent Valley Canal, this time by the Trent Valley Waterway Association, with which object in view communications have been addressed by Mr. S. R. Armstrong, Secretary of the Association, to the municipal councils along the route of the canal, urging that a memorial, prepared by the Association, be taken into their consideration, and that the same should be passed, and forwarded, signed by the head of the Council and the Clerk, to the Hon. A. G. Blair, Minister of Railways and Canals, Ottawa.

The Association promise it will do all it can to back up the resolutions of the Councils, and requests also, that one or more members be appointed to represent each Council on the Association in the event of a general meeting being required.

THE MEMORIAL.

The memorial reads as follows:

To the Honorable the Minister of Railways and Canals:

The Memorial of the Council of the .... respectfully sheweth:

1. The extraordinary development of the trade and commerce of Western Ontario, Manitoba and the North West Territories, the immediate prospects of the speedy settlement of our vast unsettled, but fertile lands, and the demonstrated inability of the railways to carry the produce of the west to the seaboard, emphasize the conviction that it is an obligatory duty to enlarge the facilities for giving free outlet to the products of the labors of the settlers who are being invited and urged to settle our western heritage.

2. The construction of railways north of the Great Lakes as compared with the cheaper natural route by water is not only extravagantly expensive, but very limited as to capacity; and the fact that the railway companies take from vessels at Parry Harbor, Midland, Owen Sound, Collingwood and other ports the larger portion of the western grain is demonstration of the capacity and economy of the water route, and your memorialists submit that the time has come when this water route be extended by the construction of the Trent Canal, which will give direct communication between Port Arthur and Montreal, thus shortening the distance between Port Arthur and Liverpool by 727 miles as compared with the route by the Erie Canal, and by 245 miles as compared with route by the Welland Canal.

3. The barge capacity of the Trent Canal is twice as great as on the Erie, and, by reason of the great stretches of lake and river, and the rocky shores of the canal portion, the capacity of the Trent is infinitely greater than that of the Erie, even after the expenditure of the twenty millions of dollars now being spent on it.

4. Besides providing a new, cheap and safe route for through trade, by which grain may reach Montreal and return goods by the empty ships may reach Port Arthur, this water way will accomodate the domestic trade of a population greater than that of several of the provinces of the Dominion, and will add 4 to 6 cents per bushel to the value of home grown grain. The local waters on the route have a shore mileage of over 1,000 miles, all of which will supply trade to this water way.

5. Your memorialists are reminded that only 32 miles out of the 200 remain to be completed and that the whole is of little value until the outlets to the lakes are opened.

Your memorialists submit that as against the Erie Canal the Trent route offers infinite advantage at a cost which is comparatively trifling, and that it is desirable that our own country should get the benefit of carrying our own produce.

Your memorialists therefor pray:

That steps be taken to put the remaining incompleted sections under contract that all may be constructed simultaneously, and that with the least possible delay.

And your memorialists will ever pray.

Signed on behalf of..............................

So far, so good. But The Times must pause to ask: What then? There is no doubt in our minds that the executive of the Trent Valley Waterway Association are sincere, and even enthusiastic in the steps they are taking in this important national work, and that as they say they will do all in their power to "back up" the resolutions adopted by the municipal councils, but we have only to look back over a few pages of modern history to conclude that the means suggested are totally inadequate in this present connection. In view of the importance of this great undertaking, which means so much to the commercial advantages of our district, and the country as a whole, we feel that the action to be taken must be one of more sturdy aggression. Well addressed memorials and prayers to the powers that be are no doubt well in their season, but we think it has been clearly demonstrated on more than one occasion that such a season has long passed, and that nothing short of a general demand for recognition will awaken the Government to the fact that the people no longer intend to remain a cypher in a matter of such vital importance to the prosperity of the country.

A strong, united effort must be made to impress the Government that the incompleted sections of this great work be immediately put under contract. It is no longer a question of judicious appropriation; for the cost is comparatively trifling with its infinite advantages and facilities for giving free outlet to the products of the country.

But whatever the reason why successive Government's shirk the responsibility of action to complete the work, it cannot be of so great but that the barrier can be removed. The time for action is evidently close at hand, and Peterborough, as the premier town upon the route of the canal, must be prepared to shoulder a large share of the responsibilities. What, The Times would ask, is to be the action of our town in this all-important matter? Are we to remain in a condition of parasitism, or shall we accept this opportunity of declaring our recognition of our premier position, and appendage ourselves to the Association only upon the conditions that a decidedly more aggressive action be taken.

The Times would suggest that the modus operandi which proved so successful some years ago again be put into operation. At that time the railroad companies were induced to run cheap excursions into Ottawa, and as a result of the efforts of several influential citizens of Peterborough, the townspeople in large numbers availed themselves of the trip to the capital, with the result that a monster deputation, headed by the best speakers in the town, took possession of the House of Commons and laid their claims before the Government. To that effort we owe the work on the Peterborough and Lakefield sections, and we have no doubt a similar plan of action would be followed by similar success. Indeed no other scheme that has been suggested appeals to us as being in any way feasible; and we consider the end will justify the means. It was to some extent due to the efforts of The Times that the former drastic measures were adopted, and any move of a similar nature in this present connection will receive our hearty co-operation. We look upon any action that Peterborough may take, not only as a privilege but a duty. In this commercial age "the survival of the fittest" is a potent factor in determining the position a country must occupy in the industrial world, and the completion of the Canal means a great deal to the commercial status of the Dominion. In view of the action of the Trent Valley Waterworks Association, it will be recognized that this is the time for immediate action. If the people of Peterborough desire to prove their loyalty to the country, and at the same time demonstrate their ability to act without absorbing nutrition from others, now is the opportunity to form an invincible combination that will move the Government to realize that this great national work must be accomplished.

GETS DEADMAN'S ISLAND

Theodore Ludgate Secures Possession After a Long Legal Fight

Vancouver, B. C., Feb. 4—Theodore Ludgate secured a lease of Deadman's Island from the Dominion Government for sawmill purposes.

The island is in Vancouver harbor.

The provincial legislature and the city of Vancouver claimed the ownership of the island and withheld possession.

After fighting for two years in the courts, the province has given in to Ludgate, and the city is making a compromise.

DAY IN KRUGER'S LIFE

Oom Paul Takes His Sleep on the Instalment Plan

Paris, Feb. 4.—A well-known deputy has received the following quaint letter, dated Mentone, from President Kruger's housekeeper;

"President rises at 5 a.m.; no breakfast—never. Reads a Bible until eight o'clock, and again goes to sleep until half-past 10. At 10.30 smokes his pipe for six minutes. Then people come to see him. At 12 sharp breakfast; lasts 20 minutes. Drinks nothing but milk. Goes for a drive between 1.30 and 2.30. Sleeps until half-past four. Receives Boers and reads Bible. Dinner at 6 sharp, about 20 minutes. His prayer before and after dinner is full of piety. The president goes to bed at 8.30 and is woke up at 11, when he takes a cup of coffee, and again goes to sleep until 1. At 1 he eats some fruit. The doctor doesn't want him to have continuous sleep."

GRAND ORANGE LODGE

WILL ASSEMBLE AT PETERBORO' 3RD WEDNESDAY IN MARCH.

Second Occasion the Grand Lodge Has Met Here—A Large Number of Delegates Expected.

There was a large turnout of members of the County Orange Lodge, at the annual meeting held on Tuesday night, and a large amount of business was transacted. It was decided to celebrate the 12th at Lakefield, and a committee was formed to receive the members of the Grand Lodge of East Ontario, which meets here in March. The following officers were elected: J. B. McWilliams, county master; S. Hawson, deputy master; Col. W. G. Miller, financial secretary; W. H. G. Armstrong, recording secretary; Jos. Batten, treasurer; Maxwell E. Weir, lecturer; W. Northcott, D of C. and D. H. Chamberlain deputy lecturer.

The master was installed by P. C. M. J. H. McWilliams, and he installed the remaining officers.

After the installation of officers, Mr. J. B. McWilliams, county master, on behalf of the County Lodge, presented Bro. Sidney B. Weir, the retiring secretary, with the following address, and a certificate of honorary membership in the County Lodge:

Sidney Weir, Esq.,
Secretary West Peterborough
County L. O. L.:

Dear Sir,—On this occasion of your leaving our country, we, the officers and members of the West Peterborough Loyal Orange Lodge desire to express our regret at your departure and our high appreciation of your services to the Order in this County. As master of L.O.L. No 49, as District master and as secretary of the County Lodge you have rendered most faithful and efficient service for many years, and we feel keenly the loss which our lodge sustains in your removal. We take this opportunity of expressing both our regret and our heartiest wishes for your prosperity in all things in your future home, and the confidence that you will there also render excellent service and win honor and advancement in the cause of our beloved order.

We have much pleasure in now presenting you with a Certificate of Honorary Life Membership in this County Lodge which the Lodge has by unanimous vote been pleased to confer upon you.

Signed on behalf of the County Lodge of West Peterborough

J. B. McWILLIAMS,
County Master.
W. H. G. ARMSTRONG,
County Secretary.

It was the unanimous request of the members of the Lodge that Bro. J. B. McWilliams consent to accept the position of County Master this year. It was just 32 years ago since he was first elected County Master, and since then he has filled the position more than half the time, and felt that he had had his share of the honor from the County. It is seldom or ever that any man can hold the respect and esteem of any society for so many years, and it must have been gratifying to Bro. McWilliams, after such a long service, to be elected to the position without one dissenting vote.

THE BOARD OF HEALTH

Dr. Bryce, of Toronto, in Town, and Attends Meeting

The Board of Health met yesterday afternoon in the Town Council Chamber. The following members were present—Messrs. R. Neill, chairman, Mayor Roger, A. Parker, and W. Eyres.

Dr. Bryce, the Secretary of the Provincial Board of Health, was present and gave information as to methods of checking infectious diseases — by quarantine and disinfection, and by the learning of cases through householders, physicians and schools. He recommended having all absentees from school reported and looked up, and to have a town physician visit schools every morning.

The Secretary was instructed to have forms printed on which physicians may report to Board of Health and to the Medical Health Officer.

The Board adjourned until Friday at 4 o'clock.

SIR CHARLES TUPPER CONDEMNS THE TREATY

He Has No Faith in the New Alaskan Boundary Commission

THE INSULT WHICH WAS OFFERED TO CANADA

The Venerable Statesman Interviewed in Winnipeg by a Reporter—Sir Hibbert Tupper Also Speaks

Winnipeg, Feb. 4.—According to the opinion of Sir Charles Tupper, expressed to a reporter of The Times, who waited on him at Ravenscourt, the residence of J. Stewart Tupper, at Armstrong's Point, yesterday, the treaty providing for the submission on the lines published of the Alaskan boundary dispute between Great Britain and Canada on the one side and the United States on the other to a commission composed of three representatives from each side, is distinctly against Canada's interests and gives the Dominion no chance of obtaining a favorable decision. This opinion is borne out by the comments of the Canadian press generally on the subject.

The veteran baronet said, in discussing the treaty:

"It will be remembered that, when Lord Herschell and the other British plenipotentiaries proposed that the difference of opinion between England and the United States as to the true construction of the British-Russian treaty of 1825 should be settled in the manner uniformly adopted by civilized nations—a reference to an international tribunal of experts—and that they were willing that the terms of reference should be the same as those dictated by the United States in the Venezuelan arbitration, their proposal was rejected, and the insulting proposition made that the tribunal should consist of three on each side without any provision for an umpire in case of a disagreement, and that, even if it was found that Skagway and other points were in British territory, they should belong to the United States. The negotiations were promptly broken off.

"It is now confidently stated by the Washington press that the present treaty contains the same provisions as those which were indignantly rejected by Great Britain and Canada. I cannot for a moment believe this to be possible, yet it seems strange that with this treaty now in possession of the United States Senate the people of Canada, so deeply interested, should have no authentic information on the subject.

"It seems to be admitted, however, that arbitrators shall consist of three on each side, and I cannot see how Canada, after the experience we have had in previous affairs of this kind, can hope to secure any decision in favor of her just claim from a tribunal so constituted."

SIR HIBERT TUPPER ALSO SPEAKS

Vancouver, B.C., Feb. 4.—Sir Hibbert Tupper said to a correspondent this evening, in speaking of the proposed Alaskan boundary commission, "I believe the commission will be appointed to settle the question once for all.

"I believe that, as usual, Canada is to be cuchered out of her rights by the Americans. There are to be three commissioners on each side and at least on the side of Great Britain, there will be one Englishman, and perhaps two. In the light of past experience, bearing in mind three similar arbitrations, the American commissioners will not budge an inch from their ground, no matter what happens. On the other hand, where Canada is concerned, British jurists are apt to lean towards the American side on the grounds of impartiality, justice and the merits of the case. Thus it is possible that the English jurists will favor the American commission and give them victory.

"In the event of the commission resulting in a tie, each side holding its own, then, according to legal procedure, the Americans win as the case falls to the ground and the United States will say; We are in possession of the disputed territory, as you have not proved your case. We will hang on to what we have.

"I believe that England would never fight the United States for one inch of Canadian territory. The United States knows this, and knows what she is doing when she agrees to a commission, on three on each side for which ever way it goes, the United States will win."

ENGLAND IS ANXIOUS NOT TO BE MISJUDGED BY THE UNITED STATES

The Future of Peterborough.

In view of the fact that water-power is the generative power of this age of electricity and industrialism it behooves Peterborough to see to it that all water powers tributary to this town and controllable by it, shall be secured by it without delay. The size of the future city of Peterborough will be directly proportionate to the electric power at its disposal for manufacturing purposes. Every effort should be made to get hold of the Burleigh power which, since the transference of electric power has become a cheap and easy matter, will be worth a mint of money to us in the near future. Which of our councillors has the interests of the town most at heart?

The people are looking for him at this juncture. Mere speculators, who are looking for the return of a usurious interest, on their investment, must not be allowed to stand in the way of the town's development. The day for that sort of thing has gone by.

CANADIANS IN PARIS

Over Twenty-Five Unite to Form a Chamber of Commerce

Ottawa, Feb. 5— The Canadian agent in Paris writes the Department of Trade and Commerce that a meeting was held recently in Paris to form a Canadian Chamber of Commerce. Over twenty-five Canadians were present. A sub-committee was appointed to perfect the organization.

POPE IS BOUND BY LAW

Otherwise He Would Be Glad to Canonize Joan of Arc

London, Feb. 5—The Times' Paris correspondent says the French bishops have asked the Pope to beatify Joan of Arc, "in whom was incarnated soul of Fatherland, who passed across our history as a radiant apparition of Christ's life for the Franks." The Pope says, in reply, that it would be great satisfaction to him to accord the favor asked, but the laws governing the procedure of the congregation of rights must be observed.

HIS BACK BROKEN

Deseronto Man Named Blanchford Struck by a Freight Train

Deseronto, Ont., Feb. 4.—About 6.30 last night a man named Blanchford, about 68 years of age, was struck by a G.T.R. engine at Deseronto Junction and had his back broken and head badly cut. He was walking on the track at the west end of the yard, and in getting off one track to save himself from an approaching train, he got in front of a freight train moving slowly in the opposite direction. He was sent to the Kingston General Hospital this morning.

RELICS OF PAARDEBERG

Chamberlain Views the Scene of the Great Battle

London, Feb. 3—The Times has a despatch from Paardeberg saying that Mr. Chamberlain arrived in that South African city on Saturday and spent two nights in an encampment pitched near the scene of Cronje's surrender. Very few landmarks of the battlefield have been effaced. Some of the trenches are becoming filled, but the debris, such as burned wagons and bleached bones of animals, still bear witness to the long resistance of the Boers. Two more Boer rifles were discovered in the river bed, and bullets and cartridge cases and shells abound.

BOXERS AND MISSIONARIES

Threatening Attitude in China Causes Change of Plans

Toronto, Ont., Feb. 5—Serious news was received yesterday from China, at the Methodist Mission Rooms. Rev. Dr. Service writes from Wu Hu that "well-disciplined army of Boxers is in the field in the province of Kang Su, and that it is reported that five Imperial regiments have joined the Boxers. In consequence of these reports a party of Christian Alliance Missionaries proceeding to Kansu has been stopped by the direction of their superintendent, at Wu Hu for the winter."

So far the disturbances have not reached the territory occupied by the Canadian Methodist missionaries.

WM. REDMOND FREE

The Irish Member Has Served Only Half His Term

Dublin, Feb. 5—William Redmond, M. P., who was sentenced last year to six months' imprisonment because he refused to give bail in $1,000 for his future good behavior, as the result of an alleged incendiary speech at Wexford, and who was arrested at Kingstown and taken to Kilmainham Jail on November 4, was released this morning, although he had only served half his term. In an interview Redmond said:

"I do not know why I am released, but I certainly do not thank the Government, who have kept me in jail for three months for really nothing."

Mr. Redmond added that he stood by every word of the speech, for making which he was imprisoned, and said there will be no real peace in Ireland until Dublin Castle shall have been cleared out from top to bottom.

The Sugar Convention.

The Brussels sugar convention has now been ratified by Germany, Holland, Austria and Italy. These countries all hold that England is compelled to impose countervailing duties on bounty-fed sugar from the self-governing colonies. Russia has notified the English, and also the above Governments, that enforcement of the convention means the abrogation of the favored nation clause in her international treaties. The question is coming up in Parliament. The session commences on the 17th inst. This is considered an anti-colonial policy, and bound here to [illegible] outcry from all parties.

TEACHERS CONVENTION

A Successful Gathering at St. Luke's Last Evening

A Teachers' Convention of the St. John's, All Saint's and St. Luke's Sunday schools, was held last evening in St. Luke's schoolroom. Despite the inclement weather there was a large gathering. The convention was called for the purpose of discussing methods of precepts to the young. The Rev. E. A. Langfeldt, in opening the proceedings, welcomed the teachers to St. Luke's, and in a few appropriate remarks referred to the object of the convention. The teaching in our Sunday schools was, perhaps, one of the most important branches of church work, and he thought the present gathering would be productive of many useful suggestions to those who taught in the schools. The programme consisted of a paper by Miss Davidson, on "Primary Work in Sunday Schools"; a demonstration of Bible teaching by Mrs. Ward; an address "Bond of Churchmanship," by Mr. Myles; and an address by Mr. Armitage on "Discipline in the Sunday School." Many useful and practical suggestions were set forth by the respective teachers, and the gathering may be voted an unqualified success.

Believes That Hitherto Americans Have Cherished no Suspicions of Our Motives

HER CONSCIENCE AT ANY RATE IS CLEAR

Hopes Sudden Wave of Doubt will Disappear as Quickly as It Arose

London, Feb. 4—The Times, in an editorial today, says: "If the report that Minister Bowen will pay an amount which the allies are willing to accept as preliminary to a reference of the question of the preferential treatment to The Hague tribunal be correct, it is hard to see what further difficulties can arise to defer the consummation we so earnestly desire. The relief which will be experienced throughout Great Britain should President Castro have decided to adopt a course which will free us from the obligation of continuing methods of compulsion, will be heartfelt and profound. "We are confident that this sentiment will be reciprocated no less earnestly, or less generally among the people of the United States. The language constantly employed by British statesmen, and the scrupulous care wherewith we have limited our share of the blockade, ought to convince them of our moderation, and the loyalty of our purpose in seeking to assert elementary international rights, which no self-respecting people could afford to abdicate or waive. We believe that hitherto Americans have cherished no suspicion of our motives. We trust that the sudden wave of doubt which appears momentarily to have affected some of the leading organs of American opinion will subside as quickly as it has arisen. Our conscience, at any rate, is clear."

THE BALKAN REVOLT IS SURE TO COME

It will Come, Despite a Plan of Reform—Every Legitimate to Frustrate the Activity of the Revolutionary Committee

London, Feb. 4 — The Times' Vienna correspondent says that one consequence of the delay in completing the publication of the Austro-Russian scheme for reforms in Macedonia is the growth of skepticism regarding the efficiency of any reforms. Where optimism prevailed a month ago, doubt is now general, and, in fact, outside of the Foreign Office, it is difficult to find any confidence in the value of diplomatic action, and the introduction of reforms.

The continual delay in the production of the Austro-Russian scheme of reforms in Macedonia is causing considerable uneasiness in Bulgaria, says the correspondent of The Times at Sofia. Although the publication of a plan would probably now be too late to forestall a probable insurrectionary movement, he adds, it would probably strengthen the Bulgarian Government in its resistance to popular pressure. The last Government Council decided to employ every legitimate means to frustrate the activity of the Macedonian Revolutionary Committee, which is energetically collecting subscriptions all over the country to aid their

A NEW FEELING OF THE BRITISH EMPIRE

Ministers Refer to Unity and Defence—Hall Caine on Canada—Our Securities Higher

Almost a daily feature of the Stock Exchange is the steady upward tendency in Canadian Pacific, Hudsons and Grand Trunks. The Grand Trunks show an improvement because there is a growing feeling of an early absorption at par of some trans-Canadian syndicate subsidized by the Government.

The Food Company.

The Imperial Food Supplies, Limited have gone to allotment. The Canadian Pacific have consented to Mr. Archer Baker, their European manager, going on the board. The manager is Mr. John Hotson, Scotch-Australian, who is now arranging a trip to Canada, with the object of establishing cold storage depots, and enlisting the sympathy of the Dominion and Provincial Governments.

London, Feb. 4—Lord Balfour, of Burleigh, Secretary of State for Scotland, in a speech last night at Edinburgh, said that Scotland was heart and soul in sympathy with the promotion of the unity of the Empire. Imperial defence, he said, was the first consideration. The colonies ought to contribute. Lord Onslow, Under Secretary for the Colonies, at the same meeting contrasted Mr. Goldwin Smith's and Mr. Disraeli's opinion many years ago, that Britain would be better off without the colonies, with the Imperial sentiment of today. The change, he said, was largely due to Mr. Chamberlain.

London, Feb. 4—Nine hundred Boer families are booked from the Transvaal to Texas, where a million acres have been secured. The American Government and some financiers are backing the emigration.

Women Hanged.

Two women were hanged here this morning for baby-farming. This is the first case of a woman being hanged during the present reign, and there is considerable feeling against inflicting the capital penalty upon women.

Marconi in England.

I am assured officially that the Marconi system is all ready to commence business, except for the final arrangement with the English Post Office's telegraph lines. The Post Office authorities [illegible] promised to grant Marconi every assistance and arrangements are now nearing a conclusion. The Marconi officials are delighted with the Canadian support and enterprise extended to the system.

COUNTY ORANGE LODGE

Decided to Celebrate the Glorious 12th at Lakefield

The Grand Orange Lodge of Eastern Ontario, inclusive, will meet in Peterborough the 3rd Wednesday in March. There will be between two and three hundred delegates and the sessions will continue between two and three days.

This is the second occasion on which the Grand Lodge has met here, and their sessions will be open to all members of the Order.

There may possibly be a meeting open to the public, at which the principles of Orangeism will be expounded, but particulars of this will be reported later.

ASSAULT AND ROBBERY

Frank Murphy, the Accused, Committed for Trial

Before Magistrate Dumble at the police court this morning, Frank Murphy, of town, was charged with having assaulted Willet Harris and robbed him of the sum of $2 on Monday evening last. Murphy declined to elect as to trial, but the case proceeded. Willet Harris, the complainant, stated that on Monday afternoon he was one of a party of four who left work on Dam No. 62, who, having drawn their wages at Lakefield, went to a hotel. He was unable to say how many drinks he had, but said the party boarded the evening train for Peterborough. Murphy carried the bottle which was frequently "hit up" on the way. At Auburn, where the men alighted from the train, the alleged assault took place. Murphy, having asserted that he could lick the "hull of 'em" made a savage attack upon the complainant. After much wrangling Murphy invited Harris to "cough up" his money and he did so to the extent of $2. Harris said Murphy threatened to kill him. It was evident all parties concerned were drunk, but the [illegible] did not feel inclined to [illegible] [illegible] [illegible] was committed [illegible]

STRICTURE

I guarantee my Latest Method Treatment to be a permanent and positive cure for Varicocele and Stricture, without cutting, stretching or loss of time. In Varicocele it absorbs the bagging, or wormy condition, equalizes circulation, stops pains in the groins, also all drains, thereby giving the organs their proper nutrition, vitalizes the parts and restores lost powers; in Stricture it absorbs the Stricture tissue, stops smarting sensation, nervousness, weakness, backache, etc., while in all prostatic troubles it is the treatment par excellence. So positive am I that my treatment will cure you, you can

PAY WHEN CURED

You need pay nothing until you are convinced that a thorough and complete cure has been established. This should convince you that I have confidence in my Latest Method Treatment, otherwise I could not make you this proposition. It makes no difference who has failed to cure you, call or write me.

Each Time You Call You See Me Personally,

Or each time you write it receives my personal attention. The number of years I am established in Detroit, and the cures I accomplished after given up by other doctors, has placed me as the foremost specialist of the country. CONSULTATION FREE. Call or write for blank for blank for home treatment. Perfect system of home treatment for those who cannot call. BOOK FREE. All medicines for Canadian patients shipped from Windsor, Ont. All duty and express charges prepaid. Nothing sent C. O. D.

PETERBOROUGH, FEB. 5, 1903.

SCARCITY OF FARM LABOR

The scarcity of farm help in Ontario is resolving itself into an enigma that will require the strenuous efforts of responsible persons to aid in its solution. Mr. Thos. Southworth, the Provincial Director of Colonization, admitted to a press representative that the question was fast becoming serious. It is stated that 10,000 farm hands can be placed immediately in the older portions of Ontario, and so far there appears to be no means of supplying the demand. The great inducements that the North-West offers to men may to a very great extent be responsible for the removal of a vast number of our Ontario boys, whilst the Territories have been so exalted by the Dominion agents in the old lands, that the stream of emigrants arriving in the country would naturally flow in that direction.

The Government officers are ever ready to give all possible assistance in helping supply the need, but farmers themselves must be prepared to do something if they wish to secure a percentage of the right sort of laborers who no doubt will arrive from Great Britain in the spring as a result of the efforts now being made by the agents of the Government in the old country.

A better rate of wages, with more adequate accommodation, especially for married men, is almost a necessary condition to success. A circular has been issued by the Bureau of Colonization at Toronto for the perusal of farmers throughout the province, accompanied by blank form on which they are asked to state their requirements, so as to aid the department in supplying the demand. The situation demands prompt action to prevent a dearth in the coming season.

THE ALASKA BOUNDARY MATTER

Perhaps it would be just as well not to jump to the conclusion that the treaty for a boundary commission sacrifices Canadian rights, says the Ottawa Citizen. A great deal of talk in the American press appears to be pure bluff to mask a distinct retreat from the extreme position formerly assumed by that government on the question. The former contention was that the settlements on the coast, such as Skagway and Dyea, were in the opinion of the United States the property of that country beyond contention, and would not be included in any negotiation. In plain English it was proposed that the United States should hold these places whether they were in his territory or not. It is now proposed to include these in the scope of negotiations "lest it be considered a sign of weakness" or lack of confidence in their case. This is an advantage from the outset. Canada wants nothing but what is hers, but if the coast settlements belong to the Dominion this country wants them. The United States in admitting a wider scope to the arbitration improves the chances of a satisfactory conclusion. There is the usual talk of making capital out of the desire of England for the friendship of the United States but there is just the probability that the really able administration at Washington recognizes the fact that the friendship of Britain has been in the past and may in the future be more valuable to the United States than the friendship of the latter country is to Great Britain. The incidents preceding the Spanish war and the recent aggressiveness of Germany towards the Monroe doctrine should remind the United States that apart from the British alliance it stands in a position of isolation almost as complete and not quite so splendid as that of the nation which can handle any two first class powers afloat or ashore, and is ready to do it at a moment's notice, which is a great deal more than the United States will be able to do for years to come, and may never be able to do because the nation is averse to expending money on the maintenance of an armament equal to that of even one first class power.

School Books

Hamer Bookstore for the best value in school books. Six good large dictation books for 25 cents. A prize with every purchase of 25 cents or over.

EDITORIAL COMMENT

The Topeka police are suing a Methodist minister who said unkind things about them from the pulpit. If the minister was talking of things he could prove he will have an opportunity of proving them. If he was not he had no business to say what he said and deserves to be punished for it. There are a lot of men who look upon the occupancy of a pulpit as extending a right to freely criticise other men.

That Manchuria is already practically a Russian province is evidently the belief of the Novoye Vremya, of St. Petersburg. Recently it published a long letter from a correspondent in that region, who says that although the Russians are said to be leaving Manchuria, those on the spot have a totally different impression. To them it seems as if they had only just begun to settle down there in real earnest, and to take up the work with energy. And now, he asks, could it be otherwise, seeing that they have only just taken in hand their great work of civilization, which has not yet lost its fascination for them? The general impression—the energy with which towns, ports and great commercial centers are being constructed, the solidity with which the great railway line has been laid—all this points to the conclusion that there is not a single Russian in Manchuria who does not believe in the brilliant future of his countrymen in this province.

All persons in Germany who have an income of $225 or upward per annum have to pay an income tax. The tax commissioners assess all income between $225 and $750. Persons with incomes of more than $750 must make a signed declaration of their incomes, stating exactly the source from which they are derived. The authorities have drawn up an array of "steps," which show just what tax every income has to contribute to the State. The assessment for income tax applies also for the municipal taxes, which are collected on a simpler plan than in England. Each municipality or country district estimates the amount it will require in the coming year for all administrative expenses. It compares this aggregate amount with the sum paid by the inhabitants of the town or district in imperial taxes, and then informs the taxpayers that they have to contribute an extra certain percentage of the imperial taxes for municipal purposes. Berliners, it is stated, have contributed for some years past exactly 100 per cent. of the imperial taxes for municipal purposes.

GIANT CANAL FOR CANADA

Scheme for New Waterway From Georgian Bay to the Sea

Albany, N.Y., Feb. 3—The legislature is discussing some interesting canal projects. Assemblyman Graff, of Essex is sponsor for the Georgian Bay canal scheme. This is a proposition to enlarge the Champlain Canal to twenty-one feet, to provide an outlet to the sea for the proposed Canadian ship canal that is to run from Georgian Bay, along the Ottawa River and Lake Nipissing to the St. Lawrence River to Montreal, thence to St. John's and by way of the Richelieu River to Lake Champlain down the Champlain Canal to the Hudson River.

By a judgment of the Court of Appeal the Ontario Bank won its action against James Poole, who consequently must pay a promissory note given by him to the bank for $1,000. Mr. Poole was one of the shareholders of the Consolidated Pulp and Paper Company of Toronto, which assigned some time ago. A number of the shareholders, among them Mr. Poole, gave a series of thirteen notes, each for $1,000. The bank made a test case of this one.

IT SPEAKS FOR ITSELF

Wonderful Results From Taking Dr. Clarke's Little Red Pills

Editor of the Morning Times:

Sir,—I have been a sufferer for 20 years from rheumatism. Tried everything and got no relief. Six boxes of Dr. Clarke's Wonderful Little Red Pills made me as well as ever. I write this solely that others may get relief. James Goodfellow, Ste. St. Marie.

F. H. Yates, Millbank, Ont., writes Tried different remedies for stomach trouble without relief. Three boxes of Dr. Clarke's Wonderful Little Red Pills have cured me.

Dr. Clarke's Little Red Pills are a positive and certain cure for rheumatism, asthma, paralysis, coughs, lame back, indigestion, all stomach and liver troubles, female complaints, even when the diseases have been standing for many years; the most stubborn case will yield. Sold by Ormond & Walsh, Peterborough, price 50c. per box.

Dr. Clarke's Sure Cure for Catarrh and Dr. Clarke's Sure Cure for Eczema, same price. $500 will be paid for any case that is not permanently cured.

Brunette and Blonde

A ROMANCE.

He was trembling from head to foot at the shock of meeting his early love, whom he had mourned as dead so many years. The joy of her reappearance would have prostrated him as completely as it had done the earl, but that he had controlled himself by the power of a strong and resolute will. But his heart beat quick and fast as he met the sad and dreary gaze of the dark eyes he remembered as so bright and joyous in the long ago.

She looked at the man who crouched upon the floor in abject terror, staring at her with ashen face and terrified eyes, as though she were indeed a ghost.

"Ask that man," she said, trying to hush the vibrating passion in her voice in her tenderness for her father. "He it was who murdered my husband, stole my child, consigned me to a mad-house, and finished his work by imposing his own child on my father for mine."

"Then Florence is not your child!" said the baronet, joyfully.

"No," Lady Ethel answered; "Hilda is my own daughter. She is eighteen years old; Florence is twenty-two. She was a child of four years when I went to America with Guy. I remember her perfectly well."

Mr. Aylesford broke into a torrent of fearful curses. The butler, who stood at the foot of the bed, went up to the wretch threateningly, and he subsided into moody silence. Then the baronet said, wonderingly:

"You say that this man murdered your husband, Ethel?"

"Yes," she answered, while Aylesford's eyes fell uneasily before the hatred in the dark eyes she flashed upon his face. "He stole my husband's fortune while Guy was abroad. They quarreled over it in the private office of the swindler, and he murdered Guy—murdered him, and hid his body beneath the flooring of the office—then fabricated a lying story of a murderous assault and a disgraceful flight."

"It is a lie," shrieked Aylesford, furiously, but his eyes were staring with horror, his teeth chattered, his knees knocked together.

"You have only recently discovered this fact, I suppose?" said the baronet, gently, his heart aching with sympathy for Ethel's sorrow.

"Yes," she said; "I will tell you how it happened, Sir Wilfred. I believed that villain's plausible story at first, as did others. I went mad with the horror and grief of it all after my little dark-eyed daughter was born. When my reason returned I found myself the inmate of a lunatic asylum—consigned to it for life by my husband's murderer. They told me my baby was dead. I had nothing left to live for, so I remained there for long years, passive, listless, broken-hearted, my dark hair prematurely whitened with grief. At length a fellow-sufferer, a wealthy woman, unjustly placed there by wicked relatives, persuaded me to join her in an effort to escape. We were successful and she overwhelmed me with bounties. Then, by the merest chance, I found Margery, the maid I brought with me from England. I took her into my service again. Last year I went to the Springs for my health. Perhaps you have heard Hilda speak of Mrs. L'Estrange?"

Sir Wilfred started.

"Yes," he said, "often. But Mrs. L'Estrange and her maid were burned to death in their cottage."

Lady Ethel smiled sadly.

"No," she said. "The cottage was empty; for Margery and I had started south an hour before, by an early train."

Mr. Aylesford, listening silently, with dilated eyes, cursed himself inwardly for the failure he had made of that dark night's work.

"I went south," continued Lady Ethel, "in order to get some information by which to circumvent the terrible scheme I had just found out. I hated to leave my daughter whom I had so recently found, but I knew I could serve her interests better by going than staying. Some vague doubts were forming in my mind. I went to Mr. Aylesford's former office, and had the flooring removed. Beneath it was found the body of my murdered husband."

Lady Ethel stooped and buried her convulsed face in her hands. If looks could have killed, the glances of execration that fell upon the murderer must have scorched him into smoldering ashes.

Lady Ethel looked up after a moment, and went on, brokenly:

"Armed with this terrible discovery, I returned to West Virginia to demand my child at the hands of her pretended father. I was met with the news of her supposed death. Then I came to England, to seek my father. I had only just reached here, with my faithful Margery, when I entered that door a little while ago."

She paused a moment, then continued, in a fluttering voice:

"But Hilda lives! I gathered so much from that villain's words as I came in the door. Where is my darling?"

She had not heard the light footsteps that stole in a little while before and paused behind her chair. Cecil Courtenaye had stolen out silently and broken the news to Hilda. She had come in very quietly, and at a sign from her grandfather, passed behind Lady Ethel's chair. Now she came forward, and threw herself, weeping, into the arms of the beautiful mother she had first learned to love as a stranger.

"The surgeon is here," announced the butler.

Lady Leigh glided softly into the room. She took the hand of her old friend softly in hers.

"Ethel, let me take you away for a little while," she whispered.

At the sound of Lady Leigh's voice — the voice of her girlhood's dearest friend —Lady Ethel broke into passionate weeping.

They led her passively away, and Lady Leigh, Mrs. Courtenaye, Hilda, and the maid, Margery, cared for her tenderly through the weary hours till morning.

Cecil Courtenaye came to them once to say that the surgeon thought well of the earl's wound. It would cause him a tedious confinement, he feared, but, with careful nursing, he would almost certainly recover.

The butler and other men servants had incarcerated Mr. Aylesford in a locked room, meaning to deliver him

A VERY DESIRABLE INVESTMENT

THE McLENNAN PAINT COMPANY

LIMITED

BUFFALO - - - NEW YORK

INCORPORATED UNDER THE LAWS OF CANADA

CAPITAL, - - $500,000

Dividends on Preferred Stock Paid Quarterly.

For the purposes hereinafter stated, we offer at par,

50,000 of our 7 per cent. Preferred Treasury Stock Shares, $100.00 each

Payments as follows: 20 per cent. on amount of stock subscribed for at time of subscription; 30 per cent. in 60 days balance in 90 days. Receipts will be issued until full amount of stock subscribed is paid, when certificates bearing the Company's seal, and signed by the President, Secretary and Treasurer are issued. The McLennan Paint Co., Limited, have one of the most modern plants of its kind in the world, occupying 300,000 square feet of floor space. The capital of the Company is a half million dollars. The growth of the business has been phenomenally rapid and conservative. In line with other large industries, the Company propose to establish a branch factory in Canada for the manufacture of their products, which are covered by valuable patents, and which practically give the Company a monopoly, and, for the above purpose, offer at par $50,000 of their 7 per cent. Preferred Treasury Stock.

The McLennan Paint Company, Limited, was organized in 1892 by Mr. C. J. McLennan of the McLennan Dipping Process, and other valuable paint-making machinery. The Company began business in rented premises, in East Buffalo. So profitable was the business, and so rapid the growth, that large factories were built in North Buffalo in 1895. The business again doubled, and another plant was added in 1898. In 1901 the Company invented and perfected a line of reds, or vermilions, permanent in color, and at much less cost than the old line colors. This increased the sale of their products practically one-fourth, making it necessary for them to build a new Color and Chemical Works. This factory is without doubt the largest and most modern in the world. Mr. Charles J. McLennan, the President of the Company, and the inventor of labor-saving machinery, such as dipping tanks, mills, etc., is recognized as one of the most skillful and best known paint manufacturers in the country. The name and fame of this Company, and its products, are known all over the United States and foreign countries, and that they will capture the Canadian market is evidenced by the fact that many of the large Canadian manufacturers are at present using their goods, in face of the heavy duty. It is with a view to saving this 25 per cent. duty and adding it to to the profits of the Company that they have decided to establish a branch in Canada, which will be controlled and managed by the parent Company.

Practical men of means, character and national reputation constitute the directorate and management. Each department is managed by a skilled man; monthly statements rendered and careful audit made semi-annually. The books are always open to the smallest shareholder. The finances of such a concern are guarded as closely as the finances of any bank, and failure is practically impossible.

COPY OF TESTIMONIALS.

A. C. Cornell, Toronto, Ont.: Columbia National Bank, Buffalo, N. Y., Jan. 23, 1903.

Dear Sir,—The McLennan Paint Co. are good customers of this bank, and I have known them personally for years. All the officers bear excellent reputations, and are considered good business men. Their management is evidenced by the large business they have built up, as careful and conservative. They have met with great success in the past, and I believe that today, theirs is one of the largest and most prosperous concerns of its kind. I have every reason to believe that the stock which they are now offering for sale is a desirable, as well as a safe investment. Yours very truly,

L. H. GETHOEFER, Cashier.

The Merchants' Refining Co., Refiners of Petroleum, Paraffines, Paraffine Wax, Lubricating Oils, Residuum, Napthas, and Gasoline,

A. C. Cornell, Toronto, Ont.; Buffalo, N. Y., Jan. 23, 1903

Dear Sir,—Your favor of 21st received, and note you are offering for sale $50,000 of the preferred stock of the McLennan Paint Company and ask me what I know of the firm. Would say I have had business dealings for eight years—transactions of many thousands of dollars. I am also doing business with other houses engaged in the same line, and desire to say there is no house in America to-day that stands higher than the McLennan Paint Co. The growth of their business has been phenomenally large, and under the conservative management of the President, Mr. C. J. McLennan, the success of the business is assured in the future. As an investment, in my judgment, nothing could be safer than the stock they offer.

Very respectfully, C. A. SALISBURY, Manager.

A. C. Cornell, Toronto, Ont.: Buffalo, Jan. 26th, 1903.

Dear Sir,—Referring to the sale of $50,000 of our 7 per cent. Preferred Stock, the Prospectus does not elaborate on the proposition, but merely mentions the amount guaranteed. I desire to inform you, however, we could have paid at least 14 per cent. last year, but carried balance to a Reserve Fund, which, necessarily, makes the stock very valuable.

Very truly yours,

THE McLENNAN PAINT CO., LIMITED,

C. J. McLennan, Manager.

P.S.—Having visited this proposition on behalf of some very conservative investors, I can verify all the above. The plant is extensive and modern in every detail; officers and management skilled and very industrious; all the products superior. This is a Canadian Company, Canadian Charter. Having built in Buffalo, in proximity to raw material, by shipping here in ground state and preparing here, will save and add large duty to already large profits. Bear in mind this is not prospective, but a large, rich, going, paying institution. Prospectus, application forms, and any further particulars, and subscriptions, address the undersigned. All cheques or drafts for stock made to the order of the Company, and forwarded to

A. C. CORNELL, Fiscal Agent,

18 Yonge Street Arcade, Toronto, Ont.

REPORT BY EX-SUPERINTENDENT OF MINE

Cecil R. Gold Mining and Milling Co., Los Angeles, California.

Ballarat, Cal., Nov. 1st, 1902.

Gentlemen,—Your request for my opinion as to the "Santa Rosa" group of mines, and other claims in which you are interested in this territory, to hand, and in reply will say;

The "Santa Rosa" group, which is located southeast of Ballarat some three and a half miles, consists of twelve claims, equal to 240 acres. The ledge crops out more or less the full length of these claims, showing the same character and formation of work as where development work has been done. In most of the outcroppings it shows highly mineralized rock, with pyrites of iron, mica schist, slate, slate porphyry, gouge, quartz, and quartzite, all bearing more or less. Where work has been done, it shows a very marked improvement in both quantity and quality of gold-bearing rock. Commencing with the surface, the ore shows much iron and copper stain. All mill tests show [illegible] ore commencing with the surface; in fact, I milled for several days and recovered $10 and over per ton, yet the milling process does not pay more than two-thirds of the value of the ore, the tailings ofttimes running as high as $8 per ton, and never less than $2.50. To save the entire value of your ore it will be necessary to install either concentrators or a cyanide plant. From careful study and frequent examination of the surface of the ground, and down as far as has been opened below the surface, I am highly pleased with the property. It is certainly a fine property, and as good as any I have ever had the pleasure of examining. Considering your mill site, with tramway facilities added, water, fuel, and cheapness of mining the ore, the Cecil R. will be capable of paying enormous dividends when your capacity for milling is increased to what it ought to be.

Wishing you every success, I remain, Yours very truly,

(Signed) G. W. FLEMING,
Ex-Mine Supt. Cecil R. Gold Mining and Milling Company.

Price is now 25 cents a share, and we offer 50,000 shares at this price, but it may be advanced by January 1st, 1903, to 50 cents a share.

Canadian Steel and Coal Co.

CAPITAL

10,000 shares 7 per cent. Cumulative Preferred Stock, par value $100 each	$1,000,000 00
50,000 shares Common Stock, par value $100 each, issued and fully paid	$5,000,000 00
Total Capitalization	$6,000,000 00

Issue of $1,000 000 7% Preferred Stock in 10,000 Shares of $100 each at par.

This Stock is preferred both as to Assets and Dividends.

The shares are entitled to cumulative preferred dividends from the net earnings of the Company, at the rate of 7 per cent per annum, payable half-yearly on the first days of April and October. They may, at the option of the holder, be exchanged for common shares. They are subject to be called in, in whole or in part, by the Company, at 15.00 per share, at any time on or after 1st January 1909.

The total issue of Preferred Stock is only $1,000,000.00, the whole of which is now offered.

Subscriptions for 10,000 shares of $100 each of the 7 per cent Preferred Stock of the CANADIAN STEEL AND COAL COMPANY will now be received at par, that is, $100 for each $100 share as follows:—

5 per cent on application.
25 per cent on allotment.
35 per cent 30 days thereafter.
35 per cent 60 days thereafter.

One share of common, par value $100.00, given with each share of preferred.

The whole of the instalments remaining unpaid at any time may be prepaid in full. A discount of one per cent will be allowed upon the par of each share if prepaid at time of allotment.

Notice of allotment will be sent promptly by ordinary letter.

COAL

PROPERTY IN FULL OPERATION

Company owns 9,600 acres of coal property known throughout the coal trade as the New Campbellton Colliery, located on Bras D'Or Bay, County of Victoria, Cape Breton, Nova Scotia. Mine is fully equipped, producing and marketing 100 tons of coal a day at a net profit of $1.00 a ton. Improvements are now being made that will increase the output to over 1,000 tons a day. On present output, figuring 300 working days in year, the net result will more than pay interest on entire issue of preferred, with output of 1,000 tons a day net result will be $300,000 per annum.

IRON

RICHEST ORE IN THE WORLD

Company owns in fee simple, free and clear of all incumbrances, 4,000 acres of iron ore deposit, located at Natashquan (tidewater) situate on North shore of Gulf of St. Lawrence, in the County of Saguenay, province of Quebec.

Deposits contain 20,000,000 tons of ore ABOVE SEA LEVEL ALONE.

Quality of ore is highest ever discovered, running from 69 to 72 per cent. in metallic iron.

More orders for the sale of this ore have been received by the Company than can possibly be accepted, and at a price netting the Company a profit of $2 a ton F. O. B. vessels at Company's docks.

Send for prospectus giving full information as to earnings, reports, etc., etc.

STOCK MARKETS

TIME FOR INDUSTRIAL STOCKS TO ADVANCE

New York, Feb. 4.—Investors and speculators are commencing to scan the industrial list with the view to selecting stocks for purchase. It is becoming to be appreciated that there has been no material advance in industrials since the flour boom of 1899 while since then there has been a thorough out-cleaning. Copper is down from 130 to 60. Sugar from 180 to 130. Peoples Gas from 124 to 107. Steel from the equivalent of about 60 to 37, etc. Many companies have drastically reduced capitalizations, while others have entirely disappeared. Among industrials Merit has been unduly and unjustly obscured. The industrial situation has never looked more radiant than it does at present. The past sceptical are now pouring in their orders, and the companies are literally swamped in business. The iron and steel situation is the best ever known. The copper situation has greatly improved. No great stocks are pressing upon the market. There is plenty of room and sufficient bullish material at hand to lift Amalgamated copper to par. The sugar situation is also in good shape. The cane and beet sugar interests have come to an understanding. The American Sugar Refining Company has on hand at present $15,000,000 of undivided profits secured from its coffee trade in the past five years. This being the dull season of the year, of the sugar trade, the company in accordance with its custom, closed down for repairs and cleaning several of their plants. Gas shares are making a most excellent showing, all increasing their surplus most prodigiously. We have quite recently been advocating immediate and extensive purchases of Peoples Gas. In our opinion the following issues are specially attractive to purchase at present, and if you will immediately buy some of them you will make good profits. American Sugar, America Copper, United States Steel common and preferred Pressed Steel and American Car and Foundry, common and and preferred Republic Steel, common and preferred A. C. O., American Locomotive and American Smelting issues, also Leather preferred and little Leather. Indications are most strong that material improvement in prices for industrials shares is near.

Summary—Today's market was much more lively, and was strong Steel touched 39. Copper sold above 69, and there was more doing in the industrials at improved prices. St. Paul sold above 179. Illinois Central advanced sharply. The Gould stocks were all in good inquiry. Quite a buying movement developed in Reading, which carried the common stock up two points. The Eries followed. It looks as if the market were about to emerge from its speculative rut. Increased activity brings advancing prices. Money closed 2 3-4. Sales 619,000.

Tomorrow's letter—"Iron and Steel Properties."

WOULDN'T TAKE A DARE

Cleveland Woman Drinks Poison in Presence of Her Husband

Cleveland, Ohio, Feb. 3.—Because she wouldn't take a dare, Miss Lizzie Weisbarth swallowed two ounces of carbolic acid last night. Prompt action saved her life.

Mrs. Weisbarth, her husband, George Weisbarth, and the woman's brother and sister-in-law, were together. Mrs. Weisbarth, said; "I'll do it now." "Do what?" exclaimed her husband. "Why, commit suicide." "You wouldn't dare," retorted the husband, laughing, thinking she was joking. For answer the woman produced a bottle and drank part of its contents before the astonished husband knocked it from her lips. No motive is known for her act, and she will recover.

Address [illegible], Fiscal Agt., Room [illegible], 42 Church St., New Haven, Conn.

INTERNATIONAL ELECTRIC MINING CO.

185 SUMMER ST., - BOSTON, MASS.

A Dividend Payer for the Past Five Years.

12 PER CENT GUARANTEED

Capital Stock, $500,000. Par, $1.00, full paid and non-assessable

Over eight thousand tons of $50.00 ore mined and smelted from this group of mines.

A limited number of shares of the stock of this Company now offered at seventy-five cents per share. This price will shortly be increased to par. Stock registered by the International Trust Company, Boston, who is also the transfer agent.

This Company has a small capital stock.

The International Electric Mining Company owns seven mines and milling plant.

The Brooklyn and New York mines of this Company lie north of and join the Victor and the Hoodlum—two rich mines that are now being worked by California parties. On the west lies the Electric Mining Company's mines. In these mines are millions of dollars' worth of rich ore in sight. On the south, adjoining the Berlin mine of this Company, is the Montazuma and Clipper. From the Montazuma over three million dollars has been taken within 80 feet of the grass roots.

This Company owns free and clear seven mines of twenty acres each, all containing rich ore, located in the Arabia and Trinity mining districts, Humboldt County, Nevada. The Company has worked these mines for the past five years, and is now driving a tunnel to cut out a rich ledge about 800 feet from the surface. The Arabia mining district, in which these mines are located, is a lively district—a great many men being employed there. The tunnel now being driven on the Brooklyn mine has about 350 feet already completed. When the tunnel cuts the main ledge, which has just been reached by the Victor tunnel about 600 feet, the Brooklyn will have about 800 feet stoping ground, which runs high in gold and silver, over $60.00 per ton.

The Company is offering for a short time a limited amount of stock for the enlargement of its plant and the working force at the mines and for the completion of the Brooklyn tunnel.

This Company has thousands of tons of rich ore in sight.

We are not making a lot of talk, because it is unnecessary. What the investor wants is dividends, which we have paid for the past five years. Now if you want a safe 12 per cent. investment, let us hear from you.

INTERNATIONAL ELECTRIC MINING Co.
185 Summer Street, Boston, Mass.

References furnished upon application.

THE OLD COMSTOCK

A California mining paper has this to say: "Nevada, that grand old stamping ground of mushroom millionaires, who plucked enough wealth from her prolific fields to build mansions, banks and big hotels in San Francisco, and palaces in Paris and London, is again astonishing the world by making more millionaires and by yielding millions in gold and silver from a new field which rivals the old Comstock lode in the days of its pristine splendor. Not only in Tonopah and Arabia districts, where within the past year nearly ten millions have been exposed, are operations active, but in every mining district in the Silver State are operations active, and Nevada will once more take her place among the big producers, the peer of any of them."

Daily Nevada State Journal, January 4, 1903.

Lovelock, Nev., October 6, 1902.

International Electric Mining Co.,
Boston, Mass.

Gentlemen,—If you wish to sell your Brooklyn mine I can get you a good price for it. If it was mine I would not sell it at any price, as you have more than a million dollars of ore in sight.

O. W. OSTRANDER, Supt.

Boston, Mass., December 1, 1902.

Mr. Geo. D. Burton, Treas.,
International Electric Mining Co.,
Boston, Mass.

Dear Sir,—During the six months of October and November of this year I visited the mines of the International Electric Mining Company, situated in Arabia and Trinity mining districts, Humboldt County, Nevada. I found the country remarkably mineralized; in fact, the possibilities of the country as a mineral producing country are yet unknown. For years it certainly has produced well. The work now being done in the Arabia and Trinity districts establishes the fact that they are fine producers.

I also found that there is a great deal of interest being taken in these properties, which have produced a great deal of wealth the past quarter of a century.

M. A. LATHROP, Mining Engineer.

GILPIN COUNTY

IS THE OLDEST GOLD PRODUCER IN COLORADO

—In 1902 she produced $4,000,000.00.—
Here is where Hundreds have been made Millionairs.

THE ELECTRIC SPARK GOLD MINING COMPANY

Is in this famous little kingdom, and is surrounded by mines that are making their owners wealthy.

CAPITAL STOCK $300,000 Par Value $1.00

We are working this mine every day doing a great amount of development work which will enable us to commence regular shipping very soon. Our shaft is now 175 feet deep, with a streak of pay ore starting at the grass roots, the vein is over 3 feet wide at the bottom of shaft, and runs from $45.00 to $85.00 per ton, mostly gold. We are only three-quarters of a mile from railroad and have a well traveled wagon road from mine to depot. There are thirteen stamp mills at Black Hawk, three-quarters of a mile from this property. Our company is managed on conservative lines by practical mining men who understand the business and are familiar with this field of gold.

We have placed a small block of this stock on the market at 20 cents per share which will be worth $1.00 in a short time. Now is the time to buy.

Mining Securities Company
805 Temple Court, New York

BUY! WHY?

BECAUSE

THE SOUR LAKE OIL CO.

Has placed four-fifths of its stock in the treasury for development work; and because

Oil is reached in less than half the depth required on Spindletop Heights in Beaumont;

The people in Canada are well acquainted with the management, which is in the hands of HON. JOHN L. BITTINGER, United States Consul General to Canada; F. S. Ashley, Vice-President of the Massachusetts Securities Co., and W. L. Marston, Vice-President of the American Union Oil and Refining Co.

These gentlemen have made a dividend payer out of one company and have raised the value of its stock from 5c per share to par value, or 25c, within a very short time;

The company is operating in the Sour Lake field, where fewer wells will tap the oil than at Spindletop; this insures a greater flow of oil, and it is of a better quality;

This is the first allotment of shares at the present price of TEN CENTS PER SHARE; it is the lowest price at which you can buy, and the time left in which to buy at TEN CENTS is short.

Make remittances and inquiries direct to

Colonial Securities Company,
62 Wall Street, New York City.

Order now at ten cents and make monthly payments.

PETERBOROUGH, FEB. 4, 1903

TOWN AND COUNTY NEWS

DASHES HERE AND THERE BY TIMES' REPORTERS

Young Men's Guild

The Young Men's Guild in connection with St. Andrew's church, held their regular monthly meeting on Tuesday night, Mr. W. Campbell, the president in the chair. After the general business had been transacted, Rev. J.G. Potter read an instructive paper on the "Industrial Invasion of Canada." The paper was well received by a large audience.

Municipal Ownership

Sherbrooke, Feb. 4—The first official move towards municipal ownership of electric light, the issue in the recent election, was taken by the City Council last night. A committee consisting of Councillors McManamy, Fraser, Fuller, Dansult and Lanctot was appointed to meet the directors of the Gas and Water Company and open negotiations for the purchase by the city of the electric light plant.

T. A. S. Reception

A reception was tendered the T.A.S. Hockey Team last night by the ladies of St. Peter's T.A.S. in the Society Rooms. The affair was a success in every particular, a large crowd being present. The handsome sum of about $25 being realized in aid of the expenses of the team. The evening was spent sociably in playing games, etc., a supper being served, of which all present partook freely of, after which dancing was indulged in until about midnight, when the gathering broke up.

At the Opera

That sterling play, "Under Two Flags," was the attraction by the Mark's Bros' Combination at the Opera House last evening. The piece has been seen here on numerous occasions, but we venture to say, it has never received such generous treatment as on this present occasion. Not only was the caste adequate to the exacting requirements of the play, but the general attention to detail was worthy of much praise. Dear Cigarette! We have laughed and cried often times at her whimsicalities and ultimate sad end, and last night in the hands of their talented actress, Miss May A. Bell Marks, she seemed to have found new arts and graces to win our affection. Her performance created a lasting impression. Bertie Cecil, too, found a capable exponent in Will. L. Stewart, whilst that capable actor J. C. Connolly, was seen at his best as the vindictive Black Hawk. It was a production of all-round merit and would bear repitition on this present visit. It is almost needless to add there was another packed house. The specialities introduced, were of the usual high-class standard and the humor of the audience was demonstrated by their generous applause.

SOCIAL AND PERSONAL

—Mr. S. D. Weir, county secretary of the Loyal Orange Lodge, was down from Toronto attending the annual meeting. He returned last night on the C.P.R.

—Dr. P. H. Bryce, Secretary of the Provincial Board of Health, was in town yesterday, and met the local Board at 1.30 in the Council Chamber for the purpose of advising as to detection in connection with contagious diseases.

LITTLE LOCAL LINES

—Matched race at the rink tonight.

—The Charlotte street choir will hold no rehearsal this week.

—Ladies' Reading Circle of St. Peter's T.A.S. hold a literary evening tomorrow.

—Members are urged to attend special practise of George street church choir this evening.

—A general meeting of the O.G.R. Co. Mutual Benefit Society will be held in the T.A.S. rooms to-morrow evening at 8 o'clock.

—The Board of Trade hold a special meeting tonight. The Trent Valley Canal and the sugar beet factory are subjects of importance.

NEW CENTRAL FAIR HAS BEEN ORGANIZED

The Old Society Has Gone Out of Business for Good

AND A FRESH START MADE

Mr. Hughes-Charles Elected President, and Mr. C. B. McAllister, Vice President—Many Leading Business Men Take Hold.

Yesterday the adjourned meeting of the West Peterborough Agricultural Society took place in the Town Council Chamber. Mr. F. H Dobbin, President occupied the chair. There were about thirty representative business men and farmers present.

The President stated the object of the meeting was for the election of a new board of directors and other business.

An informal discussion took place regarding the obligations of the society, which amounted to about $1,400.

Mr. J. M. Brooks, President of the Peterborough Turf Club, stated that the club was prepared to help the society as far as it possibly could. He had called on a number of leading business men, and had got their consent to go on the board of directors, should the meeting be disposed to elect them.

Mr. Hughes-Charles stated that he was in favor of starting with a clean sheet. He would not care to assume the obligations of the past, as it would prove a heavy load to carry. He also believed in liberal prizes, and was prepared to do what he could to promote the success of the society if reorganized.

After some further discussion, the following resolution was adopted:

Moved by Mr. W. H. Robertson, seconded by Mr. Robert Fair—That it is desirable that a new society be formed and that Messrs Hughes-Charles, E. W. Elliott, F. H Dobbin, W J Green and Alex. Elliott be a committee to nominate the officers and Board of Directors for the ensuing year.

The committee immediately went to work and brought in the following report, which was adopted:

Hon. Pres.—Hon. J R Stratton
President—D. Hughes-Charles.
1st Vice-President—C. B. McAllister.
2nd Vice-President—E. M. Elliott
Directors—H. P. Kennedy, Joseph Madill, (South Monaghan), Alex. Elliott, Robert Fair, D. Maloney, (Douro) T. M. Hunter, (North Monaghan), Geo. W. Fitzgerald, (Smith), J. K. Galvin, (Ennismore) and R. J. Munro.

The honorary directors will be appointed at the first meeting of the new board.

There was considerable enthusiasm manifested, and from appearances the new society will be a success. Mr. Hughes-Charles, the President, has taken hold in earnest, and with the splendid board of directors at his back, will place the Peterborough Central away in the lead amongst its competitors.

SUDDEN DEATH OF MRS. WARAM

Wife of the Late Mr. Richard Waram, After a Short Illness

After a short illness of only a few days, there passed away at the residence of her son-in-law, Mr. John Chittick, Smith, on Tuesday, February 3rd, Mary, beloved wife of the late Richard Waram.

The deceased was 72 years of age, and was born in Cornwall, England, coming to this country with her parents in 1854, and took up residence in Smith, where she has resided almost continuously until her death.

She leaves to mourn her loss a family of five, three daughters and two sons, all of whom are married, and two sisters and two brothers. Her husband predeceased her five years ago.

The funeral will take place from the residence of her son-in-law, Mr. John Chittick, Lot 19, Con. 8, Smith, on Thursday at 2.30 o'clock, and proceed to the Lakefield Cemetery for interment.

BEET SUGAR FACTORY

The Local Company are Busily Engaged Securing Acreage

Dr. Jeffs, one of the promoters of the Peterborough Beet Sugar enterprise, told a Times representative yesterday that the Company had 15 men out securing acreage from the farmers for the growing of beets. He also stated that the factory would be built, regardless of whether the full five thousand acres was secured or not. The Company would probably take in hand to cultivate 1000 acres or more if necessary, so as to bring the acreage up to the required amount.

The Wiarton Canadian, in speaking of the new factory built in that town, says:

"Mr Simmons, a representative of a Detroit beet seed house, when in Ontario in the fall, secured samples of sugar from all the factories in the Province, and in showing them to the best sugar men in Michigan, with whom he was in daily contact, Wiarton's sample was invariably chosen as the best."

"Last week the Sugar Company secured the services of Mr. J. S. Eckhart, one of the most expert sugar men of Michigan, who is thoroughly posted on sugar machinery, and all the latest processes, to examine and report on the Wiarton factory before taking it off the hands of the Colonial Construction Co. After a thorough examination he pronounced the factory the most complete in America, up-to-date in every particular, and capable of making sugar that cannot be beat and a little cheaper than the average."

J. J. HARTLEY IS CHAIRMAN

Of the Peterborough Board of Education for 1903—Inaugural Meeting Last Night —Standing Committees

The inaugural meeting of the Board of Education for 1903 took place last night when there were present Messrs. Stevenson, W. M. Hayes, W G Ferguson, F. J. Jameson, Wm Pringle, J. J. Hartley, Dr. Jno. Burnham, Jno Crane, H. P. Kennedy, W. H Hill, Robert Fair, J. J. McBain, V. Eastwood and Peter Hamilton.

The new members in the above list are Messrs. John Crane and Wm. Pringle.

The first ballot for chairman for 1903 resulted as follows, W. G. Ferguson 6, W. H. Hill, 6, J. J Hartley 3, J.J. McBain 1

Mr. W. G. Ferguson positively declined to accept the office under any circumstances. Mr. W. H Hill, also said he would rather his colleagues did not vote for him, as he believed two years was long enough for any member to hold the office of chairman.

The sixth ballot gave Mr. Hartley a majority of 3 over Mr. Hill, and the secretary declared Mr. J. J. Hartley duly elected chairman for 1903.

THE CHAIRMAN-ELECT.

Mr. Hartley, on taking his seat, said he did not expect on coming to the meeting this evening to be the choice of his esteemed colleagues for chairman. Although he had served on the School Board for 12 years, he felt there were others more capable than he of filling that honorable position. He had been a member of the Town Council for 10 years—22 years altogether in public office—but he had never appreciated anything so much as being elected chairman of this Board. He felt satisfied that with such exceedingly capable colleagues as he saw before him, it would be found almost impossible for a Chairman to go astray. In conclusion Mr. Hartly thanked the Board kindly for the honor bestowed upon him, and hoped that at the end of the year they would have no cause to regret their choice of Chairman for 1903.

COMMITTEES.

Mr. F. J. Jameson moved, seconded by Mr. W. G. Ferguson, that Dr Burnham, and Messrs Kennedy, Hayes, Eastwood and the mover be a committee to strike the standing committees.—Carried.

Dr. Burnham, chairman of the above committee, reported the striking of the standing committees as follows

Finance — Messrs Hayes, Crane, Stevenson, Fair, Prinfle, and
Stevenson, Fair, Pringle and
Supervision —Messrs. Jameson, Hill, Burnham, Ferguson and Hamilton
Mr. Hill, chairman.
Property—Messrs. Eastwood, Kennedy McBain, Hill, Fair and Jameson.
Mr. Eastwood, chairman.
Appointments—The whole Board. Mr. McBain, chairman.

The Board then adjourned.

GENERAL - SPORTS.

SKATING.

There appears to be considerable interest taken in the skating match, which takes place at the Brock street rink tonight, and Oliver Dusty and his rival, Walter Jackson, are both confident of success. People who are capable of judging, seem to favor the chances of Dusty, but his opponent his a lad of metal, and will no doubt make a good showing. W. E. Gamo, the champion barrel jumper of the world, will give an interesting exhibition of his powers during the evening, including a most adventurous jump over two chairs, three barrels, one box and three boys. Such a remarkable leap on skates appears at first sight almost incredible, but the fact that Mr. Gamo has performed the feat on several occasions is sufficient assurance of its possibility.

T.A.S. At Lakefield

The T.A.S. Hockey team will drive to Lakefield this evening to play the return game with the hockey team of that village. Lakefield people are quite confident that their team will win out, but the local team are not worrying and will likely spring a surprise on their Lakefield friends.

Montreal Holds the Cup.

The Winnipeg Wan were defeated by Montreal last night by a score of 6 to 1.

HUGE WAR IN THE BALKAN IS SURE TO COME IN THE EARLY SPRING

edonians Preparing for an rmed Revolt—Sister States are Hard to Control

LTAN'S ATROCIOUS MISGOVERNMENT.

pite All Warnings, Has at Last roused Both Christian and Ottoman to Revolt

ndon, Feb. 5—The preparations Macedonian Revolutionary Com- e for a general rising in the g are so extensive that it is im- ble to keep them a secret, and it possible to offset them except large army, and campaign ar- ments.

is only necessary to point out main features of the situation in to demonstrate the imminence he peril. The Sultan's atrocious vernment of Macedonia despite warnings and protests, has at aroused both the Christian and man populations to revolt.

Bulgarian Government has formal assurances that it will erything in its power to avoid ference in the coming quarrel. It ite beyond its power, as all con- d know, to prevent the Bul- n people from crossing the fron- and making common cause with Macedonian revolutionists. Ser- also professes its intention to aloof, but, there also no Gov- ent is strong enough to keep the ry long out of the field after ighting begins.

Japan's Huge Army Ready for War

London, Feb. 2—Among the best fighters of the world are the trained soldiers of Japan. No matter what their rank they never seem to be unmindful for an instant of the services in which they are engaged. They do not dissipate. The little recreation that they give themselves is quiet and innocent, and they keep their eyes, and doubtless their minds, on their business.

When the military scheme, now in course of development shall be completed, there will be 450,000 men under the age of 40 years trained for military service, divided equally among troops with the colors and men enrolled respectively in the first and second reserves. This takes no account of the masses with military training who have passed the age of 40, nor of an element quite as eager and promising under the age of 20 years. Company drill has been imposed in the government schools and many of the private schools have adopted it. All over the land at any season may be met troops of schoolboys in uniform, bearing the flag, blanket rolls, and knapsacks of food, and sometimes carrying also funs, tramping with their instructors over the hills and gathering martial spirit and a sense of discipline with their outings.

T SUGAR MEETING

ge Gathering Held in uth Monaghan on Wednesday Night

H ENTHUSIASM MANIFESTED

ing Addressed by Mr. T. E. Brad- urn, Dr. Jeffs, T. M. Hunter and Geo. W. Bennet

Wednesday evening a meeting in nterest of the Sugar Beet Indus- was held in the C.O.F. Hall at aboro. Although the night was unfavorable, still the farmers in vicinity showed their enthusiasm turning out in large numbers, being upwards of 60 or 80 re- ntative farmers present.

J. W. Dawson was chairman of meeting, and the Peterborough r Co. was represented by Mr. T. radburn, the President; Dr. W. H Agricultural Superintendent, Hunter and G. W Bennett

Dawson in opening the meeting rred to the interest he had taken estion of producing sugar beets from his sources of information formed the opinion that the in- ry would greatly benefit the ers in this district.

Bradburn gave an account of steps the Company had taken to a sugar factory in Peterbor- . The factory would cost to pur- land, erect the building, railway gs, barges, etc., and equip with ern machinery, the sum of $565,- and would have an additional out- or beets alone of from $250,000 to ,000 as well as an additional out- for lime, coal, coke, barrels, labor of another $250,000 annually.

. Bradburn said that all addition- rrangements had now been com- d, and just as soon as an assured age sufficient to keep the factory peration during the first three s was secured the work of erect- he buildings and plant would mence.

Company, Mr. Bradburn stated, ld accept beets on board cars or es at various convenient points the railways and rivers or lakes. Company to provide the cars and es, the farmer to pay freightage of more than 50c. per ton by cars 30c. per ton by barges.

. J. B. Lucas, a resident of Bail- oro, and one of the parties chosen xperiment for the Government years ago, said he had been convinced by his experience that other crop or industry would give good returns to the farmer. Any ry in Peterborough was a good for the farmer as the extra con- ing capacity brought in by such ories gave the farmer a better rket. His experiment in growing s at $4.00 per ton would have ught him $80.00 per acre as the eriment test gave him 20 tons, this, Mr. Lucas said, was even low- than it might have been.

r. G. W. Bennett showed how the beets could be grown, cultivated and harvested with little more work than any other root crop, especially if the farmer did not undertake too much—and the Company had undertaken to much—and the Company had undertaken to supply farm laborers through the Emigration Department. Blank forms of application were now in the hands of the agents of the Company and anyone wanting help could procure the forms and make application for whatever kind of help they required. This, Mr. Bennett said was an industry as directly related to the farmer as the cheese making and dairying; it meant the production and manufacture of a staple article of commerce directly from the raw material produced off the farm in the vicinity of the factory, and not only would it open up a new source of profit in farming operations but would also stimulate trade and traffic in our town and along the rivers and railways. Taken as a whole, it was a good proposition, and if the farmers of this district failed to embrace this opportunity, they would make a great mistake.

Dr. W. H. Jeffs was the next called upon. He went very fully into the advantage the beet sugar industry would be to the farmer. The growing of grain could not be done profitably by the Ontario farmer. Dairying and hog raising were now his principal sources of profit. He must seek for some industry that would go hand in hand with these industries. It was found in the cultivation of the sugar beet. This was an industry that went hand in hand with dairying. The cultivation of the sugar beet left the soil in a better condition after the crop was taken off than before it was put in. Then another feature of the business is that the pulp is a very valuable food for cattle, hogs and sheep. It is just as good a food as turnips and mangles, and is not pressed as some farmers imagine, but is in strips as it came from the pulper. The Dr. then went into the comparative figures of growing 10 acres of wheat and growing 10 acres of sugar beets. These figures are taken from a practical farmer, for the wheat a man from Victoria County, and for the beets a man in Bay County, Mich.

10 acres of wheat, Johnston Ellis—

Ploughing	$ 15 00
Cultivating	3 00
Sowing	2 00
Harrowing	3 00
Seed	10 00
Harvesting & twine	10 00
Drawing in	5 00
Threshing	10 00
Cleaning and drawing out	7 00
Rent of land	20 00
	$90 00
20 bush. acre—200 bush. at 70c per bush.	140 00
Cost	90 00
Profit 10 acres	$41 00
Profit 1 acre	4 10

10 acres of beets, John Callan, Caro, Bay County—

Ploughing	15 00
Dragging and fitting	9 00
Drilling	5 00
Thinning	50 00
Cultivating 4 times	6 00
Pulling and topping	60 00
Drawing 60 loads	56 00
Seed 150 pounds	27 00
Total cost	$248 00
Beets delivered to factory received	$620 00
Cost	248 00
Profit 10 acres	$372 00
Profit 1 acre	37 20

The following figures were taken from the Clerk's books of a Bay City factory by Mr. Johnston Ellis, of Victoria County, who was sent over last year by Victoria County Council to study the industry from the farmer's standpoint :—

Pay roll $2,000.00 per week. 1,500 patrons average 4 acres apiece grew 6,000 beets, 14 tons to acre gives 84,000 tons. Price paid by the factory, $336,000, average $56.00 per acre average for each patron $224.00.

Dr. Jeffs then went very fully into the manufacture of the granulated sugar from the sugar beet, tracing it in its various steps.

Mr. T. M. Hunter said that although his was a good wheat growing farm yet he found that there was scarcely any profit from growing wheat—he had turned his energies to the dairying, and although it had been profitable, yet he was going into the sugar beet business and intended to plant 8 acres in the spring. He foresaw great results to the farmer, especially the dairy farmer in the procuring of cheap feed from the beet pulp.

The meeting altogether was very encouraging and since the problem of shipping the beets had been assured by the Company, the farmers look quite favorably upon the proposition and nearly everyone present signified their willingness to grow the beets—it is expected that from 500 to 600 acres will be grown in S. Monaghan the first year.

Mr. Bennet, Mr. Lucas and Mr Hunter will call on the farmers and close contracts during the coming week.

Y.M.C.A. WORKERS IN CONVENTION.

Opened Yesterday Afternoon in the Baptist Church.

MANY DELEGATES PRESENT

Valuable Paper by Mr. J. W. Hopkins of Woodstock—Many Useful Suggestions Brought Out in the Course of an Interesting Discussion

A large number of delegates were present at the general opening of the 33rd annual Convention of the Young Men's Christian Association of Ontario and Quebec, which took place in Murray street church at 2 o'clock yesterday afternoon.

Peterborough has indeed been honored by selection to entertain such a gathering of enthusiastic workers on behalf of the young men. It has been an anxious time for the local Association preparing for the reception of the 200 delegates, who have assembled, representing their respective branches. But all the visitors have been billeted and their accommodation and comfort provided for.

Our local association hall is well adapted to meet the requirements of the convention, and it is safe to say its comfortable and home-like appearance will be the subject of many compliments by the delegates.

The first item on the programme at the opening session was an interesting address by Rev. John McNichol, B. A., of Toronto Bible Training School on "Preparation," followed by the appointment of a Committee on Permanent Organization. Mr. John W Hopkins, Woodstock, then read a valuable paper on "Our Opportunity Among the Young Men of our Local Fields."

The subject, the writer expressed, was one which had an important bearing upon every phase of Association Life. The extent to which this movement is to be made world wide is largely dependent upon the clearness of vision which the local association experiences, and to the spirit in which every local organization strives to influence all classes of men within the limit of its constituency. A perquisite to the realization of the problem, the writer expressed, is a knowledge of the men constituting our field of opportunity.

Woodstock offered a fair illustration of the average town and city in which association work is conducted, and Mr. Hopkins would take that town as the basis of his comparisons and investigations.

With the object of obtaining statistics to constitute a satisfactory basis of calculation of the field open for Association work, there was formed in Woodstock a committee of sufficient numerical strength to return some useful information for the writer of the paper. The figures which accompanied the reports showed to what extent the Association had been successful in reaching the various classes of men in their city.

Of the total number of business and professional men, 13 per cent. appeared on the Y.M.C.A roll; clerks 20 per cent.; mechanics, 6 per cent.; laborers, 9 per cent; students, 4 per cent: while upon further investigation it was learned that of 300 men whose names appeared on the record of the Woodstock Y.M.C.A. 16 were business and professional men, 24 clerks, 23 mechanics, 21 laborers and 10 were students.

The writer also dealt with the apparent apathy of men in the matter of attending the week-day prayer meetings in connection with the churches. It was a subject, he thought, demanding the attention of religious workers everywhere. But the problem which appeared to present itself to the minds of those present as the result of the writer's able paper, was, how to reach the class of men to whom the Association at present offers no attraction. There was a great field of opportunity in every department of the work, and if the members would be faithful to the trust committed to them, they must, in the words of Caleb and Joshua, "Go up at once and possess the land, for we are well able to overcome it." The session adjourned at 5 o'clock.

EVENING SESSION.

The evening session was held in St. Paul's church and commenced at 7.30. A most interesting address, on "Our Opportunity Among the Soldiers in South Africa," was delivered by Trooper A. J. Brace, of Second Canadian Mounted Rifles," followed by a most able discourse by the Rev. James Morrison on "Our Opportunity in View of God's Promises and Power," by Rev. James Morrison Barkley, D.D., of Detroit, Mich. The Session was largely attended, and the delegates must be well pleased with the result of the first days' proceedings.

WOMEN'S AUXILIARIES.

The eighth interprovincial Convention to the Woman's Auxiliaries of the Young Men's Christian Association of Ontario and Quebec, also opened today, the place of meeting being the Association building. As the program of the organization sets forth, the Ladies' Auxiliary is intended to give moral support to the general work, to give the Association a home-like appearance, and to assist in receptions, as well as to open homes to the entertainment of young men who may be away from home influence.

The meeting opened at 2 o'clock with Devotional services, led by Mrs. Alexander, of Toronto, followed by the appointment of Day Secretary, reading of the minutes of last convention, the Secretary's and Treasurer's reports, the appointment of Nominating Committee and an interesting address by the President. Mrs. McCallum, of Kingston, read a most interesting paper on "The Members' opportunity, which was followed by some helpful discussion.

OFFICERS GIVEN A LESSON

Hazing in the Army Has Been Put Down

London, Feb. 4—Military circles here are profoundly agitated by the sequel to the hazing of some young officers newly appointed to regiments. The London Gazette announces that Lieut.-Col. David A. Kinloch, commanding the Grenadier Guards, has been placed on half pay, and Second Lieut. Cuthbert L. Blundell Hollinshead Blundell has resigned his commission in the regiment. The practice of hazing has been very common among officers of the British army, recently. In one case, a young officer was pulled from his bed in the night, his quarters wrecked, his carpets torn up, and his furniture thrown out of the windows, simply because he devoted too much time to study to suit the taste of his brother officers, and declined to join in the sports of the regiment.

Recent cases of hazing in that crack regiment, the Grenadier Guards, have created much comment and discussion in military circles. It appears that the mother of one of the young officers hazed went to see Lord Roberts and complained, with the result that Earl Roberts, without consulting the colonel of the regiment, started a vigorous examination resulting in Col. Kinloch's retirement on half pay, and the resignation of young Lieut. Blundell. People are very sorry indeed for Colonel Kinloch, as it is not considered that he countenanced the conduct of certain wild young sparks of the regiment.

NOT OVER YET

Morocco's Sultan Still Has Trouble on Hand

London, Feb. 4—The Times' Tangier correspondent reports that the Sultan's victory over the Pretender appears to have been exaggerated. Only thirty heads and eighty-five prisoners have reached Fez so far. Although this may check the rebellion, it by no means implies that the affair is finished.

Ambassador Must Explain

Constantinople, Feb. 4—The Turkish Ambassador at Paris, Salis Munir, Bey, has been summoned here to explain the attitude of France in regard to Macedonia.

Spanish Labor Men Violent

Barcelona, Feb. 4—A meeting of representatives of twenty-three trades today voted in favor of a general strike in support of the strikers at Reus. Violent speeches were made, urging the workmen to be in readiness to destroy authority, pillage, and launch a social revolution. The authorities are preparing for trouble.

Canada's Oldest Woman Dead

Stratford, Feb. 3—Mrs. Mary Ann Mills, aged 115 years, said to have been the oldest woman in Canada, died at her home in Blanchard Township last evening. She was born in Fermanagh, Ireland, and up to a few months ago was quite active and bright. She has been a widow for fifty years. Seven of a family survive.

Miss Jones' Voice Greatly Improved

A startling improvement is noticeable—voice is stronger, and sounds clearer and sweeter than before using Catarrhozone, which is a wonderful aid to singers, speakers and ministers. Catarrhozone Inhaler insures absolute freedom from Colds, Coughs, and Catarrh, clears the nose and throat, and prevents hoarseness and huskiness. Catarrhozone makes the voice brilliant and enduring, and is uncommonly well recommended by Prima Donnas, members of Parliament, Lawyers, Doctors and thousands that use it daily. Better try Catarrhozone. Price $1.00; trial size 25c. Druggists or N. C. Polson & Co., Kingston, Ont.

Hamilton's Pills cure Constipation.

THE BYE-ELECTIONS

North York and Centre Bruce Perhaps on the 26th

Toronto, Feb. 4. It is probable that the writs for the North York, and Centre Bruce bye-elections will be issued in a few days, or as soon as the Judges' reports in connection with the disposal of the cases have been received. While no date has actually been fixed, it would not be surprising if polling day will be during the last week in February, perhaps on Thursday, the 26th.

TRAIN KILLS CHILD

A Brantford Girl Crushed While Picking up Coal

Brantford, Feb 3—Elma Smith, the ten-year-old daughter of Mrs. Smith, a widow, who resides at 166 George street, was instantly killed by a freight train here this afternoon. She and her brother were gathering coal in the Grand Trunk yards, and at the moment that she was crawling under a car, the engine shunted, and she was pinned beneath a wheel. Her head was horribly crushed. No inquest was deemed necessary, the Grand Trunk Company having repeatedly warned the children of the danger, and having even prosecuted them for trespassing.

THE LIQUOR QUESTION.

The Temperance Party Likely to Hold Many Meetings

The question of bringing pressure to bear on all representatives in the Local Legislature is occupying a prominent place in the thoughts of temperance workers. The Times is informed that the provincial leaders of the prohibition element propose to hold public meetings in every constituency in Ontario, at which resolutions will be adopted urging the passing of legislation along the lines desired, and that every effort will be made as soon as possible to induce the local representative to support such legislation. The pioneer this week urges this line of policy. A careful study of the new law which came into force in England the first of this year is being made, and it is almost certain that the Local Legislature will be asked to apply as far as practicable some of its clauses to Ontario.

It is not, however, believed, that Mr. Ross will be moved to make any radical change in the license laws.

ANGLO-AMERICAN'S REPORT

Vastly Increased Business Reported During the Past Year

The report presented at the fourth annual meeting of the Anglo-American Fire Insurance Company on Tuesday and which is published in this issue of the Times, is such as few fire insurance companies, after four years' working, could hope to compete with. Not only has the business vastly increased but the losses and working expenses have been kept down to a minimum figure. In premium incomes the company received during the year $203,716, which, with interest on its investments, brought its total income up to $206,746. After paying all losses, paying a dividend of 7 per cent. per annum, writing off the balance of the organization expenses in full, and paying other expenses in full the statement shows a balance of over $51,000, making the credit of its profit and loss account stand at $196,854.

The statement shows an increase in the premium income of the company from $54,242 in 1899 to $203,716 in 1902. As compared to 1901, without taking into account reinsurance, the premium income shows an increase of $94,969. The loss ratio to premium income and the expenses for conducting the business also showed a favorable reduction over previous years. The assets, nearly all of which are immediately available are :—Capital paid in $91,780; uncalled subscribed capital, $308,320; credit to profit and loss account, $196,854, making in all $596,954.

The directors tendered their thanks to Mr. Armstrong Dean, the General Manager, and to the staff. Mr. S. F. McKinnon was re-elected President, and Mr. J. J. Long, of Collingwood, Vice-President.

MR. ARTHUR WHITE BACK

Well-Known Railway Man Returns From Japan

Mr. Arthur White, formerly general passenger agent of the Midland Railway, Peterborough, and afterwards District Freight Agent of the Grand Trunk returned to Toronto after a trip of some months duration to Japan. Mr. White left Toronto in September and went over the proposed new route of the Grand Trunk Pacific, which, he thinks, presents no very great obstacles. While in the mountains it would be expensive. He estimates that an average of about $22,000 a mile would cover the whole situation. He was very favourably impressed with the possibilities of the country traversed by the Canadian Northern, which he found well equipped with rolling stock for freight handling. At the Pacific end of the proposed new route Mr. White encountered some remarkable hunting. Guests at the Great Northern Hotel, Port Simpson, were shooting wild duck from the windows of the hotel, and one member of a party which Mr. White took up the Work Channel shot a mountain goat, two large brown deer, a martin, about twenty ducks, and also fired three shots at a white-faced bear.

Mr. White speaks enthusiastically of the Canadian Pacific steamship service across the Pacific Ocean. On the Athenian he had an unusual experience, as the steamer was struck by a hurricane so terrific that it smashed every pane of glass on the port side of the vessel. The captain, whom Mr. White describes as a plucky fellow, turned his boat and ran nearly 400 miles back on his course, in that way saving his ship and the lives of his passengers. Mr. White tells many interesting anecdotes of his visit to Japan. He is unfortunately suffering from rheumatism, owing to the amount of driving and exposure he received at Vancouver, when a small boat in which he was sailing was cut in two by a Russian torpedo boat.

—Mr. John Primeau has been elected a member of the Separate School Board to fill the vacancy caused by the resignation of Mr. Daniel O'Connell.

$50,000 WANTED FOR SUGAR BEET FACTORY

Several Important Matters Come Before Board Of Trade Last Night

Trent Valley Canal, and Fire Insurance Rating Come in for Considerable Discussion.

The Peterborough Board of Trade met last night in the Council Chamber. Present: Mr. D. W. Dumble in the chair, and Messrs. T. E. Bradburn, W. H. Meldrum, W. O Strickland, B Shortly, T. A. S. Hay, R B Rogers, Kilgour, Kilbourn, E. J. Toker, J. W. Garvin, H. Rush, Jno. Carnegie, W Collins, W. H. Bradburn, G. W Bennet, A P. Poussette.

The minutes of last meeting were read and approved.

Communications.

A telegram was received from Mr. J. Alexr. Culverwell, regretting his inability to be present, and hoping that the Board of Trade would memoralize the Government regarding the immediate completion of the Trent Valley Canal, and advise the Boards on the route of the canal to do likewise, thus acting in concert to see that action be taken in this business man's proposition.

The President, Mr. D. W. Dumble, in introducing the subject of the Trent Valley Canal, read a memorial from the Trent Valley Waterway Association, urging the Government to take immediate steps to put the remaining incomplete sections of the Canal, under immediate contract, that all may be constructed simultaneously. The President spoke at some length on the good that must inevitably result from the completing of the Canal from a commercial standpoint, and invited the opinions of the members on the proposed memorial.

Mr. A. P. Poussette referred to an article he had read in The Times that morning which advocated that a large and influential deputation be sent from Peterborough to wait upon the Government at Ottawa and lay their claims before the Government. He thought the suggestion a wise one, and he would suggest the Board of Trade should undertake to run an excursion to the capital, with such an object in view. He had mind of a deputation in which he took part that created a most favorable impression, and resulted in Sir John Thomas giving an order that an appropriation be made in this connection.

The President said the last deputation of a similar nature had felt themselves so snubbed by the Government on that occasion that he thought it would be a difficult task to organize such a one at this time. He moreover inclined to the opinion that more good could be accomplished by sending such men like Mr. Cox and Mr. Stewart to wait upon the authorities. The deputation, too, would cost a deal of money.

Mr. Poussette said it would not cost the Board any money.

Another member thought it more important to bring Ottawa men here. Every Minister who has come to Peterborough has been impressed with the value and commercial advantages of the Canal.

Mr. Bradburn moved the adoption of a resolution that the Memorial be signed by the Board and forwarded to the Hon. A. J. Blair, Minister of Railways and Canals, and also that the secretary advise the councils on the route of the Canal.

The motion was carried.

The President then referred to the Port Hope scheme. He said the levels to Port Hope had been fixed. He thought the Port Hope route was impracticable and absurd. There were deep cuttings to be overcome, which rendered the route impossible. Boats reaching Port Hope would find themselves in the open sea, and subject themselves to storms for which the boats were unsuitable. On the other hand the Canal provided protective waters in any weather, besides the significant fact that boats arriving at Trenton would find themselves sixty miles further on their journey to Montreal than they would be when they arrived at Port Hope.

Mr. Kilbourn thought there were many reasons why the Port Hope scheme should not be chosen in preference to the present scheme, and he did not think Ottawa had any intentions in such a connection. He was watching with interest the proposed effort to effect a completion of the Canal, which he thought would be of great commercial advantage to the country.

Mr. E. J. Toker concurred with the previous speakers that the Port Hope route was an impossible one, but thought that delay may be caused if pressure was brought by Port Hope upon the Government.

Sugar Beet Factory.

The next subject brought before the Board for discussion was the proposed Beet Sugar Factory for Peterborough, and in response to an invitation of the President, Dr. Jeffs, who was a delegate of the County Council, to Berlin, gave some impressions of his visit to the Berlin factory. He said he came to the meeting as an auditor and it placed him in a rather awkward place to be called upon without preparation. He had taken some little time considering the question of the sugar beet factory, and he must say, he was very much impressed with the usefulness of the idea. At first he could not comprehend the necessity of the expenditure of $500,000 for the extracting of sugar from the beet, but when he saw the machinery necessary he was not surprised at the money necessary. He was confident of the advantage the beet sugar industry would be to the farmer. In Berlin the farmers are well satisfied with the industry, and with the result of the returns from the factory. The doctor thought that if a factory of this kind was introduced into Peterborough it would be of considerable advantage to the town, and he thought the success of the industry was unquestionable. Any farmer, he said, who can grow turnips and carrots can grow sugar beets, and he felt confident the farmers were going to take the industry up, and draw home their pulp for food.

Mr. Garvin accompanied the excursion to Berlin, and was very much surprised with the extent of the sugar beet industry. The results of his investigations were that everybody appeared well pleased with the industry, and he hoped an effort would be made to secure a sugar beet factory for Peterborough.

Messrs. Hunter, Meldrum, Collins and others also spoke, and after a discussion on fire insurance rating the meeting adjourned until Thursday, Feb. 12th.

OLD TIME LUMBERING

Four Hundred Sticks of Square Timber Cut Near Town

Four hundred pieces of square timber will be shipped in a few days to Belleville and thence rafted to Quebec where it will be sent to England. The timber was purchased standing, on the farm of the late Capt. Wallis, about two miles west of the town, and on the Tyndell farm at Chemong Lake.

Mr. Matthew Doody, of Cobourg, purchased the trees which have been manufactured into square timber. The sticks are from 20 to 80 feet in length, and remind one of the days 30 or 40 years ago, when rafts of the same class of timber were floated down the Otonabee. This is probably the last of the giants of the forests to be found in these parts.

BIG CROWD WITNESS SKATING EXHIBITION

By Mr. W. E. Genno, of Copper Cliff, and Matched Race Last Night

A large crowd was present at the rink last night to witness the matched race between Oliver Dusty and Walter Jackson, and Mr. W. E. Genno, the champion barrel jumper of the world, give an exhibition of his skill on skates. Mr. Genno is a wonder and performed many daring feats during the evening which kept his audience spell bound, as he executed his many adventurous jumps over barrels, boxes, chairs, forwards, backwards, and on one foot, for which he received deafening applause. His first exhibition was over five barrels, which he cleared quite easily and then six and seven, which he seemed to do without difficulty, and for which he received an outburst of applause. He then jumped over two, three and four, barrels backwards, while his next jump was to clear four barrels on one foot which at first seemed to the audience impossible for him to do, but the jump was made without a hitch. The next was a more difficult one over three barrels, two chairs and seven boxes. His last exhibition was a hurdle, jumped on one foot over eight barrels, 18 feet apart, which he leaped over without any apparent trouble.

The people of Peterborough will welcome Mr. Genno back, to give another exhibition, when he will be sure of a still larger crowd to witness the event.

The matched race was won by Oliver Dusty in two straight heats of 15 laps each. In the first heat Dusty took the lead, keeping it until the finish and doing the mile in 3.40. In the second heat Jackson took the lead for the first ten laps, when Dusty, jumped to the front and finished first. Time 3.23.

KEENE.

—The concert given by Mr. L. B. Spafford, under the auspices of the Keene Improvement Association, on Monday evening, was well attended, though the bad roads kept many from attending.

—The last carnival of the season will be held on Friday next, 13th February.

—Mr. Dennis Kylie, of Peterborough, is visiting at Mr. Ed. Foley's at present.

—Mr. T. G. Tully, who has been laid up for some time with a severe cold, is able to be out again.

—The hockey team will play Norwood in the near future on neutral ice. They are confident of winning the tie.

—Mr. V. McCarthy moved on to his farm a few days ago.

—The ice harvest is on now, and a great many are laying in a supply for the summer.

—Mr. P. Roach received a telegram on Wednesday informing him that his brother, Thomas, had lost his three children with scarlet fever. Much sympathy is felt for the bereaved parents.

A Sure Cure for Constipation

Some remedies cure this distressing complaint in a day, some in a month, but Nerviline never fails to cure in a few minutes. Just ten drops of Nerviline in sweetened water — that's enough, and away goes dysentery, cured to stay cured. Nerviline also cures Cramps, Colic, Pain in the Stomach and Sick Headache. It has five times the strength and curative properties of ordinary remedies, and should be in every household. Better buy a 25c. bottle and try it. Nerviline is all right.

Hamilton's Pills for the Liver.

Cleveland's
BAKING POWDER
Makes the cake and biscuit come right every time.
"I prefer Cleveland's; perfectly wholesome; always [illegible] uniform results." CARRIE M. DEARBORN, Late Principal Boston Cooking School.

Anglo-American Fire Insurance Company

The Fourth Annual Meeting of Shareholders of the Anglo-American Fire Insurance Company was held at the Head Office of the Company, McKinnon Building, Toronto, on Tuesday, the Third day of February, 1903.

The President, Mr. S. F. McKinnon, having taken the chair, Mr. Armstrong Dean, General Manager, was requested to act as Secretary to the meeting.

After reading the notice convening the meeting, the Secretary read the following Directors' Report and Financial Statement:

Your Directors have pleasure in presenting their Fourth Annual Report and the Financial Statement of the Company's business for the year ending 31st December, 1902, which is duly certified by the auditors.

The Premium income for the year ending 31st December, 1902, less rebates for cancellations, is	$303,716 58
Interest on the Company's investments	5,029 69
Total income	$308,746 27

Showing an increase in income over the year 1901 of $94,269.56.

The Company's net income for the year 1902, after deducting all re-insurance, amounts to $232,194.26.

You will note the outstanding unpaid losses at the 31st December amounted to the small sum of $1,705.00. These losses occurred during the last days of December and were unadjusted.

Result of the workings of the year shows that after paying all losses, charges and expenses, and writing off the balance of our organization expenses in full, 10 per cent. off our office furniture and Goad's plans, and paying Dividend No. 1 at rate of 7 per cent. per annum, we carry the handsome balance of $51,635.32 forward to Profit and Loss Account, making the balance now standing at credit of this account $106,854.60.

Your Directors have much pleasure in expressing their appreciation of the faithful manner in which the Manager, Office Staff, General Agents and Representatives of the Company have discharged their duties during the past year.

We cannot close this report without referring to the great loss we have sustained by the death of Mr. John Gowans, one of our most esteemed Directors, who has acted in this capacity since the inception of the Company.

Your Directors all retire, but are eligible for re-election.

S. F. McKINNON,
President.

ARMSTRONG DEAN,
General Manager.

To the President, Directors and Shareholders of the Anglo-American Fire Insurance Company:

Gentlemen,—We, the undersigned, having examined the Vouchers, checked the Bank Balances and audited the Books of the Anglo-American Fire Insurance Company, for the year ending 31st December, 1902, certify that we have found them correct, and that the Annexed Balance Sheet is a true statement as at above date.

J. P. LANGLEY,
RICHARD LEE,
Auditors.

Toronto, 27th January, 1903.

Mr. McKinnon, President—In rising to move the adoption of the Report of the Directors for the year ending 31st December, 1902, I feel it is unnecessary for me to say very much.

It is always a pleasure to meet the Shareholders with a good statement. I think you will agree with me that the report is a very satisfactory one, and that we are making steady progress in the right direction. In common with the other companies we have shared in the light fire losses that have occurred throughout the Dominion, especially the latter half of the year.

The Report of the Directors and Financial Statement now in your hands for approval and adoption, or otherwise, shows a very considerable increase in the volume of business written, and also in Premium Income.

This being the Fourth Annual Meeting, it may not be out of place to go back to the year of our inception and compare the increase made year by year.

1899, the year we commenced business, was only a broken one of about seven months.

In 1899 the Net Premium Income was	$ 54,242 96
In 1900 the Net Premium Income was	133,871 73
In 1901 the Net Premium Income was	210,[illegible] 54
In 1902 the Net Premium Income was	303,716 58

The Premium Income for the year 1902, as compared with 1901, without taking into account re-insurances, shows an increase of $[illegible]. The loss ratio to Premium Income 44 41-100 per cent., as also the expenses for conducting the business to Premium Income, 22 91-100 per cent., both of which show a favorable reduction over previous years.

Organization expenses have now been entirely written off, and therefore, for the future, will be eliminated from our accounts.

After paying off all losses, expenses of conducting the business, writing off 10 per cent. on furniture, Goad's plans, and Dividend of 7 per cent. for the year 1902, we carry to the credit of Profit and Loss for the year $51,635.32.

Turning to the "Assets" side of the Statement, you will find them in a very satisfactory condition, nearly all in what is usually known as liquid form, or immediately available.

The security for Policyholders now stands:

Capital paid in	$ 91,780 00
Uncalled Subscribed Capital	388,320 00
Credit to Profit and Loss Account	106,854 60
Making in all	$586,954 60

The Anglo-American is now writing policies from the Atlantic to the Pacific, but in the Dominion of Canada only.

This is, indeed a growing time in Canada. It is very gratifying to know that prosperity still prevails in all parts of the Dominion. All branches of trade and commerce, banking, etc., are flourishing; farmers are well-to-do and contented; labor is plentiful for those willing to work, and wages are good. Emigration to our country is increasing largely. Someone has said we are soon to become a nation. I am not inclined to dispute it.

I do not like to prophesy, but, if I did, I should say there is a great future for the Anglo-American, especially if managed on the same vigorous and conservative lines as in the past. The Anglo-American policy, when issued, or becomes a claim, is as good as gold.

The statement, "Canada for the Canadians," or "made in Canada," is as applicable to fire insurance as to steel rails or rolls of carpet. If we are to have "Canada for Canadians," let us have it in fire insurance as well as in other lines. Why pay tribute to other countries for what we can supply as well at home?

Our board, as well as the Executive Committee, comprises gentlemen of large experience in manufacturing, banking, shipbuilding, mercantile, marine, and other pursuits, and, although I have been and now am on many boards, I find that none give the same careful scrutiny to all matters of detail as that of the Anglo-American.

Reference has been made in the Report to the death, which occurred in July last, of our esteemed colleague, Mr. John Gowans, one of the foremost merchants of this city, of strict integrity and high honor. His counsel and advice will be much missed by this company. The vacancy thus caused on the board was not filled by your Directors for the balance of the term.

I cannot close without stating that we owe much of our success to the untiring care and attention to details of our Manager, Mr. Dean, who has been so ably aided by our efficient office staff.

I now have great pleasure in moving the adoption of the Report and Financial Statement, which will be seconded by the Vice-President, Mr. Long.

Mr. John J. Long, Vice-President, in seconding the resolution said: Mr. Chairman and Gentlemen,—

It affords me much pleasure to second the motion of the President for the adoption of the Report of the Directors, the Financial Statement, and Auditors' Report, of the business of the Company for the year ending 31st December, 1902.

I think it unnecessary to add anything to the very appropriate remarks of the President, but may say that when the business of a company or an individual is prospering satisfactorily, as I am happy to say the business of the Anglo-American Fire Insurance Co. is, the adoption of such a Report and Financial Statement as we have before us must without a word of comment or commendation be most pleasing to the Shareholders, and assuring to all concerned.

Our expectations of the growth and continuous success of the business of the Company, I am thankful to say, are being constantly realized. The income of the Company for 1902 was more than 44 per cent. greater than that of 1901. The proportion of working expenses to income in 1901 was 21.66 per cent., while in 1902 it was 22.91 per cent. The loss ratio in 1901 was 48.98 per cent.; in 1902 it was 44.41 per cent.

To the prosperity of Canada, to which the Anglo-American Fire Insurance Co., confines its business, and to the great care constantly exercised by the Agents, the Manager, the Inspectors and the Directors in the selection and acceptance of risks, this improvement is mostly due.

To the loyal co-operation of the Office Staff, the Agents throughout Canada, and Inspectors, with the well directed efforts of our excellent Manager, Mr. Dean, the satisfactory growth and results of the business of the Company are chiefly due.

The prospects of the Company for the year we are entering upon are bright, and I confidently hope the results for 1903 will be most satisfactory.

The following gentlemen were elected Directors for 1903:

S. F. McKinnon, Esq., S. F. McKinnon, & Co., Toronto, President.

J. J. Long, Esq., the T. Long & Brother Co., Collingwood, Vice-President.

Directors: A. A. Allan, Esq., Messrs. A. A. Allan & Co., Toronto; John R. Barber, Esq., President Toronto Paper Co., of Cornwall, Georgetown; Dr. George H. Bowlby, Berlin; A. B. Cunningham, Esq., barrister, Kingstown; H. P. Eckardt, Esq., Messrs. H. P. Eckardt & Co., Toronto; John Flett, Esq., Flett, Lowndes & Co., Limited, Toronto; W. J. Gage, Esq., the W. J. Gage Co., Limited, Toronto; John Knox, Esq., Messrs. Knox, Morgan & Co., Hamilton; R. Millichamp, Esq., Messrs. Millichamp, Coyle & Co., Toronto; J. N. Shenstone, Esq., Sec.-Treas. Massey-Harris Co., Limited, Toronto; Dr. Uriah M. Stanley, Brantford; Hugh Waddell, Esq., Peterborough; Emil Nerlich, Messrs. Nerlich & Co., Toronto.

Brunette and Blonde

A ROMANCE.

up to justice in the morning, but when morning dawned they discovered, to their grief and dismay, that the prisoner had escaped them.

Florence had learned of the disastrous failure of the attempted murder, and knew that the end had come. She secretly liberated her father, and they fled together, taking with them as lawful spoil all the costly jewels that Florence had become possessed of during her triumphant year as the earl's granddaughter. They were never seen nor heard of again by any of those whom they had so deeply and irreparably injured.

Florence's portrait was removed from the gallery, and a lovely one of Hilda soon occupied its place.

Hilda, and every one else, was surprised that Cecil Courtenaye went away suddenly the day after Lady Ethel returned, without telling any one when he would come back. It was some unexpected news in a letter from his mother that brought him back in a week.

Mrs. Courtenaye told him simply that Lady Ethel and the baronet had renewed their early troth, and that as soon as the earl recovered from his wound, they would be married. Was not her dear Cecil glad to hear of the pleasant ending of the baronet's romantic love story?

CHAPTER XXII.

"Forever Thine."

No one knew that Cecil was coming back that lovely summer morning, as there was no conveyance to meet him. He walked from the station to Lockesley Hall.

Passing through the park he heard the sound of voices near the lake. He looked, and saw Lady Ethel walking with Sir Wilfred under the trees, and Lady Leigh and Hilda sitting on the banks of the lake. He went over to them.

Hilda was looking fresh and lovely in a cool, white dress, with a bunch of white and red roses carelessly fastened in her belt. The sunshine shone down on her lovingly, the breeze caressed her dark hair with tender, viewless fingers, lifting the soft, careless locks from her fair low brow.

Cecil never forgot how deliciously she started and blushed when he went up to her so suddenly and called her name.

"You naughty boy! Where have you been?" cried Lady Leigh, shaking a playful finger at him.

"To London— on the most pressing business," replied Cecil, unblushingly.

He did not like to confess that he went away because he thought Hilda was engaged to Sir Wilfred Hale.

"Let us go on the lake and get some lilies," he said, a minute later.

Cecil was deliberately selfish when he made the remark. He knew that Lady Leigh had a nervous dread of going on the water in a small boat.

"Hilda may go," she said, ashamed to confess her weakness. "I think I would rather walk with Wilfred and Ethel. It looks too warm out there on the water."

She went away just as Cecil had expected she would do. He and Hilda went out on the lake alone.

"I would not tell Lady Leigh why I went away, Hilda," he said, "but I will tell you. I was jealous of Sir Wilfred. I thought you were engaged to him."

She looked at him in wonder, and then she laughed merrily.

"How strange," she said, "I never thought of such a thing, Mr. Courtenaye. Sir Wilfred is to marry mamma."

"So my mother wrote me," he said. "That is why I came back. I was wild to see you, darling."

Hilda did not answer. She was looking down at the water, trailing the tips of her white fingers through the rippling waves.

"Hilda, you know already how dearly I love you," Cecil went on, half pleadingly.

Hilda gave him a bright, arch glance from her sparkling eyes. She did not know how unconsciously the tenderness of her heart shone through them.

"You have saved my life once— I have saved yours twice," he said. "Does it not really seem as if we ought to belong to each other?"

"Yes," she answered, with the pretty naive simplicity that seemed to belong to her frank, sweet nature so perfectly, and Cecil realized with a thrill of rapture so keen it was almost pain, that his beautiful, brave Hilda was all his own.

After a long while they remembered that there were some other people in the world besides themselves, and they returned to the shore. Cecil went straight to Lady Ethel.

"I want to ask you the greatest fa-

A VERY DESIRABLE INVESTMENT

THE McLENNAN PAINT COMPANY
LIMITED

BUFFALO - - - NEW YORK

INCORPORATED UNDER THE LAWS OF CANADA

CAPITAL, - - - $500,000

Dividends on Preferred Stock Paid Quarterly.

For the purposes hereinafter stated, we offer at par,

50,000 of our 7 per cent. Preferred Treasury Stock Shares, $100.00 each

Payments as follows: 20 per cent. on amount of stock subscribed for at time of subscription; 30 per cent. in 60 days balance in 90 days. Receipts will be issued until full amount of stock subscribed is paid, when certificates bearing the Company's seal, and signed by the President, Secretary and Treasurer are issued. The McLennan Paint Co., Limited, have one of the most modern plants of its kind in the world, occupying 300,000 square feet of floor space. The capital of the Company is a half million dollars. The growth of the business has been phenomenally rapid and conservative. In line with other large industries, the Company propose to establish a branch factory in Canada for the manufacture of their products, which are covered by valuable patents, and which practically give the Company a monopoly, and, for the above purpose, offer at par $50,000 of their 7 per cent. Preferred Treasury Stock.

The McLennan Paint Company, Limited, was organized in 1892 by Mr. C. J. McLennan of the McLennan Dipping Process, and other valuable paint-making machinery. The Company began business in rented premises, in East Buffalo. So profitable was the business, and so rapid the growth, that large factories were built in North Buffalo in 1895. The business again doubled, and another plant was added in 1898. In 1901 the Company invented and perfected a line of reds, or vermilions, permanent in color, and at much less cost than the old line colors. This increased the sale of their products practically one-fourth, making it necessary for them to build a new Color and Chemical Works. This factory is without doubt the largest and most modern in the world. Mr. Charles J. McLennan, the President of the Company, and the inventor of labor-saving machinery, such as dipping tanks, mills, etc., is recognized as one of the most skillful and best known paint manufacturers in the country. The name and fame of this Company, and its products, are known all over the United States and foreign countries, and that they will capture the Canadian market is evidenced by the fact that many of the large Canadian manufacturers are at present using their goods, in face of the heavy duty. It is with a view to saving this 25 per cent. duty and adding it to to the profits of the Company that they have decided to establish a branch in Canada, which will be controlled and managed by the parent Company.

Practical men of means, character and national reputation constitute the directorate and management. Each department is managed by a skilled man; monthly statements rendered and careful audit made semi-annually. The books are always open to the smallest shareholder. The finances of such a concern are guarded as closely as the finances of any bank, and failure is practically impossible.

COPY OF TESTIMONIALS.

A. C. Cornell, Toronto, Ont.: Columbia National Bank, Buffalo, N. Y., Jan. 23, 1903.

DEAR SIR,—The McLennan Paint Co. are good customers of this bank, and I have known them personally for years. All the officers bear excellent reputations, and are considered good business men. Their management is evidenced by the large business they have built up, as careful and conservative. They have met with great success in the past, and I believe that today, theirs is one of the largest and most prosperous concerns of its kind. I have every reason to believe that the stock which they are now offering for sale is a desirable, as well as a safe investment. Yours very truly,

L. H. GETHOEFER, Cashier.

The Merchants' Refining Co., Refiners of Petroleum, Paraffines, Paraffine Wax,
Lubricating Oils, Residuum, Napthas, and Gasoline,

A. C. Cornell, Toronto, Ont.; Buffalo, N. Y., Jan. 23, 1903

DEAR SIR,—Your favor of 21st received, and note you are offering for sale $50,000 of the preferred stock of the McLennan Paint Company and ask me what I know of the firm. Would say I have had business dealings for eight years—transactions of many thousands of dollars. I am also doing business with other houses engaged in the same line, and desire to say there is no house in America to-day that stands higher than the McLennan Paint Co. The growth of their business has been phenomenally large, and under the conservative management of the President, Mr. C. J. McLennan, the success of the business is assured in the future. As an investment, in my judgment, nothing could be safer than the stock they offer.

Very respectfully, C. A. SALISBURY, Manager.

A. C. Cornell, Toronto, Ont.: Buffalo, Jan. 26th, 1903.

Dear Sir,—Referring to the sale of $50,000 of our 7 per cent. Preferred Stock, the Prospectus does not elaborate on the proposition, but merely mentions the amount guaranteed. I desire to inform you, however, we could have paid at least 14 per cent. last year, but carried balance to a Reserve Fund, which, necessarily, makes the stock very valuable.

Very truly yours,
THE McLENNAN PAINT CO., LIMITED,
C. J. McLennan, Manager.

P.S.—Having visited this proposition on behalf of some very conservative investors, I can verify all the above. The plant is extensive and modern in every detail; officers and management skilled and very industrious; all the products superior. This is a Canadian Company, Canadian Charter. Having built in Buffalo, in proximity to raw material, by shipping here in ground state and preparing here, will save and add large duty to already large profits. Bear in mind this is not prospective, but a large, rich, going, paying institution. Prospectus, application forms, and any further particulars, and subscriptions, address the undersigned. All cheques or drafts for stock made to the order of the Company, and forwarded to

A. C. CORNELL, Fiscal Agent,

REPORT BY EX-SUPERINTENDENT OF MINE

Cecil R. Gold Mining and Milling Co., Los Angeles, California.

Ballarat, Cal., Nov. 1st, 1902.

Gentlemen,—Your request for my opinion as to the "Santa Rosa" group of mines, and other claims in which you are interested in this territory, to hand, and in reply will say:

The "Santa Rosa" group, which is located southeast of Ballarat some three and a half miles, consists of twelve claims, equal to 240 acres. The ledge crops out more or less the full length of these claims, showing the same character and formation of work as where development work has been done. In most of the outcroppings it shows highly mineralized rock, with pyrites of iron, mica, schist, slate, slate porphyry, gouge, quartz and quartzite, all bearing more or less. Where work has been done, it shows a very marked improvement in both quantity and quality of gold-bearing rock. Commencing with the surface, the ore shows much iron and copper stain. All mill tests show good ore commencing with the surface; in fact, I milled for several days and recovered $50 and over per ton, yet the milling process does not pay more than two-thirds of the value of the ore, the tailings oftimes running as high as $25 per ton, and never less than $12.50. To save the entire value of your ore it will be necessary to install either concentrators or a cyanide plant. From careful study and frequent examination of the surface of the ground, and down as far as has been opened below the surface, I am highly pleased with the property. It is certainly a fine property, and as good as any I have ever had the pleasure of examining. Considering your mill site, with tramway facilities added, water, fuel, and cheapness of mining the ore, the Cecil R. will be capable of paying enormous dividends when your capacity for milling is increased to what it ought to be.

Wishing you every success, I remain, Yours very truly,

(Signed) G. W. [illegible],
Ex-Mine Supt. Cecil R. Gold Mining and Milling Company.

Canadian Steel and Coal Co.

CAPITAL

10,000 shares 7 per cent. Cumulative Preferred Stock, par value $100 each	$1,000,000 00
50,000 shares Common Stock, par value $100 each, issued and fully paid	$5,000,000 00
Total Capitalization	$6,000,000 00

Issue of $1,000 000 7% Preferred Stock in 10,000 Shares of $100 each at par.

This Stock is preferred both as to Assets and Dividends.

The shares are entitled to cumulative preferred dividends from the net earnings of the Company, at the rate of 7 per cent per annum, payable half-yearly on the first days of April and October. They may, at the option of the holder, be exchanged for common shares. They are subject to be called in, in whole or in part, by the Company, at 15.00 per share, at any time on or after 1st January 1909.

The total issue of Preferred Stock is only $1,000,000.00, the whole of which is now offered.

Subscriptions for 10,000 shares of $100 each of the 7 per cent Preferred Stock of the CANADIAN STEEL AND COAL COMPANY will now be received at par, that is, $100 for each $100 share as follows:—

5 per cent on application.
25 per cent on allotment.
35 per cent 30 days thereafter.
35 per cent 60 days thereafter.

One share of common, par value $100.00, given with each share of preferred.

The whole of the instalments remaining unpaid at any time may be prepaid in full. A discount of one per cent will be allowed upon the par of each share if prepaid at time of allotment.

Notice of allotment will be sent promptly by ordinary letter.

COAL

PROPERTY IN FULL OPERATION

Company owns 9,600 acres of coal property known throughout the coal trade as the New Campbellton Colliery, located on Bras D'Or Bay, County of Victoria, Cape Breton, Nova Scotia. Mine is fully equipped, producing and marketing 100 tons of coal a day at a net profit of $1.00 a ton. Improvements are now being made that will increase the output to over 1,000 tons a day. On present output, figuring 300 working days in year, the net result will more than pay interest on entire issue of preferred, with output of 1,000 tons a day net result will be $300,000 per annum.

IRON

RICHEST ORE IN THE WORLD

Company owns in fee simple, free and clear of all incumbrances, 4,000 acres of iron ore deposit, located at Natashquan (tidewater) situate on North shore of Gulf of St. Lawrence, in the County of Saguenay, province of Quebec.

Deposits contain 20,000,000 tons of ore ABOVE SEA LEVEL ALONE.

Quality of ore is highest ever discovered, running from 69 to 72 per cent. in metallic iron.

More orders for the sale of this ore have been received by the Company than can possibly be accepted, and at a price netting the Company a profit of $2 a ton F. O. B. vessels at Company's docks.

Send for prospectus giving full information as to earnings, reports, etc., etc.

STOCK MARKETS

IRON AND STEEL PROPERTIES

New York, Feb. 5.—Industrial iron and steel producers look particularly well at present. It would appear as if an upward movement were on its way in these properties. They are all doing wondrously well, and have about all the business they can attend to at present, while the prices for their shares are entirely too low commensurate with their earnings and dividends. They should be bought at current prices. Chairman Gary of the executive committee of the United Steel Corporation said, day before yesterday "At present time unfilled orders of our subsidiary companies amount to over five and one half million tons, which is the highest since the organization of the corporation. The orders now booked weekly are not materially larger than the shipments made. In many lines of products the orders booked will keep the mills busy until the early part of 1904. The demand in our lines is excellent, and there is nothing in sight to indicate a change in conditions. During the last few months prices have not materially varied, except in a very few instances where prices had been reduced to meet unusual conditions. They have since been restored."

It is an absurdity that the common and preferred stock of the United States Steel Corporation sell as low as they do. They are more than cheap. The car making companies are doing splendidly. Their reports show remarkable results. The same state of affairs exists with the Republic Iron and Steel Co., and with the American Locomotive Co. Every one of these shares will be taken in hand and advanced shortly. Merit warrants it happening. Way down in Tennessee and T. C. I. Company has been working night and day crowded with business to the utmost of its capacity. The old Bank party, so prominent in the manipulation of the stock in the past, are again buying into the shares, and there will more than likely be something doing upon the bull side very shortly. The small capitalization of the company and the financial strength of its friends cause it to fluctuate violently at times. Facts, and its present market price, indicate the next active movement in the shares will be more than likely upon the bull side. Buy some T. C. I.

BOXERS AND MISSIONARIES

Threatening Attitude in China Causes Change of Plans

Toronto, Ont., Feb. 5—Serious news was received yesterday from China, at the Methodist Mission Rooms. Rev. Dr. Service writes from Wu Hu that 'well-disciplined army of Boxers is in the field in the province of Kang Su, and that it is reported that five Imperial regiments have joined the Boxers. In consequence of these reports a party of Christian Alliance Missionaries proceeding to Kansu has been stopped by the direction of their superintendent at Wu Hu for the winter."

So far the disturbances have not reached the territory occupied by the Canadian Methodist missionaries.

ENTIRELY OUT OF THE ORDINARY

Yet one of the ways that LEAD TO FORTUNE

Why not make a small investment in oil lands right ahead of good producing wells, some having wells producing oil on adjoining farms? The oil now brings $1.50 [illegible] transportation charges, and is bound to go higher; a few hundred dollars often invested in property of this kind yields thousands of dollars profit. [illegible] company will do well to investigate this opportunity, [illegible] the advantages of years of experience, and if you don't want to drill the wells wait until the wells drilling close to you have come in and reap the benefit of their [illegible]. The oil business conducted on business principles, with honest management, is bound to succeed. You do not have to look further than the Standard Oil Co. to see what honest management founded on facts will produce; they have drawn very heavily on stocks the past three years and there is not enough of this grade of oil now above ground to run the country for more than two years, so you can readily see the profits that will be realized by starting now and obtaining the big price the Standard Oil Co. will be compelled to pay for crude oil to supply the demands of the country. For particulars write THE BADGER CO., MARIETTA, Ohio.

INTERNATIONAL ELECTRIC MINING Co.

185 SUMMER ST., - BOSTON, MASS.

A Dividend Payer for the Past Five Years.

12 PER CENT GUARANTEED

Capital Stock, $500,000. Par, $1.00, full paid and non-assessable

Over eight thousand tons of $60.00 ore mined and smelted from this group of mines.

A limited number of shares of the stock of this Company now offered at seventy-five cents per share. This price will shortly be increased to par. Stock registered by the International Trust Company, Boston, who is also the transfer agent.

This Company has a small capital stock.

The International Electric Mining Company owns seven mines and milling plant.

The Brooklyn and New York mines of this Company lie north of and join the Victor and the Hoodium—two rich mines that are now being worked by California parties. On the west lies the Electric Mining Company's mines. In these mines are millions of dollars' worth of rich ore in sight. On the south, adjoining the Berlin mine of this Company, is the Montezuma and Clipper. From the Montezuma over three million dollars has been taken within 80 feet of the grass roots.

This Company owns free and clear seven mines of twenty acres each, all containing rich ore, located in the Arabia and Trinity mining districts, Humboldt County, Nevada. The Company has worked these mines for the past five years, and is now driving a tunnel to cut out a rich ledge about 800 feet from the surface. The Arabia mining district, in which these mines are located, is a lively district—a great many men being employed there. The tunnel now being driven on the Brooklyn mine has about 350 feet already completed. When the tunnel cuts the main ledge, which has just been reached by the Victor tunnel about 600 feet, the Brooklyn will have about 300 feet stoping ground, which runs high in gold and silver, over $60.00 per ton.

The Company is offering for a short time a limited amount of stock for the enlargement of its plant and the working force at the mines and for the completion of the Brooklyn tunnel.

This Company has thousands of tons of rich ore in sight.

We are not making a lot of talk, because it is unnecessary. What the investor wants is dividends, which we have paid for the past five years. Now if you want a safe 12 per cent. investment, let us hear from you.

INTERNATIONAL ELECTRIC MINING Co.
185 Summer Street, Boston, Mass.

References furnished upon application.

THE OLD COMSTOCK

A California mining paper has this to say: "Nevada, that grand old stamping ground of mushroom millionaires, who plucked enough wealth from her prolific fields to build mansions, banks, and big hotels in San Francisco, and palaces in Paris and London, is again astonishing the world by making more millionaires and by yielding millions in gold and silver from a new field which rivals the old Comstock lode in the days of its pristine splendor. Not only in Tonopah and Arabia districts, where within the past year nearly ten millions have been exposed, are operations active, but in every mining district in the Silver State are operations active, and Nevada will once more take her place among the big producers, the peer of any of them."

Daily Nevada State Journal, January 4, 1903.

Lovelock, Nev., October 6, 1902.

International Electric Mining Co.,
Boston, Mass.

Gentlemen,—If you wish to sell your Brooklyn mine I can get you a good price for it. If it was mine I would not sell it at any price, as you have more than a million dollars of ore in sight.

G. W. OSTRANDER, Supt.

Boston, Mass., December 1, 1902.

Mr. Geo. D. Burton, Treas.,
International Electric Mining Co.,
Boston, Mass.

Dear Sir,—During the six months of October and November of this year I visited the mines of the International Electric Mining Company, situated in Arabia and Trinity mining districts, Humboldt County, Nevada. I found the country remarkably mineralized; in fact, the possibilities of the country as a mineral producing country are yet unknown. For years it certainly has produced well. The work now being done in the Arabia and Trinity districts establishes the fact that they are fine producers.

I also found that there is a great deal of interest being taken in these properties, which have produced a great deal of wealth the past quarter of a century.

M. A. LATHROP, Mining Engineer.

GILPIN COUNTY

IS THE OLDEST GOLD PRODUCER IN COLORADO

In 1902 she produced $4,000,000.00.
Here is where Hundreds have been made Millionairs.

THE ELECTRIC SPARK GOLD MINING COMPANY

Is in this famous little kingdom, and is surrounded by mines that are making their owners wealthy.

CAPITAL STOCK $300,000 Par Value $1.00

We are working this mine every day doing a great amount of development work which will enable us to commence regular shipping very soon. Our shaft is now 175 feet deep, with a streak of pay ore starting at the grass roots, the vein is over 3 feet wide at the bottom of shaft and runs from $46.00 to $88 [illegible] per ton mostly gold. We are only three-quarters of a mile from railroad and have a well traveled wagon road from mine to depot. There are thirteen stamp mills at Black Hawk, three-quarters of a mile from this property. Our company is managed on conservative lines by practical mining men who understand the business and are familiar with this field of gold.

We have placed a small block of this stock on the market at 20 cents per share which will be worth $1.00 in a short time. Now is the time to buy.

The Electric Spark Gold Mining Company,

Mining Securities Company
805 Temple Court, New York

BUY! WHY?

BECAUSE

THE SOUR LAKE OIL CO.

Has placed four-fifths of its stock in the treasury for development work; and because

Oil is reached in less than half the depth required on Spindletop Heights in Beaumont;

The people in Canada are well acquainted with the management, which is in the hands of HON. JOHN L. BITTINGER, United States Consul General to Canada; F. S. Ashley, Vice-President of the Massachusetts Securities Co., and W. L. Marston, Vice-President of the American Union Oil and Refining Co.

These gentlemen have made a dividend payer out of one company and have raised the value of its stock from 5c per share to par value, or 25c, within a very short time;

The company is operating in the Sour Lake field, where fewer wells will tap the oil than at Spindletop; this insures a greater flow of oil, and it is of a better quality;

This is the first allotment of shares at the present price of TEN CENTS PER SHARE; it is the lowest price at which you can buy, and the time left in which to buy at TEN CENTS is short.

Make remittances and inquiries direct to

WN AND COUNTY NEWS

ASHES HERE AND THERE BY TIMES' REPORTERS

An Open Meeting

The Times is requested to state that Daughters of England will hold open meeting in their hall, Hunter treet, this evening. All members are quested to attend.

Jewellers to Close

The jewellers of the town have reed to close their respective places business every evening at 6 o'clock cept Saturday night and nights preceding public holidays, the month of ovember and December excepted.

A Sad Death

The deep sympathy of the public will extended to Mr. John Kylie in the eat loss which he has sustained in death of his youngest daughter, which took place yesterday orning. The little girl had been for about three weeks from the gestion of the brain. It is a blow to Mr. Kylie, who has lost even children in almost as many ears. The funeral will take place is morning at nine o'clock from the family residence, Hunter street, to he Roman Catholic cemetery.

Mr. Nicholl's Return

Mr. D. McNichol, Second Vice-President and General Manager of the P.R., passed through town last ight on his way to Montreal. Mr. McNicholl had been on an extended our of inspection extending over everal weeks. He stayed over for a ay in Toronto, in connection with the ouble track which the company intends laying on the Esplanade. The company contemplates purchasing ore land on the south side of the Esplanade, and application therefore has een made to the Minister of Railways.

The Story of Morning Tiredness

is told by impure blood, poor digestion, sluggish liver and tired nerves. It is a warning of very serious trouble ahead, and should prompt sensible people to take a bracing tonic like Ferrozone, an energetic invigorant and rebuilder. Ferrozone will give you a sharp appetite, promote good digestion and sound sleep; it will feed and energize the enfeebled organs, strengthen the nerve and vital forces and regulate the heart. Ferrozone changes that tired feeling into vigor, strength and ambition, and does it quickly. Remember the name, and insist on having only Ferrozone; it's the best tonic made. Price 50c. per box, or 6 boxes for $2.50, at Druggists, or N. C. Polson Co., Kingston, Ont.

THERE IS A COLD SNAP COMING

but a WARM SNAP in prices at the old reliable firm of PETE SIMONS & CO. will make matters right. He quotes the following red hot prices:

7.00 Overcoats reduced to $ 4.00
20.00 Overcoats reduced to 14.00
4.50 Peajackets reduced to 2.50
7,00 Peajackets reduced to 4.50

LITTLE LOCAL LINES

—Saturday bargain day at Times Bookstore.

—Easter Sunday this year falls on the 12th of April.

—The Board of Health will meet this afternoon at four o'clock.

—A choice lot of fancy and comic Valentines now on sale at Times Bookstore.

—Hastings Star: R. M. Dennistoun, barrister, of Peterborough, will give an address at St. George's church, Hastings, on Sunday morning, and at St. James church, Roseneath, on Sunday afternoon on behalf of diocesan missions.

—A branch of the Master Horse Shoers' Association was organized in Norwood last night by Messrs. .W Kennedy, R. McGill, Ald. Jos. Batten and Ben Yelland of town.

—The Times received what is probably the largest single shipment of ledger paper ever brought to town. It consisted of nearly three tons of paper, which is to be made up into blank ledger books for a leading financial concern by The Times bindery.

—Mr. F. Might, of the J. C. Turnbull Co., is having his premises remodelled, so as to make room upstairs for the mantle department which has outgrown the space formerly allotted to that special trade on the ground floor.

—On Saturday, Jan. 25th, Maggie Groves, a young woman who was employed as a domestic at the home of Mr. I. Lane, Stanwood, Seymour township, committed suicide by deliberately swallowing two ounces of carbolic acid, causing almost instant death. The deceased was 20 years of age, and her home was in Dummer.

SOCIAL AND PERSONAL

—Mrs. R. P. Gough, of Torotno, is visiting her sister, Mrs. H. LeBrun.

—Mr. F. J. Elmhirst, Peterborough is registered at the Brunswick Hotel, Winnipeg.

—Mr. Wm. Moindoo, Pontypool, was in town yesterday and gave The Times a call.

—Miss Ivy B. Fisher, granddaughter of Mr. Robert Walton, returned home yesterday morning from a three weeks' visit to Norwalk, Ohio.

—Mr. Frank Conroy, of Ashburnham has gone to Battle Creek, Michigan, to visit with his brother, Dr. R. J. Conroy, formerly of town.

—Mr. C. B. Routley, our enterprising merchant, has been in Toronto for several days on business.

—Mr. and Mrs. Sterling Emrie, who have been residing in apartments in the Grand Central leave town today to take up their residence in Toronto.

—The many friends of Mr. T. Campbell, Warsaw, will regret to learn that he is seriously ill, and is now confined to his bed.

—Mr. Sisson, of Cold Springs, Otonabee, who was stricken with paralysis some months ago, is not recovering as fast as his many friends would like. He is now, we are sorry to say, confined to his room.

—Dr. and Mrs. Willis who have been residing with Mrs. Wm. Scott, Water street, for some time, leave town this morning for the balance of the winter. Mrs. Willis goes to Sherbrooke, Que., while the doctor will go to Savannah, Georgia. Later on Mrs. Willis will be joined at Sherbrooke by her sister, Mrs. Lucke, of Mexico. They will visit Washington. Their many friends in Peterborough will wish them safe return next summer to their beautiful lodge on the Otonabee River.

THE CEMENT INDUSTRY

To the Editor of the Morning Times:

Sir,—In your Monday's issue you refer to the opinion of City Engineer Hunt, of Toronto, in regard to the threatened abundance over production of cement in Canada. A few facts relative to this will not, we trust, be without interest to your readers. In 1902 the consumption of cement in Canada reached its highest point, namely 1,040,000 barrels. Of this 640,000 were made in Canada, and 400,000 imported. Prior to 1902 only three companies were engaged in the manufacture. In the year 1902 no less than five additional companies got under way, several of them, however, did little more than get started and supplied only about 100,000 barrels. In the year 1903 we shall have all the old factories in operation and with largely increased outputs, and also the five new companies above mentioned, the output will then be for 1903, 1,600,000 barrels, that is to say over 600,000 barrels more than the total consumption of last year, exclusive of whatever may be imported during this year. In view of these facts you will perceive that the warnings contained in the Monetary Times and Mail and Empire to which you refer, as to the danger of over-production, were well timed and should be carefully heeded by the investing public. But when we tell you that in addition to the five new companies so started last year, we have ten more new companies now being floated in this country, which are to have, according to the promoters, a combined capacity of 10,200 barrels per day, equal to an annual capacity of about 3,000,000 barrels, you will see the utter folly of putting money into more cement enterprises. Here is a list of the ten new companies with their promised output.

	Barrels per day.
The Manitoba Portland Cement Co., Winnipeg	1000
The Western Canadian Portland Cement Co.	1000
The St. Mary's Portland Cement Co.	1000
The Colonial Portland Cement Co., Wiarton	1000
The Raven Lake Portland Cement Co.	1000
The Blue Lake Portland Cement Co., Brantford	600
The Superior Portland Cement Co.	600
The Kingston Portland Cement Co.	1000
The Belleville Portland Cement Co.	2000
The International Portland Cement Co., Hull	1000
Making a daily product of	10,200

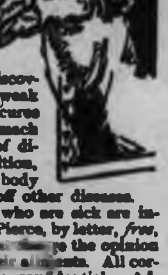
It is clear than that whatever money is made in Canada out of the cement industry hereafter will be made in promoting companies, not in operating them. It is said that the gentlemen who, two years ago, floated the Durham Company, cleaned up a half million of dollars out of the flotation, on a capital of $1,000,000. The same gentlemen are now promoting, in different parts of the country, several new companies on a scale still more ambitious than the Durham Company. For instance the Belleville Portland Cement Company is to have a capital of two and a half millions of dollars and an output of two thousand barrels per day. Can they be putting any of their money in them? If the flotation of the Durham Company could yield the promoters a half million, fairly makes ones mouth water. These promoters far surpass Engineer Rust, as dispensers of satisfaction. They gravely assure us that cement can be made in this country and profitably exported to the United States, notwithstanding the fact that nearly all cement machinery comes from the United States and is subject to heavy charges for freight and duty, and that the coal for burning the cement is all imported from the United States and costs here double what it costs there, and that the actual cost of burning cement alone is more than they pretend they can make cement for.

But then, let the promoters take courage—a sucker is born every minute, and the fools are not nearly all dead yet.

Yours,
AN OLD SUBSCRIBER.
February 5, 1903.

THE CAMEL'S HEAD.

"Where the camel's head goes his body follows," says an Oriental proverb. It's the same way with disease. A small opening will give it an entrance and when disease once has a place in the body a large number of ills may follow it.



The opening for disease is often found in a "weak" stomach. When the stomach is "weak" the body also becomes weakened by lack of nutrition, and disease attacks the heart, liver, lungs, kidneys and other organs.

Dr. Pierce's Golden Medical Discovery makes the weak stomach strong. It cures diseases of the stomach and other organs of digestion and nutrition, and so enables the body to resist or throw off other diseases.

Men and women who are sick are invited to consult Dr. Pierce, by letter, *free*, and so obtain without charge the opinion of a specialist on their ailments. All correspondence strictly confidential. Address Dr. R. V. Pierce, Buffalo, N. Y.

"For the past two years I have been a very sick woman," writes Mrs. Chesley, of 108 Woodland Ave., Cleveland, Ohio. "I tried medicines from doctors and to no avail. At last I decided to try Dr. Pierce's Golden Medical Discovery. When I started I was all run-down and had a very unpleasant taste in my mouth. Was choked up, and at times it was very hard for me to breathe. I had severe headaches and cutting pains in my knee joint. Was so weak I could not attend to my work nor walk up or down stairs without the assistance of my brother or some friend. I am now taking the fourth bottle, and am happy to say I feel like myself again. I can go up and down stairs and perform my duties as well as any one. Everything seems to be brighter, and I can assure you that life is worth living."

Accept no substitute for "Golden Medical Discovery." There is nothing just as good for dyspepsia or debility.

Biliousness is cured by the use of Dr. Pierce's Pleasant Pellets.

INDIAN RIVER.

—Mr. Peter Butler, of Hastings, is at present a blacksmith with Mr. A. Whibbs.

—The people here are pleased with Mr. Duff's broad views: as regards our roads in the lower part of the township.

—Mr. A. Whibbs is erecting a new weight scales for Mr. Torpey, live stock merchant, of our town.

—Mr. John Devlin, has an increase in his family of a daughter.

—Mr. Twomey, of Keenemore, is at present visiting at Stephen Murphy's.

—The school, No. 1, Douro, which has been closed for some time on account of scarlet fever, will re-open on Monday, February 9th.

—Miss M. Moloney, trained nurse, of the Nicholls Hospital, Peterborough, is at present nursing a case of scarlet fever at Mr. Leach's.

APPLICATION TO PARLIAMENT

NOTICE IS HEREBY GIVEN on behalf of the Corporation of the Town of Peterborough, that an application will be made to the Legislative Assembly of the Province of Ontario at the next session thereof for an Act for the following purposes.

1. To amend 62 Victoria (2), Chapter 71 by striking out the following words in the first subsection of the second section thereof, namely, the words "at any point thereon south of and in no way using power obtained from the dam known as the Nassau Dam on the said River Otonabee" in the 3rd, 4th and 5th lines thereof; the words "for Municipal purposes only" in the 17th line thereof, and the words "except commercial lighting or private lighting" in the 18th and 19th lines thereof, and for such other amendments thereto as may be necessary to remove the restrictions imposed on the said Corporation by said subsection.

2. To authorize and empower the said Corporation to erect and maintain poles and other appliances on the streets and public places of the said Town for the transmission of electricity in and through the said Town of Peterborough, and to charge a rental therefor, and to make regulations for the use, management, maintenance and control of same, and to enter into agreements with any company, firm or person now or hereafter supplying electric energy to the inhabitants of the said Town for the use of said poles and appliances on such terms as may be agreed on.

3. To authorize and empower the said Corporation to issue debentures of the said Corporation without the assent of the rate-payers for the sum of $7000 to meet the deficiency on the sale of waterworks debentures issued for the purchase of the waterworks.

4. To authorize and empower the Commissioners of the Waterworks to form a contingent fund and to retain out of the revenues derived from the said waterworks an annual sum not exceeding one-half of the net revenue for that purpose.

Dated at Peterborough this 29th day of January, 1903.

THE PROPOSED BONUS TO SUGAR BEET FACTORY

Some Important Information Regarding the Sugar Beet Industry

TOWN TO BE ASKED FOR A LARGE BONUS

Which Will be in in the Shape of Stock and Bonds to the Amount of $50,000

Considerable interest is evidenced in many quarters regarding the proposed sugar beet factory to be started in Peterborough, and much important information relating to the sugar beet industry has been brought before the public notice in the past few days.

The farmers in the neighborhood of Billieboro showed their enthusiasm upon the subject by turning out to a large meeting held in the vicinity recently, and it would appear that a favorable impression was created by those who spoke in the interests of the industry. A resident of Baillieboro, who was one of the parties chosen to experiment for the Government two years ago, expressed himself as quite convinced by his experience that no other crop or industry would give such good returns to the farmer. His experiment in growing better at $400 per ton would have brought him $60.00 per acre as the Government test gave him 20 tons; and this, he thought, was lower than it might have been.

The gentlemen who spoke on the subject of the industry at the meeting of the Board of Trade last evening, were, in most cases of the opinion that the industry was one worthy of the attention of farmers. Several gentlemen gave their impressions resulting from an investigation into the condition of the industry as practised in Berlin, which would lead the opinion that the farmers in that district are more than satisfied with the results of their work in this connection. It would appear that very little capital was required to grow beets, and it was contended that the industry would build up the land and rid the country of weeds. The beets would be grown, cultivated and harvested with little more than any other root crop. The industry was as directly related to the farmer as cheesemaking and dairying, and it meant the production and manufacture of a staple article of commerce directly from the raw material produced off the farm in the factory. It was the opinion of other speakers who spoke at the Board of Tarde meeting that the beet raising was far more profitable to the farmer than the growing of grain. In fact, it was averred that grain was no longer a source of profit to the Ontario farmer, and that some industry must be sought by him to go hand in hand with dairying and hog raising, which were now his principal sources of profit. It was thought that this desired acquisition was found in the cultivation of the sugar beet.

Another feature of the business is that the pulp is a very valuable feed for cattle, hogs and sheep. It was thought to be as good a feed as turnips and mangolds, and is not pressed as some farmers imagined, but is in strips as it came from the pulper. Some interesting figures obtained from a practical farmer, showed a preponderance of profits in favor of sugar beet cultivation, as against wheat growing, and it would seem that, the said figures proving reliable, there is little doubt of the advantages of the industry to local farmers.

With reference to the proposed factory for Peterborough, it is estimated that the sum of $665,000 would be required for the erection of the the building, purchase of land, railway sidings, barges, etc., and to equip the factory with modern machinery. It would also mean an additional outlay for beets alone of from $250,000 to $350,000, whilst the acquiring of coal, coke, lime, barrels, labor, etc., would call for an additional expenditure of $250,000 annually. The company would be prepared to accept beets on board cars or barges at various convenient points along the railways and rivers or lakes, the company to provide the cars and barges, the farmer to pay freightage of not more than 50c. per ton by cars and 30c. per ton by barges.

Much enthusiasm was manifested by some of the speakers at the Board of Trade meeting, in reference to the benefit the factory would confer upon our town, and it was thought that no other crop or industry would give such good returns to the farmer. Any factory in Peterborough was a good thing for the farmer, as the extra consuming capacity brought in by such factories gave the farmer a better market. One speaker proposed that the people of Peterborough as a corporation purchase a block of $25,000 of stock, and $25,000 of bonds in the new sugar factories. He hoped the Board of Trade would lend its valuable assistance in the establishing of this great factory in our midst. He was confident it would be a move in the right direction.

The subject really is a most interesting one. The introduction of any industry in our town which has the likelihood of contributing to its general prosperity should call forth our best energies to further its promotion. Further developments will no doubt prove of service in aiding us to form more definite opinions, and providing the industry can be shown to open out such a profitable yield as present reports would lead us to believe, there is little doubt the farmers and capitalists of Peterborough and district would only be too willing to lend their efforts towards helping on the proposed factory.

An interesting special meeting of the Board of Trade will be held on Thursday, February 12th, in this connection. The delegates who were sent to Berlin for the purpose of acquiring information, and studying the conditions of the beet sugar industry there, will submit their report. There will no doubt be a large attendance, and some important steps may be taken as a result of this report.

THE CENTRAL FAIR

How a Well Conducted Race Track Advertises a City

A Few Pointers to the Managers of the Central Fair and the Turf Club

The Times has been requested to publish the following, written by Mr. Palmer L. Clark, in the Chicago Inter-Ocean:

Opinion seems to be divided as to whether the city makes the race track a success or the race track is of more value to the city, but the best of evidence exists in favor of both sides, as is the case when the question arises as to whether a track should be controlled by one man or by an association. I am of the opinion that the city can be too large as well as too small for any man or association to profitably maintain a race track exclusively for harness-horse meetings, owing to the many counter attractions, the indisposition of business men as a whole, and the fact that the expense of properly advertising the events would run up to a greater sum than the possible gate receipts would justify. As to the second question, it all depends upon the one man or the association. The former, if good, is better than the latter, if poor, while the association if composed of the right kind, that will give its undivided support to an experienced secretary, is much the best for the track, the city, and all concerned.

Lexington, Ky., offers the best illustration of what a properly located and equipped race track and fair grounds can do for a city under the supervision of an association composed of the best business men who have the welfare of the city and the sport at heart and lend their help to a competent secretary who has the active management of affairs under his personal supervision at all times. The Kentucky Breeders' association was organized three years ago, when Lexington boasted a population of some 20,000, about one-half its present size, and the increase is due more to the efforts and success of the association than to all other interests combined. Two hundred and sixty shares of stock were issued at a face value of $100 per share to as many of Lexington's best citizens as could be induced to subscribe. Officials and directors were chosen from the stockholders, and, including the changes from time to time, have represented the leading commercial, financial and manufacturing interests of Lexington. They have always aimed to secure a secretary of recognized ability and experience, and have paid him liberally to devote his entire time to his official duties, never interfering with the details and looking only to the results of his labor. From the first an unwritten law has prevailed that no dividend should be paid on the capital invested. As the stock was scattered in small lots, this plan has never been a hardship to any one, and it has enabled the directors to enlarge the plant as increasing success demanded, inaugurate annual futurities and other rich stakes on broad and liberal plans that have in time become profitable in themselves. To-day the association stands at the head of the list from every standpoint. The grounds and buildings are worth over $100,000. Five times this sum invested in any other way would not begin to advertise Lexington and bring to the city as much outside money and trade as the Kentucky Breeders' association under past and present methods.

AN EMPLOYERS' ASSOCIATION

A Branch to Be Formed in Peterborough at an Early Date

The Times is informed that a branch of the new Employers' Association is likely to be established in Peterborough. The Association is the outcome of organized labor, and is intended to unite the employers in order to deal with strikes and labor troubles of every kind.

It is claimed that such an association will protect the weaker employer, as it provides for arbitrating all differences, and effects peaceful settlements where possible. When unreasonable demands are made, and peaceful means of settlement do not prevail, the Association will give the employer all the assistance and protection in its power.

NEW CITY DAIRY COMPANY

Disposal of Stock Fulfils All Expectators

Company Expect to Commence with a Business of From 300 to 500 Gallons Daily

The directors of the newly-organised City Dairy Company, of Peterborough, report that the sale of stock in the new concern is so far eminently satisfactory.

Already a number of the largest milk producers and vendors are interested in the promotion of the company, and are prepared to hand over their business and goodwill. This would appear to ensure success from the outset. The company expects to commence operations with a business of from 300 to 500 gallons of bottled milk daily, apart from the supply of cream and fresh creamery butter.

The benefits which the company will be able to confer upon the consumer by the supply of milk, cool, sweet, and free from disease germs, unfortunately so prevalent in this product, should, we think, ensure a large patronage.

We have in mind a similar concern in one of the principle cities that has so gained the confidence and appreciation of the people, it had grown to be considered a real public benefit, and we have little doubt this present company will in a little while be held in similar esteem in Peterborough.

It is an undertaking worthy of the co-operation of townspeople. Many of the most fatal diseases are constantly being traced to the milk supplied by ordinary means, and there is little doubt the carelessness in handling milk is responsible for considerable disease and death especially among young children.

The new Dairy Company propose to secure its supply of milk from producers whose cows are given pure water, and properly fed and kept clean. The company's own vetinary surgeon will examine each cow, and all stables and surroundings will be kept and milking done according to rules laid down by the company, and under constant inspection.

Besides all this the vessels and bottles used will be sterilized by superheated steam, and the cans used by the producers for the purpose of delivering milk at the dairy will be washed, cleansed and sterilised by modern machinery.

The company is prepared to deal liberally with all local milk dealers who wish to sell their trade or join in with the concern, and judging by the interest evidenced and the patronage already given, we think it is safe to predict that the City Dairy Company will soon be in successful operation.

EQUITY INSURANCE COMPANY

Another Prosperous Year Indicated by the Annual Report

The Director's report of the Equity Fire Insurance Company, read at the fifth annual meeting of the Company, recently held in the Company's office, Toronto, shows a prosperous year just closed. The premium income has increased from $126,980 in 1901, to $175,231.74 in 1902, the net excess of income over expenditure being $25,406.73 out of which a dividend of six per cent. has been declared upon the paid up capital. The directors felt, also, that the results justified a two per cent. cash bonus to the shareholders. With the dividend and bonus paid there remains the very handsome sum of $21,406.79 out of the year's business to add to the reserve, which now stands at $66,860.18.

The President, in moving the adoption of the report said it was pleasant to note that prosperity was more general in the insurance field for 1902 than some time previously. Not only had they reason to congratulate all concerned upon the success that had attended their efforts during the past year, but they expected a substantial increase of business during 1903, and urged that the influence of the shareholders be exercised to contribute to this end.

The short history of the Equity Fire Insurance Company shows a record of splendid accomplishments and the Company is now well established in the confidence of the public. With the watchfulness in the selection of risks, that has characterized the company in the past, and the loyal support of the general staff, there is every reason to expect a still more gratifying report at the end of the present year.

SECOND DAYS SESSION Y.M.C.A. CONVENTION

Many Important Matters Discussed by Delegates Yesterday.

Thoughtful Paper by Mr. F. S. Goodman, New York, Upon a Topic of Vital Interest

There was a large attendance of delegates at the opening of the second day's session of the Y.M.C.A. convention in Murray street church yesterday morning. The meeting opened at 9 a.m., with a song service, ably conducted by Mr. H. M. Gilchrist, of Stratford. A pleasant feature of the programme was the half-hour devoted to introductions, each delegate giving his name and that of his Association.

The programme called for the Rev A. Orr, of Pittsburg, Pa., to conduct "An Hour With the Word of God," but that gentleman was unfortunately unable to attend, and the devotional services were conducted by Mr. C. M. Copeland, of Toronto. The text was taken from the 20th chapter of Acts, and many helpful, practical suggestions were drawn from the lesson.

Mr. A. L. Breithaupt, the newly elected president, took the chair at 10 o'clock. A telegram was read from Rev. Dr. Johnston, of London, regretting his inability to be present, after which the chairman announced the convention committees.

OPPORTUNITIES.

"Our Opportunity in View of Our Young Men," was the subject of a topic by Mr. F. S. Goodman, of New York. In the course of an interesting study of the religious meetings and personal and foreign work of the Ontario and Quebec Association, the speaker considered it significant that so much time should be given to religious work in the Convention. The work of the Y.M.C.A. was in a large and true sense religious, and time spent in this feature was very important since religion would have to do with the development of all the departments in their turn.

The Association was capable of greater spiritual force, and it was desirous that it take a greater grasp of religious work, to make Christian men and to develop their social, physical and intellectual forces in their best capacity to the glory of God, and the benefit of their fellows. The religious department was as the life blood circulating through the extremities of Y.M.C.A. work. The field was the membership, which in Ontario and Quebec amounted to 12,800 men. Of this it was approximately estimated that 65 per cent. were non-Christian and the remaining Christian, and that there were 25,000 men who though friendly to the Association were not members. The directly approachable field, therefore numbered about 40,000 men.

Work among the sailors, meetings in opera houses, goal meetings and the study of personal responsibility among those at present inactive were means towards the solution of this great problem.

The discussion was heartily entered into by the delegates.

The speaker then discussed the development of personal and organized Bible study in the Association, and said the four wheels of the Y.M.C.A. chariot were, Bible study, religious meetings, personal work, and missionary extension. The boards of managers, the secretaries, the committee men, and all workers of the Association were responsible in the duty of spreading the gospel in that field directly at hand. The meeting closed with prayer.

AFTERNOON SESSION.

There was a very large gathering at the afternoon session in Murray street church. Rev. Dr. Harris, of Toronto Bible Training School gave an interesting Bible Study.

The theme of the Reverend Doctor's discourse was the great portraits of Christ as drawn by the apostles in the three synoptical Gospels, Matthew, Mark and Luke. The four gospels are selections out of the great mass of matter provided by the life of Christ on earth, and he would write over the first page of each of the Gospels the following significant headings: Matthew, Sovereignity; Mark, Service; Luke, Sympathy; John, Salvation. Matthew presented Christ as the King; Mark, the Servant; Luke, the Son of Man, and John as the Son of God. It was necessary to take the first four Gospels to get the true character of Christ.

Concluding the Rev. doctor said the Bible proved to be inspired as much by what is not said, as by what is said. In its silence, as in its speech. It was an impressive address, full of helpful and instructive suggestions to Bible students.

The general Convention adjourned at 3 o'clock, that the delegates might attend the various parlor conferences.

The Directors' Conference, the students conference and the Railroad conference were held in the Murray street church and were presided by Messrs. Robert Kilgour, Toronto; R. J. Colville, Toronto, and N. D. McLeod, Ottawa, respectively.

The Physical Work Conference presided over by by Mr. J. E. Merritt, Montreal; the District Work, presided over by T. J. Wilkie, Toronto, and the Boys' Conference took place in the Association Building. A banquet was tendered to the delegates in the Association Building, commencing at .20 when several informal addresses were delivered.

EVENING SESSION.

The evening session was held in St. Paul's church. Again there was a large attendance of delegates. The meeting opened with song, after which Mr. Frank Yeigh, Toronto, was called upon to deal with the topic, "Our Opportunity in View of the Young Men on Ontario and Quebec."

The speaker spoke with authority upon a theme with which he appeared most familiar. It was important that their best efforts should be brought into service to the bringing into the ranks the needy young men.

An interesting discussion followed.

The next speaker was Mr. John Penman, Paris., Ont., who dealt ably with the question "What have we Done in View of Our Opportunities." He reviewed what was at present being done by the Association, and invited suggestions for future aid.

Mr. F. S. Goodman, New York, dealt with the topic: "Conditions Essential to Making the most of our Opportunities," which was productive of many useful suggestions for obtaining the best possible results from the Association Work.

The meeting adjourned with prayer.

HIS BACK BROKEN

Deseronto Man Named Blatchford Struck by a Freight Train

Deseronto, Ont., Feb. 3.—About 6.20 last night a man, named Blatchford, about 56 years of age, was struck by a G.T.R. engine at Deseronto Junction and had his back broken and head badly cut. He was walking on the track at the west end of the yard, and in getting off one track to save himself from an approaching train, he got in front of a freight train moving slowly in the opposite direction. He was sent to the Kingston General Hospital this morning.

RELICS OF PAARDEBERG

Chamberlain Views the Scene of the Great Battle

London, Feb. 3.—The Times has a despatch from Paardeberg saying that Mr. Chamberlain arrived in that South African city on Saturday and spent two nights in an encampment pitched near the scene of Cronje's surrender. Very few landmarks of the battlefield have been effaced. Some of the trenches are becoming filled, but the debris, such as burned wagons and bleached bones of animals, still bear witness to the long resistance of the Boers. Two more Boer rifles were discovered in the river bed, and bullets and cartridge cases and shells abound.

The Marvellous Agent That Brings Happiness and Joy to Sad Homes

Paine's Celery Compound

Full of Virtue and Power Saves Life When Everything Else Fails

Fathers, mothers, brothers and sisters should all be interested in making home happy and joyous. Home cannot be a bright spot while some loved one is laid low by disease and suffering. Too often, the efforts of physicians are vain and fruitless, and the iron hand of death snatches away some loved one, and we are left to mourn.

Today, thank Heaven, there is a strong and mighty helper that we can bring into our homes for the rescuing of our loved ones. It is Paine's Celery Compound, the precious prescription of one of the noblest physicians that ever lived. No living mortal can form an estimate of the blessings that Paine's Celery Compound has carried into the dwellings of our country. It has revived spent hopes, banished tears, brought smiles to the faces of sad ones, because it has saved lives at the eleventh hour. Thousands of bright, strong and thankful letters of testimony continually pour in, telling of perfect restoration to health after years of suffering. Mrs. J. Valliere, Dorchester St., Montreal, says:

"I think it my duty to advise you of what Paine's Celery Compound has done for me. I was terribly inflicted with inflammatory rheumatism. I tried a vast variety of medicines, but all proved failures; I also spent much money with doctors, but never got any relief. I took the advice of a friend and used four bottles of Paine's Celery Compound, with the result that I am now perfectly cured. I think it the best remedy in the world."

THE GERMANS ARE VERY ANGRY, ARE MUCH INFLAMED AGAINST AMERICANS

"Insolence of the United States is Resented—Official Views are More Hopeful.

REAL GERMAN OPINION

Anglo German and Anglo-American Relations had been Gravely Compromised

London, Feb. 6—The Berlin correspondent of The Times says that a feeling of relief was caused by the news that has been received at the German capital from Washington during the past two days. It was felt since the recall of Ambassador Von Holleben that German policy with reference to German-American Anglo-German and Anglo-American relations had been gravely compromised but now it is hoped that Count Von Sternberg will save the situation by showing at some critical juncture a slightly more accommodating temper than Ambassador Herbert.

Real German Opinion.

The real opinion of German influential circles may be gathered from papers like the Kreuz Zeitung and the Tagliche Rundschau. The latter publishes "from a valued correspondent," a communication confirming that newspaper's opinion that "the insolence of the United States of America, fostered by the inexhaustible complaisance of Europe, has reached a pitch which is simply unbearable."

Canada's Part in South African War

Ottawa, Feb. 6—A supplementary report has been issued by the Militia Department, giving the details of the organization and despatch to South Africa, of the Canadian Division, South African Constabularly, the second, third, fourth, fifth and sixth regiments, C.M.R., and the 10th Field Hospital, and the services rendered by these corps while in the field, including the 3rd Batallion, R.C.R., which relieved the Leinster Regiment at Halifax. Canada raised clothed, equipped, and paid a force of 8 373 men of all ranks at a total cost of $2,830,965. The expenditure on the contingents was $1,996,867, whilst the sum of $834,097 was paid out in connection with the Third Special Service Batallion at Halifax. Of the total force of 7,368 that went to South Africa, 224 died and 252 were wounded. The number of killed was 63. Thirty-one died of wounds, 127 succumbed to disease, one drowned and two reported missing.

THE WORKINGMEN'S EDUCATION MOVEMENT

Lecture to be Delivered Under the Auspices of Trades and Labor Council

All right thinking men should aid the workingman in their present campaign of education. The labor movement has forged its way through many successes and many reverses to a higher plane than ever before. The coming lecture in the Opera House on Friday, February 13th., ought to be largely attended by all those who have the good of the toiling masses at heart, as well as by those who feel the necessity of finding some way to stop the conflict between capital and labor which has done so much damage in both England and America. The lecture will not be merely a defence of labor, but a careful and impartial examination of the whole field, as it is at present, of both capital and labor. These meetings are being held in all countries just now in connection with the workingmen's education movement. As it is the firm conviction of all moderate-minded men that education is the solution of the differences between capital and labor the general public will do well to encourage the workingmen by being present. It has been only too true heretofore that the well-to-do have failed to interest themselves in the movements of labor, apparently siding with capital as against labor. A chance has now arisen in this conciliatory attitude of the workingmen, who are inviting rational discussion of the question and a sympathetic interest, for the public at large to show that they are in earnest in their desire to do the fair thing by both parties. If in the future which is now making for order becomes disorder and chaos it will be due to the apathy of the general public quite as much as to anything else. The workingmen invite both men and women to be present and every effort will be made to make the discussion of a great question both interesting and profitable.

True Nerve Tonic

Will act, not so much directly upon the nerves as upon the digestive functions and the abundant formation of red vitalizing blood. Nerves can't be fed on medicine. They can, however, be restored and strengthened by assimilated food. The marvelous action of Ferrozone arises from its action over the digestive and assimilative processes. When you take Ferrozone the blood is purified, strengthened, and grows rich and red. Then you grow vigorous, healthy and beautiful, ready for work, because you have the strength to do it. No tonic for the brain, blood or nerves compares with Ferrozone. Price 50c., at Druggists, or Polson & Co., Kingston, Ont.

Hamilton's Pills are Effective.

SUNDAY SERVICES

List of Those Who will Fill the Pulpit in the Different Churches on Sunday

St. Paul's Presbyterian—11 a.m., C. M. Copland, Provincial Secretary, Toronto.

George street Methodist—A. B. Williams, New York International College Secretary; 7 p.m., C. K. Ober, editor Association Man.

St. Andrew's Presbyterian —7 p. m. D. E. McGregor, Varsity, Toronto, and A B. McWilliams.

Charlotte street Methodist —John P. McPherson, B.A., Inter-Provincial College Secretary, Toronto., Ont. 7 p.m., George Irving B.A, General Secretary Y.M.C.A.

Murray Street Baptist—7 p.m., C. K Calhoun, Asst. Secretary, Montreal.

Park Street Baptist—11 a.m., J. E. Merritt, Physical Director, Montreal, 7 p.m., R. J Colville, Railway Secretary formerly of Peterborough.

Mark street Methodist—11 a.m. J W Hopkins, Secretary, Woodstock, 7 p.m. H. H. Distin, Secretary Quebec.

Bethel Methodist church—3 p.m., J. T. Hem, Secretary Midland.

St. Paul's Mission—Geo. Elliott, Secretary, Berlin. 7 p.m., E. Peel, of Lindsay.

Boys' Meeting at 4 p.m.—C. K Calhoun will preside; Norman D. MacLeod, Boy Secretary, Ottawa, will speak.

Men's Meeting, Opera House, 4 p.m., F. S. Goodwin International Com., New York.

HOCKEY.

Girls at Port Perry.

Port Perry, Feb. 7—A very interesting game of hockey was played here last night between Blues and Reds, Girls' Hockey Clubs. The score was 1 to 0 in favor of the Reds.

The Quakers have challenged the Jewellers for a game of hockey.

The following players will represent the Ontario Bank in their match with the Imperial Bank of Toronto tonight on the Brock street rink:—Goal, Sawers; point, Hollingshead; cover-point, H. Armstrong; forwards, Ferguson, Bloomfield, R. Armstrong and Macfarlane. Mr. J. T McCabe will referee.

Keene and Norwood will battle for supremacy of their district in the T.V. League on Monday night. The game in Norwood last week was won by Norwood and made both teams a tie. The game was ordered to be played off here.

THE TURF.

—Looking Glass and Commodore K won in straight heats at the Ottawa ice races.

SKATING.

Having secured the championship of Peterborough by his victory over W. Jackson, that sterling young skater, Oliver Dusty, is looking for bigger game. He not only is prepared to protect his present title, but issues a challenge to any skater for the right to hold the championship of Ontario and will support his challenge to any reasonable amount. This time he prefers to increase the racing distance to two miles. We hope his challenge may be accepted and the local lad receive the honor he covets.

FROM COAST TO COAST

The Fame of Dr. Clarke's Wonderful Pills Spreading

Editor of the Morning Times:

Sir,—At the request of the makers, I cheerfully furnish the following statement in the hope that others like myself may be cured. I was a lifelong sufferer from rheumatism and stomach troubles and was a total wreck. Nothing did me any good until I tried Dr. Clarke's Little Red Pills, and, thank God, I am now almost well, after taking only six boxes. They undoubtedly saved my life. Clara E. Humphrey, Victoria avenue, Halifax, N.S.

R. F. Henry, Vancouver, writes: Dr. Clarke's Wonderful Little Red Pills have worked a marvel in my case. I was unable to walk with paralysis and rheumatism, and am now entirely well. These marvellous pills have done what no doctor or medicine could do.

Dr. Clarke's Little Red Pills are a positive and certain cure for rheumatism, asthma, paralysis, coughs, lame back, indigestion, all stomach and liver troubles, female complaints, even when the diseases have been standing for many years; the most stubborn cases will yield. Sold by Ormond & Walsh, Peterborough, price 50c. per box.

The Future Foretold.

A visitor to Richmond overheard the following conversation between his hostess and the cook.

"Please, Mis' Gawdee, may I git off nex' Sunday to go to the fun'ral of a friend of mine?"

"Next Sunday? Why, Eliza, this is only Monday—they wouldn't put a funeral off for a week!"

"Yas'm"—respectfully—"but dey has to, 'cause he ain't dead yit."

"Not dead! I am positively ashamed of you! How can you be so heartless as to arrange to attend the funeral of a man who is still living? Why, he may not die at all!"

"Yas'm, but he will; dey ain't no hope."

"It is impossible to say that, Eliza; the best doctors are often mistaken. But, even if they do know a case to be hopeless, they cannot predict the exact time of a man's death with such a certainty that the funeral can be arranged so long beforehand."

"Yas'm"—with calm assurance—"but he will be buried nex' Sunday for all dat, cause he's goin' to be hung on Friday."

NERVOUSNESS

Or despondency caused by weak unhealthy nerves, are responsible for more sickness and [illegible] than any other disease. If you have a secret drain from early abuse, later excesses or exposure, you cannot expect healthy nerves while your vitality is being wasted. Do not go through life a miserable outcast on account of your follies, you are not safe until cured—disease never cures—no matter how young, old or innocent one may be.

KIDNEYS AND BLADDER.

Have you pain in the back, a dull feeling in the region of the kidneys? At times your water comes freely, a large quantity light in color, while at other times you do not make a quarter as freely, it is dark in color, you make a small quantity, or you may have a mucous deposit or brick dust colored sediment; give your condition immediate attention or more serious complications will set in. My treatment guaranteed as a positive cure for such conditions, and remember you

PAY WHEN CURED.

You need pay nothing until you are convinced that a thorough and complete cure has been accomplished. Surely this is fair, as you run no chances. CONSULTATION FREE. If you cannot call, write for blank for home treatment. Perfect system of home treatment for those who cannot call. BOOK FREE. Medicines for Canadian patients shipped from Windsor—All duty and transportation charges prepaid—Everything confidential—No names on envelopes or packages—Nothing sent C. O. D.

COUNTY OR DISTRICT AUCTION SALES

In many districts of Great Britain auction sales of live stock have been held annually for years. Large numbers of pure-bred animals for breeding purposes have been marketed in this way, besides many "store" cattle and other animals. In several provinces of the Dominion, provincial sales of this kind have been established with satisfactory results, and have created a feeling in favor of county or district sales. There are hundreds of farmers throughout Canada who raise yearly from one to four good breeding males, and perhaps a few females. Many of these men understand the *principles of stock breeding*, and have from time to time bred noted show yard specimens. Yet the progress and profits of these men has been greatly hampered because of their inability to sell their surplus stock promptly. In some years they have been able to sell; in other years they have had to keep a number of animals longer than their means of feeding warranted. On the other hand, many farmers desire to obtain suitable breeding males, but do not know where to buy what they require at a reasonable price. The cost of travelling from place to place in search of suitable animals deters them from purchasing at all.

With the idea of bringing buyers and sellers into touch with each other, a number of breeders of pure bred cattle in Durham, Northumberland and adjacent counties, last year formed the "Central Ontario Pure Bred Stock Association," and started a series of annual auction sales. Their initial sales was fairly satisfactory, and they are now arranging for their second sale, which is to take place at Campbellcroft, on 18th of March next, with J. W. Martyn, of Canton, as President, and W. B. Campbell, of Campbellcroft, as Secretary of the Association.

There are many other counties and districts which would find it beneficial to inaugurate sales of this kind, and as a guide to breeders interested in the subject, the rules governing the Central Ontario sale are given below;

1. A committe of three will be appointed to inspect entries, value same, confer with contributors, and reserve the right to either withdraw from sale or accept the bid offered.
2. All animals must be registered in their respective herd books.
3. Each animal must be in good condition and well halter broken.
4. All entries must be made with the Secretary on or before Wednesday, February 18th, 1903.
5. An entrance fee of $2.00 to accompany each entry, same to be returned if animal is sold.
6. A charge of 3 per cent. on the sale price will be made to cover expenses of sale.
7. All entries to be in place not later than 11 a.m. on the day of sale, to be numbered for sale, and for inspection of intending purchasers.
8. Each animal when sold becomes the property of the purchaser.
9. Terms of sale, cash.
10. All settlements to be made with the Clerk on day of sale.

OLD TIME LUMBERING

Four Hundred Sticks of Square Timber Cut Near Town

Four hundred pieces of square timber will be shipped in a few days to Belleville and thence rafted to Quebec where it will be sent to England. The timber was purchased standing, on the farm of the late Capt. Wallis, about two miles west of the town, and on the Tyndell farm at Chemong Lake.

Mr. Matthew Doody, of Cobourg, purchased the trees which have been manufactured into square timber. The sticks are from 20 to 60 feet in length, and remind one of the days 30 or 40 years ago, when rafts of the same class of timber were floated down the Otonabee. This is probably the last of the giants of the forests to be found in these parts.

A GUARANTEED CURE For All Forms of Kidney Disease

We the undersigned Druggists are *fully prepared to give the following* guarantee with every 50 cent bottle of Dr. Pettingill's Kidney-Wort Tablets, the only remedy in the world that positively cures all troubles arising from weak or diseased kidneys:—

"Money cheerfully returned if the sufferer is not relieved and improved after use of one bottle. Three to six bottles effect astonishing and permanent cures. If not relieved and cured, you waste no money."

Wonderful Results From Taking Dr. Clarke's Little Red Pills

Editor of the Morning Times;

Sir,—I have been a sufferer for 10 years from rheumatism. Tried everything and got no relief. Six boxes of Dr. Clarke's Wonderful Little Red Pills made me as well as ever. I write this solely that others may get relief. James Goodfellow, Ste. St. Marie.

F. H. Yates, Millbank, Ont., writes Tried different remedies for stomach trouble without relief. Three boxes of Dr. Clarke's Wonderful Little Red Pills have cured me.

Dr. Clarke's Little Red Pills are a positive and certain cure for rheumatism, asthma, paralysis, coughs, lame back, indigestion, all stomach and liver troubles, female complaints, even when the diseases have been standing for many years; the most stubborn case will yield. Sold by Ormond & Walsh, Peterborough, price 50c. per box.

Dr. Clarke's Sure Cure for Catarrh and Dr. Clarke's Sure Cure for Eczema, same price $500 will be paid for any case that it will not permanently cure.

ST. ANDREW'S CHURCH

The Annual Meeting—Very Favorable Reports Made

The annual meeting of St. Andrew's church took place on Wednesday evening, and was presided over by Rev. J. G. Potter, pastor of the church.

The report of the session showed that on December 31st there was a membership of 378, 62 being added to the church during the year. Seven were removed by death, and 17 by departure from town. There were 23 baptisms during the year—three adults and 20 children.

The Sunday school report showed 280 on roll. Total receipts $184.32.

The Ladies' Aid Society had a very successful year. Total receipts $212.87, and a small balance on hand.

The W.F.M.S. had also a good year's work to report. Membership 52. Total income $106.

The Mission Band showed a membership of 54, and income $41.13.

The Y.P.S.C.E. had a membership of 50, and was doing good work.

The Young Men's Guild had a very successful year. Membership 45. Total receipts $640.59; expenditure $559.

The Boys' Guild and Willing Workers also had favorable reports.

The Board of Managers reported a reduction of the church debt $350.

The financial statement showed receipts of general account to have been $2,965.86, and the surplus, $5.28. The property account receipts were $840, of which $455.79 was transferred to general account. The Missions Account receipts were $559.91, of which $250.00 was remitted Dr. Warden, and $309.91 was for allocation. The total indebtedness was shown to be $691.68. The amount contributed to Cordova Mission was $65.71.

On motion Mr. Lloyd was appointed on the Board of Managers in place of Mr. Graham, who has removed from town, and Messrs. Tully and Thompson were re-appointed.

Rev. J. G. Potter was appointed the representative on the Nichols Hospital Board.

Rev. Mr. Potter said it would undoubtedly inspire confidence in the congregation to know that no hospital in Canada to-day was so well equipped, and none in which there existed such pains-taking and loving interest and care.

Mr. Fowler was appointed to represent the church on the Central Charity Board.

The matter of increasing the seating capacity of the church was discussed and referred to the consideration of a committee. The erection of a gallery was proposed.

A vote of thanks was tendered the Ladies' Aid for the splendid work accomplished during the year.

Refreshments were served by the ladies at the close of the business meeting.

Wanted

A good representative to sell Fruit Trees, Ornamental Trees, etc., in Peterboro and near-by districts. We have over 600 acres under cultivation, and have the best and most complete list of nursery stock in Canada to-day. THE EQUITY

FIRE INSURANCE COMPANY

The Fifth Annual Meeting of the above Company was held yesterday at the Company's Head Office, 24 King street west, Toronto, with a good attendance.

DIRECTORS' REPORT.

Your Directors beg to present herewith the Fifth Annual Statement, representing the Company's financial standing for the year ending December 31st, 1902, as attested by the Auditors.

Your attention is called to the satisfactory increase of premium income from $126,960.93 in 1901, to $175,281.74 in 1902, the net excess of income over expenditure being $25,406.79, out of which a dividend of 6 per cent. has been declared upon the paid-up capital. Your Directors felt also that results justified a 2 per cent. cash bonus to the Shareholders.

With the dividend and bonus paid, there remains the very handsome sum of $21,406.79 out of the year's business to add to Reserve, which now stands at $55,250.18. Upon the excellent results attained, all interested, we think, may well be congratulated.

Several changes were necessitated by the retirement of Mr. Campbell. In pursuance of the powers vested in them, your Board filled the vacancies by the election of Mr. Thomas Crawford, M.P.P., as President, Mr. C. VanNorman as Vice-President and Mr. W. Vandusen as a member of the Board.

The term for which the Auditors and Directors were elected now expires. They are eligible for re-election.

All of which is respectfully submitted.

THOMAS CRAWFORD.
President.

REVENUE ACCOUNT FOR YEAR ENDING 31st DECEMBER, 1902.

To premium income...	$172,295 72	By reinsurances and cancellations...	$ 46,955 01

	$567,914 29		$567,914 29

This is to certify that we have maintained a continuing audit of the books, and examined all vouchers and securities of The Equity Fire Insurance Company for the year ending 31st December, 1902, and find they have been correctly kept and are truly set forth in the above statements.

C. E. ARNOLDI,
FRED ROPER,
Auditors.

Toronto, January 31st, 1903.

The President, in rising to move the adoption of the Report, said:—From the Report just read it will be observed that the Company has enjoyed another prosperous year. It is pleasant to note also that prosperity was more general in the Canadian insurance field for 1902 than for some time previously. This, no doubt, will strengthen confidence in the business. The Shareholders, Agents, and all interested in the Company have reason, in the Report before you, to take pride in its progress and management. 20 per cent. of Surplus earnings upon the net business of the year does not leave room for adverse criticism. Our ratio of increase has been quite satisfactory though we have not secured the large volume of business which might have been secured, our policy being to increase moderately, and carefully. The value of this, we trust, the future will further disclose.

To realise, however, what this Company has accomplished, let it be remembered that it started into business in 1898 with $12,000, passed through a conflagration in 1900, and stood at December 31st, 1902, with $105,250.18 over and above and $450,000 unpaid Subscribed Capital. Besides this, we have paid to Shareholders in that period $7,750.00 in Dividends and Bonus. It will be seen, therefore, that there has been produced out of the earnings of the Company roundly $63,000, or an average of $12,600 per annum. Out of this $63,000 we paid off Organisation expenses, 15 1-2 per cent. dividends, and at the end of the year just closed $55,250.18 of an Accumulated Reserve.

To protect the Capital as well as the Policyholders, it is absolutely necessary to maintain a strong reserve against the time of excessive fire losses. This is the first essential. While we are undoubtedly in the position at the present time of transferring every liability of the Company without a dollar of cost to the Shareholders, we aim to make our Reserve come up to the high standard set by the Insurance Department.

We have, as you are aware, paid a Dividend of 6 per cent., which may be regarded as a good return upon Capital. The Directors thought, however, the favorable results of the year justified an additional 2 per cent. to the Shareholders.

As for the Policy-holders, we close the year with security to them as follows:—

Capital paid-up...	$ 50,000 00
Uncalled Subscribed Capital...	450,000 00
Accumulated Reserve Fund...	55,250 18
Total...	$555,250 18

I trust the Company is now so well established in the confidence of the public that with continued watchfulness in the selection of risks and in the exercise of judicious economy, the future business will not only continue to be characterised by eminent satisfaction to assurants, but will permit the most gratifying returns to Shareholders.

We expect the business of 1903 to show a substantial increase. The influence of the Shareholders can and should contribute very materially to this end. Increased burden and responsibility is laid upon the Management and Staff, the Directors and Auditors. We look to the loyalty of the Agents. Their support is indispensable. They, and all those contributing to the excellent showing in the Report placed before you to-day, certainly deserve credit.

I have much pleasure in moving the adoption of the Report.

The Board of Directors for the ensuing year are:—

Thos. Crawford, Esq., M.P.P., Toronto, President; C. C. VanNorman, Esq., Toronto, Vice-President; Stephen Noxon, Esq., Ingersoll; His Honor Judge Morgan, Toronto; Wm. Hendrie, Jr., Esq., Hamilton; David Carlisle, Esq., J.P., Toronto; W. H. Biggar, Esq., K.C., Montreal; H. E. Irwin, Esq. K.C., Toronto; Alex. MacLaren, M.P., Stratford; C. H. Elliott, London; W. Vandusen, Esq., Toronto.

W. GREENWOOD BROWN,
General Manager and Secretary.

vor in the world," he said. "Will you give me Hilda?"

Lady Ethel looked at him, startled. The quick tears sprang to her dark eyes. She looked at him, half vexed.

"So soon?" she said. "Why, I have only just found her myself."

Then Hilda blushed crimson, and slipped her hand caressingly through her mother's arm.

"Mamma," she said, "do not be angry with Cecil. It is all my fault. I allowed him to ask you. I thought as Sir Wilfred had taken you from me——"

She stopped just there, for every one was laughing.

Lady Ethel colored vividly, then said resignedly:

"I see how it is. You may take her, Cecil."

"You brought roses from the lake, instead of lilies," Lady Leigh said, mischievously, to Hilda, as she kissed her glowing cheek.

Then they went to the earl in his large, airy chamber, where his wound still confined him. The ladies all took turns in amusing him. Mrs. Courtenaye was reading to him now, while Margery fanned him.

"My lord," said Cecil, demurely, "I have changed my mind. I am willing to marry your granddaughter."

The worn, white face of the old man flushed with pleasure. He said, quickly:

"I am very glad to hear it, Cecil. You have given me the desire of my heart."

"And mine," said Mrs. Courtenaye, giving Hilda a very motherly kiss.

The earl lived several years longer—long enough to see Lady Ethel and Hilda both married; then one quiet summer evening they found him sitting in his chair with a calm, happy smile on his lips, like one dreaming; in his peaceful slumber his soul had gone away from him to the better land.

Hilda made a very noble and beautiful wife to the new earl of Devon. She was very happy and blessed in the love of her devoted husband. When a little son came to her she called him Guy, in tender memory of her own young father, who had died before she was born.

Lady Ethel Hale was very fond of her little grandson. Every one remarked her devotion to the child, but no one guessed how many hours she spent alone with the little one, fondly tracing, in his infantile features, fancied resemblances to her first husband. Hilda was wholly like her mother, but Hilda's son grew very like the pictured face of the handsome young man in the pearl-studded locket Lady Ethel always wore on her breast. She looked at the picture often; she kissed it when it had first been given back to her by Hilda. Sir Wilfred was not jealous of her love for the dead. He loved her with the devotion of a life-time, and she made him very happy, but he knew, for she had told him so, before she had given herself to him, that half her heart was buried in Guy Aylesford's grave.

The End.

NOT OVER YET

Morocco's Sultan Still Has Trouble on Hand

London, Feb. 4—The 'Times' Tangier correspondent reports that the Sultan's victory over the Pretender appears to have been exaggerated. Only thirty heads and eighty-five prisoners have reached Fez so far. Although this may check the rebellion, it by no means implies that the affair is finished.

Ambassador Must Explain

Constantinople, Feb. 4—The Turkish Ambassador at Paris, Salie Munir, Bey, has been summoned here to explain the attitude of France in regard to Macedonia.

Spanish Labor Men Violent

Barcelona, Feb. 4—A meeting of representatives of twenty-three trades today voted in favor of a general strike in support of the strikers at Reus. Violent speeches were made, urging the workmen to be in readiness to destroy authority, pillage, and launch a social revolution. The authorities are preparing for trouble.

Canada's Oldest Woman Dead

Stratford, Feb. 3—Mrs. Mary Ann Mills, aged 115 years, said to have been the oldest woman in Canada, died at her home in Blanchard Township last evening. She was born in Fermanagh, Ireland, and up to a few months ago was quite active and bright. She has been a widow for fifty years. Seven of a family survive.

Art Photography.

The new art photography is very attractive and a boon to the homely girl for which she will be eternally grateful, but it has its disadvantages. A man discovered the latter fact about a month ago, when he received the photograph of a beautiful creature whom he did not in the least recognize. He examined the likeness that was not a likeness by daylight, by gaslight and by the ghastly glare of an arc light. He looked at the handwriting on the cover, and it conveyed not an idea to his stupid masculine head. Then he gave it up.

"Blest if I know who it is," said he to himself, "but if I ever meet her my bachelor days are over, sure, for she's the prettiest thing ever."

Just last week after he'd cherished the photo of his unknown admirer for a good fortnight, he met his second cousin on the street.

Now, his second cousin is a very amiable young woman, but she isn't in the way of being beautiful, and when she greeted him with—

"Well, Fritz, why haven't you acknowledged the photograph I was good enough to send you?" the man was staggered.

"I never received it, that's why," said he. "I'd love to have a likeness of you, Mab, but you've never sent me one."

"I have sent you one, nearly a month ago, taken in my bridesmaid's gown and with a big chiffon hat on. Now, don't tell me you never received it, for I'm sure you did, and have forgotten."

"Was that you?" exclaimed the man, and then he felt that this was among the things better left unsaid, and he weakly hedged.

"'Course I got it," said he. "I just wanted to jolly you a bit. Splendid of you, too."

"What did the man do to her?" he asked his sister half an hour later. "I declare to you I'd never recognize her in the world."

"Well, he drew a line down her nose to make it look less—er—well, less retrousse," replied that world-wise young lady, "and he curved her mouth with rouge, and made her eyes larger in the negative, and really I think it's a very creditable work of art. I'm going to him myself."

The man didn't say a word, but he made up his mind to something, and now when people show him a photograph of "my lovely niece down South," or "my sister, who's the beauty of Denver," he glances at it cursorily and then he says gently, "It's a very pretty picture, but I should like to see the original."

FARM JOYS

I've heard about the men who make
  A million in a day
A-buyin' stocks or sellin' 'em
  Or any other way.
I've heard about their habits,
  And so far's I can see,
A life down on the ole farm
  Is good 'nough for me.
Them fellers who in cities live
  No doubt would think me slow,
Well, if I am, I'm satisfied
  That none of 'em can know
The 'mount of solid comfort
  A feller gets in life
Who's miles away from any kind
  Of worry, care or strife.
I'm just eighteen, but you can bet
  I know what I'm about—
The wealth is here, and all you have
  To do is "dig" it out.
And the singin' of the robins,
  As they hop from twig to twig,
Just makes a feller really feel
  He rather wants to "dig."
And the more I hear tell about it,
  The plainer 'tis to see,
That life down on the old farm
  Is good 'nough for me.

—J. B. Dignam.

Experiments show that a frog deprived of his brains will live and eat and pursue existence in a sort of automatic manner.

Nearly one-half of the ships sold by England in 1899 were built before 1886, and more than three-fifths were built before 1891.

There is plenty of money throughout Northern Brazil. Para is a city of great thrift and enterprise, and is enjoying prosperity.

The output of oil in California has increased from 1,245,339 barrels in 1895 to 2,292,123 barrels in 1899. The output for 1900 will be much larger.

A west Australian exploring party that recently arrived at Oodnadata reported that there had not been a drop of rain for two years in the region traversed.

The ice business in Costa Rica is small. There are factories in San Jose, Port Limon and Punta Arenas, and several smaller towns are supplied from these.

Aden, Arabia, Feb. 4—The North German Lloyd steamer Freisburg, from Hamburg, January 8, for ports of China and Japan, is ashore near Mocha, Arabia. It is expected she will be re-floated.

London, Feb. 4—King Edward is still confined to his apartments at Windsor Castle, but his progress is perfectly satisfactory.

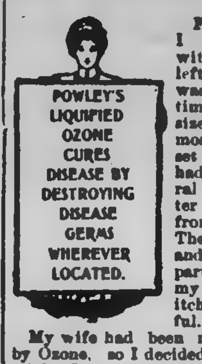
Leg Was Swollen Three Times Its Natural Size and Mortification Had Apparently Set In.

Itching Was Frightful, But Powley's Liquified Ozone Killed the Disease Germs and Eradicated Every Trace of the Disease.

To-day He is Sound and Well and Mr. Banks is Strong in the Belief That Ozone Saved His Life.



For twenty years I was troubled with eczema in my left leg. My leg was swollen three times its natural size and apparently mortification had set in. The skin had broken in several places and matter was oozing from the ulcers. The leg was black and rawish-red in parts right up to my hip and the itching was frightful.

My wife had been much benefitted by Ozone, so I decided to give it a trial. It was not long before I noticed an improvement in my blood. The humors began to disappear and soon my leg had resumed its natural healthy tone.

I believe that Ozone has saved my life, and I give this testimonial for the benefit of others. Ozone also cured me of bad kidney disorder and a most painful eye trouble.

J. B. BANKS,
787 Queen st. West, Toronto.

J. B. BANKS.

To Get Rid of Blood and Skin Disorders You Must Get at the Root of the Trouble.

You cannot cure blood and skin disorders by treating the symptoms. You must find the cause and remove it. Medical science has demonstrated that these disorders are due to disease germs. Powley's Liquified Ozone destroys these germs wherever located, and it is due to this fact alone that it is the grandest remedy for the treatment of disease that the world has ever known. If but one person or a dozen bore testimony to the fact that they have been cured it might be reasonable to think all were mistaken, or that they simply "happened" to get better, but when the number runs into the thousands, and all are alike in being most positive and enthusiastic, it becomes proof of the most convincing kind that Ozone will do all we claim for it—destroy disease germs wherever located.

The number of persons cured of blood and skin disorders by Powley's Liquified Ozone is far too great to attempt to publish them here. We give a few, however, to show that the good work is not confined to any particular part of the country:

John Smith, Cataraqui, Ont., salt rheum.
Jas. Dunbar, 447 East King st., Toronto, blood disorder.
M. Lever, 19 St. Vincent st., Toronto, blood disorder.
J. W. Brown, 30 Alexander st., Toronto, skin disease.
Miss Crew, 346 Van Horn st., Toronto, blood poisoning from ivy.
Miss Edythe Cooper, Cornwall, Ont., scrofula.
Rodger Pilson, Downsview P.O., eczema.
Herbert Cookman, Huntsville, Ont., running sore.
Mrs. Ellen Smith, 21 St. Andre street, Montreal, eczema.
P. Trompe, 351 Panet st., Montreal, painful boils.
Vincent O'Neil, 108 Mitchell ave., Toronto, eczema.
Mrs. Wm. Stevenson, 73 Laughton ave., Toronto Junction, Ont., skin disease.
Mrs. F. Southorpe, 72 Cobourg st., Ottawa, Ont., eczema.
C. Hagens, 94 Anderson st., Montreal, running sore.
W. Dorsey, 27 Sultan street, Toronto, eczema.
Dr. M. Mecklenburg, cor. Craig and Bleury sts., Montreal, eczema.
Mr. W. Knowlton's little son, 97 Brunswick ave., Toronto, eczema.

Powley's Liquified Ozone is sold by reliable druggists—never by fakirs or peddlers. Price 50 cents and $1.00 per bottle. Our free booklet on receipt of name and address.

THE OZONE CO., Limited,
Toronto, Ont.

THE BYE-ELECTIONS

North York and Centre Bruce Perhaps on the 26th

Toronto, Feb. 4. It is probable that the writs for the North York, and Centre Bruce bye-elections will be issued in a few days, or as soon as the Judges' reports in connection with the disposal of the cases have been received. While no date has actually been fixed, it would not be surprising if polling day will be during the last week in February, perhaps on Thursday, the 26th.

—Dr. and Mrs. Willis who have been residing with Mrs. Wm. Scott, Water street, for some time, leave town this morning for the balance of the winter. Mrs. Willis goes to Sherbrooke, Que., while the doctor will go to Savannah, Georgia. Later on Mrs. Willis will be joined at Sherbrooke by her sister, Mrs. Lucke, of [illegible]. They will visit Washington. Their many friends in Peterborough will wish them safe return next summer to their beautiful lodge on the Otonabee River.

HIS BACK BROKEN

Deseronto Man Named Blatchford Struck by a Freight Train

Deseronto, Ont., Feb. 3.—About 6.30 last night a man named Blatchford, about 68 years of age, was struck by a G.T.R. engine at Deseronto Junction and had his back broken and head badly cut. He was walking on the track at the west end of the yard, and in getting off one track to save himself from an approaching train, he got in front of a freight train moving slowly in the opposite direction. He was sent to the Kingston General Hospital this morning.

RELICS OF PAARDEBERG

Chamberlain Views the Scene of the Great Battle

London, Feb. 3—The Times has a despatch from Paardeberg saying that Mr. Chamberlain arrived in that South African city on Saturday and spent two nights in an encampment pitched near the scene of Cronje's surrender. Very few landmarks of the battlefield have been effaced. Some of the trenches are becoming filled, but the debris, such as burned wagons and bleached bones of animals, still bear witness to the long resistance of the Boers. Two more Boer rifles were discovered in the river bed, and bullets and cartridge cases and shells abound.

—Let it not be forgotten that every man leaves himself liable to a fine for neglecting to blanket his horse, when it is left standing on the streets on a cold day. The law goes so far as to inflict a punishment of imprisonment for three months.

A VERY DESIRABLE INVESTMENT

THE McLENNAN PAINT COMPANY
LIMITED
BUFFALO - - - NEW YORK
INCORPORATED UNDER THE LAWS OF CANADA
CAPITAL, - - $500,000
Dividends on Preferred Stock Paid Quarterly.

For the purposes hereinafter stated, we offer at par,

50,000 of our 7 per cent. Preferred Treasury Stock Shares, $100.00 each

Payments as follows: 20 per cent. on amount of stock subscribed for at time of subscription; 30 per cent. in 60 days balance in 90 days. Receipts will be issued until full amount of stock subscribed is paid, when certificates bearing the Company's seal, and signed by the President, Secretary and Treasurer are issued. The McLennan Paint Co., Limited, have one of the most modern plants of its kind in the world, occupying 300,000 square feet of floor space. The capital of the Company is a half million dollars. The growth of the business has been phenomenally rapid and conservative. In line with other large industries, the Company propose to establish a branch factory in Canada for the manufacture of their products, which are covered by valuable patents, and which practically give the Company a monopoly, and, for the above purpose, offer at par $50,000 of their 7 per cent. Preferred Treasury Stock.

The McLennan Paint Company, Limited, was organized in 1892 by Mr. C. J McLennan of the McLennan Dipping Process, and other valuable paint-making machinery. The Company began business in rented premises, in East Buffalo. So profitable was the business, and so rapid the growth, that large factories were built in North Buffalo in 1895. The business again doubled, and another plant was added in 1898. In 1901 the Company invented and perfected a line of reds, or vermilions, permanent in color, and at much less cost than the old line colors. This increased the sale of their products practically one-fourth, making it necessary for them to build a new Color and Chemical Works. This factory is without doubt the largest and most modern in the world. Mr. Charles J. McLennan, the President of the Company, and the inventor of labor-saving machinery, such as dipping tanks, mills, etc., is recognized as one of the most skillful and best known paint manufacturers in the country. The name and fame of this Company, and its products, are known all over the United States and foreign countries, and that they will capture the Canadian market is evidenced by the fact that many of the large Canadian manufacturers are at present using their goods, in face of the heavy duty. It is with a view to saving this 25 per cent. duty and adding it to to the profits of the Company that they have decided to establish a branch in Canada, which will be controlled and managed by the parent Company.

Practical men of means, character and national reputation constitute the directorate and management. Each department is managed by a skilled man; monthly statements rendered and careful audit made semi-annually. The books are always open to the smallest shareholder. The finances of such a concern are guarded as closely as the finances of any bank, and failure is practically impossible.

COPY OF TESTIMONIALS.

A. C. Cornell, Toronto, Ont.: Columbia National Bank, Buffalo, N. Y., Jan. 23, 1903.

DEAR SIR,—The McLennan Paint Co. are good customers of this bank, and I have known them personally for years, All the officers bear excellent reputations, and are considered good business men. Their management is evidenced by the large business they have built up, as careful and conservative. They have met with great success in the past, and I believe that today, theirs is one of the largest and most prosperous concerns of its kind. I have every reason to believe that the stock which they are now offering for sale is a desirable, as well as a safe investment. Yours very truly,

L. H. GETHOEFER, Cashier.

The Merchants' Refining Co., Refiners of Petroleum, Paraffines, Paraffine Wax,
Lubricating Oils, Residuum, Napthas, and Gasoline,

A. C. Cornell, Toronto, Ont.; Buffalo, N. Y., Jan. 23, 1903

DEAR SIR,—Your favor of 21st received, and note you are offering for sale $50,000 of the preferred stock of the McLennan Paint Company and ask me what I know of the firm. Would say I have had business dealings for eight years—transactions of many thousands of dollars. I am also doing business with other houses engaged in the same line, and desire to say there is no house in America to-day that stands higher than the McLennan Paint Co. The growth of their business has been phenomenally large, and under the conservative management of the President, Mr. C. J. McLennan, the success of the business is assured in the future. As an investment, in my judgment, nothing could be safer than the stock they offer.

Very respectfully, C. A. SALISBURY, Manager.

A. C. Cornell, Toronto, Ont.: Buffalo, Jan. 26th, 1903.

Dear Sir,—Referring to the sale of $50,000 of our 7 per cent. Preferred Stock, the Prospectus does not elaborate on the proposition, but merely mentions the amount guaranteed. I desire to inform you, however, we could have paid at least 14 per cent. last year, but carried balance to a Reserve Fund, which, necessarily, makes the stock very valuable.

Very truly yours,
THE McLENNAN PAINT CO., LIMITED,
C. J. McLennan, Manager.

P.S.—Having visited this proposition on behalf of some very conservative investors, I can verify all the above. The plant is extensive and modern in every detail; officers and management skilled and very industrious; all the products superior. This is a Canadian Company, Canadian Charter. Having built in Buffalo, in proximity to raw material, by shipping here in ground state and preparing here, will save and add large duty to already large profits. Bear in mind this is not prospective, but a large, rich, going, paying institution. Prospectus, application forms, and any further particulars, and subscriptions, address the undersigned. All cheques or drafts for stock made to the order of the Company, and forwarded to

A. C. CORNELL, Fiscal Agent,
18 Yonge Street Arcade, Toronto, Ont.

GEO. C. HALDEMAN, Director.

REPORT BY EX-SUPERINTENDENT OF MINE

Cecil R. Gold Mining and Milling Co., Los Angeles, California.

Ballarat, Cal., Nov. 1st, 1902.

Gentlemen,—Your request for my opinion as to the "Santa Rosa" group of mines, and other claims in which you are interested in this territory, to hand, and in reply will say:

The "Santa Rosa" group, which is located southeast of Ballarat some three and a half miles, consists of twelve claims, equal to 240 acres. The ledge crops out more or less the full length of these claims, showing the same character and formation of work as where development work has been done. In most of the outcroppings it shows highly mineralized rock, with pyrites of iron, mica, schist, slate, slate porphyry, gouge, quartz, and quartzite, all bearing more or less. Where work has been done, it shows a very marked improvement in both quantity and quality of gold-bearing rock. Commencing with the surface, the ore shows much iron and copper stain. All mill tests show pink ore commencing with the surface; in fact, I milled for several days and recovered $30 and over per ton, yet the milling process does not pay more than two-thirds of the value of the ore, the tailings ofttimes running as high as $25 per ton, and never less than $12.50. To save the entire value of your ore it will be necessary to install either concentrators or a cyanide plant. From careful study and frequent examination of the surface of the ground, and down as far as has been opened below the surface, I am highly pleased with the property. It is certainly a fine property, and as good as any I have ever had the pleasure of examining. Considering your mill site, with tramway facilities added, water, fuel, and cheapness of mining the ore, the Cecil R. will be capable of paying enormous dividends when your capacity for milling is increased to what it ought to be.

Wishing you every success, I remain, Yours very truly,
(Signed) G. W. FLEMING,
Ex-Mine Supt. Cecil R. Gold Mining and Milling Company.

Price is now 25 cents a share, and we offer 25,000 shares at this price, but it may be advanced by January 1st, 1903, to 50 cents a share.

1% Guaranteed Regular Every Month on the Investment Until Mill is Completed

California - Nevada Mining Co

Owns the VICTOR and ARIZONA Mines

$30,000,000 blocked out ready for The Hoodlum claim which adjoins the mill in the former. $5,000,000 in the Victor 6 claims on Argus Mountain—eight in the latter. All can be mined, taken and 6 in Limerick Canyon, all and milled for less than $2 per ton, with big ore values yet to figure on.

The Greatest Mining Proposition of Modern Times

This company has demonstrated its ability to produce ore at a profit and pay regular monthly dividends under the most adverse circumstances. Only the highest grade could be shipped and cost upwards of $25 per ton. With a mill it can be treated at less than $3 per ton. The company has nearly enough money to pay for the mill, which they promise to have in operation by April 1st, 1903.

WHAT INVESTORS SHOULD KNOW.
Is the management honest and able? Investigate and learn the facts.

A Limited Amount of Stock for Sale.

Present price, $1.00 per share, will soon be advanced again. A 50-ton mill will be in operation at the Arizona mine probably in January and dividends increased. This company will stand the most rigid investigation. Write for prospectus.

Deeper Levels, New Hoist, Increased Power, New Mill, More Ore, Greater Earnings
That's the Policy of the

GOLCONDA
CONSOLIDATED GOLD MINES COMPANY

The Golconda made a fortune for its former owners in its surface workings. From 500 feet the shaft will be sunk to 1,200 feet. A new hoisting plant has been ordered. That will carry out the waste rock and the ore. From 20 stamps—the size of the present mill the reduction plant will be increased to 60 stamps. Nine hundred feet of pipe is being added to the 7,000 foot pipe line. This will increase the electric power to 1,000 horse power.

The GOLCONDA produced ore worth $211,000 per ton. That's the Government record. - - - -

Suppose you were to invest in the future of this great mine? You would want to know something about it and its neighbors; you would want to know everything about its directorate; you would want to know that your invested capital was safe; you would want to know what it would likely earn from the time dividends will be declared—March, 1903—and for scores of years thereafter.

STOCK MARKETS

SOMETHING DOING IN B. R. T.

New York, Feb. 6.—We some time ago came out with a bullish document upon Brooklyn Rapid Transit, advising its immediate purchase when prices were considerably below current figures. The movement appears to be well under way now and indications are most strong that the stock will have a further advance. Some of the insiders are talking 80 for the shares upon this move. The earnings of the company are improving most materially while lots of work has accomplised which will further the handling of the growing traffic and reduce the cost of operation. There is but very little doubt but what B. R. T. will ultimately be an integral part of the greater transportation system destined to carry on the business in Greater New York. The company has over 200 miles of available and operating line, and the property is improving all the time. Mr. Flower used to say that an increase of five per cent. in population in a city of the size of Brooklyn meant an additional two per cent. The transportation companies of the town. Brooklyn is growing very rapidly and will expand greatly each year. There is no doubt but what the stock will in a very short time go above par to stay, and that the stock will become a regular dividend payer. We strongly advocate the purchase of the shares at present prices, believing they they will sell much higher almost immediately. A word as to M. R. while on the traction subject. This stock is at present very close to the lowest price recorded for 1902. A long interest of Tammany politicians has been in the stock for some time past, and there has been an undoubted effort to tire these gentlemen out. The stock has been permitted to sag, and it is now pretty thoroughly understood that this element has closed out at the low prices in disgust. The buyers of their stock were the insiders. It is fair to presume that the stock has gone about as low as it will, and that it will shortly command better prices. As a seven per cent. guaranteed stock upon a local city property it is at present absurdly cheap, and well worthy of the attention of both investors and speculator.

Summary—Today's market was reactory in tone, probably in counting a showing of loss upon balance by the banks in tomorrow's bank statement. As has been the case for over a month past, recessions brought a narrowing of the volume of business, and visible decreased street offerings. It is an acknowledged fact that free purchases of stocks can only be made by bidding prices up sharply. We are disposed to sell any stocks they are carrying and generally so with nearly every road. Steel conversion plan will more than likely be hastened through now the company has won the decision in the litigation connected with the matter. Stocks look to be an excellent purchase at present. Money 2 3-4. Sales 450,100.

HAIGHT & FREESE CO.

ENTIRELY OUT OF THE ORDINARY

Yet one of the ways that LEAD TO FORTUNE

Why not make a small investment in oil lands right ahead of good producing wells, some having wells producing oil on adjoining farms? The oil now brings $[illegible] per barrel, bought by the Standard Oil Co., without any transportation charges, and is bound to go higher; a few hundred dollars often invested in property of this kind yields thousands of dollars profit. I personally know of parties who made over $[illegible] in [illegible] days time on an investment of this kind; also have wells making from [illegible] to [illegible] barrels a day. Parties desiring to organize a company will do well to investigate this opportunity, getting thereby the advantage of years of experience, and if you don't want to drill the wells wait until the wells drilling close to you have come in and reap the benefit of their costing. The oil business conducted on business principles, with honest management, is bound to succeed. You do not have to look further than the Standard Oil Co. to see what honest management founded on facts will produce, they have drawn very heavily on stocks the past three years and there is not enough of this grade of oil now above ground to run the country for more than two years, so you can readily see the profits that will be realized by starting now and obtaining the big price the Standard Oil Co. will be compelled to pay for crude oil to supply the demands of the country. For particulars write THE BARGER CO., MARIETTA, OHIO.

Alaska Gold Mining Company's Stock

NOW. This company owns, free from debt, [illegible] acres on the beach and tundra at Nome, Alaska. [illegible] tests made to bed rock on [illegible] acres averaged to the cubic yard of sand $[illegible] in gold, the tundra sand averaged $1.00 in gold. This Company's one mill is pumping, through the ice, from the sea bottom, [illegible] cubic yards daily, heaping it up on the beach to sluice in the Spring. To erect more mills a limited amount of stock is now offered at $[illegible] a share. Capital $[illegible],000; all Common Stock. Address,

[illegible], Fiscal Agt., Room [illegible], 67 Church St., New Haven, Conn.

INTERNATIONAL ELECTRIC MINING Co.

185 SUMMER ST., - BOSTON, MASS.

A Dividend Payer for the Past Five Years.

12 PER CENT GUARANTEED

Capital Stock, $500,000. Par, $1.00, full paid and non-assessable

Over eight thousand tons of $50.00 ore mined and smelted from this group of mines.

A limited number of shares of the stock of this Company now offered at seventy-five cents per share. This price will shortly be increased to par. Stock registered by the International Trust Company, Boston, who is also the transfer agent.

This Company has a small capital stock.

The International Electric Mining Company owns seven mines and milling plant.

The Brooklyn and New York mines of this Company lie north of and join the Victor and the Hoodium—two rich mines that are now being worked by California parties. On the west lies the Electric Mining Company's mines. In these mines are millions of dollars' worth of rich ore in sight. On the south, adjoining the Berlin mine of this Company, is the Montazuma and Clipper. From the Montazuma over three million dollars has been taken within 30 feet of the grass roots.

This Company owns free and clear seven mines of twenty acres each, all containing rich ore, located in the Arabia and Trinity mining districts, Humboldt County, Nevada. The Company has worked these mines for the past five years, and is now driving a tunnel to cut out a rich ledge about 300 feet from the surface. The Arabia mining district, in which these mines are located, is a lively district—a great many men being employed there. The tunnel now being driven on the Brooklyn mine has about 250 feet already completed. When the tunnel cuts the main ledge, which has just been reached by the Victor tunnel about 600 feet, the Brooklyn will have about 300 feet stoping ground, which runs high in gold and silver, over $80.00 per ton.

The Company is offering for a short time a limited amount of stock for the enlargement of its plant and the working force at the mines and for the completion of the Brooklyn tunnel.

This Company has thousands of tons of rich ore in sight.

We are not making a lot of talk, because it is unnecessary. What the investor wants is dividends, which we have paid for the past five years. Now if you want a safe 12 per cent. investment, let us hear from you.

INTERNATIONAL ELECTRIC MINING Co.
185 Summer Street, Boston, Mass.

References furnished upon application.

THE OLD COMSTOCK

A California mining paper has this to say: "Nevada, that grand old stamping ground of mushroom millionaires, who plucked enough wealth from her prolific fields to build mansions, banks and big hotels in San Francisco, and palaces in Paris and London, is again astonishing the world by making more millionaires and by yielding millions in gold and silver from a new field which rivals the old Comstock lode in the days of its pristine splendor. Not only in Tonopah and Arabia districts, where within the past year nearly ten millions have been exposed, are operations active, but in every mining district in the Silver State are operations active, and Nevada will once more take her place among the big producers, the peer of any of them."

Daily Nevada State Journal, January 4, 1903.

Lovelock, Nev., October 6, 1902.

International Electric Mining Co.,
Boston, Mass.

Gentleman,—If you wish to sell your Brooklyn mine I can get you a good price for it. If it was mine I would not sell it at any price, as you have more than a million dollars of ore in sight.

G. W. OSTRANDER, Supt.

Boston, Mass., December 1, 1902.

Mr. Geo. D. Burton, Treas.,
International Electric Mining Co.,
Boston, Mass.

Dear Sir,—During the six months of October and November of this year I visited the mines of the International Electric Mining Company, situated in Arabia and Trinity mining districts, Humboldt County, Nevada. I found the country remarkably mineralized; in fact, the possibilities of the country as a mineral producing country are yet unknown. For years it certainly has produced well. The work now being done in the Arabia and Trinity districts establishes the fact that they are fine producers.

I also found that there is a great deal of interest being taken in these properties, which have produced a great deal of wealth the past quarter of a century.

M. A. LATHROP, Mining Engineer.

GILPIN COUNTY

IS THE OLDEST GOLD PRODUCER IN COLORADO

In 1902 she produced $4,000,000.00.
Here is where Hundreds have been made Millionairs.

THE ELECTRIC SPARK GOLD MINING COMPANY

Is in this famous little kingdom, and is surrounded by mines that are making their owners wealthy.

CAPITAL STOCK $200,000 Par Value $1.00

We are working this mine every day doing a great amount of development work which will enable us to commence regular shipping very soon. Our shaft is now 175 feet deep, with a streak of pay ore starting at the grass roots, the vein is over 3 feet wide at the bottom of shaft and runs from $45.00 to $85.00 per ton, mostly gold. We are only three-quarters of a mile from railroad and have a well traveled wagon road from mine to depot. There are thirteen stamp mills at Black Hawk, three-quarters of a mile from this property. Our company is managed on conservative lines by practical mining men who understand the business and are familiar with this field of gold.

We have placed a small block of this stock on the market at 20 cents per share which will be worth $1.00 in a short time. Now is the time to buy.

The Electric Spark Gold Mining Company,
NEBRASKA TELEPHONE BLDG, OMAHA, NEB.

Mining Securities Company

805 Temple Court, New York

BUY! **WHY?**

BECAUSE

THE SOUR LAKE OIL CO.

Has placed four-fifths of its stock in the treasury for development work; and because

Oil is reached in less than half the depth required on Spindletop Heights in Beaumont;

The people in Canada are well acquainted with the management, which is in the hands of HON. JOHN L. BITTINGER, United States Consul General to Canada; F. S. Ashley, Vice-President of the Massachusetts Securities Co., and W L. Marston, Vice-President of the American Union Oil and Refining Co.

These gentlemen have made a dividend payer out of one company and have raised the value of its stock from 5c per share to par value, or 25c, within a very short time;

The company is operating in the Sour Lake field, where fewer wells will tap the oil than at Spindletop; this insures a greater flow of oil, and it is of a better quality;

This is the first allotment of shares at the present price of TEN CENTS PER SHARE; it is the lowest price at which you can buy, and the time left in which to buy at TEN CENTS is short.

Make remittances and inquiries direct to

Colonial Securities Company,
62 Wall Street, New York City.

Order now at ten cents and make monthly payments.

Morning Times

PETERBOROUGH, FEB. 7, 1903

TOWN AND COUNTY NEWS

DASHES HERE AND THERE BY TIMES' REPORTERS

Two More Smallpox Reports

An unexpected outbreak of smallpox has been reported from Hallowell, Township in Prince Edward County. A case is also reported from the Township of North Easthope, Perth County

The German Choir Boys

The German choir boys are requested to meet at the Y.M.C.A. rooms this morning at 10 o'clock when they will be driven around the town, at the hospitality of their friends. The hosts who are entertaining them will kindly see that they arrive safely at the building, and on time.

An Important Case

A case for violation of the Public Health Act will come before Police Magistrate Dumble this morning at the Police Court. It is the first case of the kind in Peterborough. It appears that the card was put up in a window of a house on Parnell street, and the father, who will neither stay in our out of the house, will be charged with being a danger to the public health.

Sure Cure for Sick Stomach

Such maladies as Nausea, Sick Stomach, Cramps and Colic, yield instantly to Polson's Nerviline, and if you suffer periodically from any of these complaints just keep Nerviline handy and take a few drops in water for quick relief. A large 25c. bottle of Nerviline is a comfort and safeguard in any household, and will save great suffering and big doctors' bills every year. Do you use Nerviline? Try it.

Hamilton's Pills Don't Gripe.

THERE IS A COLD SNAP COMING

but a WARM SNAP in prices at the old reliable firm of PETE SIMONS & CO. will make matters right. He quotes the following red hot prices:

$ 7.00 Overcoats reduced to $ 4.00
20.00 Overcoats reduced to 14.00
4.50 Peajackets reduced to 2.50
7.00 Peajackets reduced to 4.50

—A choice lot of fancy and comic [illegible] now on sale at Times Bookstore.

What Does It Mean?

The Times has received an unsigned letter dealing with the proposal to add another high salaried official to the list of civic office holders, in the shape of a road commissioner. The writer thinks the employment of a competent man to superintend and take charge of our highways is all right, but the services of engineer should be dispensed with. If the author will send us his name, (not for publication), the letter will appear, but not otherwise.

Complete Isolation Necessary

In discussing the outbreak of scarlet fever in Peterborough, the Lindsay Post says :— "The serious outbreak of scarlet fever and diphtheria in Peterborough has been checked, but not overcome Chief of Police Rossell, Sanitary Inspector, claims that physicians are still negligent about reporting cases within the legal time, and should another failure occur he say he will prosecute the offender and enforce the full penalty. In connection with our remarks a few days ago on the same subject, when we quoted Dr. McAlpine, Medical Health Officer, of this town, as having stated a couple of years ago before Lindsay Board of Health, that no case of fever had ever been traced to citizens using city water. Dr. McAlpine informs us that he referred to typhoid fever. He does not agree with the Peterboro physicians who hold that scarlet fever can also be contracted from the use of impure well water, and says that the perfect isolation of patients and suspicious persons is the plan to be followed if the disease is to be stamped out in an effective manner."

At the Opera

The Sensational French drama "Camille" was presented by the Marks Bros.' combination last evening at the local opera House. The piece is a most exacting one, calling for all-round talent to present a performance of credit. The requirements of the piece were amply furnished last evening by the artists who took part in its presentation. The unfortunate Camille could hardly have a more sympathetic representative than Miss May A. Bell Marks. Her action was marked by intelligent restraint, and she found no difficulty in commanding the sympathies of the audience. Mr. Will Stewart scored another success as Armand Duval, and the same may be said of J. C. Connolly as the Count de Varville. It was a production of all round merit.

The present visit of this clever combination has been so successful that the visit will be extended until Wednesday evening next, Feb. 11. Several new plays are yet to be produced including "In Old New York Town," which is promised for Monday night. The attraction for tonight is "A Romance of Colorado.

SOCIAL AND PERSONAL

—Mr. and Miss Fowlds, of Hastings, were in town yesterday.

—Mr. John Hull, of Lakefield, was in town on business yesterday.

—Mrs. Ebar Syre, of Millbrook, returned home today, after spending a week in town with friends.

—Mr. H. P. Kennedy went up to Toronto in the interest of his live stock business.

—Mrs. George Ingham, of Roseneath has been visiting her parents, Mr. and Mrs A. R. Kidd, Aylmer street

—Mr. A. H. Scobell, of the Stanley Piano Co., left for home yesterday, evening to visit his mother in Bowmanville.

—Mr. and Mrs. Poole, of St. Catherines are attending the convention, and are the guests of Mr. and Mrs. W. H Robertson, Water street.

—Lakefield News:—Mr. Wm. Patterson, of Peterborough, is at present taking Mr. Evans' place as principal of the public schools here. Mr. Evans is confined to his home through illness.

—The many friends of Mr. John Smith, ex-Reeve of Ashburnham will be pleased to learn that he is able to be out again. He left last night for Orillia, where he is engaged in doing some work at the Asylum.

—Rev. H. D. Kennedy, brother of H P. Kennedy, of town, has just closed a very successful revival at Crawford street Methodist church, Toronto. During the revival there were over fifty adult converts and over 100 children. He was in town yesterday and leaves for Deseronto today at 2 o'clock, where he will conduct services for a month.

The Cause of Deafness

Deafness and impaired hearing are due almost entirely to catarrhal inflammation of the eustachian tubes. Permanent cure is guaranteed to all who inhale Catarrhozone as directed. This vegetable compound is inhaled at the mouth, and after traversing all the air passages of the respiratory organs is exhaled through the nostrils; it completely erradicates catarrh from any part of the system, clears the nose and throat, and allays inflammation, congestion and soreness. For Deafness, Earache, Ringing in the Ears, Head Noises, Catarrh, Asthma, and Bronchitis, medical science can devise nothing as beneficial as Catarrhozone. Complete outfit for two months' use, price $1.00; trial size 25c. Druggists, or N. C. Polson & Co., Kingston, Ont.

Hamilton's Pills are Effective.

LITTLE LOCAL LINES

—Saturday bargain day at Times Bookstore.

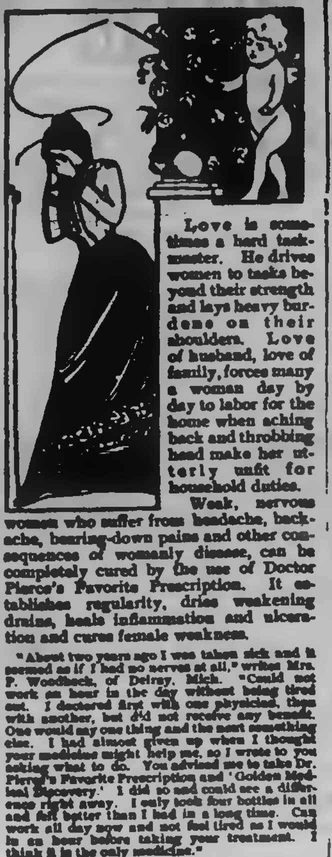
—The band was at the rink last night.

—The Orangemen of this district will celebrate the Battle of the Boyne in Lakefield on July 12th. next.

—Rev. Mr. Hannah, of the Park st. Baptist Church, has resigned. His departure will be much regretted.

—A good game of hockey will be played this evening at the Brock st. rink between the Ontario Bank team and the Imperial Bank team, Toronto. There should be a large turnout.

—A fine new building is to be erected at the corner of Charlotte and George streets, by Mr. W. J. Taylor The structure will be three stories in height, of red pressed brick. This building will extend 126 feet along Charlotte street, and 37 feet on George st. The ground floor will be taken up by about three stores, and offices will be on the two other floors above. The building will have all modern conveniences and will be heated by steam. The structure is expected to be completed about September. Mr. W. Blackwell is the architect.



Love is sometimes a hard taskmaster. He drives women to tasks beyond their strength and lays heavy burdens on their shoulders. Love of husband, love of family, forces many a woman day by day to labor for the home when aching back and throbbing head make her utterly unfit for household duties.

Weak, nervous women who suffer from headache, backache, bearing-down pains and other consequences of womanly disease, can be completely cured by the use of Doctor Pierce's Favorite Prescription. It establishes regularity, dries weakening drains, heals inflammation and ulceration and cures female weakness.

"About two years ago I was taken sick and it seemed as if I had no nerves at all," writes Mrs. P. Woodbeck, of Delray, Mich. "Could not work an hour in the day without being tired out. I doctored first with one physician, then with another, but did not receive any benefit. One would say one thing and the next something else. I had almost given up when I thought your medicine might help me, so I wrote to you asking what to do. You advised me to take Dr. Pierce's Favorite Prescription and 'Golden Medical Discovery.' I did so and could see a difference right away. I only took four bottles in all and felt better than I had in a long time. Can work all day now and not feel tired as I would in an hour before taking your treatment. I think it is the only medicine."

Dr. Pierce's Pleasant Pellets cure dizziness and sick headache.

Birds' Heart

Fatty degeneration is often the cause of death with birds. As with men and women, it is generally brought on by wrong diet. COTTAM SEED furnishes no more fat constituents than can be profitably appropriated. It produces healthy muscular tissues. [122]

Mr. Lang is Prepared.

Mr. Andrew Lang, always deft and generally victorious in controversy, has shown a new resource to the practitioner of that amusing art. He has been apprised of the fact that when Mr. Swinburne publishes his essay on Dickens in the "Quarterly Review" he will incidentally "speak his mind liberally about a recent editor of Dickens." Mr. Lang is "a recent editor of Dickens," and he reads with a chuckle the warning in a literary journal that Mr. Swinburne has the gift of "incisive language," and that the "recent editor" may "look sharply to his eye." Whereupon Mr. Lang playfully anticipates things in the "London Morning Post." He points out that he did no editing of his author, leaving the text inviolate, but merely spoke his mind about the books, "with the frankness of an old and enthusiastic admirer and the candor of an elegant and liberal mind." He goes on to eulogize Dickens again, but the gem of his delightful paper must be given intact:

If I am the unhappy "editor" on whom Mr. Swinburne is going to exercise his gift of "incisive language," why, I don't care! A good deal of language has been expended on me already as the critic of Dickens, just as considerable quantities have been poured forth on Mr. Henley, editor of Burns. Indeed, Mr. Henley himself expended, I was told, the vials of his Dickensian wrath on this head of mine, which remains "bloody but unbowed." I did not read the criticism; for I could not alter what I had written, and my feelings might have been hurt. It was not that the blessing was too great, but that the blessing came too late, for practical purposes of correction. And, even if I am the recipient of Mr. Swinburne's blessing, and of his "incisive language," that language also I shall deny myself the tonic tribulation of reading.

It is clever of Mr. Lang, and it is good of him to indicate in this happy manner a perfect way in which to discount the onslaught of the foe.

The World's Best Age.

Most people have no doubt asked themselves at some time or other what part of the world's history would have been best worth living in; it is a favorite topic, on which the superlative degree is often exercised. Mr. Justin McCarthy, the eminent Irish historian, has been heard to vote for the period of Dr. Johnson and Mrs. Thrale. Years ago, when Mr. Gladstone was alive, the Grand Old Man and a group of friends were discussing this same question at Hawarden Castle. Mr. Gladstone, without any hesitation, decided from the intellectual point of view, and expressed the opinion that he would describe as the greatest day in the world's history a day in ancient Greece, when Athens was at the summit of its glory. Another member of the group chose the day of Pentecost. The effect on Mr. Gladstone is still remembered vividly by those who were present. The intellectual gave way at once to the spiritual, and the aged statesman, "seeming rather ashamed of himself," according to one who was present, asked leave to withdraw his former choice, and to say, "A day with the Lord."—"Leslie's Weekly."

What I would like to unravel in Justa's predictions is the unknown part foreign to myself. Did she go beyond what I knew? I do not think so. When she spoke to me of the fortunate issue of the affair, this was, upon the whole, the issue which I anticipated, and which the selfish and unavowed part of my instinct desired more keenly than the complete triumph which another and more generous sentiment made it incumbent on me to pursue and hope for, although I knew it to be, in its essence, impossible. When she foretold the death of my adversary, she was but revealing a secret wish of that same instinct, one of those dastardly and shameful wishes which we hide from ourselves, and which never rise to the surface of our thought. There would be no real prophecy in this, except if, against all expectation, against all likelihood, that death should occur suddenly within a short time hence. But, even if it were shortly to occur, it would not, I think, be the Pythian that would have fathomed the future, but I, my instinct, my unconscious being that would have foreseen an event with which it was connected. It would have read the pages of Time, not absolutely and as though in a universal book, where all that is to take place is written, but by me, through me, in my private intuition, and would but have translated what my unconsciousness was unable to communicate to my thought.

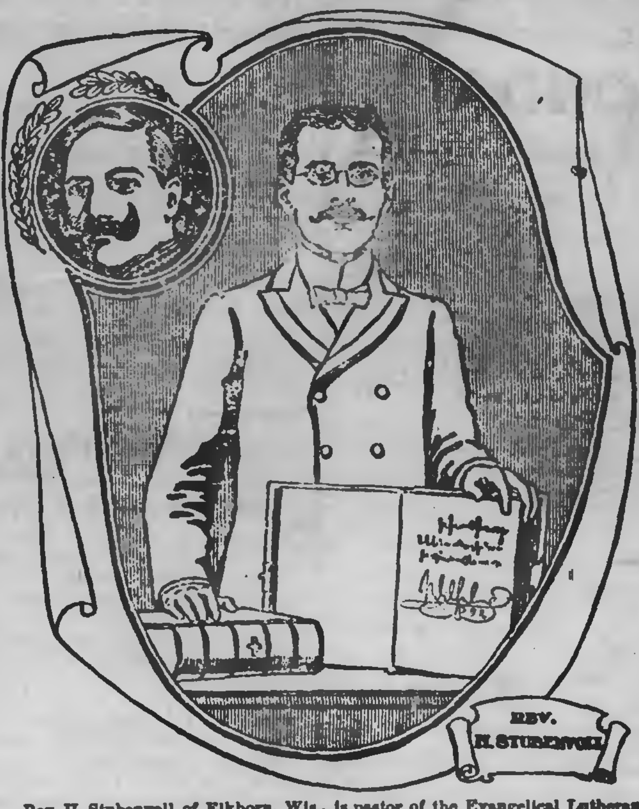
A PASTOR WHO WAS BEFRIENDED BY AN EMPEROR **SAVED BY PE-RU-NA.**



Rev. H. Stubenvoll, of Elkhorn, Wis., is pastor of the Evangelical Lutheran St. John's Church of that place. Rev. Stubenvoll is the possessor of two bibles presented to him by Emperor William of Germany. Upon the fly leaf of one of the bibles the Emperor has written in his own handwriting a text.

This honored pastor, in a recent letter to The Peruna Medicine Co., of Columbus, Ohio, says concerning their famous catarrh remedy, Peruna:

The Peruna Medicine Co., Columbus, Ohio.

Gentlemen: "I had hemorrhages of the lungs for a long time, and all despaired of me. I took Peruna and was cured. It gave me strength and courage, and made healthy, pure blood. It increased my weight, gave me a healthy color, and I feel well. It is the best medicine in the world. If everyone kept Peruna in the house it would save many from death every year."—H. STUBENVOLL.

Thousands of people have catarrh who would be surprised to know it, because it has been called some other name than catarrh. The fact is catarrh is catarrh wherever located; and another fact which is of equally great importance, is that Peruna cures catarrh wherever located.

If you do not derive prompt and satisfactory results from the use of Peruna, write at once to Dr. Hartman, giving a full statement of your case and he will be pleased to give you his valuable advice gratis.

Address Dr. Hartman, President of The Hartman Sanitarium, Columbus, O.

THE CLOSING SESSIONS Y.M.C.A. CONVENTION

Delegates Consider the Immense Fields of Great Opportunity

Gratifying Attendance at All Meetings—Evidences of the Wonderful Growth of Association Work

SATURDAY'S MEETINGS.

The third day's session opened in Murray street church, on Saturday, at 9 a.m., about 200 delegates being present. After devotional services, Rev. Dr. Harris conducted "An hour with the Bible," and took for his subject the Gospel of St. John. He made a most beautiful analysis of the beauties of the Gospel, and said the only way to study the Bible was to take it book to book. The Gospel of St. John was to be regarded as the spiritual Gospel, and reveals the Sonship of Christ in its great aspects and reveals St. Luke's Gospel as the Gospel of the Son of God.

FINANCIAL STATEMENT.

Mr. J. J. Gartshore, of Toronto, Treasurer, presented his statement, showing a prosperous financial year for the Association, with a small surplus, after all requirements had been provided for. The receipts amounted to $5,964.43, and the expenditure $5,924.48, leaving a credit balance of $29.95. The collection at St. Paul's church last night amounted to $46.24, the subscription from new people amounted to $152.50, and renewals of old subscriptions amounted to $606.

The reports of the conferences held yesterday were presented.

DISTRICT WORK.

The conference report showed that E. T. Case, of Picton, read a paper on the work which emphasized the place of the corresponding members in the Y.M.C.A, whose function was to bring men into the work from outlying districts to centres. Mr. T. J. Wilkes dealt with the topic: "Some fundamentals in organized Christian work for men." "Our opportunity to private Bible study," showed the need of a full realization of the objects aimed at. "The summer conference" also received consideration and commendation.

DIRECTORS' CONFERENCE.

At this conference, "The directors' responsibility" was the topic; and it was thought the directors should be a man engaged in business, a Christian man, and willing to give his time to the work, and should be familiar with all details of work, and capable of exercising foresight. These qualifications were elaborated in discussion.

BOYS' WORK.

At the Boys' Work Conference, reports were considered from a large number of Associations, which brought out the necessity of keeping before boys the necessity of all rounded manhood. Every boy of fourteen should have a definite place in the work. Mr. Jameson, Hamilton, read a paper on the religious aspect of the work. Personal purity was a question that must be dealt with, for the object of bringing about purity of life among boys. A paper was read by Mr. Dead of Montreal, on "Boys camps," and in a paper by Mr. Froude, of Peterborough, it was held that the Boys' department was a source of supply to the Association, and their future strength.

PHYSICAL COMMITTEE.

In the report of the Physical committee it was stated that Bible Classes for men were the most desirable. Mr. Winters, of Montreal, told of the organization of a gymnasium, which proved very successful. The Hamilton Association had found a "Good night" a useful innovation. It was the conclusion of the conference that Boys' Work in the gymnasium should be carefully looked after.

PERMANENT COMMITTEES.

The efficient and admirable work of the Provincial committee was dealt with by the committee on Provincial committees report, the secretaries, Messrs. Copeland, Wilkie and McPherson, being especially commended. The report records a budget of $6,000, and with a surplus in the treasury. Numerous recommendations were made.

AFTERNOON MEETING.

There was another large attendance at the afternoon session on Saturday, in Murray street Baptist.

After devotional service, Rev. Dr. Harris conducted "An hour with the Bible," and chose as his subject the Acts of the Apostles, and made a clear and eloquent analysis of the main points in the chapters.

Mrs. H. Yeigh, of Toronto, gave a report of the work done in the convention by the Ladies' Auxiliary Association, and expressed the gratification she felt at the appreciation their efforts has received. They, as an Association, had been in existence ten years, and she was convinced that every life had been helped and quickened by their connection with the work of Y.M.C.A.

Mr. F. S. Goodman, of New York, took up the subject: "A continuation of the consideration of the religious work department," and invited the delegates to make suggestions, and submit questions upon the subjects: "Field of religious work," and "Bible study." In the line of religious work many suggestions were volunteered by the delegates. It was thought shop meetings and shop classes were useful, and experience had proven that not only were they practical, but had shown excellent results in places where they had been introduced. They were no new thing, either, having been held in some form as far back as 25 years ago. The shop meetings held to-day, were usually at dinner hour, and the "Cleveland Idea" was quoted as a successful example. These classes were conducted in fifteen factories, and took the form of a Bible lesson, whilst a most successful shop Bible class was held at Topeka, Kansas. These classes proved themselves practical by the large numbers who attended them.

Evangelical meetings in every form were advocated by the delegates, as family prayer gatherings, missionary meetings, evangelical meetings for boys, and meetings of a social nature which should include a Bible study. The salvation of man was the vocation of the Y.M.C.A., and in neglecting that main object of the work, they would not be true to purpose. The delegates appeared to favor aggressive evangelism. It was their mission, and would be sure to produce results.

Much was said on the importance of the association work among boys. Boys were available to temptations. Most men found Christ in youth, and it was important that the association direct their labors to this source. The boys were responsive, if care was taken in the manner of presenting the Gospel to them.

More enterprise was necessary in organising and advertising Y.M.C.A. meetings, and care taken in the choice of speakers. What was wanted in this connection was a manly man with a manly message.

The meeting closed with prayer.

EVENING MEETING.

St. Paul's church was well filled at the Saturday evening meetings. Mayor Roger took the chair and after devotional service, and an anthem by the Berlin Lutheran church boys' choir, he called upon Mr. A. B. Williams, New York, to deal with the topic: "An opportunity in view of the young man of the world."

The speaker took the student class of young men as the direction of his discourse, whom he though, taking the world as a whole, were the most influential class. He thought it a very significant fact that the Y.M.C.A. had laid hold of the hand and heart of this class of young men. Practically every institution of importance has been entered, despite the fact that many of them were bound by conservatism. Even theological students, who thought they had not so many temptations as other young men, had been brought into fold of Y.M.C.A. workers.

The speaker said he could point to eastern universities, where it was impossible for any man, leading an immoral life to be appointed to any position of leadership by the students, such a hold had the institution upon the mind and heart of the student. He thought that college and university life was now the safest place against temptation any young man could enter.

The colleges of this continent, the speaker said, were giving some of its brightest spirits to the work of the institution, and he cited many students who had taken notable positions in the religious world, and were now devoting their energies and mental equipment to this noble work. It was not only among the students of this country, that the institute had taken a hold. In Great Britain and in all lands a great world-wide movement of students was devoting its energies for the evangelization of the world.

The speaker concluded by saying that we have every reason to be proud of such an agency as the Association for bringing men to the standard of Jesus Christ.

Mr. C. K. Ober, Chicago, was the next speaker. He dealt with the same topic. There were four great divisions of the Christian army, viz., the students of our colleges and universities, railroad workers, the army and navy, and the city men. He represented the young men of the city. He spoke of the largeness of the opportunities in the cities and towns of North America. There was a wide field in the larger cities. In smaller towns of the continent where the Y.M.C.A. was represented, they had an average membership of 29 per cent., whereas in the large cities the average membership only showed 3 1-2 per cent. But they were growing most rapidly. So fast, indeed, that in many large centres the Association had outgrown their buildings. The city of Buffalo was quoted as a notable example of this. There the Y.M.C.A. had made such rapid strides during the past few years that a new building three times the capacity of the old one had had to be erected. The movement was showing unmistakable signs of rapid growth, and he looked forward when the Association would at least double its present membership.

The speaker also dwelt upon the the field of opportunity among railroad men, and quoted the laudable cooperation of the railroad corporations in the work. The employers sought this means of solving the great problem of capital and labor.

The session adjourned with prayer.

SUNDAY SERVICES.

A Fellowship meeting opened the Sunday services of the Y.M.C.A. Convention, which was held in the Association building at 9.30. Several informal addresses were delivered.

There was a large attendance at the Men's meeting, held in the opera house yesterday, commencing at 4 p.m. Mr. F. S. Goodman, of New York, delivered a stirring address. He opened his remarks by a reference to the wonderful growth of the Association. The movement had its origin fifty-nine years ago in England, in the heart of a young man, who saw the need of such an institution among his young associates. At the present time there were 7,000 Associations in existence.

The speaker then dwelt on Christ's mission to men, and appealed to those present to bring themselves into touch with the Christian life.

FAREWELL MEETING.

The Farewell service of the Convention was held in the George street Methodist church last evening. There was a crowded congregation. The service was conducted by Rev. W. J. Jolliffe, of Charlotte street. Anthems were rendered by the German choir.

MUCH MISERY FOR THE LONDON POOR

Hundreds of Thousands Go to bed Hungry Every Night

THE DISTRESS VERY WIDESPREAD

Interesting Budget of News by Cable - Mr. Chamberlain's Visit to South Africa

London, Feb. 29.—The distress and destitution of the London poor this winter are intense. All the resources of the various charitable organizations are strained to their utmost. Industrially, times in England, and particularly in London, are not good. Normally there are more than 150,000 confessed paupers in London. Now, with tens of thousands of honest workingmen unable to obtain employment at anything, it is a bitter fact that hundreds of thousands of Londoners go to bed (when they have one) hungry every night.

The unemployed workingmen are parading the streets, particularly of the fat, wealthy West End, in processions of from 200 to 1,000.

In some twenty processions in different parts of the city there were 12,000 men. They were thinly clad. "out-of-works," as they are called here, and they looked and were very destitute. They carried banners inscribed "Give us work or bread" and "We are willing to work, but there is no work."

One procession tried to sing the stirring song of the French "The Marseillaise," as it passed through Park lane, the millionaires' row of London, but there was no enthusiasm in the song.

Hungry Englishmen cannot sing "The Marseillaise." It takes a Frenchman to do it justice.

Each procession is escorted by a squad of police. There has been no disorder. The men are permitted to solicit money, and dozens shaking collection boxes walk the sidewalks flanking each procession of the unemployed.

The timorous people are demanding that the authorities prohibit these processions of the miserable, fearing that trouble may come from them.

The distress is widespread. A charitable bachelor living in The Temple the abode of the lawyers, the other night determined to share his Sunday night dinner with twelve unfortunates.

He found them easily on the embankment. Of the twelve three were high school graduates, three were university men and one could speak Greek and Latin as fluently as English.

The managers of the Salvation Army's relief shelters state that not in years has utter want been so widespread, or so many honest men out of work and unable to earn over 10 cents a day. Fortunately the winter until now, has been very mild.

PRINCELY SALARIES

London, Feb. 9.—The Established Church of England pays its high priests generously. Dr. Randall Davidson, bishop of Winchester, the appointed archbishop of Canterbury, will in the latter post get $12,500 a year more than he got at Winchester.

The bishop of London and the archbishop of York get the salary of the president of the United States, $50,000 a year.

The bishop of Durham gets $35,000 annually. The bishops of Oxford, Worcester, Salisbury, and Bath, have to make both ends meet on salaries of $25,000 a year.

MR. CHAMBERLAIN'S TRIP.

London, Feb. 9.—When the colonial secretary, Joseph Chamberlain, who is now in South Africa, with his wife, who is an American, started for the Cape in imposing style in the huge cruiser, the Good Hope, the radical press condemned the government for extravagance in setting aside a great warship for Mr. Chamberlain's cruise.

It was stated that Mr. Chamberlain could have gone to the Cape in the style of an American millionaire for $15,000, with special cabins and all the luxuries of the season.

It now transpires that Mr. Chamberlain's trip will cost much more than even the radicals imagined.

The cruiser on the way out burned an average of 280 tons of coal daily. the first week's consumption was 1,680 tons.

Coal in England sells at about 12 shillings, or $3 per ton. Americans who are now paying from $5 to $10 a ton for coal can appreciate the fact that the government was indeed lavish in providing a huge warship to carry Mr. Chamberlain and his wife from Portsmouth to far Durban.

It is as much of an extravagance as if Mr. Morgan were to use one of his huge trans-Atlantic ships to carry him and his wife from New York to Southampton.

Mr. Chamberlain's trip is probably the costliest any untitled Englishman ever has made.

THE KING'S MODESTY.

London, Feb. 9.—King Edward has set his face against publicity and has ordered the palace attaches not to give out any news of his comings and goings.

It is reported that the King has caused orders to be given to the servants of all his palaces that they must not divulge anything of what they see or hear in the palaces, and must not even tell their wives!

The servants never learn anything about their royal master's movements until the very last moment.

Very short notice is given them in which to get ready to travel with the King and Queen, and they are forbidden to ask questions about the King's next journey.

A palace servant was abruptly dismissed the other day because he answered a simple question asked by a newspaperman. A nobleman passing heard the brief conversation and reported it, and the servant was instantly dismissed.

No servant or clerk at the palace dare be seen speaking to a newspaper man. They dare not even return an ordinary salutation.

BOERS RESPECT A STRONG MAN

Chamberlain Has Earned Their Admiration By Keeping a Steady Hand on the Reins

His Advice, "Let us Shake Hands and Be Friends," Accepted by Country Burghers

London, Feb. 9.—Hopeful signs are apparent in the Transvaal of the establishment of good relations between the Boers and the British. Mr. Chamberlain's tour which continues to be reported at great length in the newspapers, having had the most promising results already. Mr. Chamberlain's trek through the Western Transvaal certainly was the most interesting part of this journey. "Now the fight is over," said Chamberlain at Venterdorp, "let us shake hands and be friends."

It looks as if the country burghers are inclined to act on this excellent advice. A remarkable feature of the proceedings at Venteradorp was the impromptu and unexpected speech of Gen. Delarey, who expressed his pleasure at seeing Mr. Chamberlain among them and remarked that he had found the colonial secretary a strong man. He thought Chamberlain was the man to set things right in South Africa.

Chamberlain has earned the respect of the Boers by refusing to reopen the peace terms. He declined in London when the Boer generals endeavored to persuade him to do so, and he declined again at Pretoria, where another attempt was made.

The Boers respect a man who knows his own mind and will keep to his resolution. Many years ago a Boer who knew his countrymen well, said; "It is the jerky hand on the reins that makes them jibe." Chamberlain's hand is steady, and the Boers already are showing that they appreciate firmness when it is allied with kindness and sympathy.

The poor pro-Boers in England are sadly disconcerted by Chamberlain's success with his former enemies. It upsets all their calculations, falsifies all their predictions, and makes them them not look a little foolish. "Never prophesy unless you know" is a sound maxim in politics as well as in the other departments of life. Had they observed it the small section of extreme pro-Boers in this country would have been spared much mortification. As it is, they are inclined to withdraw their sympathy from those so grievously by yielding to the stern logic of facts and grasping the hand of friendship held out to them by Chamberlain in the name of the British nation.

Britishers are compelled nowadays to "think continentally," as Alexander Hamilton would have said. While South Africa claims their attention to its pressing problems they dare not forget North Africa, where Kitchener and Milner both served their apprenticeship under Cromer, the great administrator, whose magnificent statesmanship their activities have temporarily outshone.

PREMIER SPRIGG NOT POPULAR.

Kimberley, Cape Colony, Feb. 8.—Since his arrival here with Colonial Secretary Chamberlain, a series of demonstrations against Sir John Gordon Sprigg, the premier of Cape Colony, have occurred. He was publicly hissed on several occasions, and during Mr. Chamberlain's remarks on the situation in Cape Colony at the banquet given in his honor here Friday evening, cries were raised of "Away with Sprigg," while the members of a deputation which waited on Mr. Chamberlain informed him in the premier's presence that they had no faith in the Sprigg ministry, which "pampered the Afrikander bund and was dependent on it for its existence."

Sir John heatedly characterised these remarks as a personal insult.

ONTARIO BANK WINS FROM IMPERIAL

Bank Hockey Team of Toron by 6 to 4.

Saturday night's match between the Imperial Bank team, of the Toronto Senior Bank League, and the Ontario Bank seven, was one of the fastest and best games played here this season, and the win of the local team by 6 goals to 4 was a very popular one. The Imperial team has made a splendid showing in the Bank series, and on Saturday night were strengthened by McKay and Wiley, of the Bank of Toronto team. McKay is the Wellington's star rover. The Ontario Bank has a fast, well balanced team, and it is understood that other games will be arranged with other Bank League teams.

The game was free from roughness. Referee McCabe, who gave splendid satisfaction, was not called upon to discipline any of the players. The half time score was 5 to 4 in favor Ontario, and 6 to 4 at the finish. The teams were as follows:

Ontario Bank—Goal, Sawers; point Hollingshead; cover point, H. Armstrong; forwards, Ferguson, R. Armstrong, Blomfield, Macfarlane.

Imperial Bank—Goal, Ogden; point Lowsmboro; cover point, Smith; forwards, Wiley, MacKay, Young, Keele.

The T.A.S. will have a practise with the Intermediate Colts to-night between 7 and 8.

The T.A.S. and Lakefield will play off their tie at Lindsay on Wednesday night. A special train will leave Peterborough at 7 o'clock and return at 12, so that the supporters of the team may accompany the boys. Tickets can be had at the T.A.S. rooms, Ormond and Walsh's or Lynch's drug store.

—A choice lot of fancy and comic valentines now on sale at Times Book-store.

THE DREYFUS CASE BROUGHT UP AGAIN.

Forged Documents Before Rennes Tribunal.

TRUTH IS SURE TO COME OUT

Minister of War is Charged with Crime.

London, Feb. 8.—The Times Paris correspondent writes that M. Jaures, the Socialistic Deputy, writing in the newspaper, The Petit Republique announcing his intention of throwing more light upon the Dreyfus case, says; "I defy my adversaries to oppose in Parliament free and loyal utterance of the truth. I shall there declare it on my personal responsibility without exaggerating and without attenuating." It is asserted by the Agence Fournier that M. Jaures has proof that secret documents submitted to the Rennes court martial were forged., and he is confident that he can get the verdict of that tribunal annulled. It is asserted that a general, who once held the post of Minister of War, is implicated. The Master of Deputies will be asked to prosecute him.

PRINCESS NOT WELCOME

Mentone Shows Hostility to Her and Giron

Mentone, Feb. 9—The Crown Princess of Saxony and Andre Giron do not like the treatment they have been receiving here recently and will probably leave at once. For several days passers-by have jostled the couple on the streets whenever they appeared. For the last day or two Giron and the Princess have remained at their hotel. Giron states that they have determined to seek new quarters immediately, and, when the divorce proceedings are over, they will go to America.

DETERMINATIONS TO HIT AT GREAT BRITAIN EVERYWHERE

Anglo-Geman Alliance is Violation of Compact with Colonies.

THE EMPIRE'S UNITY.

Australia Condemns the German Alliance

London, Feb. 7.—Count Posadowsky, Secretary of the Interior, speaking in the Reichstag at Berlin yesterday, said that some Canadian wheat and flour may enter Germany via the United States, thus benefiting, owing to the lower duty, on American cereals, but that every effort would be made to stop it. He also said that no Canadian food was bought by the Government for the German army and navy, and that the Government would not buy any.

The German Government seems delighted to hit the British Empire at any point.

Last night, Right Hon. Henry H. Asquith, formerly Home Secretary, speaking at a big Liberal banquet, said he hoped the self governing colonies and the Motherland would always feel one people, with one destiny. Attorney-General Wise, of New South Wales, speaking at the same meeting, startled the gathering by declaring that the Anglo-German alliance in Venezuela was contrary to the spirit of the understanding arrived at by the Colonial Premiers at the late conference, which said that the views of the self-governing colonies should be obtained in such treaties as they were interested in. Mr. Wise said that Australia condemned the German alliance, and considered Germany her only enemy in the Pacific.

Dying by Slow Degrees

Although not always aware of it yet thousands die by slow degrees of catarrh. It first attacks the nose or throat, then the lungs, and finally spreads all through the system. Catarrhozone is the only remedy that will immediately prevent the spread of this awful disease. Every breath from the inhaler kills thousands of germs, clears the throat and nose, aids expectoration and relieves the pain across the eyes. Catarrhozone eradicates every vestige of catarrh from the system, and is highly recommended also for Bronchitis, Asthma, Deafness and Lung Trouble. Price $1.00; trial size 25 cts., all druggists. Polson & Co., Kingston, Ont.

Arms and Ammunition Taken From Chinese Reformers

Hong Kong, Feb. 8.—The authorities of Canton have captured arms, ammunition and the commissariat which were in possession of the reformers. Foreign marines are patrolling Shamian, a suburb of Canton. Gunboats are being held in readiness in in case of emergency.

DUTCH STRIKE SERIOUS

Cavalry and Marines Sent to Amsterdam to Keep Order

Amsterdam, Feb. 9.—The strike of men employed on the wharf railways and the railway men's union, which has assumed the proportions of a general labor contest, became so serious to-day that it was necessary to reinforce the garrison with detachments of cavalry from The Hague and Haarlem and marines from Nieuwe-Diep, the harbor of Helder. The ironclad Evertsen is held in readiness at Nieuwe-Diep to start for this place at a moment's notice. The postal service of Amsterdam, Haarlem and Utrecht is done by motor cars.

MEN'S CLUB ORGANIZED

Young Men of St. John's Met on Friday Last for That Occasion

A meeting of the young men of St. John's congregation was held in the schoolroom on Friday evening last, with the object of organizing a Men's Club. Officers for proposed club were elected as follows; President, Mr. Gray, secretary-treasurer, Jas. Bell; executive committee, Messrs. T. Dawson, R. Gibbs, and R. [illegible]

And Russia and Austria Reply with Firm Requests for Reform.

FABRIC OF MODERN GERMANY IN HOMES

Regulationc Under the New "Undesirables Act."

Paris, Feb. 8.—Official advices have been received here confirming the report that the Sultan of Turkey has ordered the immediate mobilization of 240,000 troops for a military demonstration in Macedonia. The step is regarded with apprehension by the French officials as being likely to involve complications between Turkey Russia and Austria.

It is said that the Russian and Austrian Governments have agreed on a firm note to the Sultan, which will be presented within the next few days, insisting on administrative and financial reform in Macedonia. Although France will not be a party to the note, she will approve of it. It is considered the Sultan's mobilization of such a vast army is clearly an effort to forestall the presentation of this note. The mobilization of so many troops is here regarded as unwise and dangerous, especially as it is said the soldiers who are to be brought into Macedonia from Asiatic Turkey are semi-barbarous levies and are hostile to Christians, which will tend to inaugurate another series of massacres. It is understood the powers are exchanging views as to the course to be pursued towards the mobilization of Turkish troops.

IRRIGATION

What the British government has done in India to irrigate arid regions is both encouraging and instructive to this country, which has so much land that needs water. The British government has expended in India no less than $150,000,000 in works to distribute water. It did not introduce irrigation into India, for irrigation had been in vogue there from ancient times, but it developed old systems and built new ones, so that now India has the most extensive irrigation works in the world. The Ganges system, which was opened in 1854 by Lord Dalhousie, who was then governor-general of India, now includes more than one thousand miles of main canals and branches, and takes water to an area exceeding 1,000,000 acres. In the Madras presidency, are the irrigation works projected by Sir Anthony Cotton. The great dams that he designed have relieved vast sections of country from the dangers of famine, and in some instances have made lands formerly barren fertile and productive. Some of the irrigation plants have proved highly successful from a financial point of view, one of them yielding recently thirty-one per cent. on the capital invested. Another plant, which has converted one of the poorest regions in India into one of the most prosperous, pays fifteen per cent. on the money invested. There are several canals in India more than 250 miles long. The extension of the works is still in progress, and will go on probably until most of the land is protected against the failure of the periodic rainfall.

It will cost a pile of money to carry out the great irrigation schemes that are proposed in this country, but much of the money will doubtless be well spent. It is astonishing what water will do for some of the dry western lands.

LOOKS LIKE A POLICY OF RETALIATION

It was understood in 1896 and 1897 that the Bertram brothers, John and George, has played an important part in the preparation of the Liberal tariff, and it was to George Bertram that Sir Wilfrid wrote his letter a few days before the election in 1896 telling the manufacturers not to be afraid. An expression of opinion from Mr. John Bertram is therefore of considerable significance in connection with the policy of the Liberal party. Mr. John Bertram has just written to the Globe a letter in which he advocates changes and increases in the tariff to place Canada on a more equal basis with the United States. A change of policy has been clearly hinted at on a number of occasions, and this is but another indication of the lines in which development is taking place in the Liberal party. Mr. Bertram writes;

"If the tariff of the two countries, so closely associated with each other, were the same, manufacturers might be left to fight it out, but the Canadian low tariff enables Americans to exploit the market, whilst the Canadian is prevented by the high tariff of the United States from making a raid back, as American manufacturers cynically take advantage of our helplessness, and have been known to boast that they would ruin this or that Canadian factory."

As a remedy, Mr. Bertram urges the substitution of "specific" for "ad valorem" duties on competitive American goods coming into Canada, and also in some cases an additional duty to the regular duty. He thinks this change would cover nearly all the hardships now existing.

PARTISAN POLITICS

Wentworth county council, which holds forth in Hamilton, is illustrating the beauties of partisan politics in municipal affairs. The council consists of twelve members. This year six Grits and six Tories were elected. The council was to meet to elect the county warden. An injunction was got out forbidding a Grit member to take his seat because he had been a school trustee when elected. Pending the decision in court, the five other Grits won't go to council. If they did, the six Tories would elect a Tory warden. So long as the five Grits stay away, the Tories can not do any business, because the law requires a majority of the council for a quorum. The six Tories are not sufficient. The legal judgment upon the injunction may not be decided for some weeks. Meanwhile all Wentworth county municipal business is blocked. What does this matter in comparison with the importance of having a Tory or Grit warden to help decide where a county bridge shall be built, or a county ditch dug?

EDITORIAL COMMENT

There appears to be some ground for the charge that the oil find in the vicinity of Chatham is being exaggerated and that a large discount may be deducted from the reports sent out from here to the press. Intending investors should govern themselves accordingly and thoroughly investigate propositions before putting money into them.

Chili and Argentina have paid another compliment to Britain, their great stand-by in international disputes. They have agreed to limit their naval armaments so that neither need be afraid of the other. By part of this agreement, they are to sell off the ships they now have under construction in Europe, and—the most interesting point of the whole thing—if they are not successful, "the ships are to remain under the control of the King of England."

In the Supreme Court of the United States a judgment has been rendered sustaining a law of California which declares void all contracts for the purchase or sale on margin of the shares of the capital stock of any corporation, or for the purchase or sale of shares to be delivered at any future time, or all agreements for payment of any money in such transactions. One Parker who bought stock on margin and lost, sued the broker to get his money back and has won. The California law looks like a pretty successful whack at stock gambling.

HIS BACK BROKEN

Deseronto Man Named Blatchford Struck by a Freight Train

Deseronto, Ont., Feb. 8.—About 6.30 last night a man named Blatchford, about 60 years of age, was struck by a G.T.R. engine at Deseronto Junction and had his back broken and head badly cut. He was walking on the track at the west end of the yard, and in getting off one track to save himself from an approaching train, he got in front of a freight train moving slowly in the opposite direction. He was sent to the Kingston General Hospital this morning.

THEY ARE A MARVEL

Dr. Clarke's Little Red Pills the Greatest Wonder of the Age

Editor of the Morning Times;

Sir,—I am only too pleased to write a letter to the press, as I firmly believe that all who suffer from rheumatism or any troubles of the blood can get sure and certain relief. I was ill for many years, and am now entirely well. Dr. Clarke's Little Red Pills are without doubt the greatest wonder of the age in medicine. They cured me, and I know they will cure others who are even worse than I was. I write this of my own accord in the hope that it will do some good. Evans Blair, G. T. R. News Agent, Union Station, Toronto.

A. R. Legge, Stanstead, Que., writes "Six boxes of Dr. Clarke's Little Red Pills entirely cured me of indigestion after years of torture."

Dr. Clarke's Little Red Pills are positive and certain cure for rheumatism, asthma, paralysis, coughs, lame back, indigestion, all stomach and liver troubles, female complaints, even where the diseases have been standing for many years; the most stubborn case will yield. Sold by Ormond & Walsh, Peterborough, price 50c. per box.

Dr. Clarke's Sure Cure for Catarrh and Dr. Clarke's Sure Cure for Eczema, same price. $500 will be paid for any case that it will not permanently cure.

RELICS OF PAARDEBERG

Chamberlain Views the Scene of the Great Battle

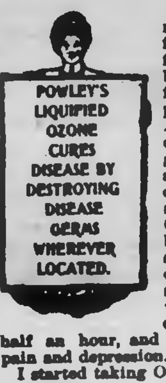
London, Feb. 9.—The Times has a despatch from Paardeberg saying that Mr. Chamberlain arrived in that South African city on Saturday and spent two nights in an encampment pitched near the scene of Cronje's surrender. Very few landmarks of the battlefield have been effaced. Some of the trenches are becoming filled, but the debris, such as burned wagons and bleached bones of animals, still bear witness to the long resistance of the Boers. Two more Boer rifles were discovered in the river bed, and bullets and cartridge cases and shells abound.

Dyspepsia Cured To Stay Cured.

Mr. J. Gibbs, of Toronto, Suffered Intense Agony--Was So Bad That Food Would Not Remain on His Stomach Half an Hour.

Powley's Liquified Ozone Soon Improved His Condition—In a Short Time He Was Able to Eat Every Kind of Food.

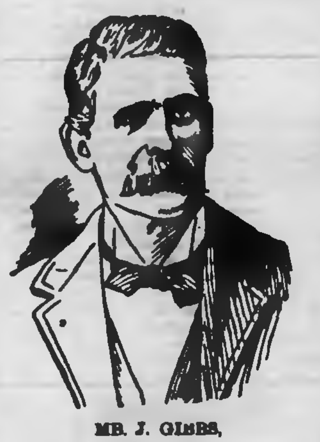
To-day He is a Well Man---By Killing the Germs, Ozone Eradicated the Disease and He is Cured to Stay Cured.



I suffered the most insense agony from dyspepsia and found it impossible to get a cure from physicians or patent medicines. Anything I would eat would not digest and my stomache would become distended with the sour fermentation. Great gusts of belching would sometimes nearly choke me. I was so bad that food would not remain on my stomach half an hour, and I suffered intense pain and depression.

I started taking Ozone and it made a difference in a very short time. I was soon able to eat all kinds of food without any after distress. I have had no return of this stomach disorder, and to-day am a well man through Ozone. I visited Nova Scotia occasionally and found that my dyspepsia would leave me. When I returned to Toronto my trouble would come back as badly as ever. In the light of my recent experience I feel satisfied that my relief in Nova Scotia was due to the Ozone in the atmosphere.

Yours very truly,
(Signed) J. GIBBS,
Hardware Dealer,
724 East Queen st., Toronto.



MR. J. GIBBS,
Toronto, Ont.

The remarkable success of Powley's Liquified Ozone in the treatment of Dyspepsia and all other stomach troubles is due to the fact that it attacks the cause of the trouble instead of merely alleviating the symptoms. It cures Dyspepsia by destroying the disease germs that cause it.

Powley's Liquified Ozone is sold by all reliable druggists—never by fakirs or peddlers. Price 50 cents and $1.00 per bottle. Our book on Stomach Trouble for the asking.

THE WORKINGMEN'S EDUCATION MOVEMENT

Lecture to be Delivered Under the Auspices of Trades and Labor Council

All right thinking men should aid the workingman in their present campaign of education. The labor movement has forged its way through many successes and many reverses to a higher plane than ever before. The coming lecture in the Opera House on Friday, February 13th., ought to be largely attended by all those who have the good of the toiling masses at heart, as well as by those who feel the necessity of finding some way to stop the conflict between capital and labor which has done so much damage in both England and America. The lecture will not be merely a defence of labor, but a careful and impartial examination of the whole field, as it is at present, of both capital and labor. These meetings are being held in all countries just now in connection with the workingmen's education movement. As it is the firm conviction of all moderate-minded men that education is the solution of the differences between capital and labor the general public will do well to encourage the workingmen by being present. It has been only too true heretofore that the well-to-do have failed to interest themselves in the movements of labor, apparently siding with capital as against labor. A chance has now arisen in this conciliatory attitude of the workingmen, who are inviting rational discussing of the question and a sympathetic interest, for the public at large to show that they are in earnest in their desire to do the fair thing by both parties. If in the future which is now making for order becomes disorder and chaos it will be due to the apathy of the general public quite as much as to anything else. The workingmen invite both men and women to be present and every effort will be made to make the discussion of a great question both interesting and profitable.

A VERY DESIRABLE INVESTMENT

THE McLENNAN PAINT COMPANY

LIMITED

BUFFALO - - - NEW YORK

INCORPORATED UNDER THE LAWS OF CANADA

CAPITAL, - - - $500,000

Dividends on Preferred Stock Paid Quarterly.

For the purposes hereinafter stated, we offer at par,

50,000 of our 7 per cent. Preferred Treasury Stock Shares, $100.00 each

Payments as follows: 20 per cent. on amount of stock subscribed for at time of subscription; 30 per cent. in 60 days balance in 90 days. Receipts will be issued until full amount of stock subscribed is paid, when certificates bearing the Company's seal, and signed by the President, Secretary and Treasurer are issued. The McLennan Paint Co., Limited, have one of the most modern plants of its kind in the world, occupying 300,000 square feet of floor space. The capital of the Company is a half million dollars. The growth of the business has been phenomenally rapid and conservative. In line with other large industries, the Company propose to establish a branch factory in Canada for the manufacture of their products, which are covered by valuable patents, and which practically give the Company a monopoly, and, for the above purpose, offer at par $50,000 of their 7 per cent. Preferred Treasury Stock.

The McLennan Paint Company, Limited, was organized in 1892 by Mr. C. J. McLennan of the McLennan Dipping Process, and other valuable paint-making machinery. The Company began business in rented premises, in East Buffalo. So profitable was the business, and so rapid the growth, that large factories were built in North Buffalo in 1895. The business again doubled, and another plant was added in 1898. In 1901 the Company invented and perfected a line of reds, or vermilions, permanent in color, and at much less cost than the old line colors. This increased the sale of their products practically one-fourth, making it necessary for them to build a new Color and Chemical Works. This factory is without doubt the largest and most modern in the world. Mr. Charles J. McLennan, the President of the Company, and the inventor of labor-saving machinery, such as dipping tanks, mills, etc., is recognized as one of the most skillful and best known paint manufacturers in the country. The name and fame of this Company, and its products, are known all over the United States and foreign countries, and that they will capture the Canadian market is evidenced by the fact that many of the large Canadian manufacturers are at present using their goods, in face of the heavy duty. It is with a view to saving this 25 per cent. duty and adding it to to the profits of the Company that they have decided to establish a branch in Canada, which will be controlled and managed by the parent Company.

Practical men of means, character and national reputation constitute the directorate and management. Each department is managed by a skilled man; monthly statements rendered and careful audet made semi-annually. The books are always open to the smallest shareholder. The finances of such a concern are guarded as closely as the finances of any bank, and failure is practically impossible.

COPY OF TESTIMONIALS.

A. C. Cornell, Toronto, Ont.: Columbia National Bank, Buffalo, N. Y., Jan. 23, 1903.

DEAR SIR,—The McLennan Paint Co. are good customers of this bank, and I have known them personally for years. All the officers bear excellent reputations, and are considered good business men. Their management is evidenced by the large business they have built up, as careful and conservative. They have met with great success in the past, and I believe that today, theirs is one of the largest and most prosperous concerns of its kind. I have every reason to believe that the stock which they are now offering for sale is a desirable, as well as a safe investment. Yours very truly,

L. H. GETHOEFER, Cashier.

The Merchants' Refining Co., Refiners of Petroleum, Paraffines, Paraffine Wax,
Lubricating Oils, Residuum, Napthas, and Gasoline,

A. C. Cornell, Toronto, Ont.; Buffalo, N. Y., Jan. 23, 1903

DEAR SIR,—Your favor of 21st received, and note you are offering for sale $50,000 of the preferred stock of the McLennan Paint Company and ask me what I know of the firm. Would say I have had business dealings for eight years—transactions of many thousands of dollars. I am also doing business with other houses engaged in the same line, and desire to say there is no house in America to-day that stands higher than the McLennan Paint Co. The growth of their business has been phenomenally large, and under the conservative management of the President, Mr. C. J. McLennan, the success of the business is assured in the future. As an investment, in my judgment, nothing could be safer than the stock they offer.

Very respectfully, C. A. SALISBURY, Manager.

A. C. Cornell, Toronto, Ont.: Buffalo, Jan. 26th, 1903.

Dear Sir,—Referring to the sale of $50,000 of our 7 per cent. Preferred Stock, the Prospectus does not elaborate on the proposition, but merely mentions the amount guaranteed. I desire to inform you, however, we could have paid at least 14 per cent. last year, but carried balance to a Reserve Fund, which, necessarily, makes the stock very valuable.

Very truly yours,
THE McLENNAN PAINT CO., LIMITED,
C. J. McLennan, Manager.

P.S.—Having visited this proposition on behalf of some very conservative investors, I can verify all the above. The plant is extensive and modern in every detail; officers and management skilled and very industrious; all the products superior. This is a Canadian Company, Canadian Charter. Having built in Buffalo, in proximity to raw material, by shipping here in ground state and preparing here, will save and add large duty to already large profits. Bear in mind this is not prospective, but a large, rich, going, paying institution. Prospectus, application forms, and any further particulars, and subscriptions, address the undersigned. All cheques or drafts for stock made to the order of the Company, and forwarded to

REPORT BY EX-SUPERINTENDENT OF MINE

Cecil R. Gold Mining and Milling Co., Los Angeles, California.

Ballarat, Cal., Nov. 1st, 1902.

Gentlemen,—Your request for my opinion as to the "Santa Rosa" group of mines and other claims in which you are interested in this territory, to hand, and in reply will say:

The "Santa Rosa" group, which is located southeast of Ballarat some three and a half miles, consists of twelve claims, equal to 240 acres. The ledge crops out more or less the full length of these claims, showing the same character and formation of work as where development work has been done. In most of the outcroppings it shows highly mineralized rock, with pyrites of iron, mica, schist, slate, slate porphyry, gouge, quartz and quartzite, all horning more or less. Where work has been done, it shows a very marked improvement in both quantity and quality of gold-bearing rock. Commencing with the surface, the ore shows much iron and copper stain. All mill tests show rich ore commencing with the surface; in fact, I milled for several days and recovered [illegible] and over per ton, yet the milling process does not pay more than two-thirds of the value of the ore, the tailings ofttimes running as high as [illegible] per ton, and never less than $12.50. To save the entire value of your ore it will be necessary to instal either concentrators or a cyanide plant. From careful study and frequent examination of the surface of the ground, and down as far as has been opened below the surface, I am highly pleased with the property. It is certainly a fine property, and as good as any I have ever had the pleasure of examining. Considering your mill site, with tramway facilities added, water, fuel, and cheapness of mining the ore, the Cecil R. will be capable of paying enormous dividends when your capacity for milling is increased to what it ought to be.

Wishing you every success, I remain. Yours very truly,

(Signed) G. W. FLEMING,
Ex-Mine Supt. Cecil R. Gold Mining and Milling Company.

Price is now [illegible] cents a share, and we offer [illegible] shares at this price, but it may be advanced by January 1st, 1903, to [illegible] cents a share.

Stocks—THE MARKETS OF THE WORLD—Grain

Deeper Levels, New Hoist, Increased Power, New Mill, More Ore, Greater Earnings
That's the Policy of the

GOLCONDA

CONSOLIDATED GOLD MINES COMPANY

The Golconda made a fortune for its former owners in its surface workings. From 500 feet the shaft will be sunk to 1,200 feet. A new hoisting plant has been ordered. That will carry out the waste rock and the ore. From 20 stamps—the size of the present mill—the reduction plant will be increased to 60 stamps. Nine hundred feet of pipe is being added to the 7,000 foot pipe line. This will increase the electric power to 1,000 horse power.

The COLCONDA produced ore worth $211,000 per ton. That's the Government ecord.

Suppose you were to invest in the future of this great mine? You would want to know something about it and its neighbors; you would want to know everything about its directorate; you would want to know that your invested capital was safe; you would want to know what it would likely earn from the time dividends will be declared—March, 1903—and for scores of years thereafter.

BUY! WHY?

BECAUSE

THE SOUR LAKE OIL CO.

Has placed four-fifths of its stock in the treasury for development work; and because

Oil is reached in less than half the depth required on Spindletop Heights in Beaumont;

The people in Canada are well acquainted with the management, which is in the hands of HON. JOHN L. BITTINGER, United States Consul General to Canada; F. S. Ashley, Vice-President of the Massachusetts Securities Co., and W. L. Marston, Vice-President of the American Union Oil and Refining Co.

These gentlemen have made a dividend payer out of one company and have raised the value of its stock from 5c per share to par value, or 25c, within a very short time;

The company is operating in the Sour Lake field, where fewer wells will tap the oil than at Spindletop; this insures a greater flow of oil, and it is of a better quality;

This is the first allotment of shares at the present price of TEN CENTS PER SHARE; it is the lowest price at which you can buy, and the time left in which to buy at TEN CENTS is short.

Make remittances and inquiries direct to

Colonial Securities Company,
62 Wall Street, New York City.

Order now at ten cents and make monthly payments.

OIL IS KING!

and will make you money if you buy stocks that are paying dividends.

STIRLING OIL

can be bought to-day for 10 Cents a Share, paying 5 per cent. dividend every two months, which is 30 per cent. per year on your money invested. Buy some of this stock at once.

$10 buys	100 shares,
50 buys	500 shares,
100 buys	1000 shares,
500 buys	5000 shares,
$1000 buys	10000 shares.

This company has two wells producing 1000 barrels per day, and are drilling more. Buy if you want to make money.

STOCK MARKETS

DECEMCER AND JANUARY EARNINGS

New York, Feb. 7.—Net earnings of the railways for December are showing marked improvement, while those reoprted for January are also most excelleant. After all earnings are the greatest measurer of values. These reports indicate not the slightest backing up of business activity, but rather a continued expansion. The Illinois Central reports a net increase for December amounting to $140,600, and a gross increase for January of $225,629. This stock is a splendid bargain at the present time. It shows marked indications of recording a good advance. Last fall it sold above 170. It is very cheap now, below 150, paying 7 per cent, the same as it did in the depressed times of from 1893 to 1896 and earnings not more than twice the amount to pay its dividends. The Norfolk and Western earning gross increase for the fourth week in January amounted to $132,871. Under the fostering care of the Pennsylvania this stock should work its way to par some time this year. New York Central reports a gross increase for January of $838,434. This stock has recently been depressed, it being figured by the bearish contingent that it was high considering its dividend return upon the investment when money was tight. Money is however now becoming easy. The statisticians of Wall street will soon commence to figure on what the road earns, instead of on what it pays. There are a good deal like the the weather cocks, arranging their figures in accordance with the way the wind blows. Down from 170 to about 150 makes N. Y. C. an attractive proposition at present. Southern Railway's increase for the month was $69,759, and for the last week in the month $31,531. This is a steadily improving property in physical condition earning power, and growth of business and is destined to sell much higher. Louisville and Nashville reports an increased gross of $150,314 for the fourth week of January and of $354,894 for the complete month. The stock came within a fraction of selling at 160 late last summer. It should be a magnificent purchase below 130. The report of the Manhattan for the quarter ending January 1st last showing a net increase in earnings of $423,559 with a reduction in operating expenses for the period of nearly $50,000 despite the fact that the additional cost to the company for the coal used owing to the strike amounted to $15,000 more than it did for the same period in 1901 indicate the enormous saving the company is making and will continue to make from the installation of electricity as the motive power. The coal stocks are accomplishing wonder also. No wonder with easy money that the sagacious Wall street prognosticators are anticipating a rise in prices of some proportions.

Summary—The market today opened dull at about prevailing prices at close last night. Considerable trading in Wabash securities with slight changes and a decline of about 1 1-2 per cent. were the only features of any account. The general market held strong with apparently little interest, but showed some weakness after publication of the bank statement, which appeared a little disappointing. On any further decline Monday, we most certainly advise purchases. Money closed nothing doing. Sales 204,000.

Alaska Gold Mining Company's Stock

NOW. This company owns, free from debt, [illegible] acres on the beach and tundra at Nome, Alaska. [illegible] tests made to bed rock on [illegible] acres averaged to the cubic yard of sand [illegible] in gold, the sea bar sand averaged $11.00 in gold. This Company's one mill is pumping, through the ice, from the sea bottom, [illegible] cubic yards daily; heaping it up on the beach to sluice in the Spring. To erect more mills a limited amount of stock is now offered at [illegible] a share. Capital [illegible]; all Common Stock. Address,

JEROME KENNEDY, Fiscal Agt., Room [illegible], 42 Church St., New Haven, Conn.

INTERNATIONAL ELECTRIC MINING Co.

185 SUMMER ST., - BOSTON, MASS.

A Dividend Payer for the Past Five Years.

12 PER CENT GUARANTEED.

Capital Stock, $500,000. Par, $1.00, full paid and non-assessable

Over eight thousand tons of [illegible] ore mined and smelted from this group of mines.

A limited number of shares of the stock of this Company now offered at seventy-five cents per share. This price will shortly be increased to par. Stock registered by the International Trust Company, Boston, who is also the transfer agent.

This Company has a small capital stock.

The International Electric Mining Company owns seven mines and milling plant.

The Brooklyn and New York mines of this Company lie north of and join the Victor and the Hoodlum—two rich mines that are now being worked by California parties. On the west lies the Electric Mining Company's mines. In these mines are millions of dollars' worth of rich ore in sight. On the south, adjoining the Berlin mine of this Company, is the Montezuma and Clipper. From the Montezuma over three million dollars has been taken within [illegible] feet of the grass roots.

This Company owns free and clear seven mines of twenty acres each, all containing rich ore, located in the Arabia and Trinity mining districts, Humboldt County, Nevada. The Company has worked these mines for the past five years, and is now driving a tunnel to cut out a rich ledge about [illegible] feet from the surface. The Arabia mining district, in which these mines are located, is a lively district—a great many men being employed there. The tunnel now being driven on the Brooklyn mine has about [illegible] feet already completed. When the tunnel cuts the main ledge, which has just been reached by the Victor tunnel about [illegible] feet, the Brooklyn will have about [illegible] feet stoping ground, which runs high in gold and silver, over [illegible] per ton.

The Company is offering for a short time a limited amount of stock for the enlargement of its plant and the working force at the mines and for the completion of the Brooklyn tunnel.

This Company has thousands of tons of rich ore in sight.

We are not making a lot of talk, because it is unnecessary. What the investor wants is dividends, which we have paid for the past five years. Now if you want a safe 12 per cent. investment, let us hear from you.

INTERNATIONAL ELECTRIC MINING Co.
185 Summer Street, Boston, Mass.
References furnished upon application.

THE OLD COMSTOCK

A California mining paper has this to say: "Nevada, that grand old stamping ground of mushroom millionaires, who plucked enough wealth from her prolific fields to build mansions, banks, and big hotels in San Francisco, and palaces in Paris and London, is again astonishing the world by making more millionaires and by yielding millions in gold and silver from a new field which rivals the old Comstock lode in the days of its pristine splendor. Not only in Tonopah and Arabia districts, where within the past year nearly ten millions have been exposed, are operations active, but in every mining district in the Silver State are operations active, and Nevada will once more take her place among the big producers, the peer of any of them."

Daily Nevada State Journal, January 4, 1903.

Lovelock, Nev., October 6, 1902.

International Electric Mining Co.,
Boston, Mass.

Gentlemen,—If you wish to sell your Brooklyn mine I can get you a good price for it. If it was mine I would not sell it at any price, as you have more than a million dollars of ore in sight.

G. W. OSTRANDER, Supt.

Boston, Mass., December 1, 1902.

Mr. Geo. D. Burton, Treas.,
International Electric Mining Co.,
Boston, Mass.

Dear Sir,—During the six months of October and November of this year I visited the mines of the International Electric Mining Company, situated in Arabia and Trinity mining districts, Humboldt County, Nevada. I found the country remarkably mineralized; in fact, the possibilities of the country as a mineral producing country are yet unknown. For years it certainly has produced well. The work now being done in the Arabia and Trinity districts establishes the fact that they are fine producers.

I also found that there is a great deal of interest being taken in these properties, which have produced a great deal of wealth the past quarter of a century.

M. A. LATHROP, Mining Engineer.

Here is where Hundreds have been made Millionairs.

THE ELECTRIC SPARK GOLD MINING COMPANY

Is in this famous little kingdom, and is surrounded by mines that are making their owners wealthy.

CAPITAL STOCK $300,000 Par Value $1.00

We are working this mine every day doing a great amount of development work which will enable us to commence regular shipping very soon. Our shaft is now 175 feet deep, with a streak of pay ore starting at the grass roots, the vein is over 3 feet wide at the bottom of shaft, and runs from [illegible] to [illegible] per ton, mostly gold. We are only three-quarters of a mile from railroad and have a well traveled wagon road from mine to depot. There are thirteen stamp mills at Black Hawk, three-quarters of a mile from this property. Our company is managed on conservative lines by practical mining men who understand the business and are familiar with this field of gold.

We have placed a small block of this stock on the market at 20 cents per share which will be worth $1.00 in a short time. Now is the time to buy.

The Electric Spark Gold Mining Company,
NEBRASKA TELEPHONE BLDG, OMAHA, NEB.

Canadian Steel and Coal Co

CAPITAL

10,000 shares 7 per cent. Cumulative Preferred Stock, par value $100 each	$1,000,000 00
50,000 shares Common Stock, par value $100 each, issued and fully paid	$5,000,000 00
Total Capitalization	$6,000,000 00

Issue of $1,000 000 7% Preferred Stock in 10,000 Shares of $100 each at par.

This Stock is preferred both as to Assets and Dividends.

The shares are entitled to cumulative preferred dividends from the net earnings of the Company, at the rate of 7 per cent per annum, payable half-yearly on the first days of April and October. They may, at the option of the holder, be exchanged for common shares. They are subject to be called in, in whole or in part, by the Company, at 15.00 per share, at any time on or after 1st January 1909.

The total issue of Preferred Stock is only $1,000,000.00, the whole of which is now offered.

Subscriptions for 10,000 shares of $100 each of the 7 per cent Preferred Stock of the CANADIAN STEEL AND COAL COMPANY will now be received at par, that is, $100 for each $100 share as follows:—

5 per cent on application.
25 per cent on allotment.
35 per cent 30 days thereafter.
35 per cent 60 days thereafter.

One share of common, par value $100.00, given with each share of preferred.

The whole of the instalments remaining unpaid at any time may be prepaid in full. A discount of one per cent will be allowed upon the par of each share if prepaid at time of allotment.

Notice of allotment will be sent promptly by ordinary letter.

COAL

PROPERTY IN FULL OPERATION

Company owns 9,600 acres of coal property known throughout the coal trade as the New Campbellton Colliery, located on Bras D'Or Bay, County of Victoria, Cape Breton, Nova Scotia. Mine is fully equipped, producing and marketing 100 tons of coal a day at a net profit of $1.00 a ton. Improvements are now being made that will increase the output to over 1,000 tons a day. On present output, figuring 300 working days in year, the net result will more than pay interest on entire issue of preferred, with output of 1,000 tons a day net result will be $300,000 per annum.

IRON

RICHEST ORE IN THE WORLD

Company owns in fee simple, free and clear of all incumbrances, 4,000 acres of iron ore deposit, located at Natashquan (tidewater) situate on North shore of Gulf of St. Lawrence, in the County of Saguenay, province of Quebec.

Deposits contain 20,000,000 tons of ore ABOVE SEA LEVEL ALONE.

Quality of ore is highest ever discovered, running from 69 to 72 per cent. in metalic iron.

More orders for the sale of this ore have been received by the Company than can possibly be accepted, and at a price netting the Company a profit of $2 a ton F. O. B. vessels at Company's docks.

TOWN AND COUNTY NEWS

DASHES HERE AND THERE BY TIMES' REPORTERS

Fancy Dress Skating Carnival

It was decided at a well attended meeting of No. 29, Canadian Order of Foresters, on Friday evening, to hold a fancy dress carnival in the rink on Friday evening, February 26th. A strong committee has charge of the arrangements.

Is Your Back Lame

Does it hurt to stoop or bend down? Have you a heavy dull pain at the base of the spine? If so, the best remedy is Nerviline; it will invigorate the tired, sore muscles, make them supple and strong. Nerviline will drive out the pain and make you well in no time. Nothing so good as Nerviline for Lumbago, Stiff Neck, Rheumatism, Neuralgia and Sciatica. Buy a bottle of Polson's Nerviline to-day, and try it.

Dr. Hamilton's Pills Cure Constipation.

Peterborough Old Boys

The Times is in receipt of an invitation to attend a meeting of the Toronto Peterborough Old Boys' Association to be held in the Oakam House in that city this evening. This great family journal would like to put in an appearance, but fear it will be unable to do so this time. There is nothing that appeals more vigorously to this g.f.j.'s feelings than the prospect of sitting around the fire place in the back parlor of an old-fashioned suburban inn, and relate reminiscences (over a glass of hot lemonade) of the good old days when we were all boys and girls together. We are pleased to see that the old town is not forgotten by those who left it years ago, and regard it as "home, sweet home."

At the Opera

"A Colorado Romance" is the title of a new play, which was presented for the first time in its entirety on Saturday evening by the Marks' Bros. combination at the local opera house. The piece is full of thrilling episodes which roused the audience to much enthusiasm. In the hands of a less capable company the play might have failed in its purpose, but the versatility of the Marks' Bros. combination scored for it instantaneous success. The action was quick and decisive, and the humorous situations taken full advantage of. Each character represented had a most adequate portrayal. Miss A. Bell-Marks lacked sufficient opportunity in the character of Sylvia Thorpe, but needless to say every scoring point was taken advantage of. Will L. Stewart was excellent as Harold Sinclair, and the same may be said of G. C. Connelly, as Larry Donovan. The work of Will C. Millard throughout the engagement has been marked by consistent excellence and in the part of Joe Heinrich, he soon gained the good feeling of the audience. There was a packed house on Saturday night, which once more testifies to the drawing powers of Marks' Bros. combination.

THERE IS A COLD SNAP COMING

but a WARM SNAP in prices at the old reliable firm of PETE SIMONS & CO. will make matters right. He quotes the following red hot prices:

$ 7.00	Overcoats	reduced to	$ 4.00
20.00	Overcoats	reduced to	14.00
4.50	Peajackets	reduced to	2.50
7,00	Peajackets	reduced to	4.50

The Evils of Constipation

This dangerous condition causes sick headache, abdominal pains, piles, and in severe cases insanity and apoplexy. The most agreeable and satisfactory remedy is Ferrozone, which makes the bowels so well ordered that natural and unassisted action is established. It is mild and certain in action and never causes distress or inconvenience, and may be taken as long as required. Pains in stomach and intestines, piles, billiousness and headache disappear at once when Ferrozone is used. Recommended and sold by Druggists, price 50c. By mail from N. C. Polson & Co., Kingston, Ont.

No Pills like Dr. Hamilton's.

NORTH AMERICAN LIFE

Another Year of Success for This Popular and Progressive Company

Once again has the North American Life Assurance Company passed a milestone in its history, and once again do we congratulate the directors and the policy-holders on the splendid results of the year's operations, as set forth in the annual report, which appears elsewhere in this issue of The Times. This company is popular in Peterborough, as it is elsewhere throughout the country, on account of the high character of the gentlemen who are at its head, and the correct business methods which prevail in dealing with its policy-holders.

The annual report for the year ending December 31st, 1902, show a total revenue of $1,279,810.21, and total assets of $5,465,149.82. The total disbursements were, for death claims $374,513.14, other payments $316,851.33, making a total of $691,364.47. There is a net surplus on hand of $515,041.76.

The insurance issued during 1902 amounted to $6,600,265; insurance in force $30,637,268. The new insurance exceeded the previous year by over a million of dollars.

To the ability and progressive spirit of its executive officers, Mr. Wm. McCabe, Managing Director, and Mr. L. Goldman, Secretary, much of the great success of the company is due, and it must be gratifying to these gentlemen to know that their labors have been so phenomenally fruitful.

TO ENFORCE HEALTH ACT

Warning Issued by Medical Health Officer Bingham to Citizens

Posters have been issued from The Times job rooms, signed by Dr. Bingham, Medical Health Officer, calling attention to the provisions of the Public Health Act, which are as follows:

1. All cases of infectious diseases must be reported promptly.
2. When a house is placarded for infectious disease, no person must enter such house or leave such house without proper permission.

TRENT WATERWAY ASS'N.

Meeting to be Held in the Council Chamber To-Day

We would call attention to the meeting of the Trent Valley Waterway Association, to be held in the Council Chamber at one o'clock to-day. The meeting is called to urge on the work of the Trent Waterway. The co-operation of all influential citizens will be welcomed, for the necessity of immediate action cannot be too urgently insisted upon

POLICE COURT

Mr. Thomas McGee Charged with Violating the Health Laws

Before Magistrate Dumble, at police court on Saturday, Thomas McGee was charged with a violation of the Health Laws. It was alleged that McGee's child had been taken to the hospital with scarlet fever, and that McGee had not confined himself to the house as the law demands, but had mingled with other people, thereby endangering those with whom he came in contact.

The accused in answer to the charge said that with the exception of milking his cows and feeding his pigs, he had confined himself to the house. After the child's removal to the hospital the house had been disinfected.

The magistrate, in discharging the accused, said people could not be too careful.

Many Complaints Being Made

The Times is in receipt of an important letter, which was posted at Fenelon Falls on January 31st, and which only reached us on Saturday. This letter took exactly seven days to get to its destination. Another instance: An important letter was posted in Toronto to a member of our staff, on December 16. It reached Peterborough next day, but did not reach this office till January 5th. The result of this delay was the loss of the opportunity of claiming the grant of land given by the Ontario Government to veterans of the Fenian raid, as the time for fyling applications expired on January 31st. Almost every day complaints reach us regarding the mail service. This is not surprising when it is known how poorly the clerks are being paid. Long hours at starvation wages is not calculated to ensure an efficient service. No blame is attachable to Postmaster Rogers or the staff. They are simply underpaid and overworked.

A Long Established Real Estate Business Changed Hands

Mr. John L. O'Connell, our enterprising real estate salesman, has recently purchased the real estate business of Mr. T. Hurley & Co., and the business will henceforth be conducted under the name of O'Connell & Co., at the same stand, No. 126 Hunter street, near the Post Office.

Mr. O'Connell has been in the employ of Mr. Hurley & Co. for a number of years, and has wide experience in dealing with real estate, and by his business ability has won the confidence of the public.

With the present staff of salesmen and a newly equipped office, and good conveyance, Mr. O'Connell is in a position to meet the demands of the public whose patronage he solicits.

Having sold my real estate business to Mr. John T. O'Connell, who has been in my employ as salesman for nearly five years, I wish to return my most sincere thanks to my numerous friends, and the public generally for the liberal patronage accorded me during the past nineteen years, and solicit for my successor a continuance of the same.

T. HURLEY.

—The German choir boys, when on their way to the Convention here, were met by the Mayor of Port Hope at the station, and were munificently treated.

SOCIAL AND PERSONAL

—Mr. Charles Fairburn, ex-M.P. for South Victoria, was in town Saturday.

—Rev. O. C. Elliott, of Belleville, who has been in town for several days, returned home on Saturday.

—Miss Nellie Minore, of Belleville, who has been visiting friends in town, left on Saturday for Indian River, on a visit to her brother, Mr. M. Minore, station agent.

—Mr. J. B. McWilliams leaves this morning on a tour of inspection over the North Shore lumbering districts, where the Sudbury and Webwood agencies are situated. Mr. McWilliams will be absent two or three weeks.

DISASTROUS FIRE AT CRESSMAN'S STORE.

The Entire Building Completely Gutted

Great Damage to Property by Fire and Smoke—Loss Estimated Between Thirty and Thousand Dollars

On Saturday afternoon Peterborough was visited by one of the most disastrous fires that has occurred for many a day. Mr. A. W. Cressman's dry goods store was the scene of conflagration, and the loss of property is estimated at between thirty and forty thousand dollars.

The actual conflagration broke out in the cellar of the southern store, No. 385 and 384 George street, but the real cause of the outbreak cannot as yet be ascertained, though it would appear to be either from the furnace or the electric wires.

The fire brigade answered promptly to the summons, and on their arrival dense clouds of smoke and fire were issuing from the windows of the second floor of store No. 385, as well as between the window sashes of No. 384 store. Three powerful streams of water were soon pouring upon the building from the front, and the effect was early noticeable. In a few minutes two extra streams were in service at the rear, and for a full-hour the streams of water poured into the building before any noticeable effect was produced. The firemen had a fierce struggle before the results of their untiring efforts were rewarded. The contents of the various floors were of a most inflamable nature, and the flames spread with remarkable rapidity. Fortunately at the time of the outbreak only a few ladies were employed on the second floor, but their time for escape was very limited, and but for the fact that one of the employees hustled up with the elevator, things might have been more disastrous. Mr. Robert Fair occupied the next store to Mr. Cressman's on the south side, and much damage has been done to his store by the fire, which will necessitate a cessation from business for some little time.

Much sympathy is felt for Mr. Cressman in his severe loss. He has conducted business in the town for the past four or five years, and he recently enlarged his opportunities by adding a furnishing department.

The building is owned by the Toronto Savings and Loan Company. It is difficult at this time to estimate the damage done to it, but it is most likely covered by insurance.

Had the fire not been so early discovered it is hard to say to what extent it might have spread, so rap'd was its progression. Much credit is due to the fire department for its prompt and efficient action.

OBITUARY

We regret to hear of the death of Mrs. Louise Brault, wife of Mr. Earnest LaPlante, at 9 o'clock on Saturday evening. The funeral will take place at 3 o'clock this afternoon to the Roman Catholic cemetery.

Business Opportunities

A FORTUNE IN MAY CORN—May corn is now selling 25 cents per bushel less than it was last year at this time. On account of the greater demand for export and manufacturing purposes, it should be selling considerably above. You never saw such a situation in your life, and those who take advantage of the opportunity offered by the low price of May corn at this time, should soon double their money. We predict that May corn will sell for 60c. in January and 75c. in May. Large capital is not necessary to take advantage of this opportunity. Buy now and stand to make a fortune. $25 00 will margin 1,250 bushels, 2 cents, $50.00 will margin 2,500 bushels, and $100 00 will margin 5,000 bushels. Experience on your part is unnecessary. We will take complete charge of your account and charge but 10 per cent. of the profit we make for you. We devote all our time watching corn and when we say Buy May Corn, we know what we are talking about and are confident corn will advance in price. Now is the time to make a purchase. Do not delay a day, but telegraph us your order at once, and allow your remittance to fo low by mail. Write for free booklet, giving valuable information on the grain markets. Our methods have made many a for une. Merchants Brokerage & Commission Co., St Louis Mo.

THE NEW AGREEMENT TO PACIFY IRELAND

Provided the Imperial Government Will Find the Necessary Amount of Money

Clear Summary of the Recent Agreement Arrived at in the Green Isle

Dublin, Feb. 9—The basis of agreement arrived at as the result of the conference between representatives of the Irish landlords and Irish tenants is meeting with the faith of all, compromises. A section of the landlords headed by the Earl of Erne, professes itself dissatisfied with the bargain made by Lord Dunraven and Lord Mayo, which a section of tenant opinion—to which prominent expression is given by Mr. Davitt—is dissatisfied that Mr. John Redmond and Mr. William O'Brien have yielded so much to the landlords.

The simple way of stating the net result of the compromise is that each of the conflicting parties has accepted all or a great part of the opposite party's demands, and left the imperial treasury to provide the amount of money necessary to make up the difference they could not split.

If the result is viewed in relation to the public demand of each side before the conference was entered upon the landlords have certainly had less reason for regret. Their rents are falling; the security of their property is so bad that they have the greatest difficulty in raising any more money on it, even at 5 or 6 per cent interest. They are blistered by mortgages raised to meet the extravagances of their ancestors, and the future of agriculture is full of doubt.

Since Gladstone's land act of 1881 their rents, judicially fixed, have come down by 40 per cent. and if prices continue to fall, consequent on the development of agriculture in hitherto unfruitful countries, such as Eastern Russia, they would have to face still further reductions which would bring many of them to bankruptcy. They have, therefore, reasons for satisfaction that the tenants' representatives have agreed that they shall be paid for their properties a sum which will secure them their present net income (their nominal rentals less 10 per cent.) if invested at 3 per cent. The change from the uncertainty of rents to an income in a 3 per cent. security is surely enormous. In figuring the net rent no account is taken of bad debts and law costs—two fertile sources of loss. The man with a thousand a year in rentals is admitted to receive £900 of it and he is to get for the land which is supposed to bring him in this amount the sum of £30,000. There are few men in a failing business who would not be glad to accept such terms.

But this is not all. They have all good mansions and demesnes. They are to keep these if they wish. Furthermore, they are to retain their sporting and riparian rights—assets often of considerable value—and will have sole right of fishing or shooting over the estates they have sold. It is a very rosy prospect, and it is no wonder that the Duke of Abercorn, and the other landlords who opposed the land conference have passed a resolution congratulating it upon its results.

The reason for all these concessions to the landlords lies in the fact that the abolism of landlordism is regarded as imperatively necessary to free Irish agriculture from an intolerable incubus. The possibility of forcing a compulsory expropriation of the landlords—one of the primary objects of the United Irish League—is doubtful and at best somewhat remote. For the compulsion of necessity there has therefore been substituted the compulsion of inducement and to hasten the process the offer of the inducements must be closed within five years. On the other hands these boons to the landlords will not, according to the agreement, come from the tenants. It is hoped that the government, to get rid of the most immediately pressing part of the Irish difficulty, will bridge the gap between what the landlords get and what the tenants give, and that the savings on law and police which would result from the end of the land war would be sufficient or almost sufficient to recoup the expenditure.

What the tenants are to give is provided in the stipulation that every tenant shall pay, by way of installments of purchase money, 15 to 25 per cent. less yearly than he is paying in rents fixed judicially for the second term. That is to say, if a man was paying £100 a year for a farm in 1881 and had had 20 per cent. knocked off twice, he is now paying £80 rent a year. Under the purchase scheme he will pay not more than £45 nor less than £35 a year in purchase, and every payment will bring him nearer to the ownership of his holding. In sixty-six years he, or his successor will be absolute owner.

Mr. Davitt is very doubtful whether the government will provide the necessary bonus. He puts the necessary figure of treasury loss at £20,000,000 ($100,000,000.) But the figure is much less startling than it looks. It is after all only £500,000 a year ($2,500,000) if the government borrows it at 2 1-2 per cent. The Irish police alone costs a million and a half sterling a year and except for land disputes has nothing to do. Moreover, when the government wanted the landlords to agree to local government it gave them a subsidy of about £700,000 a year in relief of rates. For a less sum than it then cheerfully parted with it can rid itself of Irish agrarian agitation forever. It seems cheap at the price, and even the London Times is inclined to believe that the thing is possible.

A special feature of the recommendations of the land conference is the provision for the reinstatement, when possible, of tenants evicted in the land war in past years, and the provision for exceptional treatment for the congested districts, which means the bad land where the people swarmed when they were evicted to make room for cattle in the days when cattle rearing was as profitable as a gold mine, before American trade entered the competition. It is in these districts principally but not wholly along the western seaboard, that the famines are heard from. The people live mainly on potatoes in wretched cabins. A bad potato year means a famine. A redistribution of the great grazing ranches would provide all the people with comfortable little holdings and Ireland would cease to be counted in with India as the home of famine under the British flag.

The chief secretary for Ireland will bring in a land bill once parliament meets. If it is a big bill facing the situation you will have heard the last of the Irish land question. If, encouraged by the conciliatory attitude of the tenants' representatives, who felt themselves strong enough to state without finesse their minimum demand, he tinkers at the question, the fight will begin all over again.

ANTITOXIN FOR TYPHOID

Bacteriologists Searching for One Along New Lines

London, Feb. 9—It is one of the disappointments of the medical profession since the bacteria theory of many diseases has been fully established that all efforts to find an antidote for the typhoid bacillus have failed. An antitoxin has been provided for the diphtheria bacillus, because the poison of this bacillus passes out of its cell and is soluble. The poison of typhoid tuberculosis is intracellular and cannot be reached under ordinary conditions.

Recent experiments by bacteriologists, with the assistance of Prof. Dewar, of the effects of extreme cold upon the bacilli show that they survive at the lowest temperature attainable. It was discovered, however that when frozen in liquid air, the bacilli became extremely brittle, so that they could be triturated into exceedingly fine character and their cellular character thus destroyed. It is then possible to experiment with antidotes upon their poisonous contents, and it is hoped before long that this method will lead to the discovery of a treatment which will destroy the germs of typhoid in the human body.

LORD CROMER ON CAPTURE OF KHARTOUM

It Is Now Five Years Since the Mahdi Has Vanished

British Rule Meeting With the Usual Success—British Education; its Nature

London, Feb. 9—Lord Cromer made a remarkable speech this week in Khartoum, which reminds the people that in five years after the defeat of the Mahdi at Omdurman the Soudan has been reclaimed from sanguinary fanaticism to peace, prosperity and civilization.

Lord Cromer spoke most highly of the American missionaries on the Sobat river, saying that their work was being conducted admirably. Despite all this progress, however, he insists that the Soudan wants more population, more railways, more irrigation, more British officials, more schoolmasters, more public buildings in fact, except some crocodiles and hippopotami of which there is a superabundant supply, there is not enough of anything in the Soudan.

Will all these wants be supplied? That depends on the moral and financial resources of the British Empire and its continuity of policy. At present there is every indication that that the nation will rise to the demands of its great responsibilities.

Frequently of late English education has been adversely criticized. Cromer admits that the English youth are behind those of other nations in book learning, but he maintains that the results of the British educational system are best seen in countries like the Soudan. A lad, he says, who has been trained in the free atmosphere of the great English schools or military colleges has learned lessons which fit him for his duties as one of an imperial race. He is no automaton but can think and shift for himself; can take responsibilities and can govern with justice and fairness.

In proof of the truth of this, he adds that there exists all over the Soudan these young Englishmen who are being regarded by the natives as the representatives of a system which debars any return to the oppression and mal-administration of the past.

CRIMES OF PASSION

Startling Increase in Them Is Reported in France

Paris, Feb. 9—The increase in recent years in France of what the French call crime passionel has been most alarming. Dr. Toulouse, an eminent phychologist, who has investigated the subject, states that out of 191 murders committed in France, only 44 were due to motives of cupidity. All the others sprang from sexual passion. There were also, of course, numerous attempted murders, assaults of all kinds, stabbing and vitriol throwing, arising from the same cause.

It is useless to look for an improvement so long as French juries persist in acquitting or recommending to mercy, offenders of this kind, who plead the so-called tender passions as an excuse for their crimes.

A SCOURGE OF TYPHOID

Ithaca, New York State, in a Very Bad Way With Fever

Ithaca, N.Y. Feb 9—The epidemic of typhoid fever which recently broke out in Ithaca has now attained serious proportions. Today the nurses of the City hospital were obliged to give up their rooms to make room for the patients, the hospital having been crowded for some time. The Rev. C W. Peuer, of the Unitarian church offers to turn the church over for a hospital. There are at least 200 cases in the city at present and the list is rapidly increasing.

Physicians agree that the epidemic is due to impure drinking water and all citizens are warned not to use city water before it is boiled. The hospital authorities refuse to admit any but the worst cases.

MILES THE KING'S GUEST

Called to Windsor for a Sunday Visit—Sousa's Band Plays There

London, Feb. 9—This will be a great American week-end at Windsor. By command of the King, Sousa's band gave a concert today. Mr. Henry White, the American Charged' Affaires and Mrs. White dined with the King and Queen and will remain at the castle until Monday. Gen. Miles will join the party on Sunday at dinner time for an overnight visit.

At the request of Lieut-Gen. Miles, Mr. White asked his Majesty to receive the General in audience next week. The King, however, invited the General to visit him on Sunday, explaining that his engagement with the Duke of Devonshire to attend a house party at his seat in Chatsworth would prevent him from receiving the American commander on a week day.

Cramps are Like Burglars

They come unexpected and when least welcome. Be armed with a one-minute cure in a bottle of Nerviline, which relieves cramps and stomach pains in five minutes. In Colic, Summer Summer, Diarrhoea, Indigestion, and Nausea Nerviline is a remedy of remarkable potency, and acts promptly and satisfactorily at all times. The composition of Polson's Nerviline expresses the highest medical progress of the age, which accounts for its superior merit. Price 25c.

Hamilton's Pills are Good Pills.

BITE OF THE BOERS IS LESS THAN BARK

Attitude of Extremists is Not Regarded Seriously

A FIRM HANDIS WHAT IS NEEDED

Results of Chamberlain's Visit to Bloemfontein

London, Feb. 9.—The Times' Bloemfontein correspondent says that the net results of the visits of the three deputations that waited on Mr. Chamberlain at Bloemfontein is to prove that the settlement of the Orange River Colony has not progressed quite so far as has been represented. The Moderate party seems to be leaning a little more toward the Extremists than to the ultra-loyalist party, and this perhaps is the most satisfactory feature of the case.

There will always be extremists among the Boers, but Mr. Chamberlain's reception in the Transvaal led him to believe that the moderates constituted a more numerous section, and were entirely well disposed toward the British.

The correspondent, however, still believes that the bark of the Boer, is worse than his bite, and it is possible that a sufficiently firm attitude has not been adopted in the Orange River Colony, and that the authorities have fallen into the easy-going attitude and a policy of conciliation through being surrounded by so many friends, but the Boers will only appreciate conciliation when thoroughly impressed by accompanying firmness.

NAVAL RESERVE

Bill to Be Introduced at Next Session of Parliament

Ottawa, February 10 — At the coming session of Parliament, a bill will be introduced by the Government for the establishment of a Canadian naval reserve force. Although the new naval force will be defensive yet it is not the intention to place it under the charge of the Minister of Militia and Defence, but of the Minister of Marine and Fisheries. Mr. Prefontaine will therefore be the first admiral of the Canadian navy. The details of the scheme are being worked out. Generally it is understood that the idea is to train a number of the young fishermen of the Maritime Provinces in naval and gunnery practice during the winter months, but whether on special Canadian vessels or on the vessels of the North American squadron, is not yet determined. It is obvious that the instruction will have to take place on Southern waters owing to climatic influences. It has been suggested, however, to also establish a training school for lads, whose vessels could be stationed in Canadian waters in the summer time.

Inflamed Nose and Throat

And such diseases of the respiratory organs as Bronchitis, Weak Lungs, Cold in the Head and Nasal Catarrh are treated with marvelous success on strictly scientific principles by Catarrhozone. The medicated vapor of Catarrhozone quickly traverses every air passage possible to be reached by any treatment. All soreness, pain, congestion and inflammation are at once dispelled, and by means of the healing powers of Catarrhozone, the vitiated tissues are quickly restored. Where Catarrhozone is used colds only last ten minutes, coughs half an hour and Catarrh, Consumption, Asthma, and Bronchitis flee as from fire. A trial will convince anyone of the startling merit of Catarrhozone. Costs $1.00; small size 25c. At Druggists or Polson & Co., Kingston, Ont.

Dr. Hamilton's Pills cure Constipation.

RUSSIA WILL TAKE A HAND, FRANCE IS RUSSIA'S ALLY

War in Balkans May Mean a General Outbreak

TURKEY IS READY FOR WARFARE.

After Macedonian Outbreak Big Powers will Grapple.

New York, Feb. 9.—The Sun has the following special despatch from London in regard to the Macedonian situation; The Turkish view of the situation is lucidly set forth in the Pall Mall Gazette by a staff officer who served in the last Russo-Turkish war. He says: "There have been many false alarms, but this spring trouble will come. The one convincing sign is to be found in the circumstances of Count Ignatieff's tour of the Balkans in commemoration of Russian victorism, which were not a sufficient motive for his speeches. These were of a sort calculated to make mischief. He did not improvise those speeches or make them on his own responsibility. That is not the Russian way. It follows that in fomenting trouble he was carrying out the settled policy of the Russian Foreign Office. It is reasonable to infer that the trouble he made publicly was not all the trouble he made. What one has to remember is that Macedonia is always ready to rise whenever she sees a chance of foreign assistance, but the leaders know perfectly well that without foreign assistance their case is helpless.

WILL RUSSIA ACT?

"Bulgarian assistance is not enough. The Turks are quite capable of stopping the Bulgarians without bringing a single man from Asia Minor. This fact is well known in Macedonia, Bulgaria and Russia. There will be no serious rising in Macedonia until Russia gives the word. If Russia gives the word, it will be because she is sure of a free hand, without interference from the other powers. Has Russia a free hand? At present everything depends on the answer to that question, and I believe it can be answered in the affirmative. Take the powers one by one. Since Lord Salisbury's speech about putting money on the wrong horse, Russia has held that England does not count in Balkan politics. France is Russia's ally, and the alliance may be presumably relied upon to keep Germany quiet. Some small concession on the Adriatic coast would easily conciliate any objection that Italy might be disposed to raise.

RUSSIA MUST FIGHT.

"The theory that a Macedonian rising is not only anticipated, but has been arranged for is the only theory that fits all the facts. The course of events will be somewhat as follows: The programme of reforms which Russia, France and Austria have pressed upon the Sultan will not be carried out. The snows will melt, and the insurgents will take to the mountains. The rising will be put down and the bloodshed involved will be exaggerated. The Macedonian committee will no longer be held back. Bulgaria will come to the rescue of Macedonia, and Russia will have to come to the rescue of Bulgaria. Austria will have to stand aside, keeping in the ring and awaiting the stipulated reward of a war like the last one.

—A choice lot of fancy and comic valentines now on sale at Times Bookstore.

Cleveland's
BAKING POWDER

The great cooking schools must have the best results. They use Cleveland's Baking Powder.

"I have used Cleveland's Powder constantly both in school-room and lecture work. I recommend it." Miss FANNIE M. FARMER, Principal Boston Cooking School.

RETREAT CUT OFF

Many Yaqui Indians Barely Slaughter Mexican Regulars

Tucson, Ariz., Feb. 9—Word has just reached here that the Twelfth Battalion of the Mexican regulars was almost annihilated on a battle with the Yaquis, whom they were pursuing after having defeated them in a fight at San Marcial.

The regulars were caught in a trap their retreat was cut off by a second band, of whose existence they knew nothing. There were 600 soldiers in the battalion and if the report of the survivors of the fight who reached San Marcial is true, a great many of that number were killed. The reports, however, are believed to be exaggerated.

According to last previous accounts, the regulars were in a critical condition and had lost a large number, although the casualties are not known. The Twelfth battalion has been stationed for some time at Potam Rio Yaqui. It was made up of soldiers, trained to fight the Indians in the bush and was officered by some of the best men in the service in Sonora.

WEDDING BELLS

Nuptials of Miss Agnes Maud Fraser, of Norwood, and Mr. Jas. A. Bradley, of Calgary

Maple Villa, the home of Mr. Thos Fraser, one of Norwood's most prominent citizens, was the scene of a very pretty wedding on Wednesday, February 4th, the occasion being the marriage of his eldest daughter, Agnes Maud, to Mr. James A. Bradley, of Calgary, N.W.T., formerly of Peterborough. The officiating clergyman was the Rev. R. Taylor.

The bride entered the drawing-room leaning on the arm of her father, to the strains of the song, "My Dearest Heart," by Sir Arthur Sullivan, sung by the bride's sister-in-law, Mrs. D. A. Fraser, and took her place under a tastefully draped arch

The bride was attired in her going-away gown of blue ladies' cloth, the waist being of Louisiana silk, trimmed with cream silk applique. The bride was attended by her neice, Miss O. Fraser, as ring bearer. After the ceremony the guests sat down to a dainty dejeuner, the tables being decorated with carnations and smilax.

The wedding presents were numerous, showing the esteem in which the young couple are held. The gift of the groom to the bride was a highly ornamental silver tea service. The happy couple left on the 5 o'clock train, remaining a few days at Peterborough, Toronto and Winnipeg before taking up their abode at Calgary.

SATURDAY'S GREAT FIRE

MORE DISASTROUS THAN FIRST ESTIMATED

Stock Destroyed at Cressman's Valued at $40,000—Amount of Insurance

So far the cause of the fire at Mr. Cressman's building on Saturday is shrouded in mystery, although many theories have been advanced.

The results of the conflagration have proved so far more disastrous than were anticipated. The loss to the two buildings and the stock of Messrs. Cressman and R. Fair & Co. is estimated at $60,000. Mr. Cressman estimates the value of his stock destroyed at $40,000, which is covered by insurance to the extent of $35,000.

Mr. R. Fair's loss is between $15,000 and $20,000, which is also nearly covered by insurance.

Mr. Cressman's building, which is owned by the Toronto Savings and Loan Co., was damaged to the extent of $6,000, and is covered by policies in the British American and Western. R. Fair and Co.'s store is owned by the Bradburn estate, and is also fully insured.

Mr Cressman was to-day able to open his safe and take out papers of value which were uninjured by the fire.

A Good Magazine

The January issue of "Canadian Good Housekeeping" is on our desk, and is another evidence of the excellent work being done by Canadian publishers. The magazine, while new to many of our readers, has a very wide reputation in the United States. Its circulation here is growing steadily, and is based upon sheer merit. Among the many features of the current issue are: The commencement of "Colin of the Ninth Concession," a tale of Scottish life in Eastern Ontario, written by R. L. Richardson. This splendid story is considered by many to be superior to that well-known book, "The Man from Glengarry," and will run through several months' issues of "Canadian Good Housekeeping." "A Railway King at Home," by Mary MacLeod Moore, a description of the private life of Sir William Van Horne, with photos of his magnificent residence in Montreal. "The Housekeeper," Her Importance in the State, by Lally Bernard; "Chinese Women in America," by Jessie Juliet Knox; "Jacob Abbott's Methods with Children," by Lyman Abbott; "A Romance of the Kitchen," by Alice Dunbar. In addition we note many other interesting and instructive articles by well-known writers. The cover of the January number is a work of art. It was designed by Edward Penfield, who is unequalled in cover designing. We can say in all sincerity that "Canadian Good Housekeeping" is a magazine that should be in every household. It fills a long felt want, and there is no doubt that it will turn out to be by far the most popular magazine in the Dominion.

Completely Fagged Out

The world is full of sickly despondent, tired, enervated people, all hoping to be well some day. The surest road to health is along the way of taking Ferrozone after meals. Ferrozone is a great appetizer and enables one to eat plenty of wholesome food without fear of indigestion or dyspepsia. This results in the rapid formation of an abundance of red, vitalizing blood which will restore the nerves, increase flesh and vigor, and nourish and feed every organ of the body. Ferrozone is an ideal restorative and invigorant. It is a tonic of unequalled merit that anyone can use with benefit. Price 50c. per box, or six boxes for $2.50, at Druggists or N. C. Polson & Co., Kingston, Ont.

AWFUL DISASTER REPORTED FROM SOUTHERN SEAS

The Tidal Wave Brought Death--Thousands Lost Many Homeless

Society Islands and Tuomotu Group Swept by Storm—About Eight Hundred Lives Lost

San Francisco, Feb. 9.—News of a fearful loss of life in a destructive storm that swept over the South Sea Islands last month has reached here by the steamer Mariposa, direct from Tahiti. The loss of life is estimated at 1,000 persons. January 13th last a huge tidal wave, accompanied by a terrific hurricane, attacked the Society Islands, and the Tuomotu group with fearful force, causing death and devastation never before equalled even in a land of dreaded storms. The storm raged several days, reaching its maximum strength between January 14th and January 16th. From the meagre news received at Tahiti up to the time of the sailing of the Mariposa, it is estimated that 1,000 of the islanders lost their lives. It is feared that later advices will increase this number.

SATURDAY NIGHT'S BIG HOCKEY MATCH

Norwood Defeat Keene and Win Their District

Here we are again, and the much talked of hockey match between the C.G.E. Co, Rats and the Lock Works Mice is over. It was a grand spectacle, brilliant game, full of ginger, speed and wind, and unearthed stars who never shone before. The following players lined up before Big Bon Brown for instructions:

C.G.E. Co Rats—Goal, Drop McBrien, point, Hustler Norton, cover point, Fatty Foley; rover, Curly Jones; centre, Chaser Grady; right wing, Go On Crough; left wing, Get There Mahoney; goal umpire, Shorty Hurtubise.

Lock Works Mice—Goal, Stop O'Brien; point, Dagger McAuliffe; cover point, Shamus O'Brien; rover, Jumper Humber; centre, Popcorn O'Brien right wing, Cyclone Stortz; left wing, Hurricane Rishea; goal umpire, Hold Up Gleeson.

The game started with a rush and after some beautiful combination on both sides, and some useful stops by McBrien, (who by the way played a grand game) Cyclone Stortz got the puck, and a grand end to end rush, scored the first game for the Lock Works, to the delight of the assembled multitude. Time 3 min. 47 7-9 sec.

The second game commenced immediately after the first, and O'Brien, McAuliffe and O'Brien, the Lock Works defence, who were now down to business and playing brilliant games, stopped many well directed shots, when by a pretty piece of combination by Rishea, Stortz and O'Brien, Stortz scored the second game, and some of the girders gave away. Time 4 1-2 min.

The puck was hardly faced when Rishea scored the third game for the Lock Works on a wrist shot from centre.

After the face off, the game got a little rough, and Foley and Humber were sent to the fence by Referee Brown for two minutes. Both sides were working like Trojans, and the goal keepers were having their work cut out, when suddenly to the delight of all the players, the bell rang for half-time. Score 3 to 0 in favor of the Lock Works.

When the referee called the players on the ice again, it could be easily seen they had all benefitted by the ice bath, and soon were playing magnificent hockey again. After some grand rushes of the grand-stand order by both sides, Pop Corn O'Brien got the puck and shot, which McBrien could not see, and the score was 4 to 0.

As soon as the hostilities commenced again it could be seen that the C.G.E. were forcing matters and Stop O'Brien turned away some hot shots till Grady got a nice side shot and Shorty's hand went up, which meant the C.G.E.'s first game, and their supporters were tied down. Time 6 1-2 min.

They were soon down to business again, and by a beautiful piece of rush work by Humber the puck was brought into C.G.E. Co.'s territory, and the umpire's hand went up, and as there was only one minute to play, no further damage was done till the referee's bell rang. Score ended 6 to 1 in favor of the Lock Works.

NOTES.

Dagger McAuliffe showed much of his old time form, and with a little practice will be the same stalwart player as he was when he played with the old "Goose Pond Wonders" who nearly won the Stanley Cup.

Shamus O'Brien also put up a pretty game. His lifting being the feature.

Cyclone Stortz was the most brilliant man on the ice and his shooting was marvellous. It is rumored that the Montrealer's are after him to help to defend the Stanley Cup.

Rishea's checking and fast skating was also a feature.

McBrien and Norton for the C.G.E. Co. played grand games and are fast enough for any company.

Mahoney, the Spalding Bay League recruit, on the Electric team, shot well, but spoiled his chances by having a jersey the same as the Lock Co. players.

Stortz's fall was perhaps the best feature of the match, and the dejected look on him after his stick struck the rafters would have been a masterpiece for any photographer.

Manager O'Hearn was a delighted spectator. He was heard to say on the side, "They are world beaters."

A grand matched race was now the order, and Shamus O'Brien and Dagger McAuliffe faced starter Evans, and the pistol cracked. McAuliffe took the lead for the first half lap when O'Brien passed him, and held the lead till he fell on the last lap and McAuliffe came in a winner and is now the champion of the Lock Works.

Mr. W. E. Genno, who gave a successful exhibition at the new rink last Thursday, gives an exhibition at Lakefield to-night.

Norwood and Keene played off their tie last night on the Brook street rink, which resulted in Norwood winning by a score of 4 to 3, although it took 10 minutes over time to score the deciding goal. At half time the score was 1—0 in Norwood's favor, and at the expiration of time 3—3. It was a hard fought game from start to finish. This places Norwood in the semi-finals of the T.V.L. Mr. Jas. McCabe officiated as referee, and Mr. H. R. H. Kenner and Harry Morgan as goal umpires.

—A special train to Lindsay will be run by the T.A.S. hockey team to-morrow evening.

—Two post office keys, without numbers, and also a new lock, picked up on Hunter street, are in the possession of the Chief of Police. The articles may be had on application at police station.

A PROBLEM FOR GREAT BRITAIN SHOULD SHE BE INVOLVED IN WAR

JOB FOR MORGAN

New York, Feb. 9—A despatch to the World from Boston says that J. Pierpont Morgan, according to an Advertiser story, will go to Ottawa, and submit to the Canadian government a proposition to take charge of the Dominion railways. In case this mission is not successful he will propose as an alternative to finance the

Soldiers For Manitoba Here

Winnipeg, Feb. 10—Twenty English soldiers and volunteers who have seen service in South Africa arrived in the city yesterday with the object of settling in the northwest, and only six of them registered at the immigration hall, and these had all seen considerable service, extending from six to eleven years, in cavalry regiments, and were well accustomed to horses. Five of the men were engaged by Headingly farmers, and the other who has his wife with him, left last night for Medicine Hat. They say that a large number of South African veterans will follow them.

Canada Could Help to Avert Dreaded Famine in Event of Great War

ARE LOADING UP THE BRITISH PUBLIC

American Correspondents are Sending in Anti-Canadian Despatches

London, Feb. 9.—The committee headed by the Duke of Sutherland, Lord Strathcona, Lord Charles Beresford, and a number of members of Parliament, admirals and other prominent men, which was formed February 1, to agitate the question of the scarcity of Great Britain's food supply in time of war, has issued a statement, in which the opinion is expressed that in the event of Great Britain becoming involved in an European war the country must be prepared to see bread at practically a famine price.

Various reasons are given as the basis for this opinion. The chief reasons are that the greatest source of Great Britain's food supply is the United States, where the price of wheat can be raised artificially, and that the corn trade on both sides of the Atlantic would expect to make profits on a scale commensurate with the war risks.

MEMOIR OF PROF. DOUGLAS.

London, Feb. 9.—Dr. Charles Douglas, M.P. for North-West Lanarkshire, has written a memoir of his brother, the late Professor Halliday Douglas, of Knox College, Toronto.

Perfect Manhood

Is rightly yours; but if you are not the man you should be, if you are losing your energy, your Vital force, memory, annoyed by Varicocele, shrunken parts, and feeling if you don't care what happens, you are suffering from Lost Vitality; it creeps upon men unawares; do not deceive yourself or remain in ignorance while you are being dragged down by this disease; no matter what the cause may be, whether early abuse, excess, or overwork and business cares, the results are the same: premature loss of strength and memory, emissions, impotency, Varicocele and shrunken parts. OUR LATEST METHOD TREATMENT WILL CURE YOU. We guarantee it as a positive cure for these conditions; it is the outcome of years of experience; it equalizes the circulation, stops all drains, thereby vitalizes the parts, restoring them to their normal condition and make the man of you as nature has intended. Do not be misled by so-called Specialists and Institutes. Read the following facts:

1. We do not accept an incurable case for treatment.
2. Every time you call you see Dr. Goldberg personally. He has 18 Diplomas, etc., which should be sufficient guarantee to his abilities. All other Chronic, private and Blood Poison Specialists either have some doctor in charge of their office or have an assistant to doctor you.
3. We are doing business on our own reputation, not of our predecessor.
4. Our records show more actual cures than all the other Specialists combined.
5. You need pay nothing until you are convinced that you are thoroughly cured.

OUR LATEST METHOD TREATMENT GUARANTEED TO CURE

Varicocele and Stricture without cutting, Stretching, or loss of time; also Blood Poison, Chronic, Nervous, Impotency, Kidney, Liver, Bladder, Stomach, Female and Rectal Troubles. CONSULTATION FREE. Call or write for blank for home treatment. BOOK FREE. Hours 9 a.m. to 8 p.m. Sundays, 10 a.m. to 2 p.m.

UNION LABEL

PETERBOROUGH, FEB. 9, 1903.

A BANQUET THAT WON'T COME OFF

There was going to be a celebration in St. Petersburg of the second centenary of the Russian press, but there isn't going to be now. The promoters of the feast intended to ignore official warnings, and hold their banquet at all hazards, but when they found that the dining hall had been seized and individual warnings sent to all the guests, they concluded to yield to superior force. A glance at the resolutions which were to have been adopted affords an explanation of the government interference. Here are some of the demands which were to have been made: It is necessary that the system of preventive censorship should be absolutely and completely abolished; a complete change is necessary in the system by which the government is able to inflict punishment on the press by administrative order; breaches of law committed by press organs should be brought before a public and independent court of law; it is necessary that the press should have the legal right of discussing freely social and political questions; no concession should be necessary for the establishment of any organ of the press in any language; the inviolability of copyright should be guaranteed by law; the system by which publishers are required to deposit caution money should be abolished.

These demands seem reasonable, but the rulers of Russia think the press is already too free, and they are not disposed to give it any more privileges. M. Plehve told a press committee the other day that their newspapers were the cause of all Russia's internal troubles, and were not entitled to any favor from the government.

A TWENTY MILLION THANK-OFFERING

The most remarkable financial achievement of any religious body since the world began is the raising by American Methodists of a "thank-offering" fund of $20,000,000 in commemoration of the advent of the twentieth century. Four years ago at a meeting held in Trinity Methodist church, Springfield, Mass., this plan was broached. It was soon taken up in earnest and Rev. Dr. Mills, a presiding elder in the Elmira district No. 3, was chosen as the raiser of this fund. On the last night of 1902, at a watchmeeting held in the Springfield church, where the movement started, he announced that the last dollar of the immense amount had been secured.

In promoting his work, Dr. Mills visited every Methodist conference in the United States and met with interesting and dramatic experiences that would fill volumes. A few large donations have come from wealthy people, but the fund has been made up mostly of the smaller offerings of people of moderate means. Dr. Mills found the sons of Methodist ministers playing an active part in the business and professional life of all sections of the country, many of them being men of wealth and influence. One man, whose fortune is estimated at $20,000,000 gave a check for $400,000 as a contribution to the "thank-offering." As his father, a circuit preacher, had never received an annual salary of more than $400 this cheque represented a larger sum than that good man could have earned in a thousand years. The Norwegian conference of Minnesota, all of whose members are poor men, leads the list with an average contribution of $32 from each member, and the ministers of the Oregon German conference comes next with an average of $30 each.

The fund is to be devoted to educational uses, to the paying off of church indebtedness, and to various charitable purposes, such as the founding of hospitals, ten having been built since the movement started. Two of these hospitals, one in Illinois and another in Iowa, have been erected by wealthy laymen. Debts on other hospitals have also been cancelled. Dr. Mills, in his report, says that nearly $8,000,000 of this fund has been devoted to education, and that over eighty-six universities and schools will be its beneficiaries. It is confidently expected that when the payments are all utilized, no Methodist church of the United States will be in debt.

This fund, which has more than doubled the capital the church had hitherto in philanthropy, means, says the Baltimore American, "an advance movement for Methodist along vance movement for Methodism all along the line," while according to the Chicago Daily News, it has a "finer significance as a revelation of the abiding vitality and vigor of religious faith." In the days of its founder Methodism was only rich in faith. It is a gratifying fact that its growth in numbers, material wealth and influence has in no way dampened its zeal for good works. In this movement it has set an example that other churches would do well to follow.

A GUARANTEED CURE

For All Forms of Kidney Disease

We the undersigned Druggists are fully prepared to give the following guarantee with every 50 cent bottle of Dr. Pettingill's Kidney-Wort Tablets, the only remedy in the world that positively cures all troubles arising from weak or diseased kidneys:—

"Money cheerfully returned if the sufferer is not relieved and improved after use of one bottle. Three to six bottles effect astonishing and permanent cures. If not relieved and cured, you waste no money."

Ormond & Walsh, Druggist, Peterborough, Ont.

DUTCH STRIKE SERIOUS

Cavalry and Marines Sent to Amsterdam to Keep Order

Amsterdam, Feb. 9.—The strike of men employed on the wharf railways and the railway men's union, which has assumed the proportions of a general labor contest, became so serious to-day that it was necessary to reinforce the garrison with detachments of cavalry from The Hague and Haarlem and marines from Nieuwe-Diep, the harbor of Helder. The ironclad Evertsen is held in readiness at Nieuwe-Diep to start for this place at a moment's notice. The postal service of Amsterdam, Haarlem and Utrecht is done by motor cars.

Each Package of

MALT BREAKFAST FOOD

Is Solidly Filled With Nourishing and Life-Giving Elements

One Package Makes a Dish for Twenty-Five People

The large majority of cereal breakfast foods furnish only from nine to twelve ounces of food; while Malt Breakfast Food—wholly composed of concentrated nourishing elements—furnishes a solid and full package of twenty-four ounces of health-giving and delicious preparation, or enough to make a dish for twenty-five people. The full, solid package of Malt Breakfast food makes it the most economical cereal that families can use. Go to your Grocer; buy a package and try it. As far as economy and deliciousness are concerned Malt Breakfast Food has no equal.

Author of "The House in the Marsh," "A Prince of Darkness," etc., etc.

CHAPTER I.

Two miles at least from anywhere, with the first flakes of a coming snowstorm falling, a biting wind cutting into your bones, suffering moreover from a recent spell of fever and a scarce healed gunshot wound: can mortal man imagine a much worse predicament?

This was not, however, the whole sum of the suffering of Astley Darwen on that bitter December day. For he had not only himself to think of, but he had to consider also the fact that he was in charge of a brand-new motor-car, the property of a confiding friend, which had broken down in a hopeless manner when he had got a few miles out of Oxford, and which he felt bound to stand by in misfortune as it had stood by him up to then.

With much exertion, therefore, and limping along in a very chastened mood, Astley directed his steps, motor and all, towards a riverside inn which he knew, where he proposed to leave the car for the time, and to get rest and refreshment for himself, before returning into the town.

Never had he seen the place so deserted. Not so much as a tramp did he meet to give him a hand on his way. Slowly, painfully, with laborious steps, he pushed the vehicle along, filled with that deep sense of humiliation and abasement of which the Englishman becomes conscious when, after forsaking his true friend the horse, and taking up with the modern substitute, that substitute breaks down and, so to speak, taunts him with his inconstancy.

When he had got so near the inn that a shout would have brought someone out to him, Astley paused a moment, and gave a look round him.

The snow was beginning to drive down at a faster rate; the wind was whirling the flakes round before dropping them in little feathery clumps wherever there was a nook or a hole to be filled. Already a cloudy veil hung between him and the river, which was running fast and looking black as it ran.

There was just one figure in sight, and Astley watched it with the interest to which its lonely position entitled it. It was that of a woman, apparently a slight young girl, who, with her hat pressed down tightly with one hand, and her skirts blown round her like a sheath, was running like a hare with the wind, along the towing-path and towards the hand-bridge which crossed the river, a little below this point, past an old water-mill.

He was much too far off to see her face, but something in the woman's walk and manner made Astley look again, and presently made him leave his motor-car, to hobble a few steps in the direction in which she had gone, to look at her again.

And the more he looked, the more infatuated he became.

The woman reached the bridge, stepped on it, stopped short, turned once, turned twice, hesitated, came off the bridge again, and stood for a few moments looking down at the water. Then again she made a dash for the bridge, crossed it, and disappeared in the veil of snow.

Astley had by this time made up his mind to follow her. Something in his own circumstances at that time made him take a special interest, of a cynically bitter rather than a benevolent sort, in the doings of any woman of eccentric tendency. So he crossed the bridge, and turned to the right, and saw the same figure again, this time close to the racing water.

She did not see him. She did not hear him. The snow was driving, the wind was roaring and whistling in the leafless trees, and she walked along the bank quickly, without a look behind.

Then suddenly she stopped. Whether she was blinded by the snow, or whether she did it of her own free will she never told; but the next moment she was down the bank and in the water.

Astley was near enough to scramble down the bank after her, to snatch at her dress, to seize it, and to hold on, wet through himself, until, somehow or other, neither ever knew exactly how, they both found themselves, dripping, shivering, in a state of pitiable amazement at their circumstances, on the slimy grass and mud at the edge of the river.

Such a bedraggled, miserable object as the woman looked, Astley thought he had never beheld. What she was like it was impossible to tell; for her hair had got loose and was hanging in strings down her face; she had lost her hat, and a wisp of something which had that morning been a cravat of white chiffon now hung round her neck like a cord.

Her voice was young, and so he concluded that the creature was a girl: and to his surprise, there was an accent of refinement in it which he had not been prepared to expect.

"Thank you, thank you," she said, rather tartly, as she freed herself from the grasp of her preserver's hands, and made a futile attempt to draw her jacket back into its proper place: it had twisted itself round her in an indescribable way, while one of the sleeves had become stretched to an inordinate length.

Astley was by this time exceedingly cross, and his ill-humor was discernible in his voice as he said:

"Are you all right?"

"Oh, yes. I'm—I'm much obliged to you—of course," said she, speaking with so much irritation that Astley suddenly burst out laughing.

It was not that he was ill-natured, not that he was unsympathetic; but the incongruity of her words with the service he had just rendered her struck him with so much force that, being not unnaturally in a state of some excitement over his adventure, he was quite unable to control the impulse which moved him.

His laughter startled the girl as nothing else could have done. She stood before him—for they had now scrambled up a little way—and stared at him stolidly.

"Why do you laugh?" said she shortly.

Brought face to face with the knowledge that he was behaving unconventionally, Astley grew serious again.

"Indeed I don't know," said he. "There's nothing really laughable about the affair for me; for I've got wet through, and as I'm dead-lame, and haven't long got over an attack of typhoid, there's really nothing about this adventure which ought to make me merry."

The woman stared at him, and a little sound, like a smothered sob, came to her lips. Her eyes, which were black and looked unnaturally large in her face now that it was blue-grey with cold, suddenly became moist.

"Let me help you up the bank," said she.

And it was now her turn to do him a service, for his injured limb was benumbed with the cold, and she had hard work in getting him up to the top of the bank, which was now wet and slippery.

"I'm much obliged to you," said he, with his teeth chattering.

And he tried to walk, following her as she hurried along in the direction of the bridge. A curious object she looked, with her lank garments clinging to her, and the water still pouring down all over her. Before she had got many steps away she turned half round to look at her rescuer. He was hobbling along with evident pain, and she hesitated, her conscience getting the better of her shyness. In another moment she had come back to him.

"Won't you let me help you along?" said she quickly, in a shamefaced way.

"Thanks. It's very good of you, but you'd better make haste and get somewhere out of the snow, and I can't get along fast enough to—to—"

"I can't leave you, after what you did, until I've seen you out of it, too," murmured the girl in a low voice, still in the same awkward and shy manner.

Suddenly it occurred to Astley to think that it would be better for the girl, as well as for him, for her to remain under his eye for the present. So he said:

To be Continued.

ENTIRELY OUT OF THE ORDINARY

Yet one of the ways that LEAD TO FORTUNE

Why not make a small investment in oil lands right ahead of good producing wells, some having wells producing oil on adjoining farms? The oil now brings $1.50 per barrel, bought by the Standard Oil Co., without any transportation charges, and is bound to go higher; a few hundred dollars often invested in property of this kind yields thousands of dollars profit. I personally know of parties who made over $100,000 in 60 days time on an investment of this kind; also have wells making from 10 to 300 barrels a day. Parties desiring to organize a company will do well to investigate this opportunity, getting thereby the advantage of years of experience, and if you don't want to drill the wells wait until the wells drilling close to you have come in and reap the benefit of their drilling. The oil business conducted on business principles, with honest management, is bound to succeed. You do not have to look farther than the Standard Oil Co. to see what honest management founded on facts will produce, they have drawn very heavily on stocks the past three years and there is not enough of this grade of oil now above ground to run the country for more than two years, so you can readily see the profits that will be realized by starting now and obtaining the big price the Standard Oil Co. will be compelled to pay for crude oil to supply the demands of the country. For particulars write THE BADGER CO., MARIETTA, OHIO.

A VERY DESIRABLE INVESTMENT

THE McLENNAN PAINT COMPANY

LIMITED

BUFFALO - - - NEW YORK

INCORPORATED UNDER THE LAWS OF CANADA

CAPITAL, - - $500,000

Dividends on Preferred Stock Paid Quarterly.

For the purposes hereinafter stated, we offer at par,

50,000 of our 7 per cent. Preferred Treasury Stock Shares, $100.00 each

Payments as follows: 20 per cent. on amount of stock subscribed for at time of subscription; 30 per cent. in 60 days balance in 90 days. Receipts will be issued until full amount of stock subscribed is paid, when certificates bearing the Company's seal, and signed by the President, Secretary and Treasurer are issued. The McLennan Paint Co., Limited, have one of the most modern plants of its kind in the world, occupying 300,000 square feet of floor space. The capital of the Company is a half million dollars. The growth of the business has been phenomenally rapid and conservative. In line with other large industries, the Company propose to establish a branch factory in Canada for the manufacture of their products, which are covered by valuable patents, and which practically give the Company a monopoly, and, for the above purpose, offer at par $50,000 of their 7 per cent. Preferred Treasury Stock.

The McLennan Paint Company, Limited, was organized in 1892 by Mr. C. J. McLennan of the McLennan Dipping Process, and other valuable paint-making machinery. The Company began business in rented premises, in East Buffalo. So profitable was the business, and so rapid the growth, that large factories were built in North Buffalo in 1895. The business again doubled, and another plant was added in 1898. In 1901 the Company invented and perfected a line of reds, or vermilions, permanent in color, and at much less cost than the old line colors. This increased the sale of their products practically one-fourth, making it necessary for them to build a new Color and Chemical Works. This factory is without doubt the largest and most modern in the world. Mr. Charles J. McLennan, the President of the Company, and the inventor of labor-saving machinery, such as dipping tanks, mills, etc., is recognized as one of the most skillful and best known paint manufacturers in the country. The name and fame of this Company, and its products, are known all over the United States and foreign countries, and that they will capture the Canadian market is evidenced by the fact that many of the large Canadian manufacturers are at present using their goods, in face of the heavy duty. It is with a view to saving this 25 per cent. duty and adding it to to the profits of the Company that they have decided to establish a branch in Canada, which will be controlled and managed by the parent Company.

Practical men of means, character and national reputation constitute the directorate and management. Each department is managed by a skilled man; monthly statements rendered and careful audet made semi-annually. The books are always open to the smallest shareholder. The finances of such a concern are guarded as closely as the finances of any bank, and failure is practically impossible.

COPY OF TESTIMONIALS.

A. C. Cornell, Toronto, Ont.: Columbia National Bank, Buffalo, N. Y., Jan. 23, 1903.

DEAR SIR,—The McLennan Paint Co. are good customers of this bank, and I have known them personally for years. All the officers bear excellent reputations, and are considered good business men. Their management is evidenced by the large business they have built up, as careful and conservative. They have met with great success in the past, and I believe that today, theirs is one of the largest and most prosperous concerns of its kind. I have every reason to believe that the stock which they are now offering for sale is a desirable, as well as a safe investment. Yours very truly,

L. H. GETHOEFER, Cashier.

The Merchants' Refining Co., Refiners of Petroleum, Paraffines, Paraffine Wax, Lubricating Oils, Residuum, Napthas, and Gasoline,

A. C. Cornell, Toronto, Ont.; Buffalo, N. Y., Jan. 23, 1903

DEAR SIR,—Your favor of 21st received, and note you are offering for sale $50,000 of the preferred stock of the McLennan Paint Company and ask me what I know of the firm. Would say I have had business dealings for eight years—transactions of many thousands of dollars. I am also doing business with other houses engaged in the same line, and desire to say there is no house in America to-day that stands higher than the McLennan Paint Co. The growth of their business has been phenomenally large, and under the conservative management of the President, Mr. C. J. McLennan, the success of the business is assured in the future. As an investment, in my judgment, nothing could be safer than the stock they offer.

Very respectfully, C. A. SALISBURY, Manager.

A. C. Cornell, Toronto, Ont.: Buffalo, Jan. 26th, 1903.

Dear Sir,—Referring to the sale of $50,000 of our 7 per cent. Preferred Stock, the Prospectus does not elaborate on the proposition, but merely mentions the amount guaranteed. I desire to inform you, however, we could have paid at least 14 per cent. last year, but carried balance to a Reserve Fund, which, necessarily, makes the stock very valuable.

Very truly yours,

THE McLENNAN PAINT CO., LIMITED,
C. J. McLennan, Manager.

P.S.—Having visited this proposition on behalf of some very conservative investors, I can verify all the above. The plant is extensive and modern in every detail; officers and management skilled and very industrious; all the products superior. This is a Canadian Company, Canadian Charter. Having built in Buffalo, in proximity to raw material, by shipping here in ground state and preparing here, will save and add large duty to already large profits. Bear in mind this is not prospective, but a large, rich, going, paying institution. Prospectus, application forms, and any further particulars, and subscriptions, address the undersigned. All cheques or drafts for stock made to the order of the Company, and forwarded to

A. C. CORNELL, Fiscal Agent,

18 Yonge Street Arcade, Toronto, Ont.

REPORT BY EX-SUPERINTENDENT OF MINE

Cecil R. Gold Mining and Milling Co., Los Angeles, California.

Ballarat, Cal., Nov. 1st, 1902.

Gentlemen,—Your request for my opinion as to the "Santa Rosa" group of mines and other claims in which you are interested in this territory, to hand, and in reply will say:

The "Santa Rosa" group, which is located southeast of Ballarat some three and a half miles, consists of twelve claims, equal to 240 acres. The ledge crops out more or less the full length of these claims, showing the same character and formation of work as where development work has been done. In most of the outcroppings it shows highly mineralized rock, with pyrites of iron, mica, schist, slate, slate porphyry, gouge, quartz and quartzite, all bearing more or less. Where work has been done, it shows a very marked improvement in both quantity and quality of gold-bearing rock. Commencing with the surface, the ore shows much iron and copper stain. All mill tests show rich ore commencing with the surface; in fact, I milled for several days and recovered $50 and over per ton, yet the milling process does not pay more than two-thirds of the value of the ore, the tailings oftimes running as high as $35 per ton, and never less than $12.50. To save the entire value of your ore it will be necessary to instal either concentrators or a cyanide plant. From careful study and frequent examination of the surface of the ground, and down as far as has been opened below the surface, I am highly pleased with the property. It is certainly a fine property, and as good as any I have ever had the pleasure of examining. Considering your mill site, with tramway facilities added, water, fuel, and cheapness of mining the ore, the Cecil R. will be capable of paying enormous dividends when your capacity for milling is increased to what it ought to be.

Wishing you every success, I remain, Yours very truly,

(Signed) G. W. FLEMING,
Ex-Mine Supt. Cecil R. Gold Mining and Milling Company.

Price is now [illegible] cents a share, and we offer [illegible] shares at this price, but it may be advanced by January 1st, 1903, to [illegible] cents a share.

St. Louis Office, - - - 417 Odd Fellows' Building.

BUY! WHY?

BECAUSE

THE SOUR LAKE OIL CO.

Has placed four-fifths of its stock in the treasury for development work; and because

Oil is reached in less than half the depth required on Spindletop Heights in Beaumont;

The people in Canada are well acquainted with the management, which is in the hands of HON. JOHN L. BITTINGER, United States Consul General to Canada; F. S. Ashley, Vice-President of the Massachusetts Securities Co., and W L. Marston, Vice-President of the American Union Oil and Refining Co.

These gentlemen have made a dividend payer out of one company and have raised the value of its stock from 5c per share to par value, or 25c, within a very short time;

The company is operating in the Sour Lake field, where fewer wells will tap the oil than at Spindletop; this insures a greater flow of oil, and it is of a better quality;

This is the first allotment of shares at the present price of TEN CENTS PER SHARE; it is the lowest price at which you can buy, and the time left in which to buy at TEN CENTS is short.

Make remittances and inquiries direct to

Colonial Securities Company,
62 Wall Street, New York City.

Order now at ten cents and make monthly payments.

OIL IS KING!

and will make you money if you buy stocks that are paying dividends.

STIRLING OIL

can be bought to-day for 10 Cents a Share, paying 5 per cent. dividend every two months, which is 30 per cent. per year on your money invested. Buy some of this stock at once.

$10 buys	100 shares,
50 buys	500 shares,
100 buys	1000 shares,
500 buys	5000 shares,
$1000 buys	10000 shares.

This company has two wells producing 1000 barrels per day, and are drilling more. Buy if you want to make money.

STOCK MARKETS

MORE FAVORABLE EXHIBITS

New York, Feb. 9.—We cannot refrain from again calling your attention to more of the remarkable statements of earnings being issued by the American roads at present, though we have no desire to become reduntant or tedious. As earnings are the primary foundations of all values, they naturally enter largely into all financial discussions and are thereby prominent in any theme or treatise relative to stocks and stock prices. When earnings are larger and apparently still on the increase, it is usually not only a good time to become interested in the market, but a very bad time to dispose of one's holdings. With easy money freely obtainable also, the above truism becomes even more trite and pertinent. Chesapeake and Ohio has been more or less strong lately, exhibiting a marked tendency to advance. People closely allied with the property have been steady buyers and are favorably disposed to it at the time. It is showing marked improvement and will undoubtedly work considerably higher prices. For the fourth week in January it reports a gross increase in earnings of $105,597. We believe you will make no mistake in buying into the property immediately. The Brooklyn Heights Railroad which is to all intents and purposes is the backbone of the Brooklyn Rapid Transit system reports increased earnings for the quarter of $274,902 and for the last six months of $602,334. ern Pacific reports a gross increase for December, amounting to over $600,000 while the net was about the same as last year. This is due to the fact of the company's enormous expenditures for improvement all of which is being directly charged to operating expenses. This policy will cause this stock in a comparatively short time to sell above par. It is synonymous to the business man of large earning capacity, spending for his living say only one-fifth of the income. The policy of all the American roads nowadays is to husband resources, to improve their property and traffic handling facilities as much as possible at the expense of the operating cost, which policy diminishes steadily the cost of handling of business, thereby increasing net results. As long as this is the case, and in addition business continues to expand, and traffic consequently increases it is futile to anticipate any decided fall in market values.

Summary.—Today's dealings were characterized by continued strength, many issues opening up quite sharply. Copper crossed 70. Sugar advanced 2 points, while T.C.I., Steels and Leathers were in demand at improving prices. The industrial list is in most every instance a good purchase at the present time. Wabash preferred led the railway list advancing four points. Rock Island rose over 2 points. St. Paul was strong all day, selling well above 180. Mo. P. rose 2 points. The entire market without exception was higher. We anticipate further improvement. Money closed last loan, 2 1-2. Sales 892,700.

INTERNATIONAL ELECTRIC MINING Co.

185 SUMMER ST., - BOSTON, MASS.

A Dividend Payer for the Past Five Years.

12 PER CENT GUARANTEED

Capital Stock, $500,000. Par, $1.00, full paid and non-assessable

Over eight thousand tons of $[illegible] ore mined and smelted from this group of mines.

A limited number of shares of the stock of this Company now offered at seventy-five cents per share. This price will shortly be increased to par. Stock registered by the International Trust Company, Boston, who is also the transfer agent.

This Company has a small capital stock.

The International Electric Mining Company owns seven mines and milling plant.

The Brooklyn and New York mines of this Company lie north of and join the Victor and the Hoodium—two rich mines that are now being worked by California parties. On the west lies the Electric Mining Company's mines. In these mines are millions of dollars' worth of rich ore in sight. On the south, adjoining the Berlin mine of this Company, is the Montazuma and Clipper. From the Montazuma over three million dollars has been taken within [illegible] feet of the grass roots.

This Company owns free and clear seven mines of twenty acres each, all containing rich ore, located in the Arabia and Trinity mining districts, Humboldt County, Nevada. The Company has worked these mines for the past five years, and is now driving a tunnel to cut out a rich ledge about [illegible] feet from the surface. The Arabia mining district, in which these mines are located, is a lively district—a great many men being employed there. The tunnel now being driven on the Brooklyn mine has about [illegible] feet already completed. When the tunnel cuts the main ledge, which has just been reached by the Victor tunnel about [illegible] feet, the Brooklyn will have about [illegible] feet stoping ground, which runs high in gold and silver, over $[illegible] per ton.

The Company is offering for a short time a limited amount of stock for the enlargement of its plant and the working force at the mines and for the completion of the Brooklyn tunnel.

This Company has thousands of tons of rich ore in sight.

We are not making a lot of talk, because it is unnecessary. What the investor wants is dividends, which we have paid for the past five years. Now if you want a safe 12 per cent. investment, let us hear from you.

INTERNATIONAL ELECTRIC MINING Co.
185 Summer Street, Boston, Mass.

References furnished upon application.

THE OLD COMSTOCK

A California mining paper has this to say: "Nevada, that grand old stamping ground of mushroom millionaires, who plucked enough wealth from her prolific fields to build mansions, banks and big hotels in San Francisco, and palaces in Paris and London, is again astonishing the world by making more millionaires and by yielding millions in gold and silver from a new field which rivals the old Comstock lode in the days of its pristine splendor. Not only in Tonopah and Arabia districts, where within the past year nearly ten millions have been exposed, are operations active, but in every mining district in the Silver State are operations active, and Nevada will once more take her place among the big producers, the peer of any of them."

Daily Nevada State Journal, January 4, 1903.

Lovelock, Nev., October 8, 1902.

International Electric Mining Co.,
Boston, Mass.

Gentlemen,—If you wish to sell your Brooklyn mine I can get you a good price for it. If it was mine I would not sell it at any price, as you have more than a million dollars of ore in sight.

O. W. OSTRANDER, Supt.

Boston, Mass., December 1, 1902.

Mr. Geo. D. Burton, Treas.,
International Electric Mining Co.,
Boston, Mass.

Dear Sir,—During the six months of October and November of this year I visited the mines of the International Electric Mining Company, situated in Arabia and Trinity mining districts, Humboldt County, Nevada. I found the country remarkably mineralized; in fact, the possibilities of the country as a mineral producing country are yet unknown. For years it certainly has produced well. The work now being done in the Arabia and Trinity districts establishes the fact that they are fine producers.

I also found that there is a great deal of interest being taken in these properties, which have produced a great deal of wealth the past quarter of a century.

M. A. LATHROP, Mining Engineer.

THE ELECTRIC SPARK GOLD MINING COMPANY

Is in this famous little kingdom, and is surrounded by mines that are making their owners wealthy.

CAPITAL STOCK $200,000 Par Value $1.00

We are working this mine every day doing a great amount of development work which will enable us to commence regular shipping very soon. Our shaft is now 175 feet deep, with a streak of pay ore starting at the grass roots, the vein is over 3 feet wide at the bottom of shaft, and runs from $46.00 to $[illegible] per ton, mostly gold. We are only three-quarters of a mile from railroad and have a well traveled wagon road from mine to depot. There are thirteen stamp mills at Black Hawk, three-quarters of a mile from this property. Our company is managed on conservative lines by practical mining men who understand the business and are familiar with this field of gold.

We have placed a small block of this stock on the market at 20 cents per share which will be worth $1.00 in a short time. Now is the time to buy.

The Electric Spark Gold Mining Company,
NEBRASKA TELEPHONE BLDG, OMAHA, NEB.

"THE FRIDAY MINE"

Located at Pearl, Willow Creek, Boise County, Idaho
About 25 Miles Northwest of Boise City

THE FRIDAY GOLD MINING CO. is a corporation duly organized under the laws of the State of Oregon, with head office at Sumpter, Oregon, owning and controlling "The Friday Mine." Capital Stock, $1,000,000, divided into 1,000,000 shares. Par value $1.00 per share, fully paid and non-assessable, no personal liability. 350,000 shares have been set aside and placed in the treasury of the Company to be sold for the purpose of equipping the "Friday Mine" with machinery. It is for this purpose we are offering you stock in this great mine. This plant will handle 60 tons of Friday ore every 24 hours. The general average of the Friday ore is over $[illegible] per ton. The ore as it was shipped to the smelters at Salt Lake averaging over $65.60 per ton. The Friday is highly developed, great quantities of ore blocked out and in sight ready for the mill. As soon as the mill is completed the Friday Mine will again pay dividends.

Large ore bodies which will net to the company $[illegible], for the first few months, are now blocked out ready for the mill. As soon as the mill is completed you will draw your regular monthly dividend. It is safe, certain and conservative.

We are not soliciting your money for the purpose of developing the mine, but only for the purpose of erecting a mill to work the ore bodies in the mine. The company is officered by men of well known business ability, mining experience and strict integrity.

Hon. Martin H. Jacobs, State Mining Inspector of mines for the State of Idaho says: "The Friday has a large amount of good ore in sight, and there is no question about its being a good paying property."

AT ST. PAUL'S CHURCH

Opening of the Revival Services Last Night

LARGE CROWDS PRESENT.

The Meeting Commenced with Song Service—Able Addresses Delivered By Evangelists Kerby and Turk.

There was a large congregation at St. Paul's church last evening, when the evangelists, Messrs. Turk and Kerby opened the week night meetings of the union revival services. The evangelists united inspiring song with earnest preaching and exhortation. The meeting opened with a song service, led by Mr. Mulligan, which was followed by a bible reading from Mr. Kerby.

Evangelist Turk delivered an address, and chose his text from the 4th Chap. 2nd Corinthians. He dwelt upon the Divine and human sides of the word revival. God had, in his work of saving the world, limited himself to a partnership with man, and if results were expected from this present revival in Peterborough the way must be prepared. Each individual must realize his own responsibility, and do something to make the meetings a success. They must get united with God. After the baptism of Pentecost Peter and John had, in the power of Jesus' name, healed the lame man who lay at the gate called Beautiful, and only they who had the baptism of the Spirit could do effective work. They, the evangelists, came not to Peterborough in the capacity of leaders of this revival, they had merely come to assist in the work. The pastors of the churches were the leaders of their people, and the Almighty was the Director. The speaker thought that there never was a time when the need for revivals existed as in this present age of materialism. What he saw at the opera house on Sunday had, he said, satisfied him that the time was ripe for a revival in Peterborough. There are people in the town whom God would save, and who in their turn are ready to receive the message—are yearning for that peace which the world cannot give. What was required now, was personal work and earnest prayer. There was work ready to be accomplished, and the responsibility of its accomplishment rested upon the Christian people of this town. It was an address full of earnest spirit and created a deep impression.

Mr. Kerby closed the meeting, and exhorted those present to help make the revivals a spiritual success. To fit themselves for the work four things were necessary: First, "Get right with God;" second, "Get right with your fellow-man;" third, "To get the Holy Spirit;" and lastly, "To get to work."

No evangelists who have ever been in Peterborough have made so good an impression as these men. Their utter abnegation of self, their freedom in method from anything savoring of sensational or emotional methods, their deep earnestness and apparent sanctity by baptismal power, created a very deep and worshipful feeling among the people present. The service was a benediction as all realized not only that they were in the presence of the Master, but that God was working by his spirit on the hearts of the people. The meetings will be all week at St. Paul's. Those who stay away are making a mistake, as no one could listen to the beautiful music so finely rendered by the evangelists and to their earnest words without feeling themselves lifted into a higher and nobler life.

THREE HUNDRED ABSENTEES."

From Schools Yesterday — Absentees will Receive Police Call To-Day

A report, which was the result of a plan arranged to find out the number of school absentees, showed that 300 pupils were not present yesterday morning. The Chief of Police advises that unless the children are in their places this morning, the police call to ascertain the cause of absence.

FRACTURED HIS COLLAR BONE

Mr. Jas. Tindle Meets with a Very Painful Accident

While working around the barn yesterday morning, Mr. Jas. Tindle, of Smith, met with a very painful accident. He had the misfortune to fall, alighting on his shoulder, and fracturing his collar bone. Dr. Morgan, of Peterborough, was summoned, and reduced the fracture.

OBITUARY

Death of Mr. Alex. Drummond, Town—Funeral To-Day

We regret to announce the sad death of Mr. Alex. Drummond, which occurred on Sunday at the residence of his mother, Mrs. Alex. Drummond, No. 759 George street. Mr. Drummond had only been sick since Friday last. The deceased had been in town four years, and during the greater part of that time has been employed in connection with the repair department of the Massey Harris Co. on Simcoe street.

The funeral will take place to-day at 1.30 o'clock to the Keene cemetery.

IMPORTANT MEETING

A Movement to Improve the Norwood Road for Travel

A public meeting of those interested in the improvement of the Norwood road is to be held at Shearer's cheese factory, on Friday next, at 2 o'clock. The meeting has been called in view of the $1,000,000 grant the Provincial Government is making for the improvement of the roads in Ontario. The purpose of the meeting is to arrange some definite plan of action with a view to improve the Norwood road.

Of this total Government grant, the sum of $2,300 is the township's share to be spent on the leading highways of Otonabee. This is a matter of importance to residents of the township, and all are cordially invited to attend.

—Chase will be skating at the Brock street rink this evening.

LOVE

Often leads to poverty. No real woman ever sold her heart for the luxuries of life. But many a woman who has gladly faced poverty for the man she loved, may well doubt her wisdom when pain becomes the mate of poverty. If she were rich, she thinks, she could find a way of cure.

Dr. Pierce's Favorite Prescription is within the reach of every one. It lifts the burden of pain which weighs down those who suffer from womanly diseases. It establishes regularity, dries weakening drains, heals inflammation and ulceration and cures female weakness.

"You have my heartfelt thanks for your kind advice to me," writes Mrs. Geo. Fletcher, of 308 Victoria Avenue, Galt, Ontario. "Was troubled with catarrh of uterus for over a year. The doctors said I would have to go through an operation, but I commenced to use Dr. Pierce's Favorite Prescription and 'Golden Medical Discovery,' also his 'Lotion Tablets' and 'Antiseptic and Healing Suppositories.' Now I am completely cured, after using six bottles of Dr. Pierce's medicines. I am glad to say his medicine has made me a new woman."

Weak and sick women, especially those suffering from diseases of long standing, are invited to consult Dr. Pierce by letter, *free*. All correspondence is held as strictly private and sacredly confidential. Address Dr. R. V. Pierce, Buffalo, N. Y.

Dr. Pierce's Pleasant Pellets are easy and pleasant to take. A most effective laxative.

SOCIAL AND PERSONAL

—Mr. J. J. Salmond, advertising manager of the Monetary Times, left on Sunday night by the midnight train for Montreal, in the interests of the paper.

—Mr. Wm. McLeish, of the Monetary Times, Toronto, spent Sunday in town, the guest of his friend, Mr. R. B. Morrison. Mr. McLeish left for the Capital on the midnight train Sunday night, to spent a few days with his brother, Mr. John McLeish, of the Geological Survey Department.

The Future Foretold.

A visitor to Richmond overheard the following conversation between his hostess and the cook.

"Please, Mis' Gawdon, may I git off nex' Sunday to go to the fun'ral of a friend of mine?"

"Next Sunday? Why, Eliza, this is only Monday—they wouldn't put a funeral off for a week!"

"Yas'm"—respectfully—"but dey has to, 'cause he ain't dead yit."

"Not dead! I am positively ashamed of you! How can you be so heartless as to arrange to attend the funeral of a man who is still living? Why, he may not die at all!"

"Yas'm, but he will; dey ain't no hope."

"It is impossible to say that, Eliza; the best doctors are often mistaken. But, even if they do know a case to be hopeless, they cannot predict the exact time of a man's death with such a certainty that the funeral can be arranged so long beforehand."

"Yas'm"—with calm assurance—"but he will be buried nex' Sunday for all dat, cause he's gwin' to be hung on Friday!"

Is There a Weak Spot That is Likely to Develop Disease?

Paine's Celery Compound

Quickly Reaches the Affected Parts, Fortifies Them and Imparts New Life to the Blood

Are you conscious of a weak spot in any of the great organs of the body? Do your kidneys bother you? It may be that you experience pain in urination, or pain in the small of the back. You perhaps find the skin dry and harsh, the urine highly colored, or a sediment in it. Any of these symptoms point to kidney trouble.

Is your liver doing its great work properly? If you have vomiting, nausea, furred tongue, constipation or disordered vision, there is a weak spot in the liver. This demands instant attention.

Is the network of muscular fibres of the stomach in a healthy condition, or are the nerves weak, irritated, or inflamed? Is digestion poor? Have you dyspepsia, indigestion, heartburn, waterbrash or flatulence? Any of these troubles are forerunners of suffering and ill health.

Does your blood as it courses to all parts of the body carry nourishment and life, or is it filled with impurities and poisons? Unless you have a full and vigorous supply of pure blood your life is daily in danger.

Eminent medical men and tens of thousands made well and strong by Paine's Celery Compound, will tell you that this marvellous medicine is your sure deliverer from all troubles we have mentioned. Paine's Celery Compound quickly and promptly reaches the weak and suffering parts, fortifies them, gives new life to the blood, nourishes the nerves, builds muscle and tissue, and makes you rejoice in a condition of health that will be permanent and lasting.

MANY BOERS SETTLING IN GERMAN EAST AFRICA

The Irreconcilables Who Won't Live Under British Flag Go There

A BIG BOOM ON FOR THE GERMAN PROVINCE

Count von Goetzen, the Governor, is Looking for Capital for a Railway

Berlin, Feb. 10—Lady Curzon is not the only American woman whose husband rules over a colonial empire. A similar position is also held by the Countess von Goetzen, who is now in Berlin with her husband, Count von Goetzen, the governor of German East Africa.

The count, who has leave of absence until March, is now in Berlin. He said to a correspondent there:

"German East Africa is double the size of Germany," he said "and has a population of 6,000,000 of which only 1,000 are Europeans. The country is very porductive and rich in mineral wealth. I am now seeking capital for the purpose of building a railroad to connect Kiwa, in the neighborhood of our capital, Daaresaalam with Lake Nyassa. This road, if built, will be of immense value for it will make possible the control of trade between Lake Nyassa and Lake Tanganicka.

"Land is given to prospective settlers in German East Africa under the most favorable conditions. It is interesting to note, in this connection, that a large number of Boers, having much practical experience in agriculture, can give a good example to German settlers.

"German East Africa's mineral wealth has been only partly exploited. At Tramba, in the Kilimagaro, a twenty-days' journey from the coast gold mines exist. I have also given much attention to the development of mica.

"German East Africa has an abundance of cattle, which are exported. Game also abounds. The native population of German East Africa on the whole is an industrious one. The negro of the eastern coast is more intelligent than the American, who was originally from Western Africa. Most of the people living in our colony are Mohammedans.

Slavery Almost Abolished.

"Slavery in German East Africa is gradually becoming a thing of the past—slave dealers being severely punished. The result has been that many Arabs formerly engaged in the traffic have become very poor. We are still permitting the so-called house slavery which can be abolished only by gradual processes.

"Daaresaalam, the capital, is increasing in size and is becoming an important shipping centre. It has the best harbor in the African coast, and is equipped with a dry dock.

"The climate of German East Africa is very enervating, but is no worse than that of India and Ceylon. In the highlands of the interior a delightful sub-tropical coolness prevails. We are now planning to establish in the Usambara Mountains, where the good coffee is raised, a hill station, in which to spend the warm season, patterned after similar ones in India.

"Daaresaalam can be reached from Naples in two weeks by the German East Africa line. Socially it is not a bad place and my wife is well pleased with it. We have our own yacht, and besides can visit Zanibar by steamer the island being only four hours distant. We frequently have regattas and tennis tournaments with the foreign residents of Zanibar. At home we often have concerts by amateurs, take delightful drives in the romantic environments of Daaresaalam, and, with our regular governmental duties, the day passes rapidly. Speaking of our drives, the story is true that when we were out driving a leopard attacked us, but the animal fled when I struck it with my whip. The story, it seems, was cabled over to America, for my wife's relatives had a special mass celebrated to express gratitude for our narrow escape.

Seldom Wear Uniforms.

"Regarding military life in the German East Africa, I wish to say that while of course drills and military parades take place occasionally, military exploits do not form the sole object of the colony. I also desire to correct the impression given out by Poultney Bigelow and others that German East Africa is governed on military lines and that officials and officers constantly wear uniforms. The very contrary is the case. Men go mostly in civilian clothes, and only on special occasions wear uniforms."

Count von Goetzen's rule of East Africa has meant the entire approval of the German Government. It has been Germany's aim to model its colonial system after that of Britain, and it found in Count von Goetzen the right man for the work on these lines.

His methods have been unbureaucratic, and in every possible way he has given active support to the merchants and planters living in the colony. He frequently holds meetings at which these elements are present and hears from them their grievances. He has solved the difficult labor problem of how to obtain men to work on the plantations by bringing natives from districts in the interior. It is his aim to put the colony on such a financial basis that it shall be self-sustaining and financially independant of the home government.

Governor von Goetzen is very popular with the natives whom he has endeavored to treat humanely and fairly. He hopes to establish a native council somewhat on the same principle as that adopted by the British in India.

SUGAR BEET INDUSTRY.

ENTHUSIASTIC MEETING AT OMEMEE ON MONDAY NIGHT

Much Interest Manifested — Important Addresses Delivered by Mr. C. W. Bennett Dr. Jeffs and Mr. Koenig

A meeting in the interests of the growing of sugar beets for the Peterborough Sugar Company was held in Omemee on Monday evening.

There were 40 or 50 representatives of farmers and business men of the village in attendance, all of whom gave evidence of the importance such an industry might become to the farming community.

The Peterborough Sugar Company were represented by Dr. W. H. Jeffs, the Agricultural Superintendent, and Mr. G. W. Bennett.

Mr. Koenig, of the Marine City Sugar Company, was also present.

Mr. McQuade, County Councillor, of Victoria County, was elected Chairman of the meeting, and in opening referred to the fact that as the Beet Sugar project that had been started in the town of Lindsay having as yet failed to materialize, he deemed the proposition from the Peterborough Sugar Company worthy of the earnest consideration of the farmers in this vicinity.

Mr. G. W. Bennett was then called upon.

Mr. G. W. Bennett, in opening, tendered apologies for the absence of Mr. T. E. Bradburn, the President of the Peterborough Sugar Company, who had been unavoidably detained owing to a fire on Saturday having destroyed some of his property in Peterborough, necessitating an appointment with the inspectors of insurance for this evening.

The Peterborough Sugar Company, Mr. Bennett said, did not wish to conflict with the Lindsay project in any way. It was at the solicitation of a large number of farmers in the County of Victoria that lead to their extending their acreage contracts into that county, and there was nothing to prevent the farmer from contracting to grow beets for both companies. This was done by the beet growers of Michigan, many of whom are now under contract to grow beets for five or six factories.

In this way the farmer had the companies at their mercy, as the factory that paid the farmer the best price and used him the best was the one who got the most beets.

Mr. Bennett clearly stated the project for the Sugar Company. The initial stages of the building of the factory were now almost complete, and in a few weeks it was expected the material and plant would be on the way.

The beets grown by the farmers in the vicinity of Omemee would be accepted by the company delivered on cars at the station, the farmer to bear the cost of hauling, the company to supply the cars and do the unloading.

Mr. Bennett gave a full description of the extent and importance of the industry to the farmer, showing that in like manner as the production and manufacture of cheese had become of great importance to the people of this country so also would become the production and manufacture of sugar from the beet, and the risk and cost of the latter, as far as the farmer was concerned, being comparatively nothing as compared to that of the former.

Mr. Bennett asked the farmers present to treat the project as a straight business proposition, to carefully consider the question from a practical standpoint, and if each one would figure the question of cost of production and income from crop, he opined that the balance would show a much greater profit than that derived from any other crop at present produced off the farm.

Dr. Jeffs, speaking of the starting of such an immense industry, mentioned the difficulties met, and compared them to the difficulties that were found in starting the cheese business, and especially at a period of prosperity, and strongly advised the farmers who, without a doubt, were experiencing an era of almost unprecedented prosperity, to encourage this new channel of production on the farm, so that in case a period of dull times again arrive farmers may have the growing of beets as another source from which to derive profit.

The Doctor said that while a few years ago a farmer could get from $5 to $10 a load for garden truck, etc., to-day the market gardeners were doing well if they made $3 to $4 for the same load, and by the reports of the meeting of the Tomato Growers' Association, of Hamilton, it was found the tomato growers were going into sugar beets. Any farmer would be well satisfied with ten cents a bushel for turnips or mangels if he could get an unlimited market. The sugar factory supplied this, and gave 12 cents the first year. This is a sure crop, and the price is fixed before the crop is planted, and is a crop that does not require any more labor than most farmers are accustomed to in their ordinary work.

If the farmer finds the price too small he has the matter in his own hands, he need not contract for a second term unless the company accedes to his demand for a better price.

The farmers of to-day are up to date, and are every where reaching out for new avenues of trade. This sugar beet industry supplies one, and the farmers are sooner or later bound to take it up.

The company can supply labor for any who contract for 25 acres or more as the Emigration Department are sending out experienced British farm hands to work on Ontario farms this spring, and any who make application will be supplied.

Mr. Koenig was then called upon. He said he had just come from Wiarton where the sugar factory was in operation at the present time. The people of that town and vicinity thought this industry was the greatest boon that had been established, and no trouble would be experienced in contracting for a far greater acreage next year. Mr. Koenig had been growing sugar beets in Ontario for three years near Wallaceburg and Dresden, he had been employed by the Marine City Sugar Company, of Michigan, and was an agriculturist for that company. He had made a great success in the growing of the beets. His company in 1900 had only 250 acres in Ontario, it increased in 1901 to 2500 acres, in 1902 to 4000 acres, and in 1903 there are 6000 acres contracted for this one company alone.

A friend of his at Sombra, Ont., had one acre in 1900 and produced 20 tons, in 1901 he had 5 acres and produced 85 tons, and in 1902 he took 20 acres. This man was not a farmer, but a citizen of the town.

Mr. Koenig gave the cost of the production as found by himself after three years experience to be from $15 to $20 per acre. That is figuring from an acreage company's standpoint, and in every case that he was connected with, the profits were large enough to satisfy all concerned.

Mr. Koenig then, at the request of those present, went fully into the question of preparing the ground, sowing, thinning and harvesting the crop, and while so doing was plied with numerous questions, all of which were answered in a very instructive and interesting way.

Mr. Koenig said that while there was no doubt slightly more work to carefully cultivate and grow beets than an ordinary root crop and careful cultivation was necessary to secure the best results, yet, on the whole, the extra work should not hinder any one from trying the crop, as the results were much better and the profit greater. They would be well repaid for the extra work

Several gentlement present expressed their intention of growing the beets, and an acreage company is well on the way to undertake 100 acres in the immediate neighborhood of Omemee.

Mr J. D. Thornton and Mr. J. McDonald were appointed contract agents and were quite enthusiastic that the townships of Emily and Mariposa will do more than their share of encouraging in a practical way this great industry.

Another meeting will be held at Reaboro on Monday evening next.

DISCOVERY OF MOLYBDENUM

Bulletin of the American Iron and Steel Association

Molybdenum is a metal which, until recently, has been but little known outside of the labratory, and its name, even now, is strange to the general public. Of late years, however, it has been much inquired for. It has been found superior to nickel for hardening and toughening steel. It is even better than tungsten for that purpose. Nickel makes steel tough; tungsten makes it tough and hard; but tungsten steel is disposed to crack under impact. Molybdenum makes the steel both tough and hard, and does not make it brittle. It has the additional quality of keeping the steel cool. It is therefore valuable in the manufacture of quick-firing guns. Molybdenum is one of the most refractory of metals. It cannot be melted in any furnace, nor even under the blowpipe. Nothing but the electric current will reduce it to a liquid state. A current of about 50 volts and 300 to 350 amperes will melt it.

The ore resembles lead and is mostly found in laminae and thin wedge-shaped masses in quartz veins. It is generally composed of about 60 per cent. of pure molybdenum and 40 per cent. of sulphur. The greater part of the ore supply has hitherto come from Sweden, but small quantities have been obtained from Maine and Arizona. Recently it was discovered in the county of Hastings, Ontario. This has been secured by a Buffalo company. A. T. Freed, formerly of the office of the American Iron and Steel association, and now of Hamilton, Ontario, has some molybdenum property on the west shore of the Georgian bay, near Parry Sound. Neither of the Canadian properties has been developed.

At present molybdenum ore, carrying 60 per cent. of the metal, is worth about $400 per ton, and the pure molybdenum about $2 a pound.

Permanent Cure for Neuralgia

Experienced sufferers state that no remedy relieves neuralgia so quickly as a hot application of Polson's Nerviline, the strongest liniment made. Nerviline is certainly very penetrating and has a powerful influence over neuralgic pains, which it destroys almost at once. Nerviline is highly recommended for Rheumatism, Lumbago Sciatica and Toothache. Better try a 25c bottle, it's all right.

THE TRENT VALLEY CANAL

Chief Engineer Rogers Lectures at Mc Gill College, Montreal

And Illustrates His Interesting Talk on the Great Waterway by Stereopticon Views

The Montreal Gazette thus refers to the lecture recently delivered at McGill College, by Mr. R. B. Rogers, Chief Engineer of the Trent Valley Canal:

One of the great results of engineering skill is the hydraulic lift lock, and two of these appliances now being installed in the Trent Valley Canal, will bring it in point of usefulness and convenience in operation to be a most important link in the chain of Canadian waterways from the west to the east. The many interesting features of this canal and the ingenuity of its construction were told last night by Mr. R. B. Rogers, chief engineer, of the canal, to a large audience in the lecture room of the High School.

The lecture was one of the series of those given to teachers, and proved most interesting. The lecturer dealt with the canal system in its entirety, but paid particular attention to the many features of the Trent canal. Mr. Rogers spoke of the value of canals and their importance in the movement of merchandise, and of the place taken by these waterways in the great problem of transportation. Grain carrying methods were gone into, and the necessity for the maintenance of the Canadian system demonstrated. The various routes were gone over, and these were made clear by the use of maps.

Mr. Rogers ventured to foretell that improvements in the western waterways would ultimately result in grain being carried to Montreal for 3 3-4 cts a bushel, a rate hitherto unheard of. The route by water from Port Arthur or Fort William to tidewater at Montreal or Quebec, comprises seventy-three miles of canals, forty-eight locks overcoming 551 feet. There are 1,150 miles of Lake and river navigation, making a total of 1,223 miles to Montreal.

Speaking of the Trent Valley Canal, Mr. Rogers said that the idea of a canal through the valley originated with the engineer corps of the Imperial Government in the first quarter of the century. Champlain had used this route on his way to the west, and afterwards spoke of its advantages. The way was explored and surveyed, and the Imperial Government commenced the work of the canal. In 1837 the Mackenzie rebellion broke out, and the money voted for the canal was turned to other channels. A portion of the work had been completed, but nothing further was done until 1880, when the Minister of Railways and Canals took a trip over the route, and its advantages appealed to him.

The work has been continued, and is now well under way. The two hydraulic lift locks which are being built will be features of the canal. The lift at Peterboro will raise vessels 65 feet in as short a time as it would take a vessel to go through the ordinary lock. These lifts consist of steel boxes, which counterbalance. A vessel enters the box, the ends of which are then closed. The pressure of the upper lift descending, causes the other to ascend. At the top the boxes are opened, and the vessel floats into the reach. Rams 7 1-2 feet in diameter support the boxes and raise or lower them. There are lifts of this character in operation in Europe, but none of them is of the size of the Canadian lifts.

Revolution in Newfoundland

Since the introduction into Newfoundland of the new Inhaler Remedy "Catarrhozone," the treatment of Catarrhal diseases has been entirely revolutionized. The old-time snuff and internal medicine has been cast aside and everyone is inhaling Catarrhozone; it clears the head and throat in two minutes, and is very agreeable and pleasant to use. Catarrhozone is a wonderful cure for Coughs, Colds, Catarrh, Asthma, Bronchitis, Lung Trouble and Deafness. It relieves quickly and cures permanently. We advise our readers to try Catarrhozone Price $1.00; trial size 25c. Druggists or Polson & Co., Kingston, Ont.

Dr. HHamilton's Mandrake and Butternut Pills.

THEY ARE A MARVEL

Dr. Clarke's Little Red Pills the Greatest Wonder of the Age

Editor of the Morning Times:

Sir,—I am only too pleased to write a letter to the press, as I firmly believe that all who suffer from rheumatism or any troubles of the blood can get sure and certain relief. I was ill for many years, and am now entirely well. Dr. Clarke's Little Red Pills are without doubt the greatest wonder of the age in medicine. They cured me, and I know they will cure others who are even worse than I was. I write this of my own accord in the hope that it will do some good. Evans Blair, G. T. R. News Agent, Union Station, Toronto.

A. R. Legge, Stanstead, Que., writes "Six boxes of Dr. Clarke's Little Red Pills entirely cured me of indigestion after years of torture."

Dr. Clarke's Little Red Pills are positive and certain cure for rheumatism, asthma, paralysis, coughs, lame back, indigestion, all stomach and liver troubles, female complaints, even when the diseases have been standing for many years; the most stubborn case will yield. Sold by Ormond & Walsh, Peterborough, price 50c. per box.

JILTED MAN TAKES LIFE

Commits Suicide on the Night He Was to Have Been Married

Butte, Mont., Feb. 10—William Winters, one of the most prominent men in Butte, and former county auditor, shot himself through the head with a revolver last night, dying instantly. It is said Winter's fiancee broke their engagement, and this, it is believed, led to his suicide.

On a table within a foot of the corpse were many wedding presents. The ceremony was to have been performed last night.

—A full attendance of all members of Companion Court Queen, No. 276, is requested for the meeting to-morrow night, as business of importance will be transacted.

FOR BIG NAVY

Nebraska Legislature Wants Uncle Sam to Prepare For War

Lincoln, Neb. Feb. 10—The following concurrent resolution, which under the rules, takes the form of a regular bill, was introduced in the state senate yesterday:

Whereas, Congress has prudently taken steps to strengthen the army of the United States by an increase in the proposed arropriation for this branch of the service, therefore, be it

Resolved, That in view of the menacing attitude of foreign powers, the international situation justifies the general government in making further preparations to secure a lasting peace by being prepared for war; therefore, be it

Resolved, That the state of Nebraska, by its legislature, in session assembled, respectfully requests its representatives in congress to support an appropriation for a larger navy.

OTTAWA FIRE INSURANCE CO.

The Company Makes a Successful Record During the Past Year

We congratulate the management of the Ottawa Fire Insurance Company on the success of their operations for the year just closed, as shown by the report which appears in this issue of The Times. The company, although only three years in existence, is one of the most prosperous in the Dominion. At its head are several of the representative business men of Ottawa, including Mr. Charles Magee, Mr. C. Berkeley Powell, M.P.P., and Mr. C. Ross. Its business is extending rapidly throughout the Dominion. The net profits for the year just closed amount to $68,192, or about 68 per cent., on the paid up capital, out of which a four per cent. dividend has been declared. The gross revenue of the past year was $300,856, an increase of $72,000 over the previous year, and there was a decrease of over $13,000 in the losses, the latter representing less than 35 per cent. as compared with the premium income.

EVANGELISTIC SERVICES

Another Large Meeting at St. Paul's Church

Evangelistics' Singing Enraptures Audience—Marked Spirit of Unity Present.

There was a crowded congregation in St. Paul's church last night, at the second week-night meeting held in connection with the union services now being conducted. All the churches were represented by their respective pastors, and the meeting was a most successful one. Representatives from the various Young Men's Guilds had charge of the ushering. Mr. Mulligan, of George street, assisted the union choir in the service of praise, while Mr. Wilgust, of St. Paul's, presided at the organ.

The service commenced with devotional singing, which was heartily joined in by those present. Evangelist Turk gave an expianatory bible reading, after which the two Evangelists sang a sacred duet.

Mr. Kerby was the speaker last evening, and selected his text from Mark 14, 8th verse. "She had done what she could." The subject of the discourse would be "The spirit and method of work."

Other writers, the speaker said, would have left out, what Scripture writers have put in. They would not have penned the incident of the eccentric woman. There must have been something wonderful about it, or Christ would not have linked it with the Gospel. Christ values things by their intrinsic worth.

This expression of love, came at a time when Christ most needed it. Others were forsaking; some betraying; some denying. But this woman showed her love. There is more love, the speaker said, in one woman's heart, than in the hearts of ten men. What was to be learned from this incident.

First: That those who love Christ are under obligations to manifest that love. Does your milkman know that you are a Christian? Has your newsboy discovered that you are a child of God? Has your family gained anything by your joining the church? Does your washer-woman believe that she is toiling for a servant of Christ?

Second: The spirit that prompted this woman's act. It is the motive that gives moral quality to an act. Much of what is done is without excellence because it is not done for Christ's sake. The man that forgets himself for Christ, will never be forgotten by Him.

Third: Timeliness of her act. If she had put it off six days longer it would have been too late, for Christ would then have been dead. We should make use of the present opportunities. Some are always behind. Late for breakfast; late for train; late with accounts. If they were not careful they would be to late to get into Heaven's gate. Now is the time to tell your wife you love her. Not tell her friends when she is dead. Now is the time to carry flowers to a sick friend. Not strew the coffin after she is gone. A ton of coal is worth more to a live man than a bouquet to a dead man. If your ministers help you, say so. It's the word in season, the bread when hungry, the sympathy when the heart is pining, and the good we can do when the days are passing by.

Fourth: The extraordinary character of this woman's effort. We ought to do something extraordinary for the Kingdom of Christ. We get into ruts and grooves, and it seems to take more or less work to get us out. Whitfield's preaching on Kennington Commons, John Wesley's preaching to the coal miners, John Livingstone's preaching on a tombstone was an extraordinary line of work, but it brought results. We must be willing to be singular for Christ.

Fifth: The spontaneous and impulsive character of this woman's act. Many a Heaven born impulse is checked for too much regard for conventionalities. It was the impulsive spirit of Lord Nelson that gave England victory at Copenhagen and Trafalgar. The same spirit in Admiral Dewey led him to sail up Manila Bay and gave the United States the proud distinction of giving civilization to ten million Fillipinos. General Buchanan was the finest scholar of the 16th century, but it was the enthusiasm of John Knox that wakened up Scotland. Erasmus was the finest scholar of any age, but it was Martin Luther that gave the world religious liberty.

To press the question them, said the speaker in conclusion, have you done what you could to know more of Christ through the study of the Bible? Have you done what you could wish with your time, money and personal influence.

The address was most impressive. Eloquent words, spoken with earnestness, and the knowledge of conviction.

After prayers from the various pastors the meeting closed with the benediction.

THE BIG POWERS ARE BEING APPEALED TO

A Menace to Bulgaria--Turkish War Preparations are So Regarded

London, Feb. 10.—The Times correspondent at Sofia says that the Bulgarian Government has addressed a representation to the Powers invoking their good offices in order to cause cessation of the Turkish military preparations. It is felt that there may be justification for the reinforcement of the Turkish troops in Macedonia, but the mobilization of an army corps at Adrianople can only be regarded as a menace to Bulgaria.

The situation is considered grave, but the Government, relying upon the friendly intervention of the Powers, will refrain from any counter demonstration. The Bulgarian army will not be mobilized except under pressure of extreme necessity, as it is fully realized here that even in case of a successful conflict with Turkey the result would be financial ruin to Bulgaria.

The same correspondent quotes a trustworthy correspondent, who has made an eleven-day excursion through Northern Macedonia. This correspondent says that the killing of some Turks in the Jumaia district led to a search for arms, which, in many cases became a pretext for extorting money. It was commonly said; "If you have no rifle, buy one and give it up," as a ransom from personal violence. The same rifles are repeatedly received by the Turks and sold again.

London, Feb. 9.—Washington and New York correspondents of London papers are busily engaged in endeavoring to prejudice the British public against Canada on the Alaskan boundary. The Standard correspondent says; "Canada can have nothing but a claim to a treaty that is objectionable because it authorises the cession of territory without any consideration, and so places the United States in jeopardy which Canada does not share."

The general English opinion, on the contrary, has been that a concession treaty should be the outcome, a give and take arrangement, both sides conceding something.

MARCONI'S CAMPAIGN.

London, Feb. 9.—Marconi will return to Canada two months hence, after visiting Italy. He is now carrying on a spirited campaign against the British permanent officials, who refuse to co-operate in establishing a commercial service between England and the American continent, and is applying over their heads to Austen Chamberlain. Marconi contrasts the obstructive tactics of the British officials with the assistance from the Canadian Government, and says there is great dissatisfaction in Canada at the British obstacles.

Milan Feb. 3—Signor Pino, the Genoese engineer, whose hydroscope, which it is said, enables the person to see the bed of the sea, was recently experimented with in the Mediterranean, said in an interview today that his invention would allow a clear view over an area of several thousand square yards, at a depth of from 400 to 500 yards. Signor Pino was reticent in regard to the construction of his instrument, but stated that he was able to see fish, plants crustacea, and other objects, even of the smallest size.

He says his apparatus can be adapted to use on shipboard and will enable a captain to see submerged reefs and banks from the maindeck of his ship. The instrument was tested in the presence of delegates from the Ministry of Marine.

The Genoese Submarine Society has also purchased for 8,000 another invention of Signor Pino. It is a large egg-shaped submarine boat, provided with two screws and also with wheels, which will enable it to crawl on the bottom of the sea. It is furnished with large grappling appliances with which loose objects at the bottom can be secured. The motive power is electricity, which maintains communication between the vessel and the surface by means of a telephone.

Signor Pino says he will make efforts in the coming spring to find the Black Prince, which was sunk during the Crimean war, with much gold aboard, and also the art treasures lost in the Greek Archipelago by Pompey in the civil war with Caesar.

Cause of Splitting Headaches

Poisons accumulate in the blood, and spread every moment to all parts of the body. The brain becomes congested, nerves irritated, and the result is that awful headache.

Ferrozone is nature's own remedy for headaches; is a blood strengthener and purifier of uncommon merit, a lasting and potent tonic, and the greatest invigorant and health maker known. Headaches never bother people that take Ferrozone after each meal. Buy a box from your druggist for 50c. By mail from Polson & Co., Kingston, Ont.

MARKS' BROS.

Another Crowd d House Greet This Popular Company Last Night

The success which has attended the various productions of the Marks' Bros. combination during their present engagement has been well nigh phenomenal. Crowded houses have witnessed each performance and the efforts of the artists have been received with unbounded enthusiasm. To-night is their closing performance, and they will depart from town leaving a lasting impression.

Last evening "In good old New York town" was the attraction, and the performance may be voted another success. Miss May A. Bell-Marks once again proved herself an emotional actress of rare ability. Her acting in May Trimmer was characterized by perfectly legitimate and artistic methods. She suggests intensity of feeling more by inference than by dramatic outbursts. There is no straining after effect; no mannerisms, but a charm and intelligence which enables her to conceal her art—which after all is the highest point of art.

Webster Morse is a real stage villain—the audience are never in doubt as to his evil intentions. J. C. Connally started out to convince that impression, and the hisses of execration accorded him last evening may be justly considered a sign of recognized merit. Will L. Stewart may be accorded a fair measure of praise for work which at least was conscientious and the same may be paid of Mr. Will C. Millard as Denny Dolan. Mr. Millard is an artist of many accomplishments, and well deserves the salvos of applause that greets his appearance. Miss Leah Stoddart tried hard to be convincing in her dual role last evening. She would do well to digest that valuable axiom of the actor's art "Appear natural." Carl B. Steers was seen at his best as Lake Trimmar, and a kind word must be spoken for the thoughtful work of Millie Bell Millard and Margie Steers. Turning to the olio "The Rowley's" in their excellent act earned new laurels. Their performance contains genuine humor free from vulgarity.

Proof Positive.

This year's Summer Girl is, more than ever alert. As witness the following incident: First, know that the young man meant only to revive that good old custom of "a pair of gloves" as a forfeit. When he found her curled up in the hammock, a magazine slipped from her listless fingers, he—well, who wouldn't! Of a sudden she opened her blue eyes on him, and remarked accusingly, a tremble in her voice: "You kissed me!"

He lost nerve, and stammered a denial.

"I know it was you," she insisted.

"I am not the only person about," he ventured. "There's Wilcox going over the links now. He had to pass here. And doubtless Dandy Williams—"

"No," she interrupted, "it was you, I know it."

Her look froze him, but he gathered desperate courage. "How do you know?" he demanded triumphantly. A flush spread to her pompadour. "Did I ever kiss you before?" he asked. "Granting I did kiss you just now—" he was pushing his advantage hard, and she squirmed—"I think I ought to be cleared!" He was getting indignant now. "There is only one way," he went on, "to put the matter to a fair test, and I propose to have that way adopted." He paused, and she looked troubled, but did not interrupt. "If I kiss you now, you can decide whether or no I was guilty before."

It was an awful risk, but he hoped a second time might soften her. She went quite pale, then replied firmly:

"I feel you have a right to vindication, Mr. S., and to show that I am perfectly fair-minded, I will submit to the test."

At this he almost shrank from continuing. But a second kiss! Delicious! And would she not relent? Would not all opposition be drowned, that is amalgamated in a mutual third? Great as the risk was, it was worth taking.

"I wish to be perfectly fair," he said, briskly, "and I suggest that you close your eyes that you may give undivided attention to the character and quality."

"But I was asleep before," she urged.

He almost said, "Really," but stopped in time, and substituted: "Simulation of sleep must do now."

"You will hurry, won't you?" she asked, her voice trembling.

But he was judicial. "It should be done properly," was all he would reply. She closed her eyes and doubled her fists, the color wavering from carnation to white rose in her cheeks. He drew a long breath, bent lingeringly, swept her trembling mouth with the tips of his moustache; softly fitted his lips to hers, gently pressed their yielding ripeness till almost the little white teeth were felt, lifted the lingering pressure till the tips of his moustache swept her trembling lips, and—it was over!

She lay quite still then, her eyelids fluttered. Presently they lifted over the blue, which was all dreamy and soft. She sighed, clasped her hands, spoke:

"I don't think the other was you!" she murmured with deep conviction.

Then he fainted.

ENTIRELY OUT OF THE ORDINARY

Yet one of the ways that LEAD TO FORTUNE

Why not make a small investment in oil lands right ahead of good producing wells, some having wells producing oil on adjoining farms? The oil now brings $1.50 per barrel, bought by the Standard Oil Co., without any transportation charges, and is bound to go higher; a few hundred dollars often invested in property of this kind yields thousands of dollars profit. I personally know of parties who made over $100,000 in 60 days time on an investment of this kind; also have wells making from 10 to 300 barrels a day. Parties desiring to organize a company will do well to investigate this opportunity, getting thereby the advantage of years of experience, and if you don't want to drill the wells wait until the wells drilling close to you have come in and reap the benefit of their coming. The oil business conducted on business principles, with honest management, is bound to succeed. You do not have to look farther than the Standard Oil Co. to see what honest management founded on facts will produce, they have drawn very heavily on stocks the past three years and there is not enough of this grade of oil now above ground to run the country for more than two years, so you can readily see the profits that will be realized by starting now and obtaining the big price the Standard Oil Co. will be compelled to pay for crude oil to supply the demands of the country. For particulars write THE RANGER CO., MARIETTA, OHIO.

ENGLISH OFFICE 30 Fleet St., London, E. C.

UNION LABEL

PETERBOROUGH, FEB. 9, 1903.

FARM LABOR

Mr. Preston writes from England that there are two classes in the old country available to help the solution of the Canadian farm labor problem. There are married men, with families of children, but the farmer must have a cottage on his premises to take advantage of this kind of help. Then there are young men, without agricultural experience, who would like to learn farming before investing in farm property. The latter, we should imagine, would be of a roving disposition and not inclined to do hard work. It would be much safer to rely on the married laborer. Canadian farmers cannot expect to find help available during the few busy months of summer, unless they can keep their men employed during the winter also. Those who have a lot of cattle and hogs to take care of need help in winter as well as in summer, and it must be a relief to the farmer's wife and family to have the hired man quartered in a house of his own. Manitoba makes a strong bid for the unattached farm laborer by its offer of high wages, with low excursion rates, during the harvest season, and Ontario can only offset that attraction by providing employment on the farm all the year round. In the fruit and sugar beet districts, the farm laborer's children could add much to the family income during the summer season.

THE NEW SERUM FOR SCARLET FEVER

The announcement of the discovery of a new anti-toxin for scarlet fever, coming as it does with the indorsement of Professor Baginsky, of Berlin, has the mark of authenticity upon it, differing from other cabled scientific news along similar lines. Aronson who is given credit for isolating the remedy, and Baginsky, who claims to have practically proved its value, have been alike identified with the earlier studies of diphtheria anti-toxin, in which they have made an enviable record. Positive statements from such men inspire all sorts of possibilities.

If scarlet fever can be treated with as much success as diphtheria thousands of precious lives will be saved that are otherwise sacrificed to present methods of medication. In the absence of scientific details of the discovery it is to be assumed that a curative anti-toxin has been discovered that has the power to neutralize the fever poison in the blood.

Heretofore all efforts to obtain such a substance have been futile, mainly for the reason that no bacillus of scarlet fever has yet been found. In view of this fact it would seem probable that some entirely new bacteriological methods have been employed to obtain this new anti-toxin, and that some new principle of isolation has been evolved.

Laxative Bromo Quinine Cures a Cold in One Day, Grip in 2 Days on every box. 25c

THIRD ANNUAL MEETING

—OF THE—

Ottawa Fire Insurance Co'y

The annual general meeting of the shareholders was held in the head office of the Company, at Ottawa, on Tuesday, the 3rd February, 1903, at 3 p.m.

Amongst those present were Messrs. G. B. Pattee, G. F Henderson, W. C Edwards, M.P., Charles Magee, C. Berkeley Powell, M.P.P., Claude McLachlin, D. Murphy, M.P.P., C Ross, C. Jackson Booth, Bennett Rosamond, M.P., C. C. Ray, W D Hogg, W S Odell, J. A. Gemmill, John Coates, Peter Larmouth and Walter G. White.

The chair was taken by the president, Mr. Charles Magee, and Mr. A. B. Powell, the manager, acted as secretary.

The manager then read the third annual report of the directors as follows:

The directors have pleasure in submitting to the shareholders the annual statements of the Company's accounts for the year ended 31st December, 1902.

The revenue account shows a large increase of premium income, the gross being $300,856.65. This amount with cancellations and reinsurances deducted leaves $211,937.08, or an increase of $72,000.00 over last year, which your directors consider satisfactory.

On the other hand losses are $73,304.57, as against $86,808.62 in 1901, and the percentage of losses to premium is under 35 per cent. The net underwriting profit was $63,163.54, or, including interest on investments and rents, $68,192.67.

The very large increase in the business transacted this year, and especially the very gratifying increase in the net profits, fully justifies the confidence expressed by your directors in the last annual report.

During the year the Company purchased the property on the corner of Sparks and Bank streets with the intention of utilizing it for the offices of the Company as soon as our present lease expires.

All of which is respectfully submitted

CHARLES MAGEE,
President.

were necessary to re-insure all our outstanding risks, or to liquidate the business, we have more than sufficient assets on hand at the present moment to do it without touching the paid-up capital. We have a well established and growing business in every province of the Dominion and in Newfoundland. The business has now reached such a volume, and is so divided and spread over such a large territory that, although we may not always have such profitable years as the last, the directors feel assured that the outlook for the future prosperity of the Company is bright; at the same time we do not wish to raise hopes of large dividends in the near future, as it should be, and I am sure, will be the policy of the directors to build up a large reserve as a protection to both policy holders and shareholders.

In explanation of the item of the $30,000 mortgage on real estate— the property was bought subject to this mortgage bearing 4 1-2 per cent. interest. The Company offered to pay it off, but the mortgagees declined to accept the money without a substantial bonus.

It was then moved by the president seconded by Mr. C. Berkeley Powell, that the directors' report and financial statements just read be received and adopted.—Carried.

A resolution was then passed thanking the president, vice-presidents and directors for their care and attention to the interests of the Company during the past year.

Mr. C. Berkeley Powell, first-vice-president, on behalf of the directors, replied, thanking the shareholders. He was very pleased that, at the end of three years, the directors were enabled to show not only a large increase in business, but a substantial profit upon the year's operations.

A similar resolution thanking the manager and head office staff, the general and other agents of the Company for their care and zeal was next passed. The manager replied briefly.

Mr. Jas. F. Cunningham was appointed auditor for the ensuing year.

The board of directors were unanimously re-elected as follows: C. Jackson Booth, John Coates, C.E., W. C. Edwards, M.P., Allan Francis, Chas Magee, Dennis Murphy, M.P.P., Claude McLachlin, W. S. Odell, C. Berkeley Powell, M.P.P., C. C. Ray, C Ross and Bennett Rosamond, M.P.

At a subsequent meeting of the board, Mr. Charles Magee was re-elected president, and Messrs. C. Berkeley Powell, and C. Ross were re-elected first and second vice-presidents respectively.

A. B. POWELL,
Manager.

To the President, Directors and Shareholders
of the Ottawa Fire Insurance Company:

Gentlemen,

We hereby certify that the books of the Company have been audited by us, that the vouchers and securities have been examined up to 31st December, 1902, and we find the whole carefully kept and correct.

P. LARMONTH, F. C. A (Can.),
JAS. F. CUNNINGHAM, F. C. A. (Can.).

Ottawa, January 30th, 1903.

The president, Mr. Charles Magee, then said:

Gentlemen:

I think we may congratulate ourselves as Shareholders, on the result of the year's business, as revealed by the statement just read.

In 1901 the gross premium income was $190,000 and in 1902 it was $300,000, or an increase of 58 per cent., whilst the net income for 1901 was $139,987, and for 1902 it was $211,937, or an increase of a little over fifty per cent.

The fire losses for 1902 were $73,304 which are $13,000 less than the previous year, notwithstanding the large increase in the volume of business; the percentage of losses to net income being under thirty-five per cent.

The net profits for 1901 were $5,296, and in 1902 they were $68,192, after writing off $1,638 for depreciation in office furniture and piano.

Out of this amount $4,000 was paid in dividends, $36,186 put aside for reserve on the increased liabilities to policy holders, leaving $28,006 to go to the credit of profit and loss.

In calculating reserve we complied with the Dominion Government requirements, which are more severe than is considered necessary, and we always use the same figures in our statement to the shareholders as we do in the return to the Insurance Department, and I am glad to be able to assure our shareholders that if it

[COPYRIGHTED]

To Set Her Free

By FLORENCE WARDEN

Author of "The House in the Marsh," "A Prince of Darkness," etc., etc.

"Very well. Then we'll get to the other side, to the inn there, and—"

"Oh, no," cried she in sudden horror. But the next moment she checked herself, and said, in a low voice: "Yes, yes, to the inn. Very well."

They had to go against the driving wind now, and, at the slow rate of progression which was the best Astley was capable of, they were so blue and stiff with the cold by the time they got across the bridge, that it was with difficulty they parted their lips to exchange a few melancholy words.

"Now—I'll—leave—you. You can —get along from here," the girl said, as she withdrew her stiffened arm from his when they had reached the opposite bank, and were near the little desolate-looking inn.

"You'd better—come in—too," rejoined Astley, with difficulty forming the words behind his chattering teeth. "There'll be—a fire—Think of it!"

He was trying to speak with humorous joviality, though his half-frozen companion was scarcely aware of the fact. She shook her head, but feebly. Astley tried again.

"Come—you'd better," said he. "You'll be half dead—by the time you get back —anywhere—if—if—"

Something in these words struck the girl, and made her hesitate.

Half dead! Dead! That was a solemn word, and it had a new meaning to her who knew what she had just escaped. She let herself be persuaded. When Astley put a cold, stiff hand on her arm, as if again asking for her support, she silently gave in, and accompanied him up the little path, trembling and wearing a very hang-dog expression.

Before they reached the door it was thrown open, and the landlady, with a hearty warmth of kindness, which sent a glow to both the frozen hearts, hurried them within doors, and busied herself at once in preparations for their restoration.

"Here, Sam, go and tell your master to find some clothes for a gentleman that's fallen in the water!" screamed she, not waiting to hear particulars of the accident. "And, Susan, light a fire in my room, and go and rout out something for the lady. This way, this way, my dear. Oh, you'll catch your death of cold if we don't make haste. How did you do it? Come, this way, this way!"

And the good woman, talking herself so fast that there was no need for either of the guests to find an answer, hurried the shivering girl up the stairs, and into her own bedroom, where she quickly provided her with some clothing to put on while her own was dried downstairs at the kitchen fire.

When the shivering girl had had her circulation restored by a warm bath, and had put on the clothes provided for her by her good-natured hostess, she sat down before the bedroom fire, with her face buried in her hands, and her heart oppressed with fears which were strangely different from the miseries which had brought her to her present plight.

In a short time there came a tap at the door, and on her crying, "Come in," she found herself once more in the presence of Mrs. Benne, who smilingly asked her how she felt, and handed her a cup of tea.

"Oh, I'm all right, thank you, and I don't know what to say to you, or how to thank you for your kindness," said the girl, reddening and holding down her head, as if to hide her face from scrutiny.

"Bless me, that's nothing!" said Mrs. Benne, pulling back the window-curtain a little so that she could get a better look at her guest's face. For, though it was still early, the December day had already begun to draw in towards dusk. "I only hope you've not caught cold. Never shall I forget the turn it gave me to see you both, you and the gentleman, looking that blue and shivering at the door. How did it happen now? Were you blinded by the snow, so that you both walked right into the river before you saw where you were going? Oh, there now, don't mind me!" added the good woman with a little laugh, patting

Deeper Levels, New Hoist, Increased Power, New Mill, More Ore, Greater Earnings
That's the Policy of the

GOLCONDA

CONSOLIDATED GOLD MINES COMPANY

The Golconda made a fortune for its former owners in its surface workings. From 500 feet the shaft will be sunk to 1,200 feet. A new hoisting plant has been ordered. That will carry out the waste rock and the ore. From 20 stamps—the size of the present mill the reduction plant will be increased to 60 stamps. Nine hundred feet of pipe is being added to the 7,000 foot pipe line. This will increase the electric power to 1,000 horse power.

The GOLCONDA produced ore worth $211,000 per ton. That's the Government record.

Suppose you were to invest in the future of this great mine? You would want to know something about it and its neighbors; you would want to know everything about its directorate; you would want to know that your invested capital was safe; you would want to know what it would likely earn from the time dividends will be declared—March, 1903 —and for scores of years thereafter.

A VERY DESIRABLE INVESTMENT

THE McLENNAN PAINT COMPANY

LIMITED

BUFFALO - - - NEW YORK

INCORPORATED UNDER THE LAWS OF CANADA

CAPITAL, - - - $500,000

Dividends on Preferred Stock Paid Quarterly.

For the purposes hereinafter stated, we offer at par,

50,000 of our 7 per cent. Preferred Treasury Stock Shares, $100.00 each

Payments as follows: 20 per cent. on amount of stock subscribed for at time of subscription; 30 per cent. in 60 days balance in 90 days. Receipts will be issued until full amount of stock subscribed is paid, when certificates bearing the Company's seal, and signed by the President, Secretary and Treasurer are issued. The McLennan Paint Co., Limited, have one of the most modern plants of its kind in the world, occupying 300,000 square feet of floor space. The capital of the Company is a half million dollars. The growth of the business has been phenomenally rapid and conservative. In line with other large industries, the Company propose to establish a branch factory in Canada for the manufacture of their products, which are covered by valuable patents, and which practically give the Company a monopoly, and, for the above purpose, offer at par $50,000 of their 7 per cent. Preferred Treasury Stock.

The McLennan Paint Company, Limited, was organized in 1892 by Mr. C. J McLennan of the McLennan Dipping Process, and other valuable paint-making machinery. The Company began business in rented premises, in East Buffalo. So profitable was the business, and so rapid the growth, that large factories were built in North Buffalo in 1895. The business again doubled, and another plant was added in 1898. In 1901 the Company invented and perfected a line of reds, or vermilions, permanent in color, and at much less cost than the old line colors. This increased the sale of their products practically one-fourth, making it necessary for them to build a new Color and Chemical Works. This factory is without doubt the largest and most modern in the world. Mr. Charles J. McLennan, the President of the Company, and the inventor of labor-saving machinery, such as dipping tanks, mills, etc., is recognized as one of the most skillful and best known paint manufacturers in the country. The name and fame of this Company, and its products, are known all over the United States and foreign countries, and that they will capture the Canadian market is evidenced by the fact that many of the large Canadian manufacturers are at present using their goods, in face of the heavy duty. It is with a view to saving this 25 per cent. duty and adding it to to the profits of the Company that they have decided to establish a branch in Canada, which will be controlled and managed by the parent Company.

Practical men of means, character and national reputation constitute the directorate and management. Each department is managed by a skilled man; monthly statements rendered and careful audit made semi-annually. The books are always open to the smallest shareholder. The finances of such a concern are guarded as closely as the finances of any bank, and failure is practically impossible.

COPY OF TESTIMONIALS.

A. C. Cornell, Toronto, Ont.: Columbia National Bank, Buffalo, N. Y., Jan. 23, 1903.

DEAR SIR,—The McLennan Paint Co. are good customers of this bank, and I have known them personally for years. All the officers bear excellent reputations, and are considered good business men. Their management is evidenced by the large business they have built up, as careful and conservative. They have met with great success in the past, and I believe that today, theirs is one of the largest and most prosperous concerns of its kind. I have every reason to believe that the stock which they are now offering for sale is a desirable, as well as a safe investment. Yours very truly,

L. H. GETHOEFER, Cashier.

The Merchants' Refining Co., Refiners of Petroleum, Paraffines, Paraffine Wax, Lubricating Oils, Residuum, Napthas, and Gasoline,

A. C. Cornell, Toronto, Ont.; Buffalo, N. Y., Jan. 23, 1903

DEAR SIR,—Your favor of 21st received, and note you are offering for sale $50,000 of the preferred stock of the McLennan Paint Company and ask me what I know of the firm. Would say I have had business dealings for eight years—transactions of many thousands of dollars. I am also doing business with other houses engaged in the same line, and desire to say there is no house in America to-day that stands higher than the McLennan Paint Co. The growth of their business has been phenomenally large, and under the conservative management of the President, Mr. C. J. McLennan, the success of the business is assured in the future. As an investment, in my judgment, nothing could be safer than the stock they offer.

Very respectfully, C. A. SALISBURY, Manager.

A. C. Cornell, Toronto, Ont.: Buffalo, Jan. 26th, 1903.

Dear Sir,—Referring to the sale of $50,000 of our 7 per cent. Preferred Stock, the Prospectus does not elaborate on the proposition, but merely mentions the amount guaranteed. I desire to inform you, however, we could have paid at least 14 per cent. last year, but carried balance to a Reserve Fund, which, necessarily, makes the stock very valuable.

Very truly yours,
THE McLENNAN PAINT CO., LIMITED,
C. J. McLennan, Manager.

P.S.—Having visited this proposition on behalf of some very conservative investors, I can verify all the above. The plant is extensive and modern in every detail; officers and management skilled and very industrious; all the products superior. This is a Canadian Company, Canadian Charter. Having built in Buffalo, in proximity to raw material, by shipping here in ground state and preparing here, will save and add large duty to already large profits. Bear in mind this is not prospective, but a large, rich, going, paying institution. Prospectus, application forms, and any further particulars, and subscriptions, address the undersigned. All cheques or drafts for stock made to the order of the Company, and forwarded to

A. C. CORNELL, Fiscal Agent,
10 Yonge Street Arcade, Toronto, Ont.

Stocks—THE MARKETS OF THE WORLD—Grain

Canadian Steel and Coal Co.

CAPITAL

10,000 shares 7 per cent. Cumulative Preferred Stock, par value $100 each	$1,000,00 000
50,000 shares Common Stock, par value $100 each, issued and fully paid	$5,000,000 00
Total Capitalization	$6,000,000 00

Issue of $1,000 000 7% Preferred Stock in 10,000 Shares o $100 each at par.

This Stock is preferred both as to Assets and Dividends.

The shares are entitled to cumulative preferred dividends from the net earnings of the Company, at the rate of 7 per cent per annum, payable half-yearly on the first days of April and October. They may, at the option of the holder, be exchanged for common shares. They are subject to be called in, in whole or in part, by the Company, at 15.00 per share, at any time on or after 1st January 1909.

The total issue of Preferred Stock is only $1,000,000.00, the whole of which is now offered.

Subscriptions for 10,000 shares of $100 each of the 7 per cent Preferred Stock of the CANADIAN STEEL AND COAL COMPANY will now be received at par, that is, $100 for each $100 share as follows:—

5 per cent on application.
25 per cent on allotment.
35 per cent 30 days thereafter.
35 per cent 60 days thereafter.

One share of common, par value $100,00, given with each share of preferred.

The whole of the instalments remaining unpaid at any time may be prepaid in full. A discount of one per cent will be allowed upon the par of each share if prepaid at time of allotment.

Notice of allotment will be sent promptly by ordinary letter.

COAL

PROPERTY IN FULL OPERATION

Company owns 9,600 acres of coal property known throughout the coal trade as the New Campbellton Colliery, located on Bras D'Or Bay, County of Victoria, Cape Breton, Nova Scotia. Mine is fully equipped, producing and marketing 100 tons of coal a day at a net profit of $1.00 a ton. Improvements are now being made that will increase the output to over 1,000 tons a day. On present output, figuring 300 working days in year, the net result will more than pay interest on entire issue of preferred, with output of 1,000 tons a day net result will be $300,000 per annum.

IRON

RICHEST ORE IN THE WORLD

Company owns in fee simple, free and clear of all incumbrances, 4,000 acres of iron ore deposit, located at Natashquan (tidewater) situate on North shore of Gulf of St. Lawrence, in the County of Saguenay, province of Quebec.

Deposits contain 20,000,000 tons of ore ABOVE SEA LEVEL ALONE.

Quality of ore is highest ever discovered, running from 69 to 72 per cent. in metallic iron.

More orders for the sale of this ore have been received by the Company than can possibly be accepted, and at a price netting the Company a profit of $2 a ton F. O. B vessels at Company's docks.

Send for prospectus giving full information as to earnings, reports, etc., etc.

REPORT BY EX-SUPERINTENDENT OF MINE

Cecil R. Gold Mining and Milling Co., Los Angeles, California.

Ballarat, Cal., Nov. 1st, 1902.

Gentlemen,—Your request for my opinion as to the "Santa Rosa" group of mines and other claims in which you are interested in this territory, to hand, and in reply will say:

The "Santa Rosa" group, which is located southeast of Ballarat some three and a half miles, consists of twelve claims, equal to 240 acres. The ledge crops out more or less the full length of these claims, showing the same character and formation of work as where development work has been done. In most of the outcroppings it shows highly mineralized rock, with pyrites of iron, mica schist, slate, slate porphyry, gouge, quartz, and quartzite, all bearing more or less. Where work has been done, it shows a very marked improvement in both quantity and quality of gold-bearing rock. Commencing with the surface, the ore shows much iron and copper stain. All mill tests show rich ore commencing with the surface; in fact, I milled for several days and recovered $50 and over per ton, yet the milling process does not pay more than two-thirds of the value of the ore, the tailings ofttimes running as high as $25 per ton, and never less than $12.50. To save the entire value of your ore it will be necessary to install either concentrators or a cyanide plant. From careful study and frequent examination of the surface of the ground, and down as far as has been opened below the surface, I am highly pleased with the property. It is certainly a fine property, and as good as any I have ever had the pleasure of examining. Considering your mill site, with tramway facilities added, water, fuel, and cheapness of mining the ore, the Cecil R. will be capable of paying enormous dividends when your capacity for milling is increased to what it ought to be.

Wishing you every success, I remain, Yours very truly,

(Signed) G. W. FLEMING,
Ex-Mine Supt. Cecil R. Gold Mining and Milling Company.

Price is now 25 cents a share, and we offer [illegible] shares at this price, but it may be advanced by January 1st, 1903, to 30 cents a share.

Market Activity Increasing

It now would appear as if there was a revival of speculation at hand, stocks are again waking up and becoming more active while prices are hardening. Most issues are now selling at exceedingly attractive prices, warranting purchasing. An increase in volume of business at present brings higher prices.

We will be pleased to notate upon request the most desirable issues for immediate purchase.

For an account with us amounting to $100.00, we will purchase and carry for you 25 shares of any active stocks, 2,000 bushels of grain or 100 Bales of cotton; larger amounts, in proportion. We solicit your investment, banking or speculative account. Let us send you for a while, our

"Daily Market Letter."

STOCK MARKETS

KELLOGG PREDICTS A LARGE ADVANCE

New York, Feb. 10—Daniel F. Kellogg, the writer of the Weekly Financial articles appearing each Monday in the New York Sun, takes a decided stand upon the bull side of the market and predicts an advance of considerable importance. Yesterday he said —The belief must be again expressed here as it was last week, that if, as now seems likely, an upward movement of considerable proportion occurs in the price of securities in the coming spring and summer it will centre in the industrial shares and lower priced railway shares. Industrial concerns at present are affording the most brilliant examples of large and increasing profits applicable to dividends. The strongest thing that can be said about them is that their productive capacity is still inadequate too meet the demands of consumption. For some reason or other the industrial concerns do not seem to be harassed by the exactions of the labor unions as the railways have been. An advance in the industrial list might be heralded by an uplift in the steel shares, while such an advance will probably come soon enough in due course of events. Its coming will unquestionably be hastened if the directors of the corporation see fit to proceed at once with the plan of converting $200,000,000 of its preferred stock into bonds as they now have the right to do, under the decision of the New Jersey Court of Appeals and Errors. Mr. Kellog's comments are exceedingly interesting, and we thoroughly coincide with him that we are on the eve of a good advance for both industrials and lower priced railway stocks. We also believe the lower priced stocks will advance also. Very seldom do we have an advance in stock prices, but what the higher priced stocks are close up to the leaders; consequently profitable to purchase. The money question is now all right. It is going begging at from 2 3-4 to 3 per cent., while astute judges of the money market as Russel Sage and others are pressing time upon their clients at 4 per cent. Railway earnings and business offerings are right up to the limit. We fail to see any factor in sight detrimental to market prices.

Summary—Dealings are increasing and market interest growing. Stocks were all up again today. Copper touched 71 while People's Gas rose to 103 3-8. More industrials were traded in freely than for some time past. Leather preferred rose three points and the common was in active demand. Railways were all strong. Mo. P. touched 115 7-8. Most of the issues were bought in considerable quantities and improved generally. Later in the day a reaction due to profit taking accompanied by reports of gold shipments took place. The market is in our opinion, a purchase upon each and every reaction. Money closed 2 1-2. Total sales 750,600.

To-morrow's letter—"Market Interest Increasing."

$20,000,000 blocked out ready for The Hoodlum claim which adjoins the mill in the former. $5,000,000 in the Victor 6 claims on Argus Mountain sight in the latter. All can be mined [illegible] and 6 in Limerick Canyon, all and milled for less than $3 per ton. with big ore veins yet to figure on.

The Greatest Mining Proposition of Modern Times

This company has demonstrated its ability to produce ore at a profit and pay regular monthly dividends under the most adverse circumstances. Only the highest grade could be shipped and cost upwards of $25 per ton. With a mill it can be treated at less than $3 per ton. The company has nearly enough money to pay for the mill, which they promise to have in operation by April 1st, 1903.

WHAT INVESTORS SHOULD KNOW.

Is the management honest and able? Investigate and learn the facts.

A Limited Amount of Stock for Sale.

Present price, $1.00 per share, will soon be advanced again. A 60-ton mill will be in operation at the Arizona mine probably in January and dividends increased. This company will stand the most rigid investigation. Write for prospectus.

GILPIN COUNTY

IS THE OLDEST GOLD PRODUCER IN COLORADO

—In 1902 she produced $4,000,000.00.—
Here is where Hundreds have been made Millionairs.

THE ELECTRIC SPARK GOLD MINING COMPANY

Is in this famous little kingdom, and is surrounded by mines that are making their owners wealthy.

CAPITAL STOCK $200,000 Par Value $1.00

We are working this mine every day doing a great amount of development work which will enable us to commence regular shipping very soon. Our shaft is now 175 feet deep, with a streak of pay ore starting at the grass roots, the vein is over 3 feet wide at the bottom of shaft, and runs from $46.00 to $80.00 per ton, mostly gold. We are only three-quarters of a mile from railroad and have a well traveled wagon road from mine to depot. There are thirteen stamp mills at Black Hawk, three-quarters of a mile from this property. Our company is managed on conservative lines by practical mining men who understand the business and are familiar with this field of gold.

We have placed a small block of this stock on the market at 20 cents per share which will be worth $1.00 in a short time. Now is the time to buy.

The Electric Spark Gold Mining Company,
NEBRASKA TELEPHONE BLDG, OMAHA, NEB.
C. H. J. MITCHELL, Fiscal Agent, Peterborough, Ont.

Thunder Mountain!

is the richest gold producing camp in the United States, and also the largest. The Thunder Mountain district, in central Idaho, is twenty miles wide and forty miles long. In comparison with this we have Cripple Creek, four miles wide and seven miles long. In many of the Thunder Mountain mines ore has already been reached that carries ONE THOUSAND DOLLARS IN GOLD TO THE TON. All of the Thunder Mountain ore is free milling, which means that it can be treated by the cheapest extraction process known—the ordinary stamp mill. It can be both mined and milled at a cost not to exceed $2 a ton. The past years operations in the several working mines have opened up millions of tons of ore that will give a net profit of from $10 to $30 a ton, enabling the respective companies to pay dividends at a rate never before equalled. Such is the showing and the prospect of the

EAST DEWEY GOLD MINING CO.

which unless all indications are at fault, will become the largest producer in the district. The EAST DEWEY mine, which it owns outright, is located directly on Thunder Mountain, just east of the famous "Dewey" mine, which already has $20,000,000 of ore in sight. The surface area of the East Dewey mine is one hundred and twenty acres—six full quartz claims. The company has also secured the big GOLDEN GATE mine, in the Big Creek section of the Thunder Mountain district —which has been so aptly termed "The Pot of Gold"—and is now developing the mine with all possible speed. For a distance of 9,000 feet, nearly two miles, the Golden Gate mines cover a mineralized ledge that is 900 feet wide, with an average height above the tunnel level of 500 feet, thus giving it the largest exposed tonnage of any mine in the west.

If you would share in the enormous profits which these figures indicate and which these developments promise, invest your money in "East Dewey" Stock. It can be bought to-day for 10 Cents a Share. Its par value is $1.

If the East Dewey mines are what they appear to be, and there is absolutely no reason to doubt or question these indications, this stock will eventually be worth at least $10 a share, and to-day you can buy it for ten cents. PRICE ADVANCES TO FIFTEEN CENTS ON FEBRUARY 28th. 5% discount allowed for cash. Stock sold at flat price of 10 cents on deferred payments, 10% with application, and 10% monthly until paid. Full particulars, prospectus, etc., on request.

"THE FRIDAY MINE"

Located at Pearl, Willow Creek, Boise County, Idaho
—About 25 Miles Northwest of Boise City—

THE FRIDAY GOLD MINING CO. is a corporation duly organized under the laws of the State of Oregon, with head office at Sumpter, Oregon, owning and controlling "The Friday Mine." Capital Stock $1,000,000, divided into 1,000,000 shares. Par value $1.00 per share, fully paid and non-assessable, no personal liability. [illegible] shares have been set aside and placed in the treasury of the Company to be sold for the purpose of equipping the "Friday Mine" with machinery. It is for this purpose we are offering you stock in this great mine. This plant will handle [illegible] tons of Friday ore every 24 hours. The general average of the Friday ore is over [illegible] per ton. The ore as it was shipped to the smelters at Salt Lake averaging over [illegible] per ton. The Friday is highly developed, great quantities of ore blocked out and in sight ready for the mill. As soon as the mill is completed the Friday Mine will again pay dividends.

Large ore bodies which will net to the company [illegible], for the first few months, are now blocked out ready for the mill. As soon as the mill is completed you will draw your regular monthly dividend. It is safe, certain and conservative.

We are not soliciting your money for the purpose of developing the mine, but only for the purpose of erecting a mill to work the ore bodies in the mine. The company is officered by men of well known business ability, mining experience and strict integrity.

Hon. Martin H. Jacobs, State Mining Inspector of mines, for the State of Idaho says: "The Friday has a large amount of good ore in sight, and there is no question about its being a good paying property."

Make all your cheques and drafts payable to

Financial Agents, SUMPTER, OREGON
or
R. J. KIDD, Fiscal Agent,
348 George Street, Peterborough.

BUY! WHY?

BECAUSE

THE SOUR LAKE OIL CO.

Has placed four-fifths of its stock in the treasury for development work; and because

Oil is reached in less than half the depth required on Spindletop Heights in Beaumont;

The people in Canada are well acquainted with the management, which is in the hands of HON. JOHN L. BITTINGER, United States Consul General to Canada; F. S. Ashley, Vice-President of the Massachusetts Securities Co., and W L. Marston, Vice-President of the American Union Oil and Refining Co.

These gentlemen have made a dividend payer out of one company and have raised the value of its stock from 5c per share to par value, or 25c, within a very short time;

The company is operating in the Sour Lake field, where fewer wells will tap the oil than at Spindletop; this insures a greater flow of oil, and it is of a better quality;

This is the first allotment of shares at the present price of TEN CENTS PER SHARE; it is the lowest price at which you can buy, and the time left in which to buy at TEN CENTS is short.

Make remittances and inquiries direct to

Colonial Securities Company,
62 Wall Street, New York City.

Order now at ten cents and make monthly payments.

Royal Templar's Social

The members and friends of the Royal Templars had a social in their hall last eve. An interesting program was successfully gone through.

Board Wanted

Good accommodation for one or two lady boarders, or a married couple. near Cordage or Electric Works Apply at Times Bookstore for address.

Watch Lost

LOST—Between Ashburnham, Simcoe street and St. Paul's church, on Monday night, a small gold open-faced watch. Finder will be suitably rewarded by leaving it at Mr. Faint's mill, Ashburnham, or The Times Bookstore.

Bartenders Ball

Don't forget the first Annual Ball of the Bartenders' League, Local Union, No. 285, at the Forester's Hall Simcoe street, on Thursday evening, 12th inst., at 8.30. Tickets, $1 per couple, to be had from members of the Union.

Court Young, Peterborough C.O.F.

All members of the Court Young Peterborough Canadian Order of Foresters are urgently requested to attend the regular meeting to be held this evening at eight o'clock. Many matters of importance will be considered. The Executive committee also meet this evening.

Adjourned Meeting

The adjourned meeting of the Board of Trade will be held in the council chamber to-morrow evening at 8 p.m.

The report of the Sugar Beet Industry committee, etc., will be received, and it is requested that all members be present. Cards to this effect are being circulated to the members by Mr. T. G. Quartermaine, secretary of the Board.

THERE IS A COLD SNAP COMING

but a WARM SNAP in prices at the old reliable firm of PETE SIMONS & CO. will make matters right. He quotes the following red hot prices:

$ 7.00	Overcoats	reduced to	$ 4.00
20.00	Overcoats	reduced to	14.00
4.50	Peajackets	reduced to	2.50
7.00	Peajackets	reduced to	4.50

BEFORE JUDGE WELLER

Frank Murphy Guilty of Assault — Robbery Charge Dismissed

Frank Murphy, who was last week committed by Magistrate Dumble on a charge of assaulting and robbing Wilber Harris, received a hearing before His Honor Judge Weller on Monday. The judge looked upon the case as a drunken brawl. He dismissed the charge of robbery, but found Murphy guilty of the charge of assault. He was allowed to go on suspended sentence.

OBITUARY

Martin Leonard, Resident of Ennismore, Passes Away

On Monday morning, Martin Leonard, a prominent resident of the township of Ennismore, passed away at the age of 62 years. The deceased had only been ill a week and his demise was caused by heart failure. He was a school trustee and member of the township council.

The funeral will take place this morning at 9 o'clock. Much sympathy will be felt for his wife and two daughters who are left to mourn his loss.

TO PAINT BARNS RED

A. F. MacLaren, M.P., is strongly in favor of a movement to paint the barns of the Province of Ontario. This he thinks, should go hand in hand with the good roads movement and agricultural education. Anyone who travels through certain rural sections of New York, Pennsylvania, and Wisconsin where every barn and outhouse is painted, realizes what an enormous improvement it would make in the Canadian landscape if it were the general practice with our farmers. In winter time, especially, the presence of gray, bleak-looking buildings crowning every knoll is particularly depressing. The cost of paint has been materially lowered by the growth of the cement industry, and the introduction of cheap cement paints, while the novel process of squirting paint on with a hose has practically eliminated the cost of labor. There is no reason why in a few years' time the whole aspect of rural Ontario should not be changed.

SOCIAL AND PERSONAL

—Mrs. Boswell, from Vancouver, is in town.

—Miss Jessie Miller is visiting with friends in Toronto.

—Mr. S. W. Tripp, of Picton, was in town yesterday.

—Mr. William Fair, father of Mr. Robert Fair, was in town yesterday.

—Mrs. R. P. Weir, of Ashburnham, has gone to Toronto to take part in the golden wedding of her parents, Mr. and Mrs. J. H. Mowry.

LITTLE LOCAL LINES

—The Charlotte street choir will have no rehearsal this week.

—A good assortment of fancy and comic valentines now on sale at Times Bookstore.

—Messrs Turk and Karby will address a mass meeting for boys to be held at the Y.M.C.A. at 4 p.m.

—To-day is market day. There is very little wood coming into town this week, owing, no doubt, to the bad roads.

—The "Elite" writing pad containing 100 sheets of best quality foreign which we are selling at 10 cents has no equal in value.—Times Bookstore.

—A meeting of the White Rose Degree of the Sons of England took place in the society's hall last evening.

—The funeral of the late Robt. Tice who died at Nichols hospital on Monday, will take place this morning, at 10 o'clock, to Little Lake cemetery.

ALL SAINTS' ENTERTAINMENT.

Under Auspices of The Senior Girls Guild a Decided Success

The entertainment at All Saints' Sunday school last night, under the auspices of the Senior Girls' Guild, was a phenomenal success. As an introduction, Miss Ida Mulholland gave a piano solo entitled "The Gipsey's Revel," in her usual clever manner, which was well received. Then Peterborough's great entertainer, Mr. Joseph Halpanny, was called upon, when he gave a humorous song, and for an encore sang "Sunday Afternoon. His songs and character sketches throughout in his own inimitable manner brought down the house. One of the most pleasing features of the evening was a recitation by Miss McCrae, who displays wonderful ability in that line. A vocal solo by Miss White was sweetly rendered. Little Pearl Haskill, for her years, did well in a piano solo. Mr. Walter Hooper's recitation of "Mothers Fool" and other pieces was rapturously received. Miss Mary Rush, in a vocal solo, sustained her well known reputation and received well merited applause. Little Geraldine Hooper's recitation was cute and clever. The accompaniments of Mrs. Glanville, Mrs. Halpanny and Miss Lillie Rush were quite artistic The oyster supper was a splendid menu and well served, during which many selections were rendered on the piano and by the graphaphone. The whole was presided over by the Rector with grace and dignity, who did much to make it one of the most successful concerts of the season.

MUSIC AND DRAMA

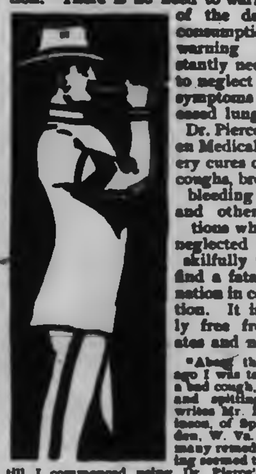
"EL CAPITAN"

"El Capitan," the greatest comic opera by John Philip Sousa, the libretto being by Charles Klein, and as produced by the Grau Opera company, is the operatic sensation of the season. It affords Mr. West the best opportunities of his successful career, permitting him to exploit his pronounced talents as a vocalist and as a legitimate comedian, as well as his merry grotesques the public has always known.

"El Capitan" is Peruvian, which gives great scope for splendor on the scenic environments, and for gorgeous costuming. The music is written in Sousa's characteristic vein, and the March King's annual contribution to the dance music of the world will be found in the tuneful "El Capitan" march. Presented by the strongest company ever organized to represent this welcome addition to all American comic operas, which will appear for the first time in the city at Bradburn's Opera House, Monday, Feb. 16— Plan open at 10 a.m. Thursday at Ormond & Walsh's.

THE BUGLER'S CHEST

is well expanded. He uses his lungs to their fullest capacity. People in ordinary do not use much over half their lung power. The unused lung surface becomes inert, and offers a prepared ground for the attack of the germs of consumption. There is no need to warn people of the danger of consumption, but warning is constantly needed not to neglect the first symptoms of diseased lungs.



Dr. Pierce's Golden Medical Discovery cures obstinate coughs, bronchitis, bleeding lungs, and other conditions which, if neglected or unskilfully treated, find a fatal termination in consumption. It is entirely free from opiates and narcotics.

"About three years ago I was taken with a bad cough, vomiting and spitting blood," writes Mr. D. J. Robinson, of Spring Garden, W. Va. "I tried many remedies; nothing seemed to help me till I commenced using Dr. Pierce's Golden Medical Discovery. After using ten bottles and four vials of his 'Pleasant Pellets,' I commenced to improve. My case seemed to be almost a hopeless one. Doctors pronounced it ulcer of the lungs. I was sick nearly two years—part of the time bedfast. Was given up to die by all. I thought it would be impossible for me to live over night at one time. I haven't spit any blood now for more than twelve months, and worked on the farm all last summer. It was Dr. Pierce's medicines that cured me."

Accept no substitute for "Golden Medical Discovery." There is nothing "just as good" for diseases of the stomach.

The "Medical Adviser," in paper covers, is sent *free* on receipt of 31 one-cent stamps to pay customs and mailing *only*. Address Dr. R. V. Pierce, Buffalo, N. Y.

Subjects of Thought.

From "Waverley Magazine."

While we gladly accord honor to the courage of active heroism, let us not forget also to reverence the courage of patient endurance, the courage of absolute sincerity, the courage of devotion to principle. He who possesses these is indeed a brave man, though no one may recognize it and he himself be unconscious of it.

The hope that inspires effort is always a blessing. Not only does it strengthen the human faculties and improve the character; it also makes rapid advancement in its own line, even when failing to reach its far-off goal.

The heart is always hungry. No man lives happily alone. The wisest and the best is wiser and better for the friends he has.

Generosity, to deserve the name, comprises the desire and the effort to benefit others, without reference to self.

It is poor policy to take advantage of other people because you have never had any advantage of your own.

What men want is not talent, it is purpose; in other words, not the power to achieve, but the will to labor.

It is a maxim that those to whom everybody allows the second place have an undoubted right to the first.

The world's greatest men and best reformers were light weight when weighed in the scales of bigotry.

Messrs. Turk and Kerby, the evangelists, will address a mass meeting for boys to be held in Association hall to-day at four o'clock. All boys over twelve are invited.

Court Young, Peterborough, C. O. F.

A regular meeting of Court Young Peterborough was held in the Foresters' hall last evening. Many matters of importance were considered. The Executive committee also met last evening.

Bartenders Ball

Don't forget the first Annual Ball of the Bartenders' League, Local Union, No. 298, at the Forester's Hall Simcoe street, on Thursday evening, 12th inst., at 8.30. Tickets, $1 per couple, to be had from members of the Union.

This Has a Local Application

The following, from the Whitby Chronicle, will furnish food for reflection in view of the amount of sewerage emptied into the Otonabee river above the town: Messrs. Sleep and Brant, two farmers of Whitby, mysteriously lost some cattle two years ago by a disease which was pronounced anthrax. They entered action against the town of Whitby and the Ontario Ladies' College, both of whom were emptying sewage into a stream which flowed on their farms. The case has been compromised out of court by the payment of $105 to Mr. Sleep, $110 to Mr. Brant and $125 costs, the college and town both agreeing to filter their sewerage by modern methods.

LITTLE LOCAL LINES

County Police Magistrate Edmison will go to Havelock to-day to hold a session of the County police court.

—The visit of the Boston Ladies' Symphony Orchestra has been cancelled owing to a date not being obtainable.

—The 59th Stormont and Glengarry Regiment is to receive a new outfit complete, including Oliver equipment and Lee-Enfield rifles.

—The adjourned meeting of the Board of Trade will be held this evening to consider the establishing of a beet factory and other important business. A full attendance of members is requested.

—Lindsay Post:—The fame of the Lindsay Local Minstrels has gone abroad. The manager of the company received a request from an organization in Peterborough, asking for a date for that town in the near future.

7.00 Peajackets reduced to 4.50

T.A.S. WIN THE DISTRICT

By Defeating Lakefield Last Night on Lindsay Ice

The T.A.S. hockey team defeated Lakefield last night at Lindsay by a score of 5 to 2, in the final game to decide the winners of this district of the T.V.L. Both teams, being a tie, were ordered to play off at Lindsay. The half time score was 2—2.

The ice was in poor condition and made good hockey and combination almost impossible, and in some places the player's skates sank through to the boards. There was considerable water on the ice when the teams lined up in the first half, but in the last half the ice appeared to be in better condition. For the T.A.S. Lynch, on the forward line, played a strong game, and Crowley, at cover point, did very effective work, while Lakefield always found Bill Meagher in his place ready to take care of anything that was coming his way. Lakefield put up a stubborn fight through out the game.

About 150 people accompanied the T.A.S., and about 80 with the Lakefield team on special trains.

Mr. Ernie Wasson officiated as referee, and was entirely satisfactory to both teams. Mr. Breen and Mr. Vanderwater were goal umpires.

NOTES.

Father Casey, of Lindsay, was an interested spectator.

A peculiar accident happened while the game was in progress. An enthusiastic spectator had to call upon the referee to pick up his false teeth, which had fallen from his mouth to the ice.

Will Peterborough have a championship?

It is up to the T.A.S.
Here's luck.

SOCIAL AND PERSONAL

—The many friends of Mrs. G. Payne will be glad to hear that she is recovering from a severe illness.

—Messrs. R. P. and A. G. Gough, of Toronto, are in town attending the closing days of stock-taking in their Peterborough establishment.

—Miss May O'Brian, of Millbrook, who has been staying in town during the past week or two with Mrs. McKee, Rubidge street, returns to Millbrook.

CIRCUIT FORMED

Big Race Meet to be Held in Peterborough in August

Mr. Arthur Rountree, secretary of the Peterborough Turf Club, arrived from Belleville on Tuesday night, where he had been attending a meeting of representatives of the Turf Clubs of Napanee, Kingston, Belleville, and Peterborough. The turf men of these towns succeeded in forming a circuit, and a grand meet will be held here in the first week of August, in Belleville the second week, Kingston the third week, and Napanee the forth week of the same month.

BOARD OF HEALTH.

MEETING HELD YESTERDAY MORNING

Dr. Bingham Asks an Increase in Salary on Account of Extra Work.

A meeting of the Board of Health was held this morning in the Town Clerk's office. There were present Mr. Robert Neill, chairman, and Messrs. A. Parker, W. Eyres, Mayor Rogar, Chief Rossel, Sanitary Inspector, and Dr. Bingham, Medical Health Officer, Dr. Burnham, and Dr. McNulty.

The minutes of the last meeting were read and confirmed.

Dr. Bingham said that he had disinfected four houses yesterday, and produced the apparatus which he had used. In view of these extra duties Dr. Bingham presented an application in which he asked for an increase of salary of $100, as these extra duties took up all his time.

On motion of Mr. Parker, seconded by Mr. Eyres, it was resolved that Dr Bingham's application would be considered.

The secretary, Mr. S. R. Armstrong, read a communication from Dr. Bryce, of the Provincial Health Board, relating to the samples of water sent up to him for analization. He suggested that a map of the town be sent with each sample, and the place where the water was taken from marked on the map.

On motion it was resolved that this be done.

Chief Rossel related to the Board how, according to instructions, he had hired a horse and rig, and a boy to drive, and had visited the homes where children were reported to be absent from school, but he said he had not seen half the number of the absentees from school.

Mr. R. Neill thought it would be a good thing to continue visiting for a few days, and then as the ground would be fairly covered, stringency could be decidedly lessened.

Mayor Rogar said that he thought it would save both the Chief and the teachers a great deal of trouble by examining the absentees only once a week.

The chairman thought that it would not be sufficient to report the absentees only once a week — he suggested that they should report on Mondays and Fridays for the next three or four weeks.

Mr. R. Neill said that the Medical Health Officer should accompany the Chief of Police on his inspection tours.

Mr. Eyres thought that in the teacher's report that official ought to mention any person whom he thought had contagious disease.

On motion of Mayor Rogar seconded by Dr. Burnham, it was resolved that on Friday the teachers of the different schools should report the absentees for that day.

Dr. Bingham said that in Dr. Bryce's analyzation report of the well water of the Lake street school, he had condemned it, and as yet the well had not been closed.

On motion of Mayor Rogar, seconded by Mr. Parker it was resolved that the secretary be requested to communicate with the Separate School Board and request them to close the well.

The Board then adjourned. The next meeting will take place on Monday next.

—A good assortment of fancy and comic valentines now on sale at Times Bookstore.

"I thank Dr. Pierce for the kind advice he gave when I wrote to him."

"I am thankful to the friend who first recommended your medicine," writes Mrs. Annie M. Brook, of Smithfield, Fayette Co., Pa. "We have a twelve pound baby, three weeks old. I took three bottles of 'Favorite Prescription' before baby came, and the time was only one hour and a half. Have had five children, and before this always had a severe time, lasting two or three days, and never was able to do any work for about two months afterward. Now I am doing all the work for four children. My friends say I look better now than ever before. We told one of my sisters to take 'Favorite Prescription,' which she did, and when her child was born the time of suffering was very short. She has better health now than since her marriage, some years ago. We cannot praise Dr. Pierce's medicines enough. I thank Dr. Pierce for the kind advice he gave when I wrote to him. Whenever I see other women suffering I tell them about your wonderful medicines."

The benefits resulting from a consultation by letter with Dr. Pierce are testified to by thousands of grateful women who have been made new women by his medical advice and fatherly counsel given absolutely without cost or fee.

Sick and ailing women, especially those suffering from chronic diseases, are invited to consult Dr. Pierce, by letter, *free*. All correspondence is held as strictly private and sacredly confidential. Address Dr. R. V. Pierce, Buffalo, N. Y.

Dr. Pierce's Favorite Prescription is the best medicine for the cure of womanly ills. It establishes regularity, dries weakening drains, heals inflammation and ulceration and cures female weakness. It is the best preparative for maternity, giving the mother strength to give her child, and making the baby's advent practically painless.

Dr. Pierce's Favorite Prescription contains no alcohol and is entirely free from opium, cocaine and all other narcotics.

The Common Sense Medical Adviser, 1008 pages, in paper covers, is sent *free* on receipt of 31 one-cent stamps to pay expense of customs and mailing *only*. Address Dr. R. V. Pierce, Buffalo, N. Y.

EVANGELISTIC SERVICES

Messrs Turk and Kerby Attract Large Congregation

The Union Services are Proving Very Successful—Sermon and Song an Effective Combination

Another large congregation assembled at St. Paul's church last evening to greet Evangelists Turk and Kerby in their noble work. There was again a representative gathering of pastors to lend their help.

The service, as on previous evenings, opened with fifteen minutes of song service. Mr. Kerby then gave a Scripture reading, which was accompanied by an interesting dissertation, following which the two evangelists sang a duett.

The sermon last evening was preached by Rev. Mr. Turk. His subject was "Reconciliation," and he selected a text from 2nd Corinthians, 5 and 18 verses.

The speaker said it was the privilege of every citizen to know something of the constitution by which he is governed. That without such knowledge he cannot discharge the duties of citizenship. If as is generally believed, there is a Supreme Being, it is the duty of man to know Him. I, as an intelligent man, the speaker said, want to know how God feels towards me, and how I ought to feel towards God. If God is good, then I ought to love him and obey him. The chief word of the text tonight is "Reconciliation," which is a beautiful word in itself; but at the same time is darkly suggestive. The Bible tells us that there is an estrangement between God and man. Not a distance, but a difference; and the main object of the Bible is to show how God and man can be reconciled.

We don't have to go to the Bible to find out this truth. The fact is that man needs to be reconciled with himself. He is out of harmony with himself. You take the lower animals: If you supply their needs and give them their liberty, they are apparently content and happy. But man is different. Let him roam over every land, and traverse every sea. Build him a palace and fill it with art. Write his name high in history —he is not content. This is but a tribute to the truth of the Bible, and leads up to the thought of the text, that man by nature is out of harmony with God. The carnal mind is enmity with God; for it is not subject to the law of God, neither indeed can be.

A little thought will show us that there is not one of God's laws but that men are opposed to. Take the covetous man: he objects to the law "Thou shalt not covet." The man that wants what does not belong to him is very much opposed to the law "Thou shalt not steal." The sensual man objects to the law "Thou shalt not commit adultery." Whilst the young man who wants to live a fast life refuses to accept the law of God which says: If a man soweth to the flesh he shall of the flesh reap corruption.

The whole truth, continued the speaker, lies in this fact: that God as the Ruler of this world has laws which must be obeyed, or man must suffer the penalty. Man has broken God's laws, and the extreme penalty of the violation is death—which means separation from God.

This Scripture to-night tells of reconciliation, and the wonder is that God, who is the offended one, should have made the reconciliations possible. And yet in earthly relations the stronger must help the weaker.

Concluding, the Evangelist said, the person through whom the Bible reconciliation is effected is Jesus, the Christ. Every barrier between God and men was removed by him. He had heard ministers exhort men to make their peace with God, but that is needless, for the Bible tells us that Jesus is our peace. Men will go on having hard thoughts about God, but all the time God feels kindly towards man through Jesus Christ, and is trying to get man to trust Him, and to love Him, and to obey Him. If he were asked to decribe in a word how a man is going to be saved, he would say: Submit to God.

After the singing by the evangelists of another duett, the service was brought to a close.

Canadian Steel and Coal Co.

CAPITAL

10,000 shares 7 per cent. Cumulative Preferred Stock, par value $100 each	$1,000,00 000
50,000 shares Common Stock, par value $100 each, issued and fully paid	$5,000,000 00
Total Capitalization	$6,000,000 00

Issue of $1,000 000 7% Preferred Stock in 10,000 Shares o $100 each at par.

This Stock is preferred both as to Assets and Dividends.

The shares are entitled to cumulative preferred dividends from the net earnings of the Company, at the rate of 7 per cent per annum, payable half-yearly on the first days of April and October. They may, at the option of the holder, be exchanged for common shares. They are subject to be called in, in whole or in part, by the Company, at 15.00 per share, at any time on or after 1st January 1909.

The total issue of Preferred Stock is only $1,000,000.00, the whole of which is now offered.

Subscriptions for 10,000 shares of $100 each of the 7 per cent Preferred Stock of the CANADIAN STEEL AND COAL COMPANY will now be received at par, that is, $100 for each $100 share as follows:—

5 per cent on application.
25 per cent on allotment.
35 per cent 30 days thereafter.
35 per cent 60 days thereafter.

One share of common, par value $100.00, given with each share of preferred.

The whole of the instalments remaining unpaid at any time may be prepaid in full. A discount of one per cent will be allowed upon the par of each share if prepaid at time of allotment.

Notice of allotment will be sent promptly by ordinary letter.

COAL

PROPERTY IN FULL OPERATION

Company owns 9,600 acres of coal property known throughout the coal trade as the New Campbellton Colliery, located on Bras D'Or Bay, County of Victoria, Cape Breton, Nova Scotia. Mine is fully equipped, producing and marketing 100 tons of coal a day at a net profit of $1.00 a ton. Improvements are now being made that will increase the output to over 1,000 tons a day. On present output, figuring 300 working days in year, the net result will more than pay interest on entire issue of preferred, with output of 1,000 tons a day net result will be $300,000 per annum.

IRON

RICHEST ORE IN THE WORLD

Company owns in fee simple, free and clear of all incumbrances, 4,000 acres of iron ore deposit, located at Natashquan (tidewater) situate on North shore of Gulf of St. Lawrence, in the County of Saguenay, province of Quebec.

Deposits contain 20,000,000 tons of ore ABOVE SEA LEVEL ALONE.

Quality of ore is highest ever discovered, running from 69 to 72 per cent. in metallic iron.

More orders for the sale of this ore have been received by the Company than can possibly be accepted, and at a price netting the Company a profit of $2 a ton F. O. B. vessels at Company's docks.

Send for prospectus giving full information as to earnings, reports, etc., etc.

REPORT BY EX-SUPERINTENDENT OF MINE

Cecil R. Gold Mining and Milling Co., Los Angeles, California.

Ballarat, Cal., Nov. 1st, 1902.

Gentlemen,—Your request for my opinion as to the "Santa Rosa" group of mines, and other claims in which you are interested in this territory, to hand, and in reply will say:

The "Santa Rosa" group, which is located southeast of Ballarat some three and a half miles, consists of twelve claims, equal to 240 acres. The ledge crops out more or less the full length of these claims, showing the same character and formation of work as where development work has been done. In most of the outcroppings it shows highly mineralized rock, with pyrites of iron, mica schist, slate, slate porphyry, gouge, quartz and quartzite, all bearing more or less. Where work has been done, it shows a very marked improvement in both quantity and quality of gold-bearing rock. Commencing with the surface, the ore shows much iron and copper stain. All mill tests show rich ore commencing with the surface; in fact, I milled for several days and recovered $50 and over per ton, yet the milling process does not pay more than two-thirds of the value of the ore, the tailings oftentimes running as high as $35 per ton, and never less than $12.50. To save the entire value of your ore it will be necessary to install either concentrators or a cyanide plant. From careful study and frequent examination of the surface of the ground, and down as far as has been opened below the surface, I am highly pleased with the property. It is certainly a fine property, and as good as any I have ever had the pleasure of examining. Considering your mill site, with tramway facilities added, water, fuel, and cheapness of mining the ore, the Cecil R. will be capable of paying enormous dividends when your capacity for milling is increased to what it ought to be.

Wishing you every success, I remain, Yours very truly,

(Signed) G. W. FLEMING,
Ex-Mine Supt. Cecil R. Gold Mining and Milling Company.

Price is now [illegible] cents a share, and we offer [illegible] shares at this price, but it may be advanced by January 1st, 1903, to [illegible] cents a share.

STOCK MARKETS

MARKET INTEREST INCREASING

New York, Feb. 11—Slowly but surely the general market interest is emerging from its period of inertia and lack of interest. Wire and local commission houses report an increase in outside orders, and a manifest tendency on the part of their many clients who have for some time past been inactive to again become interested. The general drift of the slow speculative revival leans with considerable favor towards the lower priced issues, also the industrial issues. The cliques in the standard and higher priced shares show a willingness to encourage a speculative upward movement by the advancing of the various specialties. Most every market movement at its conception is given its first start or momentum by the manipulators of the markets. This is most always the case if conditions be right. Outside support is always attracted by increasing activity and advancing prices. If conditions be wrong the movement usually collapses and falls of its own weight. Conditions at present are however, of the very best, and there is every reason to anticipate and believe that the present slowly growing demonstration will succeed in attracting outside interest. It will certainly do so. Should a month hence indicate that the current large industrial and railway earnings are not to be materially diminished by the higher cost exacted for the conduct of business there will probably be no complaint about the smallness of the market interest. We expect that public interest will run high, and that the advance in freight rates now being put steadily into effect will more than counterbalance in net earnings the results of higher wages. Europe is just waking up to the scarcity of cotton, and is now buying outright and left at immensely good prices. Wheat and corn are commanding excellent prices and are in heavy demand for export. Stimulated export demand at goodly prices for these three great American staples means untold good things for American industrial activity and for future prices of American securities.

Summary—Today's market was strong and the upward movement in leather issues still continued, apparently fostered by keen brokers. These stocks will go higher. Eries were a feature specially the second preferred, which advanced two points, they were largely dealt in. Variations in balance of list were unimportant. Prices were firm. Smelters advanced still further despite the suit relative to taxes and looks like going higher. The market looks unusually good to buy into at present. Money closed 2 3-4. Sales 476,500

No letter to-morrow—holiday.

HAIGHT & FREESE.

JILTED MAN TAKES LIFE

Commits Suicide on the Night He Was to Have Been Married

Butte, Mont., Feb. 10—William Winters, one of the most prominent men in Butte, and former county auditor, shot himself through the head with a revolver last night, dying instantly. It is said Winter's fiancee broke their engagement, and this, it is believed, led to his suicide.

On a table within a foot of the corpse were many wedding presents. The ceremony was to have been performed last night.

ENTIRELY OUT OF THE ORDINARY

Yet one of the ways that LEAD TO FORTUNE

Why not make a small investment in oil lands right ahead of good producing wells, some having wells producing oil on adjoining leases? The oil now brings $1.50 per barrel, bought by the Standard Oil Co., without any transportation charges, and is bound to go higher; a few hundred dollars often invested in property of this kind yields thousands of dollars profit. I personally know of parties who made over [illegible] in 60 days time on an investment of this kind; also have wells making from 10 to 200 barrels a day. Parties desiring to organize a company will do well to investigate this opportunity, getting thereby the advantage of years of experience, and if you don't want to drill the wells wait until the wells drilling close to you have come in and reap the benefit of their outlay. The oil business conducted on business principles, with honest management, is bound to succeed. You do not have to look farther than the Standard Oil Co. to see what honest management founded on facts will produce, they have drawn very heavily on stocks the past three years and there is not enough of this grade of oil now above ground to run the country for more than two years, so you can readily see the profits that will be realized by securing now and obtaining the big price the Standard Oil Co. will be compelled to pay for crude oil to supply the demands of the country. For particulars write THE RANGER CO., MARIETTA, OHIO.

INTERNATIONAL ELECTRIC MINING Co

185 SUMMER ST., - BOSTON, MASS.

A Dividend Payer for the Past Five Years.

12 PER CENT GUARANTEED

Capital Stock, $500,000. Par, $1.00, full paid and non-assessable

Over eight thousand tons of $50.00 ore mined and smelted from this group of mines.

A limited number of shares of the stock of this Company now offered at seventy-five cents per share. This price will shortly be increased to par. Stock registered by the International Trust Company, Boston, who is also the transfer agent.

This Company has a small capital stock.

The International Electric Mining Company owns seven mines and milling plant.

The Brooklyn and New York mines of this Company lie north of and join the Victor and the Hoodlum—two rich mines that are now being worked by California parties. On the west lies the Electric Mining Company's mines. In these mines are millions of dollars' worth of rich ore in sight. On the south, adjoining the Berlin mine of this Company, is the Montazuma and Clipper. From the Montazuma over three million dollars has been taken within 80 feet of the grass roots.

This Company owns free and clear seven mines of twenty acres each, all containing rich ore, located in the Arabia and Trinity mining districts, Humboldt County, Nevada. The Company has worked these mines for the past five years, and is now driving a tunnel to cut out a rich ledge about 300 feet from the surface. The Arabia mining district, in which these mines are located, is a lively district—a great many men being employed there. The tunnel now being driven on the Brooklyn mine has about 350 feet already completed. When the tunnel cuts the main ledge, which has just been reached by the Victor tunnel about 600 feet, the Brooklyn will have about 300 feet stoping ground, which runs high in gold and silver, over $60.00 per ton.

The Company is offering for a short time a limited amount of stock for the enlargement of its plant and the working force at the mines and for the completion of the Brooklyn tunnel.

This Company has thousands of tons of rich ore in sight.

We are not making a lot of talk, because it is unnecessary. What the investor wants is dividends, which we have paid for the past five years. Now if you want a safe 12 per cent. investment, let us hear from you.

THE OLD COMSTOCK

A California mining paper has this to say: "Nevada, that grand old stamping ground of mushroom millionaires, who plucked enough wealth from her prolific fields to build mansions, banks, and big hotels in San Francisco, and palaces in Paris and London, is again astonishing the world by making more millionaires and by yielding millions in gold and silver from a new field which rivals the old Comstock lode in the days of its pristine splendor. Not only in Tonopah and Arabia districts, where within the past year nearly ten millions have been exposed, are operations active, but in every mining district in the Silver State are operations active, and Nevada will once more take her place among the big producers, the peer of any of them."

Daily Nevada State Journal, January 4, 1903.

Lovelock, Nev., October 6, 1902.

International Electric Mining Co.,
Boston, Mass.

Gentlemen,—If you wish to sell your Brooklyn mine I can get you a good price for it. If it was mine I would not sell it at any price, as you have more than a million dollars of ore in sight.

G. W. OSTRANDER, Supt.

Boston, Mass., December 1, 1902.

Mr. Geo. D. Burton, Treas.,
International Electric Mining Co.,
Boston, Mass.

Dear Sir,—During the six months of October and November of this year I visited the mines of the International Electric Mining Company, situated in Arabia and Trinity mining districts, Humboldt County, Nevada. I found the country remarkably mineralized; in fact, the possibilities of the country as a mineral producing country are yet unknown. For years it certainly has produced well. The work now being done in the Arabia and Trinity districts establishes the fact that they are fine producers.

I also found that there is a great deal of interest being taken in these properties, which have produced a great deal of wealth the past quarter of a century.

M. A. LATHROP, Mining Engineer.

GILPIN COUNTY

IS THE OLDEST GOLD PRODUCER IN COLORADO

—In 1902 she produced $4,000,000.00.—
Here is where Hundreds have been made Millionairs.

THE ELECTRIC SPARK GOLD MINING COMPANY

Is in this famous little kingdom, and is surrounded by mines that are making their owners wealthy.

CAPITAL STOCK $200,000 Par Value $1.00

We are working this mine every day doing a great amount of development work which will enable us to commence regular shipping very soon. Our shaft is now 175 feet deep, with a streak of pay ore starting at the grass roots, the vein is over 3 feet wide at the bottom of shaft, and runs from $48.00 to $80.00 per ton, mostly gold. We are only three-quarters of a mile from railroad and have a well traveled wagon road from mine to depot. There are thirteen stamp mills at Black Hawk, three-quarters of a mile from this property. Our company is managed on conservative lines by practical mining men who understand the business and are familiar with this field of gold.

We have placed a small block of this stock on the market at 30 cents per share which will be worth $1.00 in a short time. Now is the time to buy.

The Electric Spark Gold Mining Company,
NEBRASKA TELEPHONE BLDG, OMAHA, NEB.
C. H. J. MITCHELL, Fiscal Agent, Peterborough, Ont.

"THE FRIDAY MINE"

Located at Pearl, Willow Creek, Boise County, Idaho

About 25 Miles Northwest of Boise City

THE FRIDAY GOLD MINING CO. is a corporation duly organized under the laws of the State of Oregon, with head office at Sumpter, Oregon, owning and controlling "The Friday Mine." Capital Stock $1,000,000, divided into 1,000,000 shares. Par value $1.00 per share, fully paid and non-assessable, no personal liability. 250,000 shares have been set aside and placed in the treasury of the Company to be sold for the purpose of equipping the "Friday Mine" with machinery. It is for this purpose we are offering you stock in this great mine. This plant will handle 60 tons of Friday ore every 24 hours. The general average of the Friday ore is over $30 per ton. The ore as it was shipped to the smelters at Salt Lake averaging over $85.00 per ton. The Friday is highly developed, great quantities of ore blocked out and in sight ready for the mill. As soon as the mill is completed the Friday Mine will again pay dividends.

Large ore bodies which will net to the company $80,000, for the first few months, are now blocked out ready for the mill. As soon as the mill is completed you will draw your regular monthly dividend. It is safe, certain and conservative.

We are not soliciting your money for the purpose of developing the mine, but only for the purpose of erecting a mill to work the ore bodies in the mine. The company is officered by men of well known business ability, mining experience and strict integrity.

Hon. Martin H. Jacobs, State Mining Inspector of mines, for the State of Idaho, says: "The Friday has a large amount of good ore in sight, and there is no question about its being a good paying property."

Make all your cheques and drafts payable to

NEIL J. SORENSEN,
Financial Agents, SUMPTER, OREGON
or
R. J. KIDD, Fiscal Agent,
348 George Street, Peterborough.

Thunder Mountain!

is the richest gold producing camp in the United States, and also the largest. The Thunder Mountain district, in central Idaho, is twenty miles wide and forty miles long. In comparison with this we have Cripple Creek, four miles wide and seven miles long. In many of the Thunder Mountain mines ore has already been reached that carries ONE THOUSAND DOLLARS IN GOLD TO THE TON. All of the Thunder Mountain ore is free milling, which means that it can be treated by the cheapest extraction process known—the ordinary stamp mill. It can be both mined and milled at a cost not to exceed $2 a ton. The past years operations in the several working mines have opened up millions of tons of ore that will give a net profit of from $10 to $30 a ton, enabling the respective companies to pay dividends at a rate never before equalled. Such is the showing and the prospect of the

EAST DEWEY GOLD MINING CO.

which unless all indications are at fault, will become the largest producer in the district. The EAST DEWEY mine, which it owns outright, is located directly on Thunder Mountain, just east of the famous "Dewey" mine, which already has $20,000,000 of ore in sight. The surface area of the East Dewey mine is one hundred and twenty acres—six full quartz claims. The company has also secured the big GOLDEN GATE mine, in the Big Creek section of the Thunder Mountain district—which has been so aptly termed "The Pot of Gold"—and is now developing the mine with all possible speed. For a distance of 9,000 feet, nearly two miles, the Golden Gate mines cover a mineralized ledge that is 900 feet wide, with an average height above the tunnel level of 500 feet, thus giving it the largest exposed tonnage of any mine in the west.

If you would share in the enormous profits which these figures indicate and which these developments promise, invest your money in "East Dewey" Stock. It can be bought to-day for 10 Cents a Share. Its par value is $1.

If the East Dewey mines are what they appear to be, and there is absolutely no reason to doubt or question these indications, this stock will eventually be worth at least $10 a share, and to-day you can buy it for ten cents. PRICE ADVANCES TO FIFTEEN CENTS ON FEBRUARY 28th. 5% discount allowed for cash. Stock sold at flat price of 10 cents on deferred payments, 10% with application, and 10% monthly until paid. Full particulars, prospectus, etc., on request.

PETERBOROUGH, FEB. 9, 1903.

NAVIES AS INSURANCE

If big armies and big navies prevent war they are worth all they cost, and they are valuable in some ways even if they don't prevent war. A correspondent of the London Times makes an interesting calculation of the cost of the maintenance of the British navy, in connection with the merchant marine, as so much insurance. The navy insures the safety of the Empire's trade, and on that account has a commercial value. The yearly cost of the navy, including the naval expenditures of India, Australia and other colonies, is $170,160,000, the tonnage of the mercantile marine is $10,908,487 tons, and the value of over-sea trade is yearly $6,783,722,755. On the basis of these facts it is figured out that the naval expenditure is 2 1-2 per cent. of the yearly trade—a small "insurance premium" compared with what some countries pay. Russia, it is calculated, pays 12 1-2 per cent., France, 4.2 per cent., Italy 5.9 per cent., Germany 1.8 per cent. the United States 3.3 per cent. and Japan 6.2 per cent. What annoys the Times' correspondent is that, while India and the colonies do not take their share of the naval expenditure, the United Kingdom protects their shipping. They get their "insurance" for next to nothing, while the United Kingdom foots the bill, really paying 3.6 per cent. India pays but .2 per cent, Australia .14 per cent., and the other colonies .08 per cent.

According to this calculation the United States is getting its insurance fairly cheap.

FAMINE AND RAILWAYS.

While Canada is overflowing with plenty, far in the north of Europe there are two countries that are sadly scourged by present want. One of these is Finland, where an unusual measure of privation has been brought home to some 40,000 persons by the partial failure of the barley crop. The other is its old suzerain, Sweden, where perhaps 70,000 persons in the northern areas are facing the rigors of the long arctic winter, with an insufficient food supply. While high civilization has made men susceptible to new diseases and nations liable to new dangers, the forces it has organized have made famine practically impossible. In Russia, with its crude populations and its small railroad mileage, famine in some districts has become the expected thing. But the world has ceased to expect it from France, or Germany, or even from Italy. Australia is in the grapple of a drought that has lasted year after year, and which in ancient times, would almost have extinguished the race of man on the antipodean continent. But so thorough is the organization of society in the commonwealth, and so extensive is its railroad net, that, while its sufferings are acute, and its embarrassment is keen, the phenomena it presents to the world are not the grim eventualities of famine. It is the remote and backward communities, like Finland and Northern Sweden, that suffer the worst effects of such a visitation. Primitive people have all their eggs in one basket; more civilized states have various desperate resources. The failure of the American corn crop a year ago did not even check the National prosperity, other crops brought up the average and 1901 was a good year, even from the standpoint of the individual farmer.

A Toronto clergyman complains that many churches pay their preach- doesn't seem to be as many passeners less than the wages received by street car conductors, but there gers over the line the preachers operate.

To Set Her Free

(COPYRIGHTED)

By FLORENCE WARDEN.

Author of "The House on the Marsh," "A Prince of Darkness," etc.

the girl's arm kindly, as she seemed to shrink into herself at these words. "I know what young folks are; I've been young myself, and I know it's very little they see of anything but each other."

The young girl moved restlessly under the infliction of this speech, not knowing whether she had better confess that the man who was her fellow-sufferer was a stranger to her, or allow Mrs. Benne's curiosity to evaporate in ignorance.

"Oh, it wasn't that, it was not at all like that," she said, with a little frown and a restless movement.

"Oh well, never mind, I won't bother you. You neither of you want to talk about it, I see." From these words the girl gathered that her unknown rescuer had been as reticent as herself. "I only hope the poor gentleman will get over it as well as you seem to have done; but he's done nothing but shiver ever since."

"Really?" said the girl, in a strangled voice, rising instinctively as she uttered the word.

"Really and truly. It seems he's not long got over an attack of typhoid, and he's been wounded beside, so he's more than ordinarily susceptible just now. Do you want to see him?" she went on, moving towards the door, as if to lead the way downstairs.

"No," said the girl, sharply, as she promptly resumed her seat by the fire.

Mrs. Benne seemed rather surprised, if not displeased.

"He's sitting all by himself in the parlor downstairs," said she, while she began to wonder whether a serious quarrel was at the bottom of this accident. "He's sent into Oxford for a fly, to take you both, and in the meantime I advised him to keep as warm as possible."

Again the girl stood up, and now it was impossible to mistake the expression of her face for anything but one of serious concern.

"Not for both of us," she said quickly. "He—I—"

She stopped. The landlady was confirmed in her suspicion, and the expression of her face changed also. Intense curiosity began to get the better of every other feeling in her breast, and the girl, grateful as she felt for the kindness she had received, was worried and distressed by her position, and a little inclined to resent Mrs. Benne's evident wish to know more than anybody chose to tell her.

"Oh well, of course, it's no business of mine," said the landlady, after a pause to allow her guest to unbosom herself if she chose. "Of course I've no wish to intrude, though I've been trusted with a good many secrets in my time."

"There's no secret in the case," said the girl, with unconscious irritation, turning to the window, and looking out at the still fast falling snow. "I slipped and fell into the water, and—and this gentleman got me out, and unfortunately got wet through himself in doing so. That's all."

"I quite understand, and I won't trouble you again till the fly comes," said Mrs. Benne, as she snatched up her little tray and retreated to the door.

And before her guest could detain her to express afresh her thanks for the kind treatment she had received, Mrs. Benne had shut herself out of the room, and was on her way downstairs.

The girl sprang up again, and once more stared out in the gathering gloom. The snow was falling faster than ever; the wind swept clouds of the feathery flakes now to the right and now to the left, and the black line of the river was growing dim.

"I must get away, I must get back!" muttered the girl, peering out at the flat country along the river bank with a dismal sense of the difficulties that lay before her. Then she turned quickly, and having by this time exchanged her borrowed garments for her own, proceeded to put on her jacket and misshapen headgear which, much damaged by the water, had to do duty for a hat. With one horrified glance in the little looking-glass at the strange object she then appeared, she hurried across the room, opened the door softly, and ran downstairs.

The day was by this time fading fast; the heavy clouds and the falling snow all contributed to the darkness and the gloom. At the bottom of the narrow staircase she came to a window half blocked with snow, and to a door which she knew was the back door of the house.

Almost leaping to the ground in her haste to get away, the girl had her fingers on the handle when someone darted out of an opposite door and, turning in her direction, began to grope for the latch, evidently without seeing her.

Instinctively she drew back; the other person found the handle and threw open the door.

It was the man who had rescued her from the river. At the same moment they saw, recognized each other, and uttered an exclamation.

Each understood that they had had the same idea in their minds, that of escaping from the house without the knowledge of the other.

CHAPTER II.

A curious situation it was, and for the first moment each hesitated what to make of it. Then, with a laugh, Astley spoke:

"Not inviting outside, is it? And—there's a fire in that room."

Drawing the outer door slowly to, in the face of a gust of wind and a whirl of snow, he looked round towards the room out of which he had just come.

The girl hesitated, made a movement forward, as if she would have burst her way out of the house at sight of him, and then, with a crimson, hang-dog look, and breathing heavily, turned in the direction he indicated. She hoped he would not follow her, but he did. He came in his turn, into the big, bare room, with its uncomfortable linoleum-covered floor, and its rows of deal tables, now huddled together at one end, which would be covered with little white tablecloths and ranged at even distances when the summer came, to invite the tea-drinking visitors and excursionists from Oxford.

Now there were only two of these tables in occasional use, and they were placed near the fire, each with a couple of worn knives, a few Britannia metal spoons, and a dusty basin half full of sugar, to intimate that they were at the service of the chance visitor.

On each side of the fire was a springless arm-chair, relic of the days of horsehair and crochet antimacassars, and in one of these Astley had been taking his ease when a sudden impulse had urged him to leave the inn before his fellow-visitor should make her reappearance. For there was no doubt that their situation with respect to each other was an awkward one. Astley had few romantic tendencies, and although the young woman had certainly not appeared [illegible]

BUY! **WHY?**

BECAUSE

THE SOUR LAKE OIL CO.

Has placed four-fifths of its stock in the treasury for development work; and because

Oil is reached in less than half the depth required on Spindletop Heights in Beaumont;

The people in Canada are well acquainted with the management, which is in the hands of HON. JOHN L. BITTINGER, United States Consul General to Canada; F. S. Ashley, Vice-President of the Massachusetts Securities Co., and W L. Marston, Vice-President of the American Union Oil and Refining Co.

These gentlemen have made a dividend payer out of one company and have raised the value of its stock from 5c per share to par value, or 25c, within a very short time;

The company is operating in the Sour Lake field, where fewer wells will tap the oil than at Spindletop; this insures a greater flow of oil, and it is of a better quality;

This is the first allotment of shares at the present price of TEN CENTS PER SHARE; it is the lowest price at which you can buy, and the time left in which to buy at TEN CENTS is short.

BUFFALO - - - NEW YORK

INCORPORATED UNDER THE LAWS OF CANADA

CAPITAL, - - $500,000

Dividends on Preferred Stock Paid Quarterly.

For the purposes hereinafter stated, we offer at par,

50,000 of our 7 per cent. Preferred Treasury Stock Shares, $100.00 each

Payments as follows: 20 per cent. on amount of stock subscribed for at time of subscription; 30 per cent. in 60 days balance in 90 days. Receipts will be issued until full amount of stock subscribed is paid, when certificates bearing the Company's seal, and signed by the President, Secretary and Treasurer are issued. The McLennan Paint Co., Limited, have one of the most modern plants of its kind in the world, occupying 300,000 square feet of floor space. The capital of the Company is a half million dollars. The growth of the business has been phenomenally rapid and conservative. In line with other large industries, the Company propose to establish a branch factory in Canada for the manufacture of their products, which are covered by valuable patents, and which practically give the Company a monopoly, and, for the above purpose, offer at par $50,000 of their 7 per cent. Preferred Treasury Stock.

The McLennan Paint Company, Limited, was organized in 1892 by Mr. C. J McLennan of the McLennan Dipping Process, and other valuable paint-making machinery. The Company began business in rented premises, in East Buffalo. So profitable was the business, and so rapid the growth, that large factories were built in North Buffalo in 1895. The business again doubled, and another plant was added in 1898. In 1901 the Company invented and perfected a line of reds, or vermillions, permanent in color, and at much less cost than the old line colors. This increased the sale of their products practically one-fourth, making it necessary for them to build a new Color and Chemical Works. This factory is without doubt the largest and most modern in the world. Mr. Charles J. McLennan, the President of the Company, and the inventor of labor-saving machinery, such as dipping tanks, mills, etc., is recognized as one of the most skillful and best known paint manufacturers in the country. The name and fame of this Company, and its products, are known all over the United States and foreign countries, and that they will capture the Canadian market is evidenced by the fact that many of the large Canadian manufacturers are at present using their goods, in face of the heavy duty. It is with a view to saving this 25 per cent. duty and adding it to to the profits of the Company that they have decided to establish a branch in Canada, which will be controlled and managed by the parent Company.

Practical men of means, character and national reputation constitute the directorate and management. Each department is managed by a skilled man; monthly statements rendered and careful audet made semi-annually. The books are always open to the smallest shareholder. The finances of such a concern are guarded as closely as the finances of any bank, and failure is practically impossible.

COPY OF TESTIMONIALS.

A. C. Cornell, Toronto, Ont.: Columbia National Bank, Buffalo, N. Y., Jan. 23, 1903.

DEAR SIR,—The McLennan Paint Co. are good customers of this bank, and I have known them personally for years, All the officers bear excellent reputations, and are considered good business men. Their management is evidenced by the large business they have built up, as careful and conservative. They have met with great success in the past, and I believe that today, theirs is one of the largest and most prosperous concerns of its kind. I have every reason to believe that the stock which they are now offering for sale is a desirable, as well as a safe investment. Yours very truly,

L. H. GETHOEFER, Cashier.

The Merchants' Refining Co., Refiners of Petroleum, Paraffines, Paraffine Wax,
Lubricating Oils, Residuum, Napthas, and Gasoline,

A. C. Cornell, Toronto, Ont.; Buffalo, N. Y., Jan. 23, 1903

DEAR SIR,—Your favor of 21st received, and note you are offering for sale $50,000 of the preferred stock of the McLennan Paint Company and ask me what I know of the firm. Would say I have had business dealings for eight years—transactions of many thousands of dollars. I am also doing business with other houses engaged in the same line, and desire to say there is no house in America to-day that stands higher than the McLennan Paint Co The growth of their business has been phenomenally large, and under the conservative management of the President, Mr. C. J. McLennan, the success of the business is assured in the future. As an investment, in my judgment, nothing could be safer than the stock they offer.

Very respectfully, C. A. SALISBURY, Manager.

A. C. Cornell, Toronto, Ont.: Buffalo, Jan. 26th, 1903.

Dear Sir,—Referring to the sale of $50,000 of our 7 per cent. Preferred Stock, the Prospectus does not elaborate on the proposition, but merely mentions the amount guaranteed. I desire to inform you, however, we could have paid at least 14 per cent. last year, but carried balance to a Reserve Fund, which, necessarily, makes the stock very valuable.

Very truly yours,
THE McLENNAN PAINT CO., LIMITED,
C. J. McLennan, Manager.

P.S.—Having visited this proposition on behalf of some very conservative investors, I can verify all the above. The plant is extensive and modern in every detail; officers and management skilled and very industrious; all the products superior. This is a Canadian Company, Canadian Charter. Having built in Buffalo, in proximity to raw material, by shipping here in ground state and preparing here, will save and add large duty to already large profits. Bear in mind this is not prospective, but a large, rich, going, paying institution. Prospectus, application forms, and any further particulars, and subscriptions, address the undersigned. All cheques or drafts for stock made to the order of the Company, and forwarded to

A. C. CORNELL, Fiscal Agent,
18 Yonge Srreet Arcade, Toronto, Ont.

Gem Consolidated Gold Mining Company Stock at 50 cents per share is one of the safest propositions ever offered to investors.

The property is located in the heart of a rich section of Eastern Oregon, and is steadily producing—no debts, well-equipped and practically ready to pay dividends.

Deeper Levels, New Hoist, Increased Power, New Mill, More Ore, Greater Earnings
That's the Policy of the

GOLCONDA

CONSOLIDATED GOLD MINES COMPANY

The Golconda made a fortune for its former owners in its surface workings. From 500 feet the shaft will be sunk to 1,200 feet. A new hoisting plant has been ordered. That will carry out the waste rock and the ore. From 20 stamps—the size of the present mill - the reduction plant will be increased to 60 stamps. Nine hundred feet of pipe is being added to the 7,000 foot pipe line. This will increase the electric power to 1,000 horse power.

The COLCONDA produced ore worth $211,000 per ton. That's the Government record. - - - -

Suppose you were to invest in the future of this great mine? You would want to know something about it and its neighbors; you would want to know everything about its directorate; you would want to know that your invested capital was safe; you would want to know what it would likely earn from the time dividends will be declared—March, 1903—and for scores of years thereafter.

A LITTLE BRITISH WAR IN ONE OF THE WORLD'S WONDERLANDS

Expedition Preparing to Punish the Slave Raiding Emir of Kano

ANOTHER WAR ABOUT TO START

In Which Britain Will Carry Civilization to the Sokoto Empire on the Dark Continent

London, Feb. 11 —Col. Morland, commandant of Northern Nigeria, is about to advance on the Emir of Kano, who shelters the murderers of Captain Moloney, the British resident at Keffi, and given great offence to the British government, under whose protection his territory is, by persistent slave-raiding.

Kano, which is a sultanate in Northern Nigeria, is distant some five days' march from Zaria, to which the expedition is about to make its way from Zungeru. Colonel Morland has with him some eleven hundred officers and men, five 12 1-2 pounders and seven Maxims. It is the most considerable force yet engaged in that part of the world, and the evidences point to its being fully taxed.

The Emir is no mere African savage chief. Kano is nominally but a subordinate sultanate of the Sokoto empire which, in turn, is, of course, under British protection. But Kano and its people differ from every other area and community on the Dark Continent.

Ten thousand splendid horsemen, travellers tell us, are at the command of the man who has braved the power of Britain. Behind him is a history of unchecked successes and cruel conquests.

There is no other place on earth like Kano. It is the very kingdom of paradox. A peep into one of its teeming marts suggests its story at a glance. There you see the richly apparelled Arab, urbane, refined, bartering in the open market-place with a jabbering, naked heathen.

The Hausas, who people Kano, have a literature of their own. Their language, rich and sonorous, with a vocabulary containing some ten thousand words, is an ancient one.

Their writings we are able to trace back for at least a century; they are believed to date back to a far more remote period. Differing from every other people in tropical Africa in having reduced their laguage to writing, they stand unrivalled for culture and learning, with a literature of political and religious poems and native history.

And these sable savants, with their inexplicable erudition, with their trading colonies scattered far and wide, have for their currency—what? Cowrie shells, and slaves —slaves for pounds, shillings and pence, and the cowrie shell for a two-hundredth part of a penny.

An African Manchester.

Kano is the Manchester of the Soudan. For nine and a half centuries the Hausas have been the great clothmakers of the Dark Continent. So famous is this product that the natives of the Soudan will have no other. The Hausas grow the cotton themselves, dye it with indigo of home production, or a brilliant scarlet obtained from the bark of an indigenous tree—all this by slave labor. The making of cloth is the work mainly of the free, who employ small and cunningly devised hand-looms for the purpose.

And if their cloth is good, there's nothing like leather—Kano leather. Far and wide they export it; and the "Morocco leather," of commerce, is largely the product of the Kano craftsmen.

They have altogether an enormous trade, and yet do not possess a single factory, the industries all being carried on in the homes of the individual workers.

Far and wide their caravans travel to Mecca, across the Sahara, and by way of Tripoli and Alexandria; sometimes by way of Wadai, Darfur, Khartoum, and Suakim. To this stage the Hausas have brought the trade of the land they took. But they are not the ruling body.

For the past two centuries the kings and governing classes have been drawn from the Fulah tribes—soldiers and rulers by instinct and training.

Originally, they were shepherds, and owned all the flocks and herds in the country round about. One day they decided that they would be kings; and their splendid guerilla cavalry rode staright to power and has kept the Fulahs there ever since.

World in a Market-Place.

These are they with whom slave-raiding originated, and by whom it is continued today, in spite of every British attempt at repression.

A Kano market day—it is every day in the week—is a sight never to be forgotten. Thirty thousand people daily attend to buy and sell. The market is the Whiteley's, Unlimited, of the Soudan.

You can buy everything— camels, horses, asses, cattle, cloth, leatherwork, hides, silks, nuts, salt, ivory ostrich feathers, sugar, needles, pins, paper, swords, razors, spices, copper every variety of provisions—and slaves. Never less than 500 a day of these poor wretches stand on offer in the pens.

But these do not represent the number traded. Every landowner, and man of authority demands tribute of slaves from the man next in rank beneath himself, so that raiding is incessant.

Until recently the Emir of Adamawa sent each year 10,000 slaves to the Sultan of Sokoto, a journey of eight hundred miles. An English traveller recently in Kano told us that Mohammedans were constantly arriving with gangs of captives, and that, on one occasion he saw upwards of a thousand brought in by one party.

A landowner has slaves to work his property. When he goes to trade his wares slaves form his means of transport. As the provisions for the caravan get lower he sells a man or two in wayside villages, or, pausing at a halting-place for rest and diversion, leaves a slave for payment, and takes his change in cowries.

Only Man is Vile.

The city of Kano stands four-square to a hundred miles of the richest cultivation in the world. North, south, east and west are vast tracts of Guinea corn, Indian corn, wheat, rice, indigo, ground nuts, peas, beans, bananas, sweet potatoes, onions, and every variety of vegetable and herb—all produced by a generous soil requiring little or no aid from man.

Enormously thick walls of mud, 30 feet in height, fifteen miles in circumference, guarded by a moat, 8 feet deep and pierced by thirteen gates and one water gate to permit the escape of floods, engirdle the capital. Within are fine broad thoroughfares lined by wonderful houses of mud.

The land inside the city is mainly cultivated, so that from this point of view the stronghold is equal to a prolonged seige.

The oldest quarter is Dala, which takes its name from a huge rocky mound, said to possess gold. Hausa legend has it that if ever a white man be allowed to tap the treasure of that rock, Hausa and Fulah away will perish that same instant.

To see his majesty of Kano is a matter of grave difficulty, and attended by rites and ceremonies hardly according with British ideas of the homage due to a sable potentate.

You must wait a minimum of three hours in the outer chamber of the Emir's mud palace, and then, without warning, are whirled into the presence of majesty and left to make the best of it.

An audience with the Emir of Kano is one of those genial occasions on which, if you do not keep your head in a figurative sense, you will lose it in a literal one.

TOMMY ATKIN'S WAIST LINE

Tight Lacing Causes Many Deaths Among British Soldiers

London, Feb. 10—Tight lacing is killing Tommy Atkins. This, at least, is the opinion of army surgeons who attribute the great prevalence of heart disease among soldiers to the tight-fitting British uniform. On parade Thomas looks very spruce and neat in his faultless-fitting tunic, but that same effect of neatness has cost more than one soldier of the king, his life.

One surgeon made the startling declaration this week that nearly all the soldiers upon whom he has held post-mortems have suffered from heart affection, due to the tight strapping in which the men are enveloped, especially for heavy exercises. Officers at Aldershot concur in this opinion. The high rate of sickness in camp in the summer time is due to exhaustion caused by tight belting and strapping in the drill season.

The English soldier, perhaps, is the most unsuitably clad of any army in the world, and the difference between winter and summer garments is so small as to be of no actual protection. Men faint and fall out on the march with painful frequency and soldiers, after a few years of it, develop valvular troubles.

Hearts That are Diseased

will never be cured by the false, unnatural stimulation of liquor. First increase your vitality, build up the system, strengthen and purify the blood—then the heart will respond and grow strong.

Ferrozone is precisely what to take, it gives you an appetite and a digestion that will look after everything that is eaten. Ferrozone improves nutrition, makes rich, vitalizing blood and is positively the most powerful restorative and strengthener known to science; it improves the nerve tone, regulates the heart's action, makes the feeble strong and the sick well. Ferrozone will do you untold good, and costs only 50c. at druggists, or Polson & Co., Kingston, Ont.

OUR DEBT TO EMPIRE

Chamberlain Declares that While Colonies' First Duty is at Home They Owe Much to Britain

SIGNIFICANT SPEECH IN SOUTH AFRICA.

"Who Knows When the Next Blow will Fall?"

London, Feb. 11.—Chamberlain's speech at Grahamstown on Monday was evidently intended for a wide audience, and constitutes the clearest indication of a general Imperial policy that Chamberlain proposes to pursue. He declared that the Mother Country would defend its heritage to the last man, but the colonies had their share of responsibilities for the Empire. Last year England spent £60,000,000, besides the war debt. He was, he said, addressing all the colonies when he said they were not doing what they ought in regard to obligations to the Empire. The increased vote of Cape Colony for a fleet was not sufficient to keep for six months the warship Good Hope. He would agree that the first duty was at home, but all hope of the Empire's future was based on co-operation with the mother country. He said he was anxious that the colonial aspiration should be partners in the Empire, whose mission was justice, freedom and equality. He added: "Who knows when the next blow will fall? We, by remaining one people, shall prove that the Empire is founded on a community of sacrifice."

KILLED FAMILY AND HIMSELF

Insane Man Murders His Wife and Three Children and Commits Suicide

Dallas, Tex., Feb. ——News reached here today by telephone from Woods, in Panola county, of the killing of an entire family near that village last night. Charles Rowe, who has been considered insane for several months, killed his three children, and his wife, by splitting their heads open with an axe, as they lay sleeping in their beds. Rowe then went to a field and cut his throat, and died in the woods.

Neighbors discovered the tragedy this morning. The five bodies are to be buried tomorrow.

People With Bad Breath

Generally suffer from Catarrh, and should use Catarrhozone Inhaler four times daily, and be cured. The pleasant scented Catarrhozone vapor spreads through every air passage of the breathing organs, and reaches the very root of the disease at once. It kills the germs, purifies and cleanses the mucous surfaces, and eradicates every vestige of catarrh in a short time. Pure, sweet breath, free from headache, sneezing and discharge are quickly derived from the use of Catarrhozone Inhaler. Complete outfit, guaranteed to cure, costs $1.00, trial size, 25c. Druggists or N. C. Polson & Co., Kingston, Ont.

CASTRO IS MASTER

Government Troops Capture the Town of Guatire

Caracas, Feb. 11—A force of 2,000 men with fifty horses and two guns under command of Minister of War, General Ferrer, left Caracas yesterday in the direction of the seaport Higuerote, fifty-five miles east of Caracas. The object of the expedition was to attack a body of 1,500 revolutionists, under general Mohagas, reported to be too feeble to attack the government, but strong enough to devastate the district around Rio Chico, province of Miranda, sixty miles southeast of Caracas, and daily enter and pillage the town.

Even ardent revolutionists recognize that President Castro is master of the situation.

The government troops captured the town of Guatire at noon and are now marching on Rio Chico.

TRYING TO INJURE CANADA'S CASE

Attitude of American Correspondents of London Newspapers

NOT MEETING WITH SUCCESS

The General Public Thinks Policy of Give and Take Should be Pursued

London, February 10—The Washington and New York correspondents of the London papers are busily engaged in endeavoring to prejudice the British public against Canada in the Alaskan boundary question. The Standard correspondent says: "Canada can have nothing but a claim treaty, which is objectionable because it authorizes the cession of territory without any consideration and so places the United States in jeopardy which Canada does not share."

The general English opinion on the contrary, is that it is a concession treaty, the outcome of a give and take arrangement, both sides conceding something.

A Capital Cure For Sore Throat

is to use as a gargle a few drops of Polson's Nerviline in sweetened water, and before retiring rub the throat and chest vigorously with Nerviline. By morning the soreness and inflammation will have disappeared entirely. Nerviline drives away the pain and cures sore throat and hoarseness quickly, simply because that's what it's made for. Buy a 25c bottle from your druggist today.

Dr. Hamilton's Pills stimulate the Liver.

REBELLION NOW FEARED

THE SITUATION IN CHINA NOW BECOMING SERIOUS

Preparations Being Made for a Great Revolt —Letters from Dr. Service

The gravity of the situation in China is at last admitted by the Methodist Mission Board. Those in charge have persistently denied cable despatches as altogether exaggerated and unreliable, but recent advices from their own representatives have placed matters in a more serious light.

The reason for this changed feeling at the Mission rooms is that a letter has been received from Dr. C. W. Service, who left the city for China last year, dated Werber, December 29th. It refers to the fact that a very cautious and experienced China Inland missionary, who has just returned from a tour of Kansu, reported that most extensive preparations were being made for a great rebellion, and that two of the leaders of the Boxer movement, whose heads were forfeit by demand of the foreign powers, were now at the head of a well-disciplined army of ten thousand men. A later letter from another missionary confirmed this statement, observing that the people were never known to be so unfriendly. The Mission Rooms admit that as Kansu is immediately north of Sz-Chuan, where the Canadian missionaries are, it looks serious for the peace and order of that province. Dr. Service says the missionaries at Wuhu, some twenty in number, think the situation is grave and fear that the summer may witness a widespread rebellion.

BARBARITY IN BRITISH ARMY JUNIOR OFFICERS WERE FLOGGED

Their Comrades Do It—Each Compelled to Administer Part of the Blows.

London, Feb. 10.—The Countess of Aberdeen, addressing a large audience at the Society of Arts this afternoon on "Women in Canada," paid compliments to the the earnestness, purity, patriotism and intellectuality of the Canadian woman. Right Honorable Leonard Courtney occupied the chair.

A movement is on foot for the formation of a college for training poor cultured English women for life in the colonies. They are to be taught gardening, cooking, nursing and laundrying in a one year's course. Mr. Duff Miller, the agent general for New Brunswick, is the only Canadian endorser. The syllabus rather snobbishly says: "The future wellbeing of the colonies demands English women of higher cultivation to inculcate traditions of English home-life." In my opinion Canadian have little to learn from English women

THE KING'S HEALTH.

The King is completely restored to health, and is now at Buckingham Palace, where he received Premier Balfour to-day, settling the details for the King's speech at the opening of Parliament this day week.

GAVAN DUFFY'S DEATH.

Much regret is expressed on all sides at the death at Nice of Sir Charles Gavan Duffy. He was a fellow rebel with D'Arcy McGee, but afterwards became Premier of Victoria. Since 1877 he had lived in the South of France. He met him at the last jubilee, when he said he was as keen a Home Ruler as ever. In his opinion McGee was one of Ireland's greatest men.

NAVAL EXTENSIONS.

The Admiralty has decided to build three battleships of 18,000 tons each, the largest in the world by 2,000 tons, also the heaviest armor-plated and armed. The largest American and Russian are 16,000 tons, and French 15,000 tons. The Admiralty has also decided on some ten new cruisers of 13,000 tons each.

THE GUARD'S SCANDAL.

The agitation continues in military circles arising out of the dismissal of Col. Kinloch, of the Grenadier Guards, for permitting "ragging" of subalterns by their seniors. Admiral Cochrane has a long letter in the Times today, explaining that it is the custom in the officers' mess of the Guards to cane subalterns' fleshy part bared, not for fun, but real punishment for offences against military etiquette. The Admiral quotes the case of a brilliant subaltern who resigned rather than submit to such indignities. There seems to be a prejudice in the Guards against earnest military ability.

Public feeling is veering round to favor Lord Roberts for dismissing Col. Kinloch and stopping the indignition.

COREA AGAIN BALKS

Government Forbidden Use of Notes of Japanese Bank

London, Feb. 11—The Times' Tokio correspondent says: "Despite the strong protests of Japan, the Corean Government has again interdicted the use as currency in Corea of notes issued at Seoul by the First Bank, which is a thoroughly stable Japanese institution, under the presidency of Baron Shibusawa. The Japanese press is indignant for what is termed Corea's arbitrary neglect of the treaty of 1896, guaranteeing full facilities for trade in Corea. Russian intrigue is suspected, but this is scarcely credible, as the Russo-Chinese bank also probably desires a note issue which is within the power of Corea to stop. The Japanese Government is said to be resolute in the matter, but pacific.

MANITOBA LOOKS FOR RUSH OF SETTLERS

The Provincial Government Immigration Agent Makes a Bright Forecast

Says That For Each One Last Year There Will be Five in 1903

Winnipeg, Feb. 11—The prospects for heavy immigration to Manitoba during the summer of 1903 are exceedingly hopeful. J. J. Golden, provincial government immigration agent, in speaking to a reporter for The Times this morning that for every one who came to the province last year, five will come this year. Last year over 30,000 settled in Manitoba and next year, Mr. Golden expects, the influx will be limited only by the transportation facilities.

Speaking of the rush into the country he expressed the hope that all concerned in providing accommodation realized the number that are likely to come. Last year the city was crowded; hotels and boarding houses were taxed to their utmost capacity, and considerable inconvenience was experienced by arrivals. Facilities for supplying bed and board will have to be increased greatly to handle this year's rush, and the better the newcomers are handled, the better will be their impression of the country.

Everybody Coming.

All the Americans who call at Mr. Golden's office speak of settling in the west, and he is kept busy answering the communications of those who intend coming. "If I were establishing agencies for the sale of government land throughout the United States," he said, "I could put in 1,000 now. People who intend coming want to know if they can supply their friends with government lands and what commission they will be allowed on sales made by them."

These people both call at his office and write him. In every instance they speak of large numbers coming from their vicinities in the United States in the spring, when the weather is more favorable.

Men Still Scarce.

Despite the enormous influx into the country, there is a shortage of farm hands. Men cannot be got to work on a farm, although wages are good and work is supplied for twelve months in the year. The farmer is also now more desirous of keeping good men, but on account of the easy terms on which a man can get a homestead, the experienced hand, in most cases, becomes a proprietor. By doing this, he not only depletes the army of laborers, but increases the number of employers.

RACED FOR HIS LIFE.

INCIDENT OF WOOD LIFE ENDING IN A TRAGEDY.

Fight of Woodsman Over the Ice From a Ravenous Pack of Wolves

Ottawa, February 11 — Intelligence has just been received at Hull of one of those startling tragedies which now and then direct attention to a class of men who spend more than half the months of each year in the solitude of the pine woods. Secluded in their log shanties from early in September, with, as a rule, no connection with the civilized world until the frost permits teamsters to bring their horses along the bush roads and over the lakes these men are glad to seize every opportuntiy for a change.

When the lakes were covered with a clear sheet of ice recently, two young fellows employed on the shore of Deer Lake secured two pairs of skates, which chanced to be in the place and set out at night to visit another band of men about nine miles away. With the exception of a little portage of about half a mile between two lakes, the whole journey was by ice and no very formidable undertaking to the two sturdy log makers.

As they were hobbling over the portage on their skates, they were startled by the sudden breaking across their path of a red deer, followed by three or four wolves, who were close upon the heels of their prey. Being without defensive weapons of any kind, they realized their danger if another pack of wolves should, as is often the case, follow after the beasts they had seen pass, and they made all speed to the lake before them.

Just as they were breaking through the thin ice at the lake side, they heard a whining behind them, and then

THE LOW HOWL.

which told them that their track had been discovered and that they would certainly be followed. But by the time the wolves reached the waterside, where they caught their first sight of the man they were tracking, the two shantymen had reached the firm ice and were skating in earnest.

Fortunately for them there were a few hundred yards of thin ice to be crossed, which almost, but not quite, held up the wolves, and its sharp, edges wounded and hindered them greatly. Otherwise they would have caught up with the men, and probably have overpowered them before they had gone half a mile.

As it was they had almost overtaken them before they had covered the first half of their four-mile race. Neither of the two men was a hunter and this was their first experience with wolves, but by mutual agreement they adopted the very best tactics possible, and when their pursuers came too near to them, wheeled sharply to one side. As the smooth ice afforded no grip to their claws, the wolves could not turn or stop suddenly, but generally shot forward, and made several stumbles, and sometimes somersaults before getting on the fresh track.

In this manner the skaters avoided the brutes for some time, and would probably have reached their destination, but for an unfortunate suggestion of the younger man, that they would be more likely to tire out the wolves if they separated. In accordance with this plan they wheeled in different directions at the end of an island they were approaching.

As the elder man reached the other end of the wooded island, he saw before him the sparks which issued from the huge chimney of the shanty he was searching for. Putting on all of his remaining strength, he spurted on to where the cook's path led from the shanty to the water hole. There the two big gray timber wolves, which were elected to follow him, turned tail, and with a parting yelp

TURNED IN THEIR TRACKS.

By some curious accident the poor fellow stumbled as he was approaching the low door of the shanty, and fell, breaking his right leg just below the knee. The pain and the previous exertion were too much for his overstrained nerves, and it was upward of an hour before the shanty men could recover him from the swoon into which he fell as he was carried inside.

When consciousness returned his first question was for his companion whom he had last seen as he skated around the little island in the lake. As soon as the men could be made to understand the situation, a dozen of them started out to see what had befallen the other traveler.

Within 200 yards of their winter home they found the blood-stained spot where the unfortunate young fellow had been attacked in front by the two brutes which had chased his friend. In the lightly falling snow could be read the whole story of his destruction. His boots and skates and a few fragments of clothing were all the tangible signs of the tragedy left by the wolves.

Happily for the injured man a shanty missionary, on his rounds, reached the island where he lay that same night, and being a medical man also was able to set his leg with some degree of satisfaction. Strangely enough, as it happened, the clergyman had taken with him as his driver for the trip, an uncle of the man devoured on the ice, who was greatly attached to his nephew, and was conveying to him a substantial token of this regard in hard cash, as a present.

BOERS AND PEACE TERMS LOYALISTS DISSATISFIED

Cleavage in Ranks of Extremists is Extending—Method of Awarding Relief Must be Soon Changed

London, Feb. 11.—The line of cleavage in the ranks of the Boer extremists who waited on Colonial Secretary Chamberlain on Friday has been clearly defined since Saturday's banquet, reports the correspondent of The Times at Springfontein. The irreconcilables are reduced in numbers. A memorial is being signed deprecating the lack of courtesy shown to Mr. Chamberlain by the delegates, and will be forwarded to him at Cape Town. The scheme of settlement of compensation does not meet with complete favor, however, even among the loyalists. The local magistrates, who will be commissioners to carry out the plan, have earned many complaints, and in some cases have proved incompetent. A resident magistrate in the outlying districts, says the correspondent, is an ordinary inhabitant. The British Government, therefore, should exercise the utmost care in selecting them. There is no use in preaching conciliation if the administration of the law in the outlying districts is constantly subjecting the inhabitants to petty annoyances.

London, Feb. 11.—The correspondent of The Times at Sofia reports that assurances have been received by the Bulgarian Government from one of the greatest powers that the Turkish military preparations are purely of a defensive character. It appears that large bodies of Turkish troops are already concentrated at various points close to the eastern frontier. These include 1,600 cavalry and 30,000 infantry, under Mustafa Pasha, which force commands the railway leading from Turkey into Bulgaria.

The correspondent of The Times at Vienna says that it is thought certain in the Austrian capital that all the powers will agree to the Austroprove acceptable to Turkey, and affording the Bulgarian Government some guarantee of substantial improvement of the situation in Macedonia. Fortunately, there is reason to believe, he continues, that Germany will keep in step with the other powers, and advise the Sultan to accept the proposals which are manifestly concerned with the interests of Turkish territorial integrity.

Macedonia. The programme will constitute a broad framework, he declares, well calculated to spare the susceptibilities of the powers and Russian programme of reforms in

London, Feb. 11.—The Corriere de la Socia, an important Conservative newspaper in Milan, according to the correspondent of The Times at Rome, declares that the British dispositions for attacking the Mad Mullah of Somaliland are in small accord with the policy agreed upon with Italy. Instead of preventing the Mullah's southward toward the Italian colony, the Milan newspaper says the British expeditions have actually forced him to take that direction. The British authorities refused to despatch a column to avert the danger to the Italian colony, and Italy had to bow her head to the inevitable.

"British astuteness, as usual, has had its way," remarks the Corrierre.

London, Feb. 11.—The reports that Bu Humara, pretender to the throne of Morocco, has been captured by the Government forces are contradicted by the correspondent of The Times at Tangier. He reports that the pretender is at Ghiaas, where a large number of tribesmen are continuing to support his rebellion against the Sultan.

Marks' Bros

Last night was the farewell performance of the popular combination of versatile artistes that have entertained large audiences during the past twelve nights at the local opera house. Despite the inclement weather there was a packed house, and every effort made for the amusement of the audience was greeted with unbounded enthusiasm. "The Bird in the Gilded Cage" was the title of the play presented, but it would have mattered little to the audience what medium the company had chosen to bow their adieus. The audience were there to greet old friends, and they did it in a manner that must have been very gratifying to all. Miss May Bell-Marks received a beautiful bouquet from some lady admirer, and indeed her acting last night deserved some such recognition. Everyone acted their best: Will C. Millard, Jack Connelly, Carl B. Stears, Margie Stears and Millie Bell, all of whom have furnished our amusement during the past two weeks, received their reward last evening in the enthusiasm of the audience. It would not be fair to close this eulogy without a word of honest praise to Mr. Gregory—a conscientious young actor and a club-swinger of real merit.

A SERIOUS ACCIDENT

Postmaster of Hiawatha Had His Left Leg Broken

A serious accident befell Mr. Robt. Davis, postmaster of Hiawatha on Tuesday morning last. The unfortunate gentleman, by some means, got his left leg entangled in the sleigh runner, and a bag of grain falling resulted in the leg being broken. Dr. W. T. Harrison, of Keene was called, and the latest reports from the doctor say the patient is progressing as favorably as may be expected.

THE KAISER LOSES FAVOR WITH THE BRITISH PUBLIC

Story of His Alleged Offensive Criticism of King Edward Has Been Repeated

London, Feb. 11—The National Review again refers to its famous story about the German Emperor's visit to an American yacht, saying:

"It is beyond all possible doubt that the Kaiser did perpetrate an appalling indiscretion in talking Anglophobia at large in the presence of strangers and discussing his uncle, our king, in the most offensive manner.

"Judging from the communications which have followed during the last two months, the incident made a deep impression upon our readers.

"The reason we lay so much stress upon it is that it affords a conclusive reason why the German Emperor should not be allowed to occupy the position which he covets in this country of being the power behind the throne."

OBITUARY

Passing Away of Mrs. James Brown, of North Monaghan

—We regret to hear of the sudden death of Mrs. Brown, relict of the late Jas. Brown, at her house in North Monaghan, on Wednesday morning. She has resided in North Monaghan for 40 years and was 73 at the time of her death.

The funeral takes place to-day at 1 p.m. in the Front church cemetery.

The Convener's Thanks

Mrs. Wm. Hamilton, convener of the Social committee of the Ladies' Auxiliary of the Y.M.C.A., wishes to express her hearty thanks to the members of the Ladies' Auxiliary and the ladies of the town for their co-operation in sending supplies and for assistance in connection with the convention banquet held last week. We might add that great credit reflects on Mrs. Hamilton, upon whom a great deal of the responsibility fell.

The Plans of the Catholic Orders Which Were Driven From France

SOME GO TO WASHINGTON OTHERS TO OTTAWA

As Affiliated Bodies of Catholic University, They Will Open Seminaries for Training Priest

New York, Feb. 11—As a result of the recent French legislation, known as the Association act, several powerful orders and congregations of the Roman Catholic church will seek asylum for their mother homes in the United States. The greater number of them will come to Washington. As affiliated colleges of the Catholic university of America they will open seminaries for the training of their priests and conduct their business from the capital of the American rather than the French republic.

The congregation of the Holy Cross, originally a distinctively French organ has already completed its arrangements to transfer its motherhouse to Washington, where a college of this order is already affiliated with the Catholic university. The Marists and Sulpicians will, in all probability, follow the example of the Congregation of the Holy Cross, and locate at Washington. The Congregation of the Marists has already been suppressed and the Sulpicians do not feel secure in their position, although this latter order has heretofore been specially favored by the French Government.

The fact that it is practically settled that the powerful Congregation of the Holy Cross will emigrate to America is of the greatest importance. It will work for the elevation of the dignity of the Catholic University of America.

Foreseeing the storm which has recently burst upon the church in France the Very Rev. Gilbert Francais, superior general of the Congregation about three years ago, he encouraged the foundation of the Holy Cross college near the Catholic university. The wisdom of this is now realized in the fact that he has a college in this country, where post-graduate students may continue their studies.

It is proposed to locate the undergraduates at Notre Dame, in South Bend, Ind., and in the Holy Cross colleges in Canada. The superior general is a man of strong nature, combining in his nature the beautiful and simple traits of St. Francis de Sales, and the broad-minded and energetic charity of Archbishop Ireland.

Little Hope in Appeal.

Father Francais has an appeal from the French decision now pending but there is very little hope that his efforts will meet with any success. It is estimated that the congregation will lose more than half a million dollars dollars in money by the sequestration of their property. Their principal college was located at Neuilly, in the suburbs of Paris. Upward of 1,000 students were enrolled at that institution. The various other foundations of this congregation throughout France had charge of more than 6,000 additional students. Several hundred of this number will eventually find their way to the United States and Canada.

The work of enlarging the college at Washington has not yet actually begun but the plans are projected, so that immediately the word is received from France that the order is sequestered conditions may be arranged for the influx of the French exiles.

The Congregation of the Holy Cross is not unknown in the United States. The present superior in this country is Very Rev. Dr. John A. Zahm, who is widely known as an advanced evolutionist. His book, "The Bible, Science and Faith," had done much to spread a popular conception of the scientific truths which underlie the arguments of Darwin and at the same time to recognize the infallible inspirations of the Scriptures. By liberal quotations from the writings of St. Augustine and St. Basil, he shows that many of the questions which now agitate the scientific world were fought out in the ancient schools of Alexandria in Egypt, and that these fathers of the church often admitted more startling postulates than either Darwin or Huxley. It was rumored that these works had been suppressed by order of the Congregation of the Holy Office. This was erroneous and the circulation is greater than ever.

It is not known here what course the French Dominicans will take to recoup themselves for their losses through this sequestration. The Dominicans at Washington do not correspond with their brothers in France but the heads of the order in this country have recently purchased a splendid site right at the gate of the Catholic university, and will erect a convent as large and ornate as the handsomest hall of the university itself.

Plans of the Marists.

When the Marists received the order sequestrating their property and dissolving their association a large majority of their priests took up secular work, and will remain in France, engaged in parochial duties. The superior general and his four assistants will seek an asylum in Belgium temporarily, but a large number of the priests who prefer to remain in this order will be drafted to the United States, and some doubtless will find their way to the Philippines to replace the Spanish friars. If possible the mother house will be transferred to Rome. Conditions in Italy are not much more favorable than in France, and the officials of the society here would not be surprised to receive word at any time that the chief seat of the order was removed to the United States.

While the Sulpicians do not fear immediate danger from the French laws they share the apprehensions of the other orders. Recently a good site for a college was purchased near the Catholic university, and their agents are now searching the market for a larger and more available plot, should it be needed. This order has always been closely associated with the French civil administration. It is devoted to the education of the priesthood. Archbishop Ireland and Bishop O'Gorman of Sioux Falls, are shining examples of their teachings. The eminent prelate of St. Paul has had much to do with interesting the American Government in the Passionist Fathers, whose Paris church has been confiscated. This is an English Society and the services of the Passionist church were largely frequented by English speaking Catholic tourists while in Paris.

Influence of Sulpicians.

The seminary of the Sulpicians is at Issy, a suburb of Paris, and is regarded throughout the Catholic world as the model seminary for the training of priests. Almost every bishop and cardinal now in France studied at that institution and its fame is dear to a host of American clerics. Should the Sulpicians be compelled to emigrate to the United States they will need a large tract of land, and their agents are now securing options on about a hundred acres immediately north of the Catholic university. Such men as Bossuet, Fenelon and other great preachers, thundered their eloquence from the pulpits of St. Sulpice in Paris.

The congregation gave an asylum to the great conde during a period of disgrace, and the history of their order is so intertwined with that of France that its uprooting will be in the nature of an epoch. It has long been a pet project of this order to build a counterpart of San Sulpice near the Catholic university. The spiritual directors of Divinity hall at the Catholic university are Sulpician fathers.

The Carthusians, Trappists, and White Fathers have been the only church organizations exempted from the operations of the drastic associations act. These have either very little communications with the outside world or some local interest which it is advisable the French government should recognise. Almost all the other orders will be driven away from France, and they are diligently preparing for the unhappy day when they will be forced into exile.

The drastic administration of this act will make Washington one of the greatest Roman Catholic centres outside of Rome. The Franciscans have already transferred their commissariat of the Holy Land here, and the operation of French law will expedite an emigration the European laws made certain in the future. The church in this country is displaying the utmost hospitality toward their unfortunate brethren, and there is something of retributive justice in the fact that many of these French societies during the "Americanist" controversy of a few years ago were loud in their denunciations of the alleged heretical and lax conduct of the champions among the American hierarchy.

The most generally assaulted of these are now the prelates to whom the French orders look for succor, and they hope that some relaxation of the rigors of French law will be brought about by the intercession of the United States. The action of Ambassador Porter in championing the cause of the Passionists has been cordially recognised by all the prelates and professors connected with the Catholic university.

PRINCESS TRIED TO END HER LIFE

Report That Louise of Saxony Used a Pistol

Said to Have Fired Twice—Story Not Confirmed, and Reports of Her Mental Condition are Conflicting

Vienna, Feb. 11.—Die Zeit this morning reports that the Crown Princess Louise of Saxony attempted suicide at the sanitarium where she is stopping by firing two shots at herself with a revolver. Both shots went wide of their mark, however, and before she could repeat the act, attendants at the sanitarium disarmed her. The Princess, Die Zeit says, is wild with despair, brought on by the refusal of her family to permit her to see her sick boy.

CONFLICTING REPORTS.

Vienna, Feb. 11.—There are numerous reports concerning the Crown Princess of Saxony, but there is nothing confirming the rumor that she had attempted to commit suicide. One report represents her as being mentally unfit to give attention to her case, while another says that she has greatly improved.

EXAMINED BY SPECIALIST.

Geneva, Feb. 11.—Dr. Forel, of Zurich, a mental specialist, who examined the Crown Princess of Saxony, has reported that her condition is very favorable. M. Lachenal, her lawyer, and Archduke Leopold, her brother, have visited her, and found her much improved. M. Lachenal is quoted as saying that her residence in the sanitarium will not extend beyond her confinement in April. It is stated that the Crown Princess has received numerous telegrams and letters congratulating her upon her separation from M. Giron. An anonymous letter from America contained a handsome gift of money.

MENTALLY DERANGED.

Dresden, Saxony, Feb. 11.—It is stated, apparently on high authority that the settlement of the trial here of the Crown Prince's suit against his wife will not end the matter, which will have its sequel in Austria. Several eminent legal authorities contend that there is a serious legal flaw in the action by which the Crown Princess was deprived of her Austrian titles, membership in her family, and the right to bear its name.

IS THE BATTLESHIP DOOMED? EXPERTS SAY THAT IT IS

Affirmative Reasons Advanced Advanced by Naval Architects and Engineers

NOT DANGEROUS EXCEPT TO SELF

The Success of the Destroyers in Recent Manoeuvers

London, Feb. 11—Naval architects and engineers are about agreed that the great battleship is no longer a danger, except to herself and her crew. During the recent manoeuvres of the English Mediterranean fleet the destroyers were sent out some hours in advance of the battleships. The course to be steered by the latter was kept secret and was purposely made as uncertain and as perplexing as possible. The destroyers were given two days in which to find the fleet, and within that time they did find it and planted blank shells against their hulls that in a real battle would have sunk every one of the ships attacked. Ten out of the fourteen admitted that "they were fairly bagged without so much as a chance at the attack."

This admission by competent and responsible officers is leading to a pretty general consensus of opinion on the part of naval authorities that the destroyer is the "ship of the future." In view of these developments the great naval powers are at a loss to tell what to do next. Many battleships are in course of construction, and there seemed every probability that their number would be increased. Yet, if these ships are to prove only a danger to themselves and their occupants, it would be idle to proceed with the construction. England has decreased the number of battleships she intended to commence this year by two, and will increase her torpedo destroyers by fifty. So significant a change is not going into actual fulfillment without some pretty strong proof of its wisdom.

President Roosevelt is very strenuously in favor of a greatly enlarged American navy, but in view of what is going on around them, it would appear to be the part of their program to go slow for awhile. The effectiveness of the torpedo has been so advanced that no battleship can escape her, and no solid wall of Harveyized steel can resist the terrible onslaughts of modern and maximite. Torpedoes will take to fighting each other at a combined speed of not less than sixty miles an hour and that will be warfare such as the world has not so far dreamed of. There will be no time to think. Such a battle may be all over in five minutes. There may be no room for tactics, the fight may be quicker than thought. The stricken is put hors de combat by a single blow. In such a fight everything tends to favor craft that can be lost without that loss proving an irreparable disaster.

The question becomes serious as to which nations can best supply the kind of men necessary to such warfare. They will be found among the descendants of Nelson's men-of-war's men. A naval writer in the Fortnightly says: "A thousand destroyers so manned would make the Seven Seas a British lake. In the making 500 might be lost, but the enemy's flag would have disappeared forever, nor would any battleship float a week. This is not a military opinion, but is the gospel of the entire new generation of naval officials."

SELECTING LAND IN THE ARID BELT

C.P.R Proposes to Introduce Vast Scheme of Irrigation

Would Enhance Values, Immense Areas Can be Rendered Profitable.

Montreal, Feb. 12—The question of irrigating some 2,500,000 acres of the arid lands on the line of the Canadian Pacific Railway is now being considered by the executive. The company has made a proposition to the Government in regard to the selection of the 3,300,000 acres of the company's original main land grant, which remains to be allotted. It is understood that the company desires 2,500,000 acres in the arid belt, en bloc, instead of in alternate sections. It thinks that with the aid of this land, irrigation can be made fertile, as has already been proved by the success of the Mormons with their arid lands. The company has reserved a considerable amount of capital for this work, and the plans for the scheme, which embrace a main land farm, the Bow and Saskatchewan rivers are now being elaborated. The company estimates that the cost of irrigation will be from $3.50 to $4 an acre, and that the cost of reclaiming the arid waste will be from $8000,000 to $10,000,000.

The transformation of a waste of 2,500,000 acres into cultivable land, it is estimated, would create homes for 10,000 settlers.

BRITISH OFFER ACCEPTED

Minister Bowen Conveys Venezuela's Acquiescence to Washington Embassy

Washington, Feb. 11.—Mr. Bowen has formally accepted Great Britain's protocol framed to secure a reference of the Venezuelan dispute to The Hague arbitration tribunal. He carried his note of acceptance to the British Embassy yesterday, and personally presented it to Ambassador Herbert. He expressed the opinion that it was a document of a high order from a diplomatic point of view.

BACKS CANADA IN ALASKAN TREATY

A London Paper Wants Britain to Talk Plainly to Uncle Sam

London, Feb. 11.—The Morning Post discussing the Alaskan question, urges the British Foreign Office to use emphatic words in support of the words as emphatic as those of the Canadian lady in the gallery of the Washington Congress. The Post supports the suggestion that Canada renew the previous lease of access to the Pacific on terms made moderate by the United States, and says anything would be better than the present modus vivendi which permits too many opportunities of forcible aggression on the part of the United States customs officials.

STUDY IS "BAD FORM

In the Regiment and Young Leveson-Gower Had to Leave

London, Feb. 11.—The Guards' scandal is monopolizing the press. Indignation is general especially in the case of Lieutenant Leveson-Gower, nephew of Admiral Cochrane, who bullied out of the regiment because he insisted upon studying military subjects. Study is considered bad form in the Guards. Colonel Kinloch won't talk, but the matter will be brought before Parliament.

People who have opinions to express on the subject of the "ragging" in the Guards should remember one fact—that the Brigade of Foot Guards is remarkably efficient from the military standpoint. The Guards' Brigade went through the South African campaign from Belmont to the blockhouse lines with credit. Their dash in the early morning at Belmont taught the Boers the fighting power of the British soldier when he can get at his enemy, and produced, loyal Afrikanders state, an immense moral effect in South Africa. They showed steadiness and constancy all through the war, and probably had a longer term of continuous campaigning than any other infantry brigade. The Foot Guards are the one corps of infantry in Great Britain in which genuine short service prevails. The men remain only three years with the colors, yet their excellence in ceremonial drill is proverbial, and the events of the past three years have shown that good drill and good fighting are not necessarily divorced. Such proficiency on the part of such young soldiers must mean unusually hard work on the part of the regimental officers. Let that be remembered when subalterns' courts-martial are being passed in view.

Does Your Baby Cry at Night

If so, it is well to know the great value of Polson's Nerviline, a household remedy for stomach pains, cramps toothache, sick headache, and the manifold ills peculiar to children. A few drops of Nerviline in sweetened water makes a pleasant drink and never fails to quickly relieve. Nerviline is as good as the doctor in emergencies and costs only 25c a bottle. Get Nerviline from your druggist today.

Dr. Hamilton's Mandrake Pills for Headache.

MENTALLY DERANGED.

Dresden, Saxony, Feb. 11.—It is reported that when the divorce proceedings against the former Crown Princess are called up to-day, counsel for the Princess will ask that a new date for the hearing be fixed, on the ground that the Princess is mentally deranged.

BEET SUGAR INDUSTRY AGAIN DISCUSSED

Should the Town Purchase Bonds and Stock in Proposed Factory?

The Board of Trade to Confer with Town Council to Discuss the Advisability of Such Proceeding.

The adjourned meeting of the Board of Trade was held last evening, when were present D. W. Dumble, in the chair, J. W. Garvin, E. J. Toker, T. E. Bradburn, Jno. Carnegie, Geo. Fitzgerald, J. Hughes-Charles, E. M. Elliott, T. A. S. Hay, Lieut.-Col. Rogers, Dr. Jeffs, G. W. Bennett and A. P. Pomette.

The report of the delegates sent by the Council to Berlin to study the conditions of the beet sugar industry in that district and the possibilities for the successful establishment of a similar industry in our town, was read by Mr. Jno. Carnegie.

The report showed that the delegates were favorably impressed as the result of their investigations, and were inclined to the belief that the introduction of the industry into this county might prove beneficial.

Mr. Carnegie thought the farmers would be working against their own interests not to do all in their power to help forward the introduction of the beet sugar industry into this district. They would receive especial benefits, and would run no risks.

Mr. Garvin did not know whether he could add to what he had said on previous occasions. The heavy task was getting acreage. He was pleased to say twenty men would be employed in this capacity by the end of the week, and they looked to have acquired 3000 acres by the end of March, which would be ready for sowing toward the end of May. The constant press reports had an educational influence upon the farmers and tended to bring before the people the possibilities and advantages of the industry.

The adoption of the delegate's report was moved and carried.

MANUFACTURERS COMMITTEE'S REPORT.

To the President of the Board of Trade, Peterborough, Ont.:

Gentlemen,—Your Manufacturers' committee, to whom were submitted the report of the delegation to Berlin to inspect the Sugar Beet Industry, and the figures pertaining to the purchase by the town of $25,000 worth of stock in the Peterborough Sugar Co. and also $25,000 worth of the company's bonds, bearing 5 per cent. interest, beg leave to state that they have considered the whole matter carefully and ascertained the following facts:

1. The Peterborough Sugar Co., Ltd., has been incorporated by Letters Patent under the Great Seal of the Province of Ontario, its object being to manufacture beet sugar, and for that purpose erect a factory at or near the town of Peterborough, and its provisional directors are Messrs. T. E. Bradburn, James Kendry, M.P., J. W. Garvin, Thos. M. Hunter and Arthur Stevenson.

2. The authorised capital of the company is $350,000.

3. The company has arranged with a Construction Co. to erect and equip a factory with a daily capacity of 650 tons, at a cost of $565,000, site included, of which amount $165,000 of stock, $275,000 of the company's bonds, bearing 5 per cent. interest, and $125,000 in cash will be accepted in payment.

4. It is intended to locate the factory by or near the banks of the Otonabee at the south of the town; and the Construction Co. has contracted to erect a main building, 226 by 60 ft., and 5 stories high, with walls of solid concrete, in which the extracting and refinery machinery will be placed; a warehouse with two floors, 100 by 65 ft; a machine shop 55 by 35 ft; a laboratory 66 by 60 ft; and beet sheds which will contain 6000 tons. The factory will be a large and handsome structure, equipped with a complete French plant of most improved design, and guaranteed to give the best results.

5. Recent tests in growing beets have proven that the soil in Peterborough and adjoining counties is especially adapted to such an industry; in fact, is unsurpassed on the continent.

6. Five years ago Michigan State secured its first sugar factory. To-day there are seventeen in operation in that State, and several others being erected. This indicates that the industry has proved satisfactory there, not only to the farmers, but to the capitalists as well.

7. Sugar is a staple food and must be had. Canada has been sending millions of dollars yearly to Germany, France, and other countries, for sugar, which, apparently, can be manufactured at home advantageously. Canada has at present four sugar factories in operation. It would take about 25 others to supply the home demand.

8. Apart from the soil, Peterborough has exceptional facilities for a sugar factory: Railroads radiating in every description, upon which beets can be brought in, within a radius of 50 miles, at 50 cents a ton; the Trent Canal system, with its winding river and numerous lakes, upon which beets can be carried to the factory for 30 cents a ton; illimitible quantities, near at hand, of the most suitable limestone, etc.

9. Such a factory, with its immense quantities of pulp for cattle-feeding purposes, and its liquid by-products, would doubtless lead to the establishment here, at an early date, of a condensed milk factory, and of chemical works.

10. The Peterborough Sugar Co. has now between 15 and 20 prominent farmers and others canvassing daily for acreage, and the probabilities are that before the 1st of May there will be at least 4000 acres contracted for, which at 14 tons to the acre, on an average, would keep the factory running for 100 days of 24 hours each—the usual period of the best managed factories.

11. The report of the special delegation sent to Berlin is regarded as favorable to the establishment here of such an industry.

12. We have examined Mr. Garvin's figures, as presented to the Board of Trade last Thursday evening, and find them approximately correct. The 20 year debentures would probably need to be issued at 4 per cent. instead of 3 3-4 per cent., which would require $1000 annually, and the yearly amount needed for a sinking fund at 3 per cent. instead of 3 1-2 per cent. would be slightly more than $600. To purchase $25,000 worth of the company's bonds—a first mortgage against the plant—20 year debentures would need to be issued at any 4 per cent., which would require $1000 a year. As the company's bonds bear 5 per cent. interest the town would receive $1250 per annum from this source, or $250 annually more than the 4 per cent. payable on the $25,000 of debentures.

If the stock yielded a dividend per annum of 10 per cent. only, which we understand is a low estimate, the town would net $600 annually from this source.

Allowing for the 1 per cent. extra received in interest on bonds, even a 7 per cent. dividend per annum on the stock would yield the town a small profit.

In view of the above facts, your committee is of the opinion that the risk to the town in purchasing said stock and bonds would be slight and the probable gain and importance of the community great.

D. W. DUMBLE.
F. H. DOBBIN.
T. A. S. HAY.
H. C. ROGERS.
THOS. BARRIE.
R. FAIR.
W. SAILSBURY.

Mr. Garvin said the beet sugar industry was a matter of great importance to the community at large. He thought the town should be prepared to take a fair amount of risk. Not that he considered the town in purchasing the stock and bonds would be taking much risk, for 10 per cent would be a low dividend to contemplate. But they were reasonable men, and did not want to make out too strong a case. It had been urged that it had not been the intention of communities to interest themselves in this wise. Such a standing was a dangerous precedent. Why should they not help forward an industry that would be advantageous to the community. The river flowing to such a height would be a saving to Peterborough in this connection. They could bring the water from the Otonabee river by means of pipes. Another argument that pointed to the success of the industry in this district was the superior quality of the soil. It was the idea of the company if possible to sell their stock in the community, and it was only right that the community as a Corporation should purchase the proposed amount of stock and bonds. The action of the Corporation would have a material influence upon getting the factory in our midst.

Mr. Dumble said, regarding the sugar industry, he was told that 90 per cent. of the sugar used in Canada is not from Canadian grown beet, but the product of German import. Was it wise to pay out money for the support of a foreign nation and foreign capital when we can support our own industries. The country is rich enough to supply its own wants without having to be supported in this wise from abroad. If the conditions in Michigan were favorable to the industry, they should be favorable here. He thought the agricultural community would be wise to create another industry, as was done by the introduction of the cheese industry, which was built up in a few years. He thought the Board of Trade should command the people to encourage the industry. He thought the place was suitable and the time opportune. In considering whether the Board could take the responsibility of taking this thing before the people, he did not see anything in the proposition that was not fair. He did not want the Board to do anything rash. If they did anything, they must feel it was the right thing.

It was raised that the factory would only work three months, but it was pointed out that in that time they work continuously, employing three shifts.

Mr. J. Hughes-Charles admired the way Mr. Dumble treated the subject. He spoke not as a politician, but as a Canadian. If we kept having goods manufactured abroad, we were only injuring ourselves. What we can produce we should take advantage of.

Several other speakers gave their views, which were mostly in favor of the proposed industry.

It was eventually moved "That the Board realize the advantages of the industry and would confer with the Council as to the advisability of the proposed approbation."

The meeting then adjourned.

THE EASTERN QUESTION BECOMING VERY SERIOUS

Text of the Original Agreement of the Powers Made in 1841

The Peace of Europe Now in the Hands of the Sultan of Turkey—Agreement of Powers in 1841

London, Feb. 12— Although Russia's new policy in the Balkans still remains enigmatical and will probably so remain until the joint note of Austria and Russia concerning the project of reforms in Macedonia shall have been made public, some idea of the Dardanelles affair, means may be gathered by a review of Russian diplomacy touching that question since the signing of the original agreement of the powers in 1841.

This document stated that the powers would support Turkey in her refusal to admit ships of war into the Dardanelles. The Treaty of Paris concluded in 1856, after the Crimean war, agreed to renew the treaty of 1841, "with the exception of some modifications of detail which do not affect the principle on which it rests."

These modifications, however, under the gentle ministrations of Russian diplomacy, developed into Article XI, XIII, and XIV of the Treaty of Paris. It is therein stated that the Black Sea is neutralized; that its waters and ports are thrown open to the mercantile marine of every nation, and, in consequence, "His Majesty, the Emperor of all the Russias, and H. I. M., the Sultan, engage not to establish or maintain upon that coast any military maritime arsenal." In 1864, while England and France were watching, as not altogether disinterested spectators, the American Civil War, Russia turned the harbor of Porti into a naval depot, and created at Odessa a fleet of steamers which really came under the diplomatic defination of a warship—"a vessel so armed, or capable of being armed, as to be able to fight."

In 1869 England called the attention of the powers to what was going on in the Levant, but no formal protest was entered for the simple reason that the approach of the Franco-German War left England single-handed, while immediately after the war both France and Germany believed that they owed Russia a debt of gratitude—for keeping Austria from joining one side or the other.

This was the situation when Prince Gortchakoff sent out a circular to the powers from St. Petersburg. He plausibly pointed out the unfairness of the treaty as far as Russia was concerned. While Russia, he said, had "loyally deprived herself of the possibility of taking measures for effective maritime defence in the adjoining seas and ports, Turkey preserved her privilege of having an unlimited number of warships in the archipelago and straits, while France and England were also at liberty to assemble their squadrons in the Mediterranean." The result of this circular was a treaty concluded in London, March 13, 1871, which declared that the Black Sea Clauses of the Treaty of Paris, as well as the Straits Convention, annexed to it, had been abrogated and replaced by an article, which read as follows:—

"The principle of closing the Straits and of the Bosphorous is maintained, with power to H. I. M., the Sultan, to open the said straits in time of peace to the war vessels of friendly and allied powers in case the sublime Porte should judge it necessary in order to secure execution of the stipulations of the Treaty of Paris."

Obviously, the amendment was readily accepted by the German, French and British representatives for the reason that they believed that Russia in the Black Sea was thus laying herself open to freer inspection. The logical conclusion of the modifications made in the original treaty of 1841, is that Russia aims at a free passage of the straits at all times for her war vessels.

The awaited reply of the Porte to England's protest against the recent passage through the Dardanelles of Russian torpedo-boat destroyers must, of course, be founded on that amendment of 1871, and the Porte must explain why it judged the passage of the Russian war vessels "necessary in order to secure execution of the stipulation of the Treaty of Paris."

On the plausibility of the Sultan's answer may depend the peace of Europe.

BOY ATE RED PEPPER DIED OF STARVATION

Had Convulsions and Could Not Swallow After

Montreal, Feb. 11.—The courts will have to deal with an extraordinary case as a result of a verdict of manslaughter returned by the coroner's jury at an inquest held into the death of A. Pascal Fex, the six year old son of Joseph Fex, St. Lagare, County of Vaudreuil, near Montreal, who died on Sunday, after several months of suffering.

The evidence showed that in June last the father took his boy with him to a building bee at Alphonse Charlebois, and Miss Sududa Charlebois, 20 years of age, gave the boy a red pepper to eat. Severe sickness and convulsions followed, and vomiting was kept up for five or six days, after which he was never able to swallow food. The cause of death, according to medical testimony, was starvation, and the jury returned a verdict holding Miss Charlebois criminally responsible for the death of the boy, and ordered her arrest.

The coroner pointed out that when death occurs as the result of an act which was not in itself intended to cause death, but merely for mischievous purposes, the perpetrator becomes criminally responsible for the death.

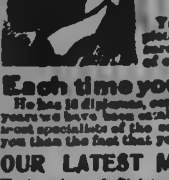
A Surprising Discovery

You will be surprised in trying Catarrhozone to find how quickly it cures cold in the head. The agreeable, penetrating vapor quickly traverses every air cell and passage of the nose, throat and lungs. In one breath it carries instant death to the millions of germs infesting the respiratory organs and breaks up a cold in ten minutes.

A trial will convince you that Catarrhozone is the most potent, satisfactory and pleasant cure for colds, Catarrh, Deafness, Bronchitis, Asthma and Lung Trouble. Complete outfit, $1.00; small size, 25c. Druggists or N. C. Polson & Co., Kingston, Ont.

Hamiltons' Mandrake Pills cure Biliousness.

VARICOCELE AND STRICTURE



We guarantee the Latest Method Treatment discovered by Dr. Goldberg to be a permanent and positive cure for Varicocele and Stricture without cutting, stretching or loss of time. In Varicocele it absorbs the bagging or wormy condition, equalizes circulation; it at once stops Pain in the groins, also stops all drains, thereby giving the organs their proper nutrition, consequently vitalizes the parts and restores lost powers. In Stricture it absorbs the tissue, stopping smarting sensation, nervousness, weakness, backache, etc., while in all prostatic troubles it is the treatment par excellence. So positive are we that our latest method Treatment will cure you that you can

PAY WHEN CURED

You need pay nothing until you are convinced that a thorough and complete cure has been established. It makes no difference who has failed to cure you, call and see us, as we will give you a thorough examination free of charge and may be the means of saving you years of suffering.

Each time you call you see Dr. Goldberg personally

He has 18 diplomas, certificates, etc., which testify to his standing and abilities. The number of years we have been established in Detroit and the cures we effected have ranked us the foremost specialists of the country. We can give no stronger guarantee of our abilities to cure you than the fact that you need pay nothing until cured.

OUR LATEST METHOD TREATMENT GUARANTEED TO CURE

Varicocele and Stricture without cutting, stretching or loss of time. Also Blood Poison, Chronic, Private, Nervous, Impotency, Kidney, Liver, Bladder, Stomach, Female and Rectal Troubles. CONSULTATION FREE. Call or write for blank for home treatment. BOOK FREE. Hours, 9 a.m. to 8 p.m. Sundays, 10 a.m. to 2 p.m.

All Medicines for Canadian Patients Shipped from Windsor, Canada.

TWO FACTORS IN FINANCE

There are two important elements affecting United States finances to which Henry Clews, the New York banker, calls attention in his last circular, which says:—

"About the only uncertain element in the monetary outlook, so far as our international exchanges are concerned, is our continued large imports. These are now running very heavy, and seem likely to remain large for some time to come. This is a perfectly natural sequence of the high level of prices now prevailing in this country; it is one of the inevitable readjustments that always follow abnormal conditions. Europe has been depressed and prices are low. America has been progressing marvelously, and prices are high. Prices like water, seek their level; hence we may look for large imports until conditions have been more nearly equalized, either by a drop in prices here, or a rise in values abroad. Most likely it will be a decline in values here that will first check the growth of imports.

"There is just one other factor in the situation that might possibly affect the money market unfavorably, unless good judgment prevails, and that is the movement obliging the trust companies to carry a reserve. This is a step in the right direction, and one already in effect in concerns which place sound banking methods above the desire to present record-breaking statements. All the trust companies should be obliged to carry a reserve in their vaults of not less than 5 per cent. A somewhat greater sum would do no harm; but if anything beyond 5 per cent. is imposed, it should be done gradually, as the sudden locking up of $40,000,000 or more of a reserve would create a very undesirable and unnecessary stringency. The value of reserves is to really use them in emergencies, and as long as the trust companies remain deficient in this respect they will be an inevitable element of weakness and suspicion. The movement is an eminently proper one, and if conducted on reasonable lines will serve to strengthen confidence where it is most needed. It is one of the most reassuring movements of the day."

THE DOURO COUNCIL

Council met pursuant to adjournment. Members all present. The Reeve, Mr. John Quinn, presiding. The minutes of previous meeting were read and confirmed.—Moved by Mr. Curtis and Ryan that the Auditor's report be received and adopted and that the clerk get 200 copies printed in pamphlet form.—Moved by Mr. Ryan and Allen, that with regard to the application of John Shea, to have the south-east quarter of lot 2, concession 11, detached from S. S. No. 11, and have the same attached to S. S. No. 3 for school purposes, that the clerk notify all parties concerned that it is the intention of this council to pass a by-law at its meeting to be held on March 30th next, giving effect to said application.—The following accounts were presented: Examiner Printing Co., $19.25; John R. Condon, $1.00, work on road in 1902; F. D. Armstrong, $4.50, arbitration fees re alteration of S. Sections Nos. 3, 11, 9, and 17; James Leahy $10, Board of Health expenses re scarlet fever at John P. Leahy's; Collector's salary $40.00. The Reeve was appointed a commissioner to purchase any timber or plank that he may consider necessary for the construction or repair of culverts.—Moved by Mr. Curtis and Ryan that James Barry be re-appointed treasurer at a salary of $30, and that the clerk prepare the necessary by-law to be passed at the next meeting of the Council.

On motion the Council adjourned to the 30th day of March next, then to meet at 10 o'clock a.m.

DISTRICT NEWS

FROM OUR OWN CORRESPONDENTS

KEENE.

—Mr. Leonard Brown has a large smile for everybody these days. It's a girl.

The present bad weather is making it very unpleasant for those who are getting out wood.

—The last carnival of the season will be held on Friday night when a large crowd is expected to be present.

—The funeral of Mr. Alex. Drummond who died in Peterborough on Sunday, took place last Tuesday to the Keene Cemetery.

—A number of young folks from here attended a pedro party at Mr. Walter Renwick's on Tuesday evening, and spent a very enjoyable evening.

—The annual ball under the auspices of the hockey club was held last Friday evening and was a decided success in every way. There were about 125 couples present.

—A youngster who is "wintering" a short distance from Keene, made himself obnoxious at the rink the other evening, by insulting some of the girls. Better be careful, little boy, or some of the girls will box your ears.

—Keene and Norwood hockey boys played off their tie in Peterboro on Monday evening. The game was very closely contested from the first. At half time the score stood 1—0 in Norwood's favor. At the expiration of time the score was 3—3. It was decided to play ten minutes longer, and in that time Norwood scored one goal, thus deciding the game. This makes Norwood winners in this district, but they have a lot of hard work before them before they win the cup.

APPLICATION TO PARLIAMENT

NOTICE IS HEREBY GIVEN on behalf of the Corporation of the Town of Peterborough that an application will be made to the Legislative Assembly of the Province of Ontario at the next session thereof for an Act for the following purposes:

1. To amend 62 Victoria (2), Chapter 71 by striking out the following words in the first subsection of the second section thereof, namely, the words "at any point thereon south of and in no way using power obtained from the dam known as the Nassau Dam on the said River Otonabee" in the 3rd, 4th and 5th lines thereof; the words "for Municipal purposes only" in the 17th line thereof, and the words "except commercial lighting or private lighting" in the 18th and 19th lines thereof, and for such other amendments thereto as may be necessary to remove the restrictions imposed on the said Corporation by said subsection.

2. To authorize and empower the said Corporation to erect and maintain poles and other appliances on the streets and public places of the said Town for the transmission of electricity in and through the said Town of Peterborough and to charge a rental therefor, and to make regulations for the use, management, maintenance and control of same, and to enter into agreements with any company, firm or person now or hereafter supplying electric energy to the inhabitants of the said Town for the use of said poles and appliances on such terms as may be agreed on.

3. To authorize and empower the said Corporation to issue debentures of the said Corporation without the assent of the rate-payers for the sum of $7000 to meet the deficiency on the sale of waterworks debentures issued for the purchase of the waterworks.

4. To authorize and empower the Commissioners of the Waterworks to form a contingent fund and to retain out of the revenues derived from the said waterworks an annual sum not exceeding one-half of the net revenue for that purpose.

Dated at Peterborough this 29th day of January, 1903.

E. H. D. HALL,
Solicitor for the Applicants.

To Set Her Free

(COPYRIGHTED)

By FLORENCE WARDEN.

Author of "The House in the Marsh," "A Prince of Darkness," etc.

to overwhelm him by any uncomfortable display of excessive gratitude, yet there was no doubt he was her rescuer, and if she met him again she could hardly fail to refer to the fact.

Foiled in his own attempt to escape, Astley was seized with a sudden impulse to laugh on finding that the girl herself had been foiled in a similar fashion. When, therefore, she reached the fireplace, and turned round abruptly, in a shamefaced manner, towards him, she saw that he was convulsed with merriment.

Astonished, as well she might be, the girl stared at him in silence. Then, half turning as she stood with one foot upon the fender, she caught sight again, as she had done upstairs, of her own reflection in a weather-stained looking-glass, and her feminine vanity suddenly got the better of every other feeling.

The expression of her face changed suddenly as she stared at the unattractive-looking object before her. It needs beauty of a high order, and in the most perfect condition at that, to stand the ordeal of an appearance in a shapeless hat which has been thoroughly soaked and imperfectly dried, seen through the medium of an early Victorian looking-glass. The girl's good looks—for she was good-looking—could not stand such a test. Her olive skin looked green; her black hair looked lank, twisted up, half-dried, in an unbecoming fashion; and her large dark eyes and fairly regular features counted for nothing against these odds.

Instinctively she turned her head away from Astley, who was struggling to regain his gravity. For the awful thought had suddenly struck him that she might think he was laughing at her. In fact, the curious little knob into which she had fastened her hair peeped out under her shapeless hat in an extremely comical way. It behoved him therefore to be careful.

"I'm afraid you think it very stupid of me to laugh," he said, as he came forward a little way into the room, and stood behind one of the mahogany arm-chairs.

"Oh, no. Some people see fun in anything," said the girl, somewhat distantly.

Evidently she was not grateful for what he had done for her. Astley felt that this was a great comfort. And it amused him to think that he had been anxious to avoid an hysterical scene of tears and thankfulness, while she had been just as anxious to escape the sight of him at all.

"Well, when things are at a very bad pass they have a way of taking a laughable turn, don't you think so?" said he.

"I can't say I do," said the girl, tartly. "There's a long walk in the snow to be faced, for one thing, and in the dark, too."

And she glanced out into the gathering gloom. Astley broke in cheerfully:

"Oh, it's not quite so bad as that. I've sent in to Oxford for a cab, you know, and—"

"But I mean to walk," struck in the girl, and she suddenly sprang away from the fireplace and made for the door.

Astley, however, was nearer to it than she, and, in spite of his lameness, was able to obstruct her passage.

"Oh no, you can't do that," he said quickly, speaking with sudden gravity.

"Oh, but I can, I must!" And into the girl's tone there came suddenly the first intimation of inward distress which she had given since her reappearance.

"Indeed you must not. I can't allow it," said Astley, speaking in his turn with curtness, and also with unexpected authority. "To venture on such a walk along an exposed road, in the dusk, with the snow and the wind driving towards you, would be danger, if not certain death, especially after such an adventure as you've had," he added hurriedly.

What gave him authority with the girl was not so much the fact that he had saved her life an hour or two before, but a certain hardness, amounting almost to a suspicion of mockery in his manner, which made her curiously conscious of a feeling of inferiority to him. Though he was perfectly courteous, it was with the courtesy of one who stands in an unassailably superior position. She felt that he looked down upon her, despised her, was courteous only because it was a convention of his class to be verbally courteous to women. The thought enraged her, quite swallowed up, indeed, any impulses she might have had towards gratitude.

"Oh, as for that, I'm none the worse for getting my feet wet," she said, ungraciously, as she paused a moment, watching for her opportunity to slip by him and get away.

"Getting her feet wet" was such a euphemistic description of what had happened that Astley could hardly forbear another smile. The girl saw it and made another dash for the door. She was foiled, however, again.

"Excuse me," said he, "but you must allow me to insist."

The girl drew herself up.

"Suppose I insist too?"

"Then we shall have to see who can insist the hardest," retorted Astley with perfect coolness, "and, to judge by our previous experience, you know, it—will not be you."

The spirit, the dash, the daring went out of the girl's face and bearing in a moment. She gave one shy, frightened look at his face, and turned away with a quivering lip. His manner altered directly.

"I should strongly advise you," said he, with the assumption of a more every-day tone, as he glanced towards the fireplace, "to take off your hat and wait quietly and get thoroughly warm before the cab comes, as you will have a very cold drive."

"And—and you?" faltered the girl, in a strangled voice, and she instinctively turned as if to obey him.

"Oh, I think I shall perhaps stay the night here, unless I tell the cabman to come back for me," he said.

It was quite clear that the girl began to breathe more easily after this. To the highly-strung mood in which he had first met her had succeeded the inevitable reaction, so that she now felt as anxious to conceal her identity from her rescuer and to hide the rash attempt she had made, as she had previously been indifferent to all these things.

"Oh!" she ejaculated in a low voice, in a tone of unmistakable relief. There was a pause, and then she said: "But I don't like to take your cab. And if you've been ill, it's even more important that you should get back than that I should. I think it will be better for you to go first, and to send the cab back for me. I'll promise to wait," she added quickly, and with a certain ingenuousness which confirmed the impression that she was very young indeed. Astley tried not to smile again.

"Oh," said he, "don't trouble your head about me. After [illegible]

A VERY DESIRABLE INVESTMENT

THE McLENNAN PAINT COMPANY

LIMITED

BUFFALO - - - NEW YORK

INCORPORATED UNDER THE LAWS OF CANADA

CAPITAL, - - - $500,000

Dividends on Preferred Stock Paid Quarterly.

For the purposes hereinafter stated, we offer at par,

50,000 of our 7 per cent. Preferred Treasury Stock Shares, $100.00 each

Payments as follows: 20 per cent. on amount of stock subscribed for at time of subscription; 30 per cent. in 60 days balance in 90 days. Receipts will be issued until full amount of stock subscribed is paid, when certificates bearing the Company's seal, and signed by the President, Secretary and Treasurer are issued. The McLennan Paint Co., Limited, have one of the most modern plants of its kind in the world, occupying 300,000 square feet of floor space. The capital of the Company is a half million dollars. The growth of the business has been phenomenally rapid and conservative. In line with other large industries, the Company propose to establish a branch factory in Canada for the manufacture of their products, which are covered by valuable patents, and which practically give the Company a monopoly, and, for the above purpose, offer at par $50,000 of their 7 per cent. Preferred Treasury Stock.

The McLennan Paint Company, Limited, was organized in 1892 by Mr. C. J. McLennan of the McLennan Dipping Process, and other valuable paint-making machinery. The Company began business in rented premises, in East Buffalo. So profitable was the business, and so rapid the growth, that large factories were built in North Buffalo in 1895. The business again doubled, and another plant was added in 1898. In 1901 the Company invented and perfected a line of reds, or vermillions, permanent in color, and at much less cost than the old line colors. This increased the sale of their products practically one-fourth, making it necessary for them to build a new Color and Chemical Works. This factory is without doubt the largest and most modern in the world. Mr. Charles J. McLennan, the President of the Company, and the inventor of labor-saving machinery, such as dipping tanks, mills, etc., is recognised as one of the most skillful and best known paint manufacturers in the country. The name and fame of this Company, and its products, are known all over the United States and foreign countries, and that they will capture the Canadian market is evidenced by the fact that many of the large Canadian manufacturers are at present using their goods, in face of the heavy duty. It is with a view to saving this 25 per cent. duty and adding it to to the profits of the Company that they have decided to establish a branch in Canada, which will be controlled and managed by the parent Company.

Practical men of means, character and national reputation constitute the directorate and management. Each department is managed by a skilled man; monthly statements rendered and careful audet made semi-annually. The books are always open to the smallest shareholder. The finances of such a concern are guarded as closely as the finances of any bank, and failure is practically impossible.

COPY OF TESTIMONIALS.

A. C. Cornell, Toronto, Ont.: Columbia National Bank, Buffalo, N. Y., Jan. 23, 1903.

DEAR SIR,—The McLennan Paint Co. are good customers of this bank, and I have known them personally for years. All the officers bear excellent reputations, and are considered good business men. Their management is evidenced by the large business they have built up, as careful and conservative. They have met with great success in the past, and I beileve that today, theirs is one of the largest and most prosperous concerns of its kind. I have every reason to believe that the stock which they are now offering for sale is a desirable, as well as a safe investment. Yours very truly,

L. H. GETHOEFER, Cashier.

The Merchants' Refining Co., Refiners of Petroleum, Paraffines, Paraffine Wax, Lubricating Oils, Residuum, Napthas, and Gasoline,

A. C. Cornell, Toronto, Ont.; Buffalo, N. Y., Jan. 23, 1903

DEAR SIR,—Your favor of 21st received, and note you are offering for sale $50,000 of the preferred stock of the McLennan Paint Company and ask me what I know of the firm. Would say I have had business dealings for eight years—transactions of many thousands of dollars. I am also doing business with other houses engaged in the same line, and desire to say there is no house in America to-day that stands higher than the McLennan Paint Co. The growth of their business has been phenomenally large, and under the conservative management of the President, Mr. C. J. McLennan, the success of the business is assured in the future. As an investment, in my judgment, nothing could be safer than the stock they offer.

Very respectfully, C. A. SALISBURY, Manager.

A. C. Cornell, Toronto, Ont.: Buffalo, Jan. 26th, 1903.

Dear Sir,—Referring to the sale of $50,000 of our 7 per cent. Preferred Stock, the Prospectus does not elaborate on the proposition, but merely mentions the amount guaranteed. I desire to inform you, however, we could have paid at least 14 per cent. last year, but carried balance to a Reserve Fund, which, necessarily, makes the stock very valuable.

Very truly yours,
THE McLENNAN PAINT CO., LIMITED,
C. J. McLennan, Manager.

P.S.—Having visited this proposition on behalf of some very conservative investors, I can verify all the above. The plant is extensive and modern in every detail; officers and management skilled and very industrious; all the products superior. This is a Canadian Company, Canadian Charter. Having built in Buffalo, in proximity to raw material, by shipping here in ground state and preparing here, will save and add large duty to already large profits. Bear in mind this is not prospective, but a large, rich, going, paying institution. Prospectus, application forms, and any further particulars, and subscriptions, address the undersigned. All cheques or drafts for stock made to the order of the Company, and forwarded to

A. C. CORNELL, Fiscal Agent,
18 Yonge Street Arcade, Toronto, Ont.

Gem Consolidated Gold Mining Company Stock at 50 cents per share is one of the safest propositions ever offered to investors.

The property is located in the heart of a rich section of Eastern Oregon, and is steadily producing—no debts, well-equipped and practically ready to pay dividends.

Deeper Levels, New Hoist, Increased Power, New Mill, More Ore, Greater Earnings
That's the Policy of the

GOLCONDA

CONSOLIDATED GOLD MINES COMPANY

The Golconda made a fortune for its former owners in its surface workings. From 500 feet the shaft will be sunk to 1,200 feet. A new hoisting plant has been ordered. That will carry out the waste rock and the ore. From 20 stamps—the size of the present mill—the reduction plant will be increased to 60 stamps. Nine hundred feet of pipe is being added to the 7,000 foot pipe line. This will increase the electric power to 1,000 horse power.

The GOLCONDA produced ore worth $211,000 per ton. That's the Government record. - - - -

Suppose you were to invest in the future of this great mine? You would want to know something about it and its neighbors; you would want to know everything about its directorate; you would want to know that your invested capital was safe; you would want to know what it would likely earn from the time dividends will be declared—March, 1903—and for scores of years thereafter.

50,000 shares Common Stock, par value $100 each, issued and fully paid	$5,000,000 00
Total Capitalization	$6,000,000 00

Issue of $1,000 000 7% Preferred Stock in 10,000 Shares o $100 each at par.

This Stock is preferred both as to Assets and Dividends.

The shares are entitled to cumulative preferred dividends from the net earnings of the Company, at the rate of 7 per cent per annum, payable half-yearly on the first days of April and October. They may, at the option of the holder, be exchanged for common shar s. They are subject to be called in, in whole or in part, by the Company, at 15.00 per share, at any time on or after 1st January 1909.

The total issue of Preferred Stoca is only $1,000,000.00, the whole of which is now offered.

Subscriptions for 10,000 shares of $100 each of the 7 per cent Preferred Stock of the CANADIAN STEEL AND COAL COMPANY will now be received at par, that is, $100 for each $100 share as follows :—

5 per cent on application.
25 per cent on allotment.
35 per cent 30 days thereafter.
35 per cent 60 days thereafter.

One share of common, par value $100.00, given with each share of preferred.

The whole of the instalments remaining unpaid at any time may be prepaid in full. A discount of one per cent will be allowed upon the par of each share if prepaid at time of allotment.

Notice of allotment will be sent promptly by ordinary letter.

COAL

PROPERTY IN FULL OPERATION

Company owns 9,600 acres of coal property known throughout the coal trade as the New Campbellton Colliery, located on Bras D'Or Bay, County of Victoria, Cape Breton, Nova Scotia. Mine is fully equipped, producing and marketing 100 tons of coal a day at a net profit of $1.00 a ton. Improvements are now being made that will increase the output to over 1,000 tons a day. On present output, figuring 300 working days in year, the net result will more than pay interest on entire issue of preferred, with output of 1,000 tons a day net result will be $300,000 per annum.

IRON

RICHEST ORE IN THE WORLD

Company owns in fee simple, free and clear of all incumbrances, 4,000 acres of ron ore deposit, located at Natashquan (tidewater) situate on North shore of Gulf of St. Lawrence, in the County of Saguenay, province of Quebec.

Deposits contain 20,000,000 tons of ore ABOVE SEA LEVEL ALONE.

Quality of ore is highest ever discovered, running from 69 to 72 per cent. in metalic iron.

More orders for the sale of this ore have been received by the Company than can possibly be accepted, and at a price netting the Company a profit of $2 a ton F. O. B. vessels at Company's docks.

REPORT BY EX-SUPERINTENDENT OF MINE

Cecil R. Gold Mining and Milling Co., Los Angeles, California.

Ballarat, Cal., Nov. 1st, 1902.

Gentlemen,—Your request for my opinion as to the "Santa Rosa" group of mines, and other claims in which you are interested in this territory, to hand, and in reply will say ;

The "Santa Rosa" group, which is located southeast of Ballarat some three and a half miles, consists of twelve claims, equal to 240 acres. The ledge crops out more or less the full length of these claims, showing the same character and formation of work as where development work has been done. In most of the outcroppings it shows highly mineralized rock, with pyrites of iron, mica, schist, slate, [illegible], gouge, quartz and quartzite, all bearing more or less. Where work has been done, it shows a very marked improvement in both quantity and quality of gold-bearing rock. Commencing with the surface, the ore shows much iron and copper stain. All mill tests show rich ore commencing with the surface; in fact, I milled for several days and recovered $50 and over per ton, yet the milling process does not pay more than two-thirds of the value of the ore, the tailings oftimes [illegible] as high as $25 per ton, and never less than $12.50. To save the entire value of your ore it will be necessary to install other concentrators or a cyanide plant. From careful study and frequent examination of the surface of the ground, and down as far as has been opened below the surface, I am highly pleased with the property. It is certainly a fine property, and as good as any I have ever had the pleasure of examining. Considering your mill site, with tramway facilities added, water, fuel, and cheapness of mining the ore, the Cecil R. will be capable of paying enormous dividends when your capacity for milling is increased to what it ought to be.

Wishing you every success, I remain, Yours very truly,

(Signed) G. W. FLEMING,
Ex-Mine Supt. Cecil R. Gold Mining and Milling Company.

Price is now 25 cents a share, and we offer [illegible] shares at this price, but it may be advanced by January 1st, 1903, to [illegible] cents a share.

POSSIBILITIES OF THE GREAT CANADIAN WEST

A Sure and Abundant Source of Wealth—Wheat Raising to Rival the Gold Mines of the Empire

We advise our readers to notice the subscription offer, which will be made in this paper in a few days of the British-Canadian Wheat Raising Company, which has been organized for the purpose of raising wheat in a wholesale way, on ten thousand acres of the best farm land in Assiniboia, North-West Territories. This land is the property of the Company, who propose to raise wheat at the lowest possible cost by employing the most modern steam machinery, etc.

The success of this Company is assured. It will be noticed that its directors are composed of some of our leading citizens, some of whom are connected with the leading Railroads and the Canadian Government; some are members of the bar and some merchants. The affairs of the Company are in the strongest hands, and backed by financial interests that will enable the Company to broaden out from year to year.

The shares of the British-Canadian Wheat Raising Company present an opportunity to the investor that cannot be equaled by any other commercial enterprise in the British Empire. The agricultural year just closed with a record of the greatest wheat crop in proportion to acreage ever grown on unfertilized soil. The conditions of the region are such as to make practically certain a uniform yield. As Canadian hard wheat is of the best quality produced in the world, it commands the best markets and highest returns. A good deal of capital has already been invested both in land enterprises and in the actual industry itself. Companies like the British-Canadian Wheat Raising Co., Ltd., are preparing to operate farms comprising thousands of acres.

Only a limited amount of the Company's Treasury shares will be offered to the public at the present time at their par value of $5.00 each. These shares will undoubtedly command a high premium in a very short time, on account of the great earning capacity of the Company, which expects to start out by paying dividends of fifteen per cent. annually, and leave a large surplus in the Treasury. These shares will be listed on the various Exchanges in due course, and, owing to the small amount in the hands of the public should be traded in at a great advance over the subscription price.

This investment will recommend itself to every person who desires an absolute, assured income together with an advancing value over the price they paid for the subscription shares. The profits to be made are practically assured, as the market for the Company's wheat product is the same as for gold—it is unlimited. There will be a constant appreciation of the Company's lands, and a constantly increasing amount of product for the market, and unlike gold mining, or similar enterprises, the resources are unexhaustible.

It is the policy of the directors to increase the acreage of the British-Canadian Wheat Raising Company, from year to year, so that it will ultimately be the largest Wheat Raising Company in the world. This company will be the largest in the British Empire, and is now only second to the famous Dalrymple farm located in North Dakota, U. S. A.

The property of this Company is located almost alongside the tracks of the Canadian Pacific Railway, where the Company proposes to have its own elevator to deposit their grain and secure the highest market prices from time to time. On account of the large product this Company will have yearly it will receive every assistance and facility from the various Canadian railroads, for the transportation of its grain to the seaboards.

Prospectus with colored maps giving full particulars of this Company, may be had free on application by addressing the Trusts and Guarantee Company, Ltd., 14 King Street, West, (Toronto, Ont.

INTERNATIONAL ELECTRIC MINING Co

185 SUMMER ST., - BOSTON, MASS.

A Dividend Payer for the Past Five Years.

12 PER CENT GUARANTEED

Capital Stock, $500,000. Par, $1.00, full paid and nonassessable

Over eight thousand tons of $50.00 ore mined and smelted from this group of mines.

A limited number of shares of the stock of this Company now offered at seventy-five cents per share. This price will shortly be increased to par. Stock registered by the International Trust Company, Boston, who is also the transfer agent.

This Company has a small capital stock.

The International Electric Mining Company owns seven mines and milling plant.

The Brooklyn and New York mines of this Company lie north of and join the Victor and the Hoodlum—two rich mines that are now being worked by California parties. On the west lies the Electric Mining Company's mines, in these mines are millions of dollars' worth of rich ore in sight. On the south, adjoining the Berlin mine of this Company, is the Montazuma and Clipper. From the Montazuma over three million dollars has been taken within 80 feet of the grass roots.

This Company owns free and clear seven mines of twenty acres each, all containing rich ore, located in the Arabia and Trinity mining districts, Humboldt County, Nevada. The Company has worked these mines for the past five years, and is now driving a tunnel to cut out a rich ledge about 300 feet from the surface. The Arabia mining district, in which these mines are located, is a lively district—a great many men being employed there. The tunnel now being driven on the Brooklyn mine has about 50 feet already completed. When the tunnel cuts the main ledge, which has just been reached by the Victor tunnel about 600 feet, the Brooklyn will have about 300 feet stoping ground, which runs high in gold and silver, over $50.00 per ton.

The Company is offering for a short time a limited amount of stock for the enlargement of its plant and the working force at the mines and for the completion of the Brooklyn tunnel.

This Company has thousands of tons of rich ore in sight.

We are not making a lot of talk, because it is unnecessary. What the investor wants is dividends, which we have paid for the past five years. Now if you want a safe 12 per cent. investment, let us hear from you.

INTERNATIONAL ELECTRIC MINING Co.
185 Summer Street, Boston, Mass.

References furnished upon application.

THE OLD COMSTOCK

A California mining paper has this to say: "Nevada, that grand old stamping ground of mushroom millionaires, who plucked enough wealth from her prolific fields to build mansions, banks, and big hotels in San Francisco, and palaces in Paris and London, is again astonishing the world by making more millionaires and by yielding millions in gold and silver from a new field which rivals the old Comstock lode in the days of its pristine splendor. Not only in Tonopah and Arabia districts, where within the past year nearly ten millions have been exposed, are operations active, but in every mining district in the Silver State are operations active, and Nevada will once more take her place among the big producers, the peer of any of them."

Daily Nevada State Journal, January 4, 1903.

Lovelock, Nev., October 6, 1902.

International Electric Mining Co.,
Boston, Mass.

Gentlemen,—If you wish to sell your Brooklyn mine I can get you a good price for it. If it was mine I would not sell it at any price, as you have more than a million dollars of ore in sight.

G. W. OSTRANDER, Supt.

Boston, Mass., December 1, 1902.

Mr. Geo. D. Burton, Treas.,
International Electric Mining Co.,
Boston, Mass.

Dear Sir,—During the six months of October and November of this year I visited the mines of the International Electric Mining Company, situated in Arabia and Trinity mining districts, Humboldt County, Nevada. I found the country remarkably mineralized; in fact, the possibilities of the country as a mineral producing country are yet unknown. For years it certainly has produced well. The work now being done in the Arabia and Trinity districts establishes the fact that they are fine producers.

I also found that there is a great deal of interest being taken in these properties, which have produced a great deal of wealth the past quarter of a century.

M. A. LATHROP, Mining Engineer.

GILPIN COUNTY

IS THE OLDEST GOLD PRODUCER IN COLORADO

—In 1902 she produced $4,000,000.00.—
Here is where Hundreds have been made Millionairs.

THE ELECTRIC SPARK GOLD MINING COMPANY

Is in this famous little kingdom, and is surrounded by mines that are making their owners wealthy.

CAPITAL STOCK $200,000 Par Value $1.00

We are working this mine every day doing a great amount of development work which will enable us to commence regular shipping very soon. Our shaft is now 175 feet deep, with a streak of pay ore starting at the grass roots, the vein is over 3 feet wide at the bottom of shaft, and runs from $46.00 to $86.00 per ton, mostly gold. We are only three-quarters of a mile from railroad and have a well traveled wagon road from mine to depot. There are thirteen stamp mills at Black Hawk, three-quarters of a mile from this property. Our company is managed on conservative lines by practical mining men who understand the business and are familiar with this field of gold.

We have placed a small block of this stock on the market at 20 cents per share which will be worth $1.00 in a short time. Now is the time to buy.

The Electric Spark Gold Mining Company,
NEBRASKA TELEPHONE BLDG, OMAHA, NEB.
C. H. J. MITCHELL, Fiscal Agent, Peterborough, Ont.

"THE FRIDAY MINE"

Located at Pearl, Willow Creek, Boise County, Idaho

—About 25 Miles Northwest of Boise City—

THE FRIDAY GOLD MINING CO. is a corporation duly organized under the laws of the State of Oregon, with head office at Sumpter, Oregon, owning and controlling "The Friday Mine." Capital Stock $1,000,000, divided into 1,000,000 shares. Par value $1.00 per share, fully paid and non-assessable, no personal liability. 250,000 shares have been set aside and placed in the treasury of the Company to be sold for the purpose of equipping the "Friday Mine" with machinery. It is for this purpose we are offering you stock in this great mine. This plant will handle 60 tons of Friday ore every 24 hours. The general average of the Friday ore is over $20 per ton. The ore as it was shipped to the smelters at Salt Lake averaging over $25.00 per ton. The Friday is highly developed, great quantities of ore blocked out and in sight ready for the mill. As soon as the mill is completed the Friday Mine will again pay dividends.

Large ore bodies which will net to the company $50,000, for the first few months, are now blocked out ready for the mill. As soon as the mill is completed you will draw your regular monthly dividend. It is safe, certain and conservative.

We are not soliciting your money for the purpose of developing the mine, but only for the purpose of erecting a mill to work the ore bodies in the mine. The company is officered by men of well known business ability, mining experience and strict integrity.

Hon. Martin H. Jacobs, State Mining Inspector of mines, for the State of Idaho says: "The Friday has a large amount of good ore in sight, and there is no question about its being a good paying property."

Make all your cheques and drafts payable to

NEIL J. SORENSEN,

or

R. J. KIDD, Fiscal Agent,
348 George Street, Peterborough.

Thunder Mountain !

is the richest gold producing camp in the United States, and also the largest. The Thunder Mountain district, in central Idaho, is twenty miles wide and forty miles long. In comparison with this we have Cripple Creek, four miles wide and seven miles long. In many of the Thunder Mountain mines ore has already been reached that carries ONE THOUSAND DOLLARS IN GOLD TO THE TON. All of the Thunder Mountain ore is free milling, which means that it can be treated by the cheapest extraction process known—the ordinary stamp mill. It can be both mined and milled at a cost not to exceed $2 a ton. The past years operations in the several working mines have opened up millions of tons of ore that will give a net profit of from $10 to $30 a ton, enabling the respective companies to pay dividends at a rate never before equalled. Such is the showing and the prospect of the

EAST DEWEY GOLD MINING CO.

which unless all indications are at fault, will become the largest producer in the district. The EAST DEWEY mine, which it owns outright, is located directly on Thunder Mountain, just east of the famous "Dewey" mine, which already has $20,000,000 of ore in sight. The surface area of the East Dewey mine is one hundred and twenty acres—six full quartz claims. The company has also secured the big GOLDEN GATE mine, in the Big Creek section of the Thunder Mountain district—which has been so aptly termed "The Pot of Gold"—and is now developing the mine with all possible speed. For a distance of 9,000 feet, nearly two miles, the Golden Gate mines cover a mineralized ledge that is 900 feet wide, with an average height above the tunnel level of 500 feet, thus giving it the largest exposed tonnage of any mine in the west.

If you would share in the enormous profits which these figures indicate and which these developments promise, invest your money in "East Dewey" Stock. It can be bought to-day for 10 Cents a Share. Its par value is $1.

If the East Dewey mines are what they appear to be, and there is absolutely no reason to doubt or question these indications, this stock will eventually be worth at least $10 a share, and to-day you can buy it for ten cents. PRICE ADVANCES TO FIFTEEN CENTS ON FEBRUARY 28th. 5% discount allowed for cash. Stock sold at flat price of 10 cents on deferred payments, 10% with application, and 10% monthly until paid. Full particulars, prospectus, etc., on request.

BUY ! WHY ?

BECAUSE

THE SOUR LAKE OIL CO.

Has placed four-fifths of its stock in the treasury for development work ; and because

Oil is reached in less than half the depth required on Spindletop Heights in Beaumont ;

The people in Canada are well acquainted with the management, which is in the hands of HON. JOHN L. BITTINGER, United States Consul General to Canada ; F. S. Ashley, Vice-President of the Massachusetts Securities Co., and W L. Marston, Vice-President of the American Union Oil and Refining Co.

These gentlemen have made a dividend payer out of one company and have raised the value of its stock from 5c per share to par value, or 25c, within a very short time ;

The company is operating in the Sour Lake field, where fewer wells will tap the oil than at Spindletop ; this insures a greater flow of oil, and it is of a better quality ;

This is the first allotment of shares at the present price of TEN CENTS PER SHARE ; it is the lowest price at which you can buy, and the time left in which to buy at TEN CENTS is short.

Make remittances and inquiries direct to

Colonial Securities Company,
62 Wall Street, New York City.

Order now at ten cents and make monthly payments.

TOWN AND COUNTY NEWS

DASHES HERE AND THERE BY TIMES' REPORTERS

Hear Mr. Burnham on Friday evening in the Opera House in connection with the workingman's educational movement. Seats reserved for ladies. Subject: "The Workingman in Ancient and Modern Times and the Labor Movement in America." Silver collection.

Boarders Wanted

Good accommodation for one or two lady boarders, or a married couple, near Cordage or Electric Works. Apply at Times Bookstore for address.

Apprentices Wanted

We want a good smart boy, at The Times' Bindery, and also a smart boy to learn press work. Apply at the business office.

St. John's Church

The Men's Success Club of St. John's will give a reception in the school rooms in honor of the church and their friends Monday evening, the 16th inst., commencing at eight o'clock.

Our Fire Loss has been adjusted—will be Opened in a few days—A. W. CRESSMAN

Our London Office

The Times has opened an office in London, England, which is under the management of Messrs. E. J. Hardy & Co. The office is situated at 30 Fleet street, where our Canadian friends visiting England are invited to call, and where they will be made welcome. The Times will be on file in the office.

Water Street Waterway

On account of the unsatisfactory way in which the granolithic walks have been built on Water street, whenever there is a thaw pedestrians are obliged to take to the middle of the road, the walks being under water. Just now people have difficulty in getting into their homes on this account. This only goes to show that a practical man is needed to superintend the building of our walks and the care of our streets.

A Successful Canadian

The Times had a pleasant call yesterday from Mr. Sidney, of Georgetown, Colo. Mr. Sidney is a Canadian and a native of Owen Sound, where his mother resides. He went to the Western States 15 years ago, where he has been very successful in mining. Mr Sidney represents the East Argentine Mining Company, which properties are amongst the richest in the State. He went west yesterday, and will return to Georgetown in a couple of weeks. A few blocks of stock in this splendid property is being placed on the Canadian market, the advertisement of which will appear in these columns in a few days.

THERE IS A COLD SNAP COMING

but a WARM SNAP in prices at the old reliable firm of PETE SIMONS & CO. will make matters right. He quotes the following red hot prices:

$ 7.00 Overcoats reduced to $ 4.00
20.00 Overcoats reduced to 14.00
4.50 Peajackets reduced to 2.50
7.00 Peajackets reduced to 4.50

YOUNG PEOPLE'S NIGHT

Special Meeting at St. Paul's To-morrow Evening

At to-morrow evening's meeting in St. Paul's church, the evangelists will speak especially to students and young people. The meeting, however, will be of general interest to all, and a good attendance is looked for.

40TH REGIMENT

The Annual Meeting was Held at Brighton a Few Days Ago

The annual meeting of the officers of the 40th Regiment was held at the Central hotel in Brighton a few days ago.

Among the business done was the appointment of Mess and Regimental committees and the Campbellford committees. The Campbellford brass Band was again chosen as the Regimental Band for the current year.

A CHANGE OF OWNERSHIP.

Mr. T. J. O'Connell Has Purchased Real Estate Business of Mr. T. Hurley & Co.

Mr. T. Hurley & Co., who for the past number of years have been in the real estate business in Peterborough, have disposed of their business to Mr. T. J. O'Connell. Mr. O'Connell has been in the employ of Mr. Hurley & Co. and will be found a worthy successor to Mr. Hurley. The firm has enjoyed a liberal patronage, which we hope will be transferred to the new owner.

FIRE CLAIMS SETTLED

The Insurance Companies Involved in Late Fire Pay Up

The many friends of Mr. A. W. Cressman will be pleased to learn that he has secured a satisfactory settlement with the insurance companies, and the work of removing the charred stock and repair of the building will now begin.

The salvage is practically worthless, so that Mr. Cressman will have little or no old stock to dispose of. While his loss is heavy he will have the satisfaction, when the time comes, of opening with full lines of new and up-to-date goods.

FIFTY YEARS WED

Mr. and Mrs. J. H. Mowry Celebrate Their Golden Wedding

On Tuesday evening last Mr. and Mrs. J. H. Mowry, formerly of Peterborough, celebrated the fiftieth anniversary of their wedding, at the residence of their son, Mr. M. C. Mowry, 662, Euclid avenue.

Numerous costly presents gave evidence of the esteem in which the old couple are held. Advantage was taken of the occasion to baptize the youngest grandchild, an infant son of Mr. and Mrs. M. C. Mowry. A most enjoyable evening was spent, and many were the expressions of good wishes for the continued health of the bride and groom of fifty years.

DUTY ON BINDER TWINE

Mr. R. R. Hall Joins a Cordage Deputation at Ottawa

Mr. R. R. Hall, of the Canadian Cordage Company, has been in Ottawa, where he joined the representatives of the eleven Canadian binder twine factories in waiting upon the Minister of Customs and Finance, asking for the imposition of a duty upon binder twine. Now that the control of the Philippines has passed into the hands of the United States, the American manufacturers are able to control the supply of raw material and obtain their Manila fibre at three-eighths of a cent per pound less than their Canadian competitors, consequently the former are able to undersell the latter in the Canadian market. The Canadian manufacturers are therefore looking to the restoration of the duty to afford them relief from ruinous competition.

Unless relief is forthcoming, it looks bad for the home industries.

DEATH OF MISS M'KEE

Daughter of Mr. W. C. McKee, of Seattle, Passes Away

The Times joins in extending heartfelt sympathy to Mr. and Mrs. Wm. C. McKee, of Seattle, Washington, formerly of Peterborough, in the great loss sustained through the death of their daughter, aged 21 years. Miss McKee was born in Peterborough, and will be remembered by many, a charming little girl of four or five years, when the family moved to the coast. The following from the Vancouver News-Advertiser, tells the sad story:

Mrs. W. C. McKee, a former resident of this city, but now of Seattle, arrived here by the Mainlander yesterday. The mission was a sad one, he having accompanied the remains of his eldest daughter, Miss Mabel McKee, who passed away at her home on [illegible] avenue and East Union street, Seattle, last Wednesday night. Tuberculosis was the cause of death, the deceased having been a sufferer from this disease for some time. She was but 21 years of age, and, during her residence in this city, was beloved by all who had the pleasure of her acquaintance.

The funeral took place yesterday afternoon from Messrs. Center & Hanna's parlors, and was largely attended by friends and relatives of the family. The services, both at the parlors and at the graveside, were conducted by the Rev. W. J. Hindley.

The greatest sympathy is felt for Mr. McKee, who, since taking up his residence in the Queen City of the Sound, has brought back no less than three of his children for interment in the family plot in the City cemetery, but one child now remains.

The pall-bearers at the funeral were Messrs. A. P. Garvey, H. Godfrey, J. McConaghy and H. H. McCagno. Amongst those who sent flowers were the following: Mr. and Mrs. McKee, Misses Bolrean, Mrs. A. Garvey and family, Mr. and Mrs. Giguere, Mr. and Mrs. J. McConaghy, Mrs. and Misses Armstrong, Nellie London, Miss Griffiths, Mr. and Mrs. Godfrey, Mrs. McDonald, Mrs. Hunter, Mrs. Veitch, Messrs. Charles and George Perry and many others.

Apprentice Wanted

We require an apprentice at The Times Press, to learn the printing business. A good chance for a bright lad.

"I thank Dr. Pierce for the kind advice he gave when I wrote to him."

"I am thankful to the friend who first recommended your medicine," writes Mrs. Annie H. [illegible], of [illegible], [illegible] Co., Pa. "We have a twelve pound baby, three weeks old. I took three bottles of 'Favorite Prescription' before baby came, and the time was only one hour and a half. Have had five children, and before this always had a severe time, lasting two or three days, and never was able to do any work for about two months afterward. Now I am doing all the work for four children. My friends say I look better now than ever before. We told one of my sisters to take 'Favorite Prescription,' which she did, and when her child was born the time of suffering was very short. She has better health now than since her marriage, some years ago. We cannot praise Dr. Pierce's medicines enough. I thank Dr. Pierce for the kind advice he gave when I wrote to him. Whenever I see other women suffering I tell them about your wonderful medicines."

The benefits resulting from a consultation by letter with Dr. Pierce are testified to by thousands of grateful women who have been made new women by his medical advice and fatherly counsel given absolutely without cost or fee.

Sick and ailing women, especially those suffering from chronic diseases, are invited to consult Dr. Pierce, by letter, *free*. All correspondence is held as strictly private and sacredly confidential. Address Dr. R. V. Pierce, Buffalo, N. Y.

Dr. Pierce's Favorite Prescription is the best medicine for the cure of womanly ills. It establishes regularity, dries weakening drains, heals inflammation and ulceration and cures female weakness. It is the best preparative for maternity, giving the mother strength to give her child, and making the baby's advent practically painless.

Dr. Pierce's Favorite Prescription contains no alcohol and is entirely free from opium, cocaine and all other narcotics.

The Common Sense Medical Adviser, 1008 pages, in paper covers, is sent *free* on receipt of 31 one-cent stamps to pay expense of customs and mailing *only*. Address Dr. R. V. Pierce, Buffalo, N. Y.

TENDERS WANTED

Tenders for the supply of Stationery and Chemicals required for the Public Schools and Collegiate Institute, for the year ending March 1st, 1904, will be received by the undersigned up to noon on Friday, the 20th inst. A list of the articles required will be supplied on application.

W. C. MORROW,
Secretary Board of Education.

LOCAL LEGAL

Division Court, Osgoode Hall, Toronto, Feb. 11.—Wood vs. Canadian General Electric Co.—W. R. Riddell, K.C., for plaintiff, moved to set aside judgment entered by Meredith, J., in an action tried with a jury, brought under the workingman's compensation for injuries act, R.S.O., ch. 160, sec. 3, sub-secs. 2, 3 and 5, for injuries sustained by the plaintiff while in the employ of the defendants. Negligence was charged against one Patterson, the General Manager of the company, and also against one Bowen, the foreman, to whose orders the plaintiff was bound to conform. A tramway runs east and west through the works of the defendants. Shortly before the accident the plaintiff had been called to the track to put in a bond timber, and to do this he had to work underneath the track. Fearing the approach of a car the plaintiff spoke to one Smith, his immediate foreman, who ordered the doors to be closed. The plaintiff was working with his back towards the door, and without any warning being given him the doors were opened, and a car coming out passed over the plaintiff's arm, causing him serious injury. The trial Judge ruled that there was no negligence on the part of defendants, and if there was the plaintiff was guilty of contributory negligence. R. M. Dennistoun (Peterborough), for the defendants, opposed the appeal. Judgment reserved.

LITTLE LOCAL LINES

—The Girls' Guild of All Saints' church will hold a valentine social this evening.

—The Young Men's Guilds of the town will hold a joint meeting this evening at the Charlotte street Sunday school room. A good program has been arranged.

—The Kawartha Lakes Navigation Co., Lindsay, capital $40,000; provisional directors, Jas. Carew, J. B. Parkin, Lindsay, and T. H. Hamilton, Toronto.

—Mr. Walter Stocker stopped a runaway team at the corner of George and Simcoe streets yesterday morning. Fortunately no damage was done by the horses, who belonged to Mr. Robt. Armst, cheese box maker.

—The Hamilton Times of Wednesday says that the delegates returned from the Peterborough Convention giving glowing accounts of the same, and will present their reports at the men's meeting next Sunday afternoon.

Nerve Wrecked and Sleeplessness

Everything goes wrong, head feels heavy and dull, mind is filled with strange forebodings, stomach is out of kilter. You need a good tonic like Ferrozone to bring back your lost appetite and digestion, and cleanse the blood of all impurities. Ferrozone is a wonderful invigorant and strengthener that will banish gloomy depression, and quickly restore you to a healthy, vigorous condition of mind and body. Nothing is so good for the sick, weary and debilitated as Ferrozone. Price 50c. per box, at Druggists, or Polson & Co., Kingston.

Hamilton's Mandrake Pills cure Constipation.

RUSSIA HOLDS KEY TO THE EASTERN QUESTION

The Outlook Gloomy and War Thought to be the Only Solution

RUSSIA AND TURKEY WILL FIGHT TOGETHER

And Will Turn the Batteries of the Dardanelles Against Britain and Her Allies

London, Feb. 14—The Post says: There seems solid reason for the growing belief that the condition of affairs in Macedonia is about to lead to action of some kind, though in what direction is not as yet very clear.

The reported preparrations of Russia and Austria may be meant only as a warning to the Macedonians who appear to be getting out of hand and to assist the Sultan in keeping order while diplomacy is endeavoring to arrange for a better future for the distracted country. The reenforcements which are about being thrown into European Turkey, from Asia are evidently intended to restrain the Bulgarians who are undoubtedly ready to march to the assistance of their fellow countrymen should a general rising take place and the usual Turkish methods of repression be indulged in. In that event it is difficult to see how the Russian Government in the present state of public feeling in Russia, could refrain from bringing military pressure to bear on Turkey, and so forcing to an issue, the question of Turkish rule in the western Balkan country.

The whole matter bristles with diffi-culties, for not only has the Sultan to be reckoned with, but the rival claimants, to the various sections of Macedonia, to say nothing of the Albanians, seem determined to uphold their asserted rights. The unfortunate part of the situation is that the Sultan will yield nothing except to force, and that a display of force at the present moment may possibly produce the very conflagration it is intended to avert. Montenegrins, Servians, Bulgarians and Greeks are ready to pass the frontier and attack the Turks from three sides, but so far they have been kept in check by the great Powers.

Once, however, the fire was lighted, it is absolutely certain that they would not be left to themselves, but that Russia and Austria, and probably also Italy, would intervene. Russia, with her Black Sea volunteer fleet is in a position to throw an army corps at any moment into Bourgas in southern Bulgaria from Odessa, in less than thirty-six hours and from there to the frontier of Macedonia is a matter of but thirty-six or forty hours by rail.

In case of intervention, Russia, is therefore, very favorably situated, while Austrian troops advancing from Herzegovina to Mitrovitza would have to cover some two hundred miles of difficult and mountainous roads with a prospect of being opposed on the way. Any opposition to Russian intervention that might take the form of action by way of the Dardanelles would probably be met by Russia's doing what was threatened at the time of the Armenian massacres—that of manning the Dardanelles batteries with Russian conjointly with Turkish guns and gunners.

As will be seen, the outlook is not reassuring and depends on events which are not easy to control.

THE BOER LEADERS ARE NOT UNITED

Most of Them Hate Britain More Than Before the War

AND SOME ARE OPENLY HOSTILE

While Others are Doubtful — De Wet Thoroughly Discontented

Johannesburg, Feb. 14—Since the return of the Boer ex-generals here there has been an amusing shifting of positions among them. Botha, who took the lead in Europe, has fallen back in favor of Delarey. Delarey, since the battle of Magersfontein, has displayed considerable hostility towards Kruger and Cronje. He always considered that the incapacity and obstinacy of Cronje in the face of the advice he offered was the cause of the Boer disaster at Paardeberg and that Mr. Kruger showed equal stupidity in his support of Cronje, despite strongly worded protests from Delarey. Altogether Delarey was dissatisfied with the old administration, and now that he has fought out his fight he is willing to loyally accept the new condition of affairs.

Botha, it is known, has decided that his children shall at present be educated in Holland, that hotbed of anti-British feeling. This does not go to show that he has forgiven his late enemies or is really anxious for union between the younger generations. De Wet stands aloof from his comrades. He is a stubborn, vindictive character.

The fact that ex-President Steyn is spending his time on the continent and that his children are being educated by foreigners instead of in England, seems to prove that he, like Botha, has no desire that his sons should be trained to love the Empire.

Smuts, who is young and very clever, coming out just in the first class in the Cambridge law tripos of 1891, is growing in influence. He is still very sore about the Boer defeat, but it is hoped that his professions of loyalty are sound. Ex-Judge Hertzog, of the Orange River Colony, is another very important personage, who seems likely to prove of assistance in pacifying his more vindictive brethren.

CANADIAN BONDS EQUAL CONSOLS

British Investors Showing Confidence in Canada

London, Feb. 12.—The prosperity of Canada, and the growing British confidence in the Dominion, is illustrated by the fact that Canadian three per cent. stock is to-day quoted at 104; English consols are no better. Grand Trunk and Canadian Pacific stocks have also advanced, and Hudson's Bay have reached forty-three. The British investor is showing growing confidence in Canada.

A CANADIAN SENSATION.

A prominent provincial emigration official visiting London expresses the opinion that the departmental decision to dispense with the services of the Glasgow agent is likely to be reminded, stating that Mr. Murray's offence is generally tolerated on the part of Canadian officials both in the Dominion and Great Britain. It is also said that an influential Senator is demanding that Mr. Murray remain, and threatening trouble in Parliament for a very prominent official in England if the request is denied.

IAN HAMILTON'S VIEWS.

General Sir Ian Hamilton, speaking last night at Birmingham, said that the volunteer movement in Canada was largely due to men who obtained their inspiration from England's volunteers. Every lad volunteering showed a realisation of imperial responsibilities. The English army needed the development of individuality.

THE GUARDS DEMORALIZED.

In connection with the Airened era scandal, it seems the whole Guards' brigade is in a state of disorganization. Two sergeants and seventeen privates, all medalled, have deserted from the Scots' Guards in a body recently, making fifty odd desertions since Christmas. The only defender Col. Kinloch has is in his brother-in-law, Bromley Davenport, M.P., who says that the Colonel was ignorant of the "ragging" incidents.

They Take Weeks

Ordinary remedies sometimes take weeks to even relieve cases that Catarrhozone cures at once.

Inhale Catarrhozone five minutes now and again and it cures a cold.

Inhale Catarrhozone five minutes four times a day and it cures stubborn coughs.

Inhale Catarrhozone five minutes every hour and we guarantee it will cure any case of Catarrh, Bronchitis, Asthma, Lung or Throat Trouble, Deafness. It is very pleasant and convenient to use, quick to relieve, and certain as the hereafter to cure. Large size, complete, price $1.00; small size, 25c. Druggists, or Polson & Co., Kingston, Ont.

Dr. Hamilton's Pills cure Headache.

REBELS MURDER VILLEGERS

Serious Outbreak Recently Occurred in South on Madagascar

London, Feb. 12— A despatch to a news agency from Paris announces that mail advices received there from the Island of Madagascar give details of a serious outbreak which occurred recently in the southern part of Madagascar. A force of rebels attacked and destroyed a village, and murdered its inhabitants. Detachments of troops pursued the rebels. They killed a hundred of them, but, during the fighting, the French sustained serious losses.

EX-QUEENS TOGETHER

Empress Eugenie Leaves Her English Home to visit Isabella in Madrid.

London, Feb. 14—The Empress Eugenie has left her English home at Farnborough, within earshot of the practice guns at Aldershot, the great military camp, and gone to Madrid to visit ex-Queen Isabella of Spain. Both these aged women are both ex-queens. Isabella, unlike Eugenie, doesn't mourn for the pomp of her past station, but devotes herself to having a good time.

Eugenie is a broken-hearted woman and is a living figure of grief.

Her visit to Madribd will add to her store of painful recollections, for she hasn't seen her native land since she left it a beautiful young girl to marry Napoleon III.

Eugenie's mission to Spain, is, it is reported, for the purpose of finally disposing of her property interests there.

She is, of course, enormously rich. She spends half her time in Paris.

It is a tribute to the politeness of the French people that she comes and goes without comment.

She always takes a suite of rooms at the Continental hotel in the Rue Rivoli, from the windows of which she can look into the gardens of the Tuileries, which palace she inhabited until the French people made up their minds to dispence with the services of Napoleon III.

MR. CHAMBERLAIN'S LATEST SPEECH

He Declares That Mother Country Would Defend Its Heritage to Last Man

London, February 11—Rt. Hon. Joseph Chamberlain's speech at Grahamstown on Monday was evidently intended for a wider audience, for it constitutes the clearest indication of the general imperial policy. Hon. Mr. Chamberlain, in pursuance of his remarks declared that the Mother Country would defend its heritage to the last man, but that the colonies had their share of the responsibilities of the Empire. Last year England spent 100,000,000 besides the war debt. He was addressing all the colonies when he said they were not doing what they ought to in regard to their obligations to the Empire.

The increased vote of Cape Colony for the fleet was not sufficient to keep for six months the warship Good Hope. He would agree that the first duty was at home, but all hope for the Empire's future was based on co-operation with the Mother Country. He said he was anxious that the colonial aspiration should be to partners in the Empire, whose mission was justice, freedom, and equality.

He added, "Why knows when the next blow will fall. We, by remaining one people, shall prove the Empire is founded on a community of sacrifice."

THE TROUBLE IN KOREA

Russian Minister is Putting in His Oar

London, Feb. 12.—There are signs of a settlement of the trouble in Korea, reports the correspondent of The Times at Tokio. The Governor of Seoul has cancelled his veto on the circulation of bank notes, and the circulation of bank notes and the general veto will probably soon be withdrawn.

The Russian Minister is trying to compose the difficulty. The run on the bank has ceased. The question of compensation may prove embarrassing, however.

The press of Tokio demands that preventive measures be taken in addition to punitive ones in order to protect Japanese interests in the future.

1,000 REINDEER FOR ALASKA

The Government Awards the Contract to the Northwestern Commercial Co

Tacoma, Wash., Feb. 14—At Washington ten days ago the Government awarded the Northwestern Commercial Company a contract for supplying and transporting another thousand reindeer from the Siberian coast to Alaska. The Company is loosely allied with the Northwestern Siberian Company, which owns trading and mining concessions on the Siberian coast and has already purchased hundreds of deer from natives in exchange for merchandise. The balance of the reindeer will be rounded up from Siberian wilds during the spring and summer.

GOVERNMENT OWNERSHIP

Ontario County Council Passes a Progressive Resolution

Whitby, Ont., February 12— At the meeting of the County Council it was moved by T. E. Kaiser, M.D., seconded by W. H. Gibbs, "that the Council of the corporation of Ontario County authorize J. E. Farewell, K.C., County clerk to address a letter to the Ontario government expressing our disapproval of granting any further franchises at Niagara Falls to any private corporation, and to urge upon the government the necessity of developing power at the said Falls as a governmental measure for the benefit and advantage of the people of the province of Ontario." The resolution was carried unanimously.

AGAINST PANAMA TREATY

Senator Morgan Thinks it Should Be Made Over.

Washington, Feb. 12.—After the confirmation of a number of nominations and the refusal to re-open the Alaskan boundary question, the Senate, in executive session today began consideration of the Panama Canal treaty between the United States and the Republic of Colombia. Senator Morgan immediately took the floor to urge that the treaty be amended in many respects, and to oppose it unless amended. He contended the convention is loosely drawn, and said that, in order to properly safeguard the interests of the United States, it should be practically made over.

NEW HEALTH REGULATIONS

Regarding the Outbreak of Scarlet Fever in Province

At the quarterly meeting of the Provincial Board of Health in Toronto, the entire afternoon session was taken up in the discussion upon the regulations for control of cases of scarlet fever, the various phases of the subject being thoroughly threshed out. The new regulations, as adopted, are comprehensive in their scope, and their enforcement will, it is anticipated, be effective in checking and controlling a serious menace to the public health of the Province. Many of the provisions with respect to the reporting and isolation in hospitals specially provided for the purpose of cases of scarlet fever, with the precautionary measures regarding quarantine of persons who have been exposed, and disinfection of clothing, etc., are similar to those which have proved so efficacious in the treatment of smallpox and diphtheria. In fatal cases the funeral must be private and specific instructions for the guidance and protection of the undertaker and his assistants are included. The maximum period of incubation of the disease is fixed at one week, and it is also provided that every person ill with scarlet fever and the surroundings of such person shall be considered infective until the process of desqumation has been completed and all infective discharges have ceased, and in no case shall the period of infection be considered to have ceased in less than six weeks from the commencement of the illness.

Another clause provides that when the disease occurs in a school the Medical Health Officer shall direct that an examination of all exposed persons, whether in the classroom or absentees in the home, shall be made daily by physicians until the period of incubation is past.

THE PRETENDER IS APPEALING TO RELIGIOUS PREJUDICES

Time Has Arrived for Moslems to Give Attention to Religious Matters

MOROCCAN REBELION

Copy of Pretender's Letter to the Riffians Received

London, Feb. 13.—"I have received a copy of the pretender's letter to the Riffians," wires The Times' correspondent from Tangier. "It says the time has arrived for Moslem to give attention to religious matters, because the Sultan is young and inexperienced, and his entourage is hand in hand with the Christians to whom they intend eventually to make over the country. The writer implores the tribesmen to assist him as the precursor of the Messiah who shall re-establish orthodox Islam and rid the country of Christian influences." The letter is unsigned, but the originals bear an almost legible cipher resembling the name Mulla Mohammed, the Sultan's brother. The letter is written in excellent classical letters of half a century ago. It diplomatically refrains from attacking the personality of the Sultan who possesses formidable religious prestige as commander of the faithful.

Throughout Riff the letters are being scattered broadcast, and also among the tribes on the bordering Algerian frontier.

Riffian Rebels Full of Fight

London, Feb. 13— Advices which show that the rebellion in Morocco still has vitality are contained in a despatch from the correspondent of The Times at Tangier. "A messenger whom I sent to Riff," he says, "has returned and states that letters from the pretender to the throne have been publicly read in the mosques and markets, and that the general feeling is in favor of support of the rebellion."

The Riffians are doubtless influenced in this attitude, adds the correspondent, by the unpopularity of the government's representatives there, who are accused of excessive corruption in their conduct of affairs. Amarim Shereff, uncle of the Sultan, has been instructed to go to Riff, and will leave on Saturday on his mission. He is empowered to change all unpopular governors and do everything possible to prevent a spread of the rebellion.

The Penalty of a Fast Life

Is paid for by an irritable condition of body and mind, by exhausted energy, poor digestion, unstrung nerves, and broken sleep. If you must and will live the killing pace, better keep in mind the sustaining powers of Ferrozone, a wonderful tonic and and reconstructor. Ferrozone is a blood maker, a nerve strengthener, a heart and brain invigorator. It creates appetite, insures perfect digestion and undisturbed sleep, restores the vitality and strength lost by excessive living very quickly. Ferrozone will do you inestimable good, try it. Price 50c. per box, or six boxes for $2.50, at Druggists, or Polson & Co., Kingston, Ont.

TURKEY BEING URGED TO AVOID PRECIPITATING IN TROUBLE

The War Cloud in Near East.

New York, Feb. 3.—The London correspondent of The Tribune says to-day: The Macedonian question remains the most important European issue. The revolutionists are making strenuous efforts to secure the condemnation of the Austro-Russian proposals of reform before the text has been submitted to the Sultan or published in any continental capital. There is an evident desire on the part of the Balkan agitators to produce an unmanageable situation, and drag first Bulgaria and Servia and finally Russia into war with Turkey. The work which preceded the Russian campaign of 1877 was conducted with secrecy and subtlety, whereas the present operations are noisy, and reveal plainly the methods of the professional agitators. Some of the closest observers are convinced that the Czar is as anxious as the Emperor of Austria-Hungary to prevent an outbreak of hostilities, and that the Russian Minister of Finance is not prepared to supply money for a decisive campaign. Lamsdorff and Goluslowski (respectively the Foreign Ministers of Russia and Austria-Hungary), according to this view, have prepared a moderate scheme of reforms, which the German Emperor will strongly advise the Sultan to accept, and the Macedonian agitators are apprehensive lest the Sultan may forestall their well organized movement by a prompt acquiescence in the wishes of the European powers. An early outbreak of hostilities is favored by the open weather in the Balkans, and Bulgaria and Servia may be carried away by infectious excitement.

MR. BURNHAM'S LECTURE

Last Night An Instructive Lecture to a Poor Audience

There was a poor attendance last evening at the lecture delivered by Mr. Burnham at the local opera house, in connection with the workingman's educational movement.

The topic chosen by Mr. Burnham was, "The Workingman in Ancient and Modern Times, and the Labor Movement in America."

The speaker reviewed the history of the workingman from the period of serfdom in the 4th century, when the uncultured Briton roamed the country without any form of government to the conditions existing to-day. After describing the working classes of Saxon times, and the men who took the place of the serfs at a later period, and who may be counted the ancestors of the workingman of to-day, the lecturer moved on to the 15th century. This was known as the Golden Age of Labor, with which the conditions existing to-day were as dross. The workingman of that time existed under ideal conditions. His habitation was rude in comparison with the dwellings of our time; yet he enjoyed a fair degree of comfort according to the limitations of existing circumstances. Moving on to the labor movement in America the lecturer dwelt at length on the advantages and necessity of organization, and described the system of profit sharing or co-operation as the goal towards which the labor movement is moving.

Rev. J. C. Davidson and Rev. Father McColl also spoke, complimenting the lecturer for his clever treatment of the topic.

A vote of thanks was accorded Mr. Burnham for his lecture.

KAISER AND SOCIALISTS

French Politician Sees Menace to Universal Suffrage in Germany

London, Feb. 11.—Mr. Jaures, the Socialist vice-president of the Chamber of Deputies, discussing in an article in the Petit Republique the present strained relations between the GGerman Socialists and the Kaiser, holds that the conflict has become so acute that the Kaiser must endeavor to break down the party by mutilating the system of universal suffrage or abandon his provocative and aggresive attitude towards the Socialist proletariat. M. Jaures believes that universal suffrage is so firmly established in France that there is no danger of its abolition, but, in Germany, it was accorded by royal power, and, therefore, not being founded in the national life, it is easi

RACE WAR IMPENDS

Shameful Treatment of Negroes in Many Parts of The South

Fayette, Mo., Feb. 14—A race war has been started here as the result of the public whipping of three negroes on the court-house steps Friday night. A committee of the Law and Order League took the negroes from their homes and whipped them publicly for alleged misconduct. Two of them were women. Since then the negroes and white people have been in open enmity and it is said twenty-five negro families have been frightened into leaving this vicinity.

The one negro man who was whipped Friday night made a desperate resistance. It took several men to carry him to the post. He cursed his captors as the lash was applied, which resulted in the whip being wielded only the more vigorously. When the ordeal was ended the negro was so weak from loss of blood that he was put to bed, instead of being driven from town. The women, who were not whipped severely, were taken to the outskirts and told to go. There is much excitement here and a clash is feared.

ENTERTAINMENT AT ALLSAINTS'

Junior Girls' Guild Give a Pleasing Entertainment Last Night

The echoes of the Senior Girls' Guild entertainment at All Saints' church had scarcely died away when that of the Junior Girls' Guild was ushered in last night. Following in such close proximity it was a singularly successful affair, and gained equal popularity. It differed somewhat from its sister entertainment inasmuch as the first part of the programme consisted of a musical romance, which caused much merriment. Each one was given a paper on which was printed sixteen questions. The answer to each question was suggested by part of some popular air played on the piano, and whoever, by this means, answered the most questions correctly was entitled to a prize. Mr. Bruce Rickey took the first prize, consisting of a plate, of unknown value; and Mr. Joseph Legg took second prize, consisting of cake, also of unknown value.

The second part of the programme was opened by a vocal selection from the choir, which subsequently gave "Come where my love lies dreaming," their voices blending harmoniously, and producing a good effect. Little Freddie Hooper recited "Five minutes late," and for an encore brought down the house with "I'm a postage stamp." Mr. Bruce Rickey also recited in a creditable manner, and for an encore told an Irish story, after having given a vocal solo to the accompaniment of Miss Bullen on the piano. The brilliant playing of Miss Ida Mulholland on the piano of a new piece of music, entitled "Hunky Dory," which she had only seen this week for the first time, elicited the admiration of the audience. The vocal duet by Miss Duncan and Miss Bullen was well received. The vocal solo by Mr. Sheppard shows he possesses a mellifluous voice, which he sustains throughout his lower notes. The Rector presided acceptably as usual. The refreshments were all that could be desired, and a most enjoyable evening was brought to a close by the audience singing "God Save the King."

The Vienna Government is Not Preparing for a War

TO PRESERVE PEACE IS THEIR OBJECT

Austria Gives Turks Advice—Comment by Papers on Balkan Situation

Vienna, Feb. 13.—The principal papers comment lengthily upon the situation in the Balkans. Careful perusal leaves the impression that confidence is still unshaken in the power of diplomacy to cope with the crisis which is unanimously admitted to exist. Nor have some publications lost hope in the tranquillizing capabilities of the Austro-Russian project of reforms, though in some quarters the cry goes up, "How long will this project be delayed?" The Wiener Journal, in a temperate article, intended to prove to the world Austria's entire good faith, sincerity and desire for a continuance of peace, remarks: "The allegations that Austria-Hungary contains ultra motives regarding Turkey are to be emphatically denied. The fact that various reforms are planned for our military system, that Austrian rentes are to be converted, and that specie payments are to be resumed, cannot be construed into preparations for war. The Porte would do best not to allow itself to be influenced by covert misrepresentations into resorting to measures which would only tend to precipitate a catastrophe."

New York, Feb. 13.—The Tribune says to-day: "The Senate has done well in ratifying the Alaska Boundary Treaty. There is, of course, no assurance that the sequel will be a final settlement of the boundary dispute, though it is earnestly hoped and indeed expected, that such will be the case. The only satisfactory settlement conceivable will be one substantially confirming the status which has prevailed for more than seventy-five years, and which for more than sixty years was unchallenged. It is expected America's just and reasonable title will be presented so clearly and effectively that the British members of the commission will recognize and confirm its validity."

Bathurst, N.B., Feb. 13—While the authorities were investigating the robberies at Hinton's store, which took place ten days ago, and Holdenraber and Rosenberg's on Monday last, they got the information that Fred Thibedeau, who is at present in jail awaiting trial for breaking into Landry's jewelry shop about a month since, was the man they wanted. On going to the jail the constables found he had cut a hole through the floor in his cell under the bed, through which he had been getting in and out of the jail at will. In his cell was found a lot of plunder which was stolen from the two stores mentioned. Two other arrests were made.

CHINESE TO BE EXCLUDED, BUT THE JAPS CANNOT BE BARRED

Mr. Chamberlain's Broad Imperialism

London, Feb. 14 — Mr. Chamberlain in his speech at Port Elizabeth pursued the theme of colonial responsibilities toward the Empire. He said: "When the war began the Dominion of Canada and the Commonwealth of Australia sprang to the assistance of the Mother Country, and made your cause their own. They were not directly concerned but felt that your cause was just. They felt that the honor and interests of the Empire were at stake and showed a readiness and anxiety to have their share of the responsibilities of the great Empire, whose privileges they enjoy." Mr. Chamberlain added: "The British race throughout the world is one people. No one in the dominions of the King can be touched or harmed without a thrill of indignation passing through the whole Empire."

The Cause of Dyspepsia

Improperly digested food usually forms gases that cause a painful distention of the stomach, and pressure against the heart. This results in much pain and distress, but Nerviline will relieve the distention, dispel the gas and cure the dyspeptic pains very quickly. Polson's Nerviline is really an excellent remedy for dyspepsia, Indigestion, Cramps, Summer Complaint and all Stomach and Bowel Troubles. No household is complete without Nerviline. Try a 25c. bottle.

—By a number of our exchanges we notice that the merchants in several of the towns and villages in this part of the Province are agreeing to close their stores at an early hour each evening, except Saturdays, nearly all at six o'clock. In nearly all of these places during the summer months, a half-holiday each week is also given. Could not our business men institute a similar system during the summer months?

An Important Announcement By Aulay Morrison, M.P. for New Westminster

LEGISLATION AT THE NEXT SESSION

Japanese Cannot for Imperial Reasons be Barred

Victoria, B.C., Feb. 13—In addressing the Liberal Association here last night, Mr. Aulay Morrison, M.P., for New Westminster, said he was in a position to say that Chinese would be excluded from Canada by the Dominion Government at the next session of the Federal Parliament. At present there is a per capita tax of $100 levied upon each Chinese entering the country; it was only $50 up to 1900, when the sum was doubled in consequence of the unanimous demand from British Columbia for greater restriction upon the immigration of Chinese.

Last year the British Columbia Legislature passed a law to prohibit the immigration of both Chinese and Japanese, under educational test, but this was recently disallowed by the Federal Government as being ultra vires of the powers of the Provincial Legislature. It is no secret that the chief reason for this disallowance lay in the placing of Japanese, as well as Chinese under the ban. That was a course which was resented as unfriendly by Japan, Britain's ally in the East, and would have been vetoed by the British Government as opposed to Imperial policy. As far back as April 29, 1900, Sir Wilfrid Laurier put this plainly in the House of Commons at Ottawa, when he said: "We must insist at this moment, so that there can be no misunderstanding at a future date, on drawing a line between Chinese and Japanese, and that whatever policy of restriction we may adopt against Chinamen, whether it be right or wrong, we cannot afford, for the sake of Imperial policy, to treat the Japanese as we have been treating the Chinese."

The last census showed a Chinese population in Canada of 17,299, and a Japanese population of 4,738.

Cleveland's BAKING POWDER

ALWAYS WORKS RIGHT. NO SPOILED DOUGH, NO GOOD INGREDIENTS WASTED.

"I use Cleveland's Baking Powder exclusively in all my classes."
Miss KATE E. WHITTAKER, Principal of Cookery, Public Schools, San Francisco.

BLOOD POISON

I guarantee my Latest Method Treatment to be a positive cure for Blood Poison. If you have this awful disease you are in danger until completely cured; the various symptoms you notice should be a warning to take immediate treatment. Don't put it off until too late, as it constantly gets worse. If you have sore throat, patches on tongue or mouth, swollen glands, hair falling out, blotches on body, itching skin or other signs of this awful disease, call on me. I give you a written guarantee to cure you without Mercury or Potassium, and You Pay When Cured. I have [illegible] diplomas and certificates which testify to my standing and abilities.

The original testimonials can be seen at my office; $5000.00 reward for any I cannot show.

The Times will be sent to subscribers in the district at [illegible] per annum, and to outside points at [illegible] per year strictly in advance.

ENGLISH OFFICE 30 Fleet St., London, E. C.

UNION LABEL

PETERBOROUGH. FEB. 14, 1903.

UNSETTLED BOUNDARIES.

Some Canadian papers are complacently saying that even if the Alaska boundary dispute is not settled by the Commission that has been appointed it will be all right, "Canada can wait."

This will be true if nothing happens to hurry both nations towards a settlement, such as the discovery of gold in the disputed territory, and the staking out and registration of claims, the inevitable collisions of miners, and the necessity of policing the region, administering law and punishing crime. If nothing happens to call forth the exercise of authority, the region might go on as it has for centuries longer. But it is this contingency that is behind the mutual desire for a settled boundary, that law and order may prevail.

Great Britain has another uncertain boundary question in Africa, the line between German South-west Africa and the British possessions. It is known that the German colony is rich in minerals. New discoveries are frequently made, and no one knows yet how extensive the profitable mining region may prove to be. The larger part of the boundary extends along the meridian of 20 degrees, east longitude, but this line has not been delimited. It is certainly better to determine by an exact survey the position of such boundary lines before the value of the land near them may give rise to disputes and result perhaps in bloodshed.

An illustration occurred in 1901 of the embarrassment which is apt to result from ignorance of the location of a boundary line. It will be remembered that some United States miners had invested considerable money in claims a little to the north of Mount Baker, which is in the State of Washington, before it was discovered by a survey that American citizens had opened their claims under the provisions of United States mining laws in territory that was clearly over the border in Canada. The result was most energetic claim-jumping on the part of Canadians, and there was some trouble and bad feeling before the matter was finally adjusted.

EDITORIAL COMMENT

Senator Wark, who is a member of the Canadian Parliament and who expects this year to attend to his legislative duties, as he has annually, for over half a century, is probably the oldest legislator in the world. He is in his one hundredth year, and has been one of the legislators for the province of New Brunswick for upwards of sixty years. He was an old man when the provinces were confederated into the Dominion.

Work will begin in the spring on forty-one new grain elevators for the North-west Elevator Company. The new buildings will, says a Winnipeg dispatch, necessitate an expenditure of $1,720,000, and will increase the elevator capacity of the province of Manitoba, and the Territories by 2,000,000 bushels. One of the new elevators, the largest, will be erected in Winnipeg. Fifteen will be put up in Manitoba, and the balance distributed at various points in the territories.

At a meeting the other day of the directors of the Savings Bank of Milan, one of the richest and most stable financial institutions in Italy, it was decided that, as the profits of the past year had been larger than usual, the sum of $1,000,000 should be bestowed on the hospitals of Lombardy, to enable them to introduce the latest discoveries of science, and in other ways to provide for the comfort and well-being of their patients. And, it might be added, of their nursing staff.

According to official returns of the British Board of Trade received at the Trade and Commerce Department, the total number of emigrants who left the United Kingdom during the calendar year ending December 31st, last was 367,116, as against 302,575 for the preceding twelve months. Of this number 232,141 went to the United States, an increase of 37,200 compared with the previous year, and 67,712 to Canada, a gain of 24,815. The emigrants of British origin who went to the United States numbered 108,501, an increase of but 4,306. The emigrants to Cape of Good Hope and Natal were 51,891 in number, as compared with 28,553 in 1901.

Coal stealing has become a habit this winter all over the land. At Hoosick Falls, N.Y., the robberies progressed until at last a whole carload was stolen. The thieves justified themselves on the plea that the speculators were holding up the price. In some store windows on a piece of cardboard has appeared for some weeks the legend in job type, "It is lawful to steal coal," then in smaller letters the object is stated. Is this a right saying to put before the people? If it is "lawful" to steal coal" it is lawful to steal anything else, whereas it is not lawful to steal for any purpose whatever.

It is believed that within a short time the cattle embargo, which has been on New England for several months because of the foot and mouth disease, will be lifted. Dr. Daniel E. Salmon chief of the United States Bureau of Animal Industry, who has been since early in December directing the fighting of the disease, has returned to Washington, and will not come back to New England unless there is a reappearance of the foot and mouth disease. So far as the officials of the Animal Bureau know, there are now no cases of the disease in New England, and most of the places where it has appeared have been disinfected.

A Protest From Venezuela

New York, Feb. 11.—Senor Myerston, the Venezuelan Consul, has presented to the Dutch Government officials a demand for the immediate seizure of the gunboat Restaurador, now flying the German flag, and the return of the vessel to Venezuela, says the correspondent of The Herald at Willemstad, Curacao. The Consul contends that as the captured ship belonged to the Venezuelan navy she could not enter Dutch waters under International law. He has also protested against Germany using Curacao as a base of supplies and as a coaling station. Venezuelan officials assert that neutral rights appear to be only for strong powers, and that International Law is a farce when feeble nations are involved.

A SURE DELIVERER WHEN SICKNESS AND DISEASE THREATEN LIFE

Paine's Celery Compound

Saves the Life of Montreal Lady

Stomach difficulties and distresses are varied in character and demand prompt attention. In the majority of cases the troubles originate from a morbid condition of the nerves of the stomach. If you suffer from dyspepsia, indigestion, inflammation of the stomach, or gastric derangements, the use of Paine's Celery Compound will assuredly banish your tormenting enemies. Paine's Celery Compound quickly tones and strengthens the stomach and its particular nerves, so that your food will enrich the blood and make solid flesh, bone and muscle. Mrs. Lefebvre, Berville St., Montreal, cured at the eleventh hour by Paine's Celery Compound, says:

"For five years I suffered from dyspepsia, dizziness, stomach weakness and constipation to such an extent that physicians failed to relieve my terrible sufferings. The reality loomed up before me that I was dying. One day I heard of Paine's Celery Compound, and I resolved to buy six bottles. After using the compound I am strong, appetite good, constipation banished, and I am perfectly cured. I would specially recommend Paine's Celery Compound to all women, as it is a grand health restorer.

—Mr. James Menogue was the guest of James Scott on Sunday evening.

—Mr. Thomas Mahoney was the guest of Mr. Fred. Hobbins on Sunday evening.

—There is good sleighing in Chandos and the farmers and lumber men are getting their logs out.

—Mr. W. Booney, culler for the Rathbun Co., was in the vicinity last week.

—Mr. John Menogue has purchased Mr. J. W. Padiff's saw mill and has it placed at Clyndale and will carry on the business there, in place of Lasswade.

A sleigh load of our young people drove to Coe Hill on Monday evening to attend the entertainment given in the town hall.

—We see our popular tax collector with a new hat. Whether he traded or took it up in mistake on Saturday evening, we do not know, but it must be a good sign of spring.

—Mr. Robt. Tanner gave his leg a bad cut. We are sorry that Robert cannot get enough timber in this wooded country to cut without chopping his leg.

—Mr. Patrick O'Brien sprained his foot and is laid up with it at present.

—The sun is beginning to get hot, and the warm days are coming and Patrick has returned back to the village until spring.

A GUARANTEED CURE

For All Forms of Kidney Disease

We the undersigned Druggists are fully prepared to give the following guarantee with every 50 cent bottle of Dr. Pettingill's Kidney-Wort Tablets, the only remedy in the world that positively cures all troubles arising from weak or diseased kidneys:—

"Money cheerfully returned if the sufferer is not relieved and improved after use of one bottle. Three to six bottles effect astonishing and permanent cures. If not relieved and cured, you waste no money."

Ormond & Walsh, Druggist, Peterborough, Ont.

Animal Emotions.

It is told of a certain Lord Holland, who was very eccentric, that he used to give his horses weekly concerts in a gallery specially erected for the purpose. He maintained that it cheered their hearts, and improved their temper, and a witness says that they seemed to be delighted with the performance. Much has been written of the effect of music upon animals. The "American Naturalist" gives some of the results of experiments made in Lincoln Park, Chicago, to determine the effect of violin-playing on different animals.

Music which was slow and sweet, like "Home, Sweet Home," or "Annie Laurie," pleased the panthers, a jaguar and a lioness and her cubs. The panthers became nervous, and twitched their tails when a lively jig, "The Irish Washerwoman," was played to them, but relapsed into their former quiet when the music again became soothing.

The jaguar was so nervous during the jig music that he jumped from a shelf to the floor of his cage and back again. When the player ceased and walked away, the jaguar reached out his paw to him as far as he could, with claws retracted.

The lioness and her cubs were interested from the first, although when the violinist approached the cage the mother gave him a hiss and the cubs hid behind her. At the playing of a lively jig the cubs stood up on their hind legs and peeped over at the player. When the musician retreated from the cage the animals came to the front of it, and did not move back when he gradually drew so near as almost to touch the great paws that were thrust through the bars. When the musician was playing "Home, Sweet Home," the entire family were very attentive, and remained motionless except that the cubs turned their heads from side to side. Then another jig was played, and the cubs danced about.

The coyotes, in a den, squatted in a semicircle and sat in silence while the music continued. When it ceased they ran up and pawed at the player through the bars. He began afresh, and again they formed in a silent semicircle. This experiment was made several times, always with the same result.

Discontented Artist—I wish I had a fortune. I would never paint again.

Generous "Brother Brush"—By Jove! old man, I wish I had one! I'd give it to you!

Seized For Rent.

A Philadelphian who spent many years in the sunny South, who, in fact, was born and brought up there, tells an amusing story of darky wit, and one well worth repeating. It was some years ago, when he lived not more than 100 miles from New Orleans. One day he returned from many hours of driving, and was agreeably surprised to see a fine plump turkey served up for dinner. Wondering where it came from, he called Rastus and enquired by what means the beautiful bird had reached his dining-table. "Why, sah," replied Rastus, "dat turkey done bin roosting on our fence dis tree nights, so dis morning I seize him for de rent ob de fence."

Wee Dainty Miss Wise

A Hamilton Little One Who Was Afflicted With Eczema For Over Two Years.

Every Known Remedy Was Tried But Without Success Until One Happy Day Her Mother Tried Powley's Liquified Ozone.

The Disease Germs Were Soon Destroyed, and After Taking Four Bottles Little Miss Wise Was Entirely Cured and in Perfect Health.

LITTLE MISS WISE.

Hamilton, January 16, 1903.

THE OZONE CO., Limited, Toronto, Ont.

Gentlemen,—It is with heartfelt gratitude I write you of the wonderful cure your remedy (Powley's Liquified Ozone) has effected in my little daughter's case.

My daughter had been afflicted with eczema for over two years, and we had tried all the different remedies known for eczema—various patent medicines and also doctors' prescriptions, but nothing that we tried did her good.

We finally tried your Powley's Liquified Ozone and we are happy to tell you that after using four bottles our little one is entirely cured and is in perfect health, as you can see by her picture we are sending you.

You are at liberty to publish this in any papers you wish and to use my daughter's picture to confirm my statements. We thank you for your wonderful remedy and attribute our little daughter's recovery to Ozone alone, as no other remedies did her any good.

We have recommended Ozone to others, who have used it and been wonderfully benefitted by it.

(Signed) MRS. H. J. WISE,
Corner Barton street and Smith avenue.

Many Eczema Cases Cured by the Infallible Ozone.

Eczema is recognized as being one of the most stubborn diseases that medical men have to contend with. No halfway measures are possible with it. It must be rooted out entirely. Powley's Liquified Ozone does this by destroying the germs that cause it. Not in simply one case has its efficacy been proven, but in hundreds, until to-day it stands unrivalled as a remedy for this painful malady. The following are brief extracts from the testimonials of a few of the many who have been cured:

RODGER PILSON,

Downsview P.O., Ont., says: "For eight years I suffered with eczema and spent hundreds of dollars in medicines, but could get nothing to help me until a friend advised me to try Powley's Liquified Ozone. I did so and before I had entirely used three large bottles I was completely cured."

WALTER KNOWLTON,

87 Brunswick avenue, Toronto, says: "When our little boy was two years old a rash broke out on his face. The following Fall it became worse and we were much alarmed, as we feared the child would be disfigured for life. The doctor said he could do nothing. A neighbor advised Powley's Liquified Ozone. I had no faith in it, but eventually decided to do so. At first he grew worse, then better, and the disease seemed gradually to dry up. In a short while he was in perfect health, with a skin as soft and smooth as velvet."

W. DORSEY,

23 Sultan street, Toronto, says: "I had a very severe attack of eczema in my left leg. It became very angry and sore, and seemed to eat right into the flesh. This gave me such great pain that I was nearly out of my mind. Different friends advised me to try Powley's Liquified Ozone. I bought three bottles and by the time I had taken them every trace of the disease was gone."

MRS. F. SCULTHORPE,

73 Cobourg street, Ottawa, says: "I was terribly afflicted with eczema, which broke out on nearly every part of the body. The irritation was almost unbearable and my life was a misery. I commenced to use Powley's Liquified Ozone and after using nine fifty cent bottles there is no trace of the disease left."

DR. MECKLENBURG,

corner Craig and Bleury streets, Montreal, says: "For over twelve years I was a great sufferer from eczema. My hands and limbs were so bad that blood would ooze out of my skin, and I had a very bad sore on my right leg at the knee. In was so painful I was unable to walk and at times my hands were so bad I could not attend to my practice and I was compelled to wear silk rubber gloves. I was treated by leading specialists on skin disease, but got no relief. With hope almost gone I finally decided to try Powley's Liquified Ozone. I noticed an improvement almost immediately and continued until I had used eleven bottles, when I was completely cured. My skin is as clean and smooth as a baby's."

WARNING In buying be sure to get Powley's Liquified Ozone. As a safeguard to your own good health it will pay you to exercise this precaution. Powley's Liquified Ozone is sold only by reliable dealers and is never peddled. Price, 50 cents and $1.00 per bottle.

THE OZONE CO., Limited, Toronto, Ont.

KAISER AND SOCIALISTS

French Politician Sees Menace to Universal Suffrage in Germany

London, Feb. 11.—Mr. Jaures, the Socialist vice-president of the Chamber of Deputies, discussing in an article in the Petit Republique the present strained relations between the GGerman Socialists and the Kaiser, holds that the conflict has become so acute that the Kaiser must endeavor to break down the party by mutilating the system of universal suffrage or abandon his provocative and aggressive attitude towards the Socialist proletariat. M. Jaures believes that universal suffrage is so firmly established in France that there is no danger of its abolition, but, in Germany, it was accorded by royal power, and, therefore, not being founded in the national life, it is easier to overthrow.

BACKS CANADA IN ALASKAN TREATY

London, Feb. 11.—The Morning Post discussing the Alaskan question, urges the British Foreign Office to use emphatic words in support of the words as emphatic as those of the Canadian lady in the gallery of the Washington Congress. The Post supports the suggestion that Canada renew the previous lease of access to the Pacific on terms made moderate by the United States, and says anything would be better than the present modus vivendi which permits too many opportunities of forcible aggression on the part of the United States customs officials.

Blue roses have at last been produced and are grown at Kew Gardens, London.

An English mathematician has figured out that it takes only a "four-flea power," whatever that may mean, to run a watch, and that a single horse-power would run all the watches in creation.

A certain Chinese lady, named Cheong Chuk Kwan, is going on a tour round the world. She is rich, and well educated in English. Having progressive ideas, she is going to see what Europe and America are like. This is the first and only instance in which a Chinese lady has ever attempted such a venture.

Railway travel is fast losing its perils. According to reports recently made public in London, not a passenger was killed on any English railway in 1901, and only eleven people who were not passengers received fatal injuries. American railways may be better equipped than those across the water, but they have not yet approached the new English record for safety.

A remarkable piece of railroad engineering is about to be begun by the Southern Pacific Railroad in Utah. For the sake of saving four and a half miles, the railroad is to build a new line one hundred and five miles long, which for part of the way will run on a timber trestle across the Great Salt Lake. It now runs around the northern shore of the lake, over a route full of sharp curves and heavy grades. The work will take three years, and will cost two and a half million dollars.

A writer in the "Illustrated Sporting and Dramatic News" tells of a clear case of canine murder. The owner of an Airdale terrier bought a small Cocker spaniel pup, and it was made much of by the members of the family. "Scottie," the terrier, utterly ignored the pup's existence. One morning the puppy was missing, and, after a fruitless search, the gardener remembered seeing "Scottie" come out of a rhododendron bed, with nose and face much begrimed with earth. There the body of the pup was found, and it was plain that "Scottie" had first killed and then buried the poor little creature.

A year ago, says the "Youth's Companion," three prominent physicians told a certain New Yorker that he was afflicted with locomotor ataxia, and beyond the power of cure. Thereupon this man, who, even when he used two canes, "floundered around wherever his legs chose to take him," went to a gymnasium. He took exercise in ten-minute instalments. It was torture, but he persisted in it, and when he was not exercising he stayed out-of-doors. Presently he began to ride the bicycle, too, although he could not stop his machine except by putting on the brake and falling off. After seven months of hard work his legs were "still wabbly," but he began to play handball. Through the winter he kept up regular practice in the gymnasium, gaining all the time, surely though slowly. This spring he had the reward of a year of prodigious and painful effort. He could take forty-mile rides on his bicycle. The doctors say he has perfectly recovered. He says he never felt better. Here is inspiration for invalids. Many a man might cure himself of "incurable" disease, as this man did, if he would only make a fight for health.

Abolition of the Night.

The strenuous character of modern life is shown by the way in which we turn night into day. Two hundred years ago the night was really night, and everybody went to bed early and slept until daylight. Streets were lighted feebly or not at all. Footpads lurked in every shadow for the belated wayfarer, and, in the loneliness of the streets, were secure against interruption. The watch or patrol was abroad, but it was inadequate to police a large city.

Midnight, two centuries ago, was a holy, a haunted, and a fearsome hour. The man who stayed out until midnight went home in fear and trembling, and lost his reputation if his late homecoming were bruited about. None but the gayest, most reckless, and most dissipated young blades were ever out of bed in the small hours of the morning. Throughout the greater part of Christendom, two hundred years ago, curfew rang at nine or ten o'clock in the evening, and all lights were put out or were concealed, behind stuffed cracks and blanketed windows, from the eye of the prying watchman.

But now, how changed! Midnight has lost its charms and thrills. Graves no longer yawn and give forth their dead, nor do ghosts walk at the stroke of 12. No pensive Madeleine, trembling in her chaste couch, sits up nowadays at midnight of St. Agnes' eve to view her lover in a looking-glass. Midnight has become commonplace. Familiarity with it has bred contempt. One hardly ever goes to bed before that hour. Life is too short that we should waste the precious hours between blankets. Slumber, such as our forefathers knew, has fled our eyes. We cannot afford to give ten and twelve hours of the twenty-four to slothful sleep. Six or seven hours of dreamful, fretful dozing make up our full allowance. The twenty-four hours are hardly enough for work and sport, and we would make the day thirty-six hours long if we could.

The modern mind is appalled, observes the San Francisco "Bulletin," at thought of the immense waste of time which occurred in those epochs—literally, the dark ages—before gas, the arc, and incandescent lights, owl cars, and other inventions robbed the night of its blackness, and when men used to sleep soundly and long. A large part of the population of the civilized world, especially in large cities, now works at night. At midnight the streets are crowded, and at three o'clock in the morning there are many, beside the roysterers, to be met. Not a few of the mills and manufactories in Eastern cities run all night. When the ground is valuable, and every hour of idleness means loss of thrift for the owner, building contractors in large cities think little of putting on a night shift, and, with the help of searchlights, employing the whole twenty-four hours in the erection of a skyscraper. An army of bakers, printers, craftsmen, and tradesmen of all sorts toil at night and go home in the early morning. The telephone service never ceases for a moment. One can have a messenger boy at any hour. There are playhouses which advertise a continuous performance. Owl cars in every large city run on nearly every line. In short, we have very nearly abolished the night.

BRITISH OFFER ACCEPTED

Minister Bowen Conveys Venezuela's Acquiescence to Washington Embassy

Washington, Feb. 11.—Mr. Bowen has formally accepted Great Britain's protocol framed to secure a reference of the Venezuelan dispute to The Hague arbitration tribunal. He carried his note of acceptance to the British Embassy yesterday, and personally presented it to Ambassador Herbert. He expressed the opinion that it was a document of a high order from a diplomatic point of view.

Interesting Items.

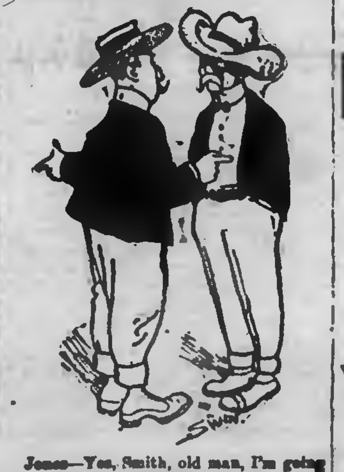
Captain F. C. Ishoy, a Dane, has invented a steamship which he thinks will be both speedier and steadier than the existing type. He makes the hull considerably more flat than in the ordinary model, thus decreasing the draft. But his most novel device is placing the screw under the bottom of the vessel instead of at the stern. Not only will such a ship be particularly seaworthy, says the inventor, but, with the same speed, it will save 20 per cent. in consumption of coal.

A new form of litter for carrying the wounded has been devised by Mrs. Chadwick, wife of the captain who commanded the flagship "New York" in the Spanish war. It is a simple arrangement of straps and slings supporting a broad canvas seat, and weighs only three and a half pounds. The New York "Sun" says of this invention: "It is no small thing for a woman to have solved the problem which has puzzled army officers and surgeons the world over. The litter for carrying the wounded which Mrs. Chadwick has devised is being praised as the simplest, lightest and most easily carried device of the kind yet invented."

The Canadian Pacific Railway Company are sending an electro-gasolene motor car to Banff, where it will be at the disposal of tourists who wish to examine minutely the grand scenery of the Canadian Rockies. Formerly visitors had to occupy observation cars attached as "trailers" to the regular express trains. The car will be able to make little trips to Field, etc., and a new pleasure is thus opened up by the enterprise of the Canadian Pacific Railway Company. There is accommodation for 14 people on the car, and five gallons of the gasolene enables it to run about 100 miles.

The state railway administration in Prussia has just settled upon a system of electric lighting for trains which is attracting much attention in Germany. The axle-driven dynamo having been found objectionable because it borrows too much power from the locomotive, and the system of storage-batteries being undesirable for other reasons, the plan adopted is to place on the locomotive a steam-driven dynamo, which supplies a current to a small regulating battery in each car. Thus every car in a vestibuled train has a separate lighting system fed from its own accumulator, although the general supply comes from the generator on the locomotive. Each car is provided with ceiling lamps and reading lamps.

The recent outbreak of volcanoes in the Antilles gives peculiar interest to a novel and rather startling theory propounded by the German geologists Paul and Fritz Sarasin. Says the Berlin "Gartenlaube" (newspaper): "Many theories have been proposed to account for the glacial epoch—or, rather, epochs—but none seems quite satisfactory. Now the Sarasins have calculated that a reduction of the average annual temperature by 7 degrees or 8 degrees F. would suffice to produce all the phenomena of glaciation. Such a reduction, they hold, may very well have been caused by volcanic eruptions. In the unparalleled eruption of Krakatoa in 1884 immense quantities of dust were lifted to a great height in the air. This dust remained suspended in the atmosphere for years, during which it was the cause of singular sunset effects and nocturnal 'silver clouds' observed in various parts of the world. Now, if we imagine the simultaneous eruption of a great many volcanoes, it is evident that the dust and smoke might impede the sun's rays sufficiently to bring about the small variation of annual temperature mentioned. A pleasing corollary of this ingenious theory is that, if we accept it, we must also accept the possibility of a new ice-age at any time."



Jones—Yes, Smith, old man, I'm going to economize on car fares, and walk home from the office every day. By the way, let's go and have something. It's a long way home.

An Unfortunate Figure.

"Dearie, I didn't know that wheat could be harvested in the winter time, and yet I see in this newspaper something about the price of January wheat. When I was a girl on the farm the wheat always ripened in July or August," and her face wore a troubled look as she laid down the paper in which she had happened to glance at the market reports while looking for the society gossip.

"Wheat doesn't ripen in January now any more than it did when we were young, my love," replied her husband. "The terms you refer to do not mean that the wheat ripened in January, but that it was sold for delivery in that month. It was harvested in July, just as it used to be, stored in elevators, and kept for use at some future time. The supply thus accumulated is then sold to various buyers, some of whom want it delivered in one month and others in other months. Sales thus made are called 'futures,' and form the basis of much of the gambling that takes place on 'Change."

"How interesting! Now tell me what 'squeezing the shorts' means."

He mused a moment, and then realizing the impossibility of properly explaining the term in his limited time, said:

"You are much shorter than I, you know. Well, when I put my arms around you I 'squeeze a short,' see?"

"Oh, indeed. Well, if that's what you men do on 'Change, it accounts for your devotion to business."

And he realized that he had made a mistake.

No Serious Hitch

Berlin, Feb. 11—The officials of the Foreign Office here deny that any insuperable obstacles to the signing of the German protocol at Washington exist. They add that a comparatively unimportant question of detail has been referred to Berlin, but that the signing will occur in a few days. First, Great Britain's protocol will be signed, and then the protocols of Germany and Italy.

To Set Her Free

(COPYRIGHTED)

By Florence Warden.

Author of "The House in the Marsh," "A Prince of Darkness," etc.

through an African campaign, this sort of experience is a mere picnic."

A look of interest suddenly peeped out of the sidelong glance she gave him. Then, as he still stood in the way between her and the door, she muttered, "Very well, then," and immediately walked back to the fireplace, where she resumed her former position, standing with one foot on the fender, and her eyes directed towards that terrible looking-glass.

Astley came forward slowly, drew one of the horse-hair arm-chairs back to a discreet distance, and sat down. As she was between him and the window, the only view he could get of her face was by the light of the fire below her, which threw distorting shadows upon her face. Little as he saw, however, he was conscious that she was taking up the burden of life again, and trying to devise some manner of tricking him, so that she might hide her identity.

Long before this Astley had discovered that his companion belonged to a different social class from that he had at first supposed, and perhaps she divined his curiosity. At any rate she presently said, after a pause:

"It's really most important that I should get back to Oxford quickly, as I'm only passing through it, with—with my aunt, and I have a train to catch to-night."

"Indeed! Then it's as well the cab is coming," said Astley politely.

"Yes, I hope it won't be very late. My aunt might be anxious. As we're both in great trouble, trouble about business, she might think, you know, she might think all sorts of dreadful things," went on the girl, fluently enough, but with a manner which was transparent to the observant Astley.

"Yes, indeed," said he, in the same tone as before, when she paused.

The girl went on with her odd confidences.

"You see women are easily depressed when anything goes wrong with them, and when you've kept a shop for years, and things suddenly go wrong with it, why you don't know what to do. But I suppose you don't know anything about shopkeeping?" she went on, turning suddenly to him, as if with a little burst of frankness.

Once again Astley smiled. This time safely enough, for his face was buried in shadow. And his answer was made in a little demure voice which startled her:

"Perhaps I know as much as you about it."

There was a pause and he heard her draw a sharp breath. Then she said curtly:

"You don't believe what I'm telling you?"

Astley answered with great suavity:

"Well, no, I don't. But what does that matter? It's no affair of mine, you know!"

Dead silence followed this unexpected retort. Then the girl moved restlessly, glanced two or three times at the motionless mass of shadow in the big chair, and at last asked in a querulous, high-pitched voice:

"How do you know it's not true?"

"I would much rather not answer you, but if you insist I'll tell you how I know."

Again she waited a moment, and then said imperiously, but in a low voice:

"I do insist."

"Well, then, I see that you don't belong to the class that keep shops, that keep them seriously, I mean."

"I don't see how you can know that. Tradesmen's daughters are educated nowadays, better educated, sometimes, than other people's daughters."

"Better educated, perhaps, but not educated in quite the same way. And they don't get the same tone."

Before the girl could reply to this, the sound of wheels and hoofs struck suddenly upon the ears of both, and they heard the cab stop. The next moment they heard someone running in the passage.

"We don't want to satisfy the curiosity of these people," said Astley quickly. "I'll go out and say *I* mean to stay here the night, while you will just get into the cab and drive away."

"Oh, thanks, thanks."

He was already at the door, and they exchanged a hasty bow as he went out. She saw nothing more of him. With her heart beating a little faster, she heard his voice informing the landlady that he hardly liked to risk the chilly drive, and asking for a room for the night. And a few moments later Mrs. Beane came in and told her the cab was at the door.

She got in quickly, not giving her address in the hearing of the landlady, but simply telling the driver to go into Oxford.

It was altogether a strange adventure, Astley thought, as he wondered who the girl he had rescued could be, and what her history was. Before night, however, he had personal concerns more pressing to think about, for the chill he had got developed into a feverish attack, and he had to send for his friend and a doctor.

Although he was well enough in a few days to go back to the hotel at Oxford at which he had been staying, Astley, weakened and demoralized by this fresh attack of illness following on the still more demoralizing typhoid, stayed on in the town, instead of going to his cousin's seat on the borders of East Lancashire, for the hunting season, as he had proposed to do.

The friend he had come to Oxford to see, an undergraduate, some half-dozen years younger than himself, did his best to make the time pass pleasantly for him. He introduced Astley to his friends in the neighborhood, one by one, and finally to a family named Bascot, who lived on the outskirts of the town.

"I'm afraid you won't find them very interesting people," he remarked, as they drew near the modern gabled red-brick house one Sunday evening. "But they're inoffensive at least. The son—there's only the one—is studying for the church. He's an ardent stamp-collector, and he's going to marry a rich cousin. That's about all there is to tell about him."

They were shown into the conventional drawing-room, which agreed in all respects with the promise of the modern gabled red-bricked exterior of the house. There were the usual small, over-crowded tables, the usual curiosities, the usual photographs. One of these attracted Astley's attention: it was that of a girl, in evening dress, holding a bunch of roses. He thought he had seen the face somewhere, but could not remember where. He had not, however, had much time for considering the point when the door opened, and Robert Bascot, the son, came in.

He proved to be a rather small and effeminate-looking fair man, with curly light hair like a baby's, and a precise little voice and manner. Astley mentally agreed with his friend that the stamp-collector might be amiable, but was not interesting.

And then two ladies came in.

"Mr. Haigh—my mother—my cousin!" said Robert Bascot, introducing the visitor.

Astley bowed, and shook hands with the elder lady. Then his heart leaped up to his mouth. For as his eyes met those of the younger lady, their eyes flashed out a mutual recognition.

Robert Bascot's cousin was the girl Astley had saved from drowning ten days before!

CHAPTER III.

Nobody noticed the confusion of these two, as Robert Bascot chirped out their names in introducing them to each other.

Astley bowed and looked down; so did Norma Bascot. There was a second's pause, and then it was Mrs. Bascot, a thin-faced woman of forty-five or so, who wore glasses and was "intellectual," who began the conversation.

And Norma stole away to the furthest possible corner, and took care not to meet Astley's eyes.

He was so utterly bewildered by the discovery that the girl he had saved from drowning and the rich cousin whom Robert Bascot was to marry were one and the same person, that it was with the greatest possible difficulty that he answered intelligently, and laughed in the right places.

And as soon as he could, he took the opportunity of examining minutely the face of the woman who had appeared to him within so short a time in two such very different characters.

So different indeed, that if it had not been for her own miserable self-consciousness, Astley might even have been tempted to believe himself mistaken. For, with her black hair beautifully dressed, parted in the middle, waved, and coiled into a massive knot behind her head, her face looked much more beautiful than it had done when she was blue with the cold and sick with nervousness: while her slight figure, which had presented no particular attraction when wrapped in a bedraggled skirt and shapeless jacket, looked exceedingly graceful now that she wore a black silk skirt, with a slight train, and a blouse of lavender silk trimmed with black velvet, and two rows of lovely pearls round her throat.

In the course of the evening Astley noticed other circumstances about the girl which excited his curiosity still further. In the first place, she received the attentions of Robert Bascot, who was most effusively courteous and even affectionate to her, with an irritable petulance which was patent to such a close observer as Astley. When the devoted Robert chirped into her ear, she looked helplessly round the room as if anxious for a chance of escape; and when he leaned over her, with an odd, prim little assumption of tender possession, she got up and walked away.

And throughout the long and somewhat heavy evening, which was characterised by much exchange of a dry sort of talk which the frequenters of the house considered intellectual and stimulating, the girl talked to everybody in the house, which was soon half full of visitors, except to Astley.

He, on his side, was bound to respect her evident wish that he should be equally discreet; but his curiosity was piqued all the same, and he would have been glad to exchange if only a few words with his heroine

The next best thing to talking with her, however, was to talk about her, and he contrived to mention her to Mrs. Bascot, by taking up the photograph he had previously noticed, and asking whether this was her niece.

"Yes," said the lady at once, "that is Norma. It's rather a good one: don't you think so?"

"Very," said Astley. And as he spoke he raised his eyes, and saw that the girl herself, with a look of deep anxiety burning in her eyes, had drawn near enough to listen to what her aunt and he were saying.

"It gives the Italian look, doesn't it?"

"Italian," said Astley, glancing first at the portrait and then at the beseeching eyes of the girl herself, and then quickly looking down again, "yes, perhaps it does. Is she Italian?"

"Not altogether, of course. Her father was my husband's brother. But her mother was half Italian, which accounts, I suppose, for some of her daughter's perversity. Norma's eccentricity is rather trying."

The good lady did not know how near her niece was.

"Well, eccentricity is rather refreshing in these days when we're all as much alike as if we'd been turned out by machinery," said Astley politely.

"Not in a young girl," retorted Mrs. Bascot almost tartly. "Why, only imagine what she did the other day! In the most dreadful weather, with a hurricane blowing and the snow falling fast, she went for a walk along the river bank, and of course slipped into the water, and came back more dead than alive, looking like a drowned rat. What do you think of that?"

Once more Astley looked up from the photograph, and saw that the girl was standing quite close to her aunt, looking piteously into his face. His eyes met hers for a moment only, and then he turned to the elder lady and said:

"Well, I think, if she fell into the water on a snowy winter's day, that you won't have to reproach her with such eccentricity again!"

The next glimpse he caught of Norma was of a pair of big dark eyes swimming in grateful tears.

When the time came for going away Astley tried hard to get near enough to the girl to bid her good-night. But she would not let him. She became absorbed in the conversation of somebody else whenever she saw him coming her way.

Astley, of course, said nothing to his friend, Jack Fielding, about his discovery. But he lingered on in Oxford, and when Jack proposed another visit to the Bascots, he readily assented.

"Now I wonder at your wanting to go there again," Jack said. "To my mind it's the slowest house in Oxford. And the women one meets there are all so high dried, except Mrs. Bascot's niece. You're not attracted there, I hope, because you know she's booked!" he added complacently.

Astley shrugged his shoulders with a frown.

"Am I likely to be attracted by any woman, after my experience?" said he impatiently.

"I know you say you're not, but—"

"And it's the truth. Perhaps one of the attractions of the Bascots' house to me is that the culture-prigs seem to have dried most of the attractiveness of femininity out of the ladies."

"Not out of Norma. She's feminine enough, in all conscience, with her im-

To be Continued.

A Dominion Exhibition

Ottawa, Ont., February 12—Dr. Orr, general manager of the Toronto Industrial Exhibition, is in the city interviewing the ministers in regard to the holding of a Dominion exhibition. An effort is being made by the management of the Toronto Industrial Exhibition to acquire possession of the military lands adjoining the show grounds, so as to enable them to be taken into the space.

THE HUMBERTS IN COURT TODAY

Opening of the Celebrated Swindle Cases in Paris—Madame Is as Cool as Ever

Paris, Feb. 11.—The Humbert family made its first appearance in the criminal courts today, when the case of Banker Cattani was taken up in the Ninth Correctional Chamber. There was great public interest manifested, and the court-room was crowded.

The Humberts were brought in like ordinary prisoners, and took seats in the prisoners' box. Madame Therese Humbert displayed her usual bravado and coolness. Her sister, Marie Daurignac, apparently was much unnerved, while the latter's brothers Romain and Emile maintained an attitude of calm defiance. The case does not involve the main question concerning the Crawford millions, but M. Cattani's charge that they libelled him in referring to the banker as a usurer indirectly affects the entire transaction.

The early stages of the trial today did not introduce any sensations. Madame Humbert gave a long, rambling statement of her dealings with M. Cattani, and alleged that his demands for excessive interest and her borrowing from him amounted to about $600,000. When M. Cattani was heard, and he repudiated the charge of usury, Madame Humbert sprang from her seat and asked for the privilege of interrogating the banker, but the presiding magistrate sternly repressed her.

STUDY IS "BAD FORM

In the Regiment and Young Leveson-Gower Had to Leave

London, Feb. 11.—The Guards' scandal is monopolizing the press. Indignation is general especially in the case of Lieutenant Leveson-Gower, nephew of Admiral Cochrane, who bullied out of the regiment because he insisted upon studying military subjects. Study is considered bad form in the Guards. Colonel Kinloch won't talk, but the matter will be brought before Parliament.

People who have opinions to express on the subject of the "ragging" in the Guards should remember one fact—that the Brigade of Foot Guards is remarkably efficient from the military standpoint. The Guards' Brigade went through the South African campaign from Belmont to the blockhouse lines with credit. Their dash in the early morning at Belmont taught the Boers the fighting power of the British soldier when he can get at his enemy, and produced, loyal Afrikanders state, an immense moral effect in South Africa. They showed steadiness and constancy all through the war, and probably had a longer term of continuous campaigning than any other infantry brigade. The Foot Guards are the one corps of infantry in Great Britain in which genuine short service prevails. The men remain only three years with the colors, yet their excellence in ceremonial drill is proverbial, and the events of the past three years have shown that good drill and good fighting are not necessarily divorced. Such proficiency on the part of such young soldiers must mean unusually hard work on the part of the regimental officers. Let that be remembered when subalterns' courts-martial are being passed in view.

BOY ATE RED PEPPER DIED OF STARVATION

Had Convulsions and Could Not Swallow After

Montreal, Feb. 11.—The courts will have to deal with an extraordinary case as a result of a verdict of manslaughter returned by the coroner's jury at an inquest held into the death of A. Procal Fox, the six year old son of Joseph Fox, St. Lazare, County of Vaudreuil, near Montreal, who died on Sunday, after several months of suffering.

The evidence showed that in June last the father took his boy with him to a building bee at Alphonse Charlebois, and Miss Sududa Charlebois, 20 years of age, gave the boy a red pepper to eat. Severe sickness and convulsions followed, and vomiting was kept up for five or six days, after which he was never able to swallow food. The cause of death, according to medical testimony, was starvation, and the jury returned a verdict holding Miss Charlebois criminally responsible for the death of the boy, and ordered her arrest.

The coroner pointed out that when death occurs as the result of an act which was not in itself intended to cause death, but merely for mischievous purposes, the perpetrator becomes criminally responsible for the death.

We have the absolute monopoly of transportation, etc., of EASTERN HONDURAS, the only outlet for 80,000 people. Three hundred and eighty six square miles of land, millions of feet of choicest hard wood, including mahogany,—and no debts. Company in active operation and earning money rapidly. Plantations now being put under bananas and rubber cultivation—soil suitable for any fruit grown in the Tropics, such as oranges, pineapples, coffee, tobacco, etc. Enterprise is backed by capitalists whose names guarantee efficient management, the Treasurer of the company being on the ground. Stock will sell at par within a year.

THE AMERICAN-HONDURAS CO.
336 BROADWAY, NEW YORK.

ENTIRELY OUT OF THE ORDINARY

Yet one of the ways that LEAD TO FORTUNE

Why not make a small investment in oil lands right ahead of good producing wells, some having wells producing oil on adjoining leases? The oil now brings [illegible] per barrel, bought by the Standard Oil Co., without any transportation charges, and is bound to go higher; a few hundred dollars often invested in property of this kind yields thousands of dollars profit. I personally know of parties who made over [illegible] in 60 days time on an investment of this kind; also have wells making from 10 to 200 barrels a day. Parties desiring to organize a company will do well to investigate this opportunity, getting thereby the advantage of years of experience, and if you don't want to drill the wells wait until the wells drilling close to you have come in and reap the benefit of their outing. The oil business conducted on business principles, with honest management, is bound to succeed. You do not have to look farther than the Standard Oil Co. to see what honest management founded on facts will produce, they have drawn very heavily on stocks the past three years and there is not enough of this grade of oil now above ground to run the country for more than two years, so you can readily see the profits that will be realized by starting now and obtaining the big price the Standard Oil Co. will be compelled to pay for crude oil to supply the demands of the country. For particulars write THE RANGER CO., MARIETTA, OHIO.

—THE—

Merchants & Traders Oil Company,

of Marietta, Ohio, will stand investigation through Mercantile Agencies or leading people. It has been successful in its operations so far, only drilling one dry hole in getting 12 wells, and one of its wells is a 25 barrel well in the acre tract, where there will be room for 160 wells. The company is now EARNING DIVIDENDS, and will start paying better than interest in January next, increasing thereafter as new wells come in.

The present price of shares is $25 for 100, but will advance to $50 as soon as some of its wells now drilling are completed.

A VERY DESIRABLE INVESTMENT

THE McLENNAN PAINT COMPANY

LIMITED

BUFFALO - - - NEW YORK

INCORPORATED UNDER THE LAWS OF CANADA

CAPITAL, - - $500,000

Dividends on Preferred Stock Paid Quarterly.

For the purposes hereinafter stated, we offer at par,

50,000 of our 7 per cent. Preferred Treasury Stock Shares, $100.00 each

Payments as follows: 20 per cent. on amount of stock subscribed for at time of subscription; 30 per cent. in 60 days balance in 90 days. Receipts will be issued until full amount of stock subscribed is paid, when certificates bearing the Company's seal, and signed by the President, Secretary and Treasurer are issued. The McLennan Paint Co., Limited, have one of the most modern plants of its kind in the world, occupying 300,000 square feet of floor space. The capital of the Company is a half million dollars. The growth of the business has been phenomenally rapid and conservative. In line with other large industries, the Company propose to establish a branch factory in Canada for the manufacture of their products, which are covered by valuable patents, and which practically give the Company a monopoly, and, for the above purpose, offer at par $50,000 of their 7 per cent. Preferred Treasury Stock

The McLennan Paint Company, Limited, was organized in 1892 by Mr. C. J. McLennan of the McLennan Dipping Process, and other valuable paint-making machinery. The Company began business in rented premises, in East Buffalo. So profitable was the business, and so rapid the growth, that large factories were built in North Buffalo in 1895. The business again doubled, and another plant was added in 1898. In 1901 the Company invented and perfected a line of reds, or vermilions, permanent in color, and at much less cost than the old line colors. This increased the sale of their products practically one-fourth, making it necessary for them to build a new Color and Chemical Works. This factory is without doubt the largest and most modern in the world. Mr. Charles J. McLennan, the President of the Company, and the inventor of labor-saving machinery, such as dipping tanks, mills, etc., is recognized as one of the most skillful and best known paint manufacturers in the country. The name and fame of this Company, and its products, are known all over the United States and foreign countries, and that they will capture the Canadian market is evidenced by the fact that many of the large Canadian manufacturers are at present using their goods, in face of the heavy duty. It is with a view to saving this 25 per cent. duty and adding it to to the profits of the Company that they have decided to establish a branch in Canada, which will be controlled and managed by the parent Company.

Practical men of means, character and national reputation constitute the directorate and management. Each department is managed by a skilled man; monthly statements rendered and careful audet made semi-annually. The books are always open to the smallest shareholder. The finances of such a concern are guarded as closely as the finances of any bank, and failure is practically impossible.

COPY OF TESTIMONIALS.

A. C. Cornell, Toronto, Ont.: Columbia National Bank, Buffalo, N. Y., Jan. 23, 1903.

DEAR SIR,—The McLennan Paint Co. are good customers of this bank, and I have known them personally for years. All the officers bear excellent reputations, and are considered good business men. Their management is evidenced by the large business they have built up, as careful and conservative. They have met with great success in the past, and I beileve that today, theirs is one of the largest and most prosperous concerns of its kind. I have every reason to believe that the stock which they are now offering for sale is a desirable, as well as a safe investment. Yours very truly,

L. H. GETHOEFER, Cashier.

The Merchants' Refining Co., Refiners of Petroleum, Paraffines, Paraffine Wax,
Lubricating Oils, Residuum, Napthas, and Gasoline,

A. C. Cornell, Toronto, Ont.; Buffalo, N. Y., Jan. 23, 1903

DEAR SIR,—Your favor of 21st received, and note you are offering for sale $50,000 of the preferred stock of the McLennan Paint Company and ask me what I know of the firm. Would say I have had business dealings for eight years—transactions of many thousands of dollars. I am also doing business with other houses engaged in the same line, and desire to say there is no house in America to-day that stands higher than the McLennan Paint Co. The growth of their business has been phenomenally large, and under the conservative management of the President, Mr. C. J. McLennan, the success of the business is assured in the future. As an investment, in my judgment, nothing could be safer than the stock they offer.

Very respectfully, C. A. SALISBURY, Manager.

A. C. Cornell, Toronto, Ont.: Buffalo, Jan. 26th, 1903.

Dear Sir,—Referring to the sale of $50,000 of our 7 per cent. Preferred Stock, the Prospectus does not elaborate on the proposition, but merely mentions the amount guaranteed. I desire to inform you, however, we could have paid at least 14 per cent. last year, but carried balance to a Reserve Fund, which, necessarily, makes the stock very valuable.

Very truly yours,
THE McLENNAN PAINT CO., LIMITED,
C. J. McLennan, Manager.

P.S.—Having visited this proposition on behalf of some very conservative investors, I can verify all the above. The plant is extensive and modern in every detail; officers and management skilled and very industrious; all the products superior. This is a Canadian Company, Canadian Charter. Having built in Buffalo, in proximity to raw material, by shipping here in ground state and preparing here, will save and add large duty to already large profits. Bear in mind this is not prospective, but a large, rich, going, paying institution. Prospectus, application forms, and any further particulars, and subscriptions, address the undersigned. All cheques or drafts for stock made to the order of the Company, and forwarded to

A. C. CORNELL, Fiscal Agent,
16 Yonge Srreet Arcade, Toronto, Ont.

Gem Consolidated Gold Mining Company Stock at 50 cents per share is one of the safest propositions ever offered to investors.

The property is located in the heart of a rich section of Eastern Oregon, and is steadily producing—no debts, well-equipped and practically ready to pay dividends.

Deeper Levels, New Hoist, Increased Power, New Mill, More Ore, Greater Earnings
That's the Policy of the

GOLCONDA

CONSOLIDATED GOLD MINES COMPANY

The Golconda made a fortune for its former owners in its surface workings. From 500 feet the shaft will be sunk to 1,200 feet. A new hoisting plant has been ordered. That will carry out the waste rock and the ore. From 20 stamps—the size of the present mill—the reduction plant will be increased to 60 stamps. Nine hundred feet of pipe is being added to the 7,000 foot pipe line. This will increase the electric power to 1,000 horse power.

The COLCONDA produced ore worth $211,000 per ton. That's the Government record. - - - -

Suppose you were to invest in the future of this great mine? You would want to know something about it and its neighbors; you would want to know everything about its directorate; you would want to know that your invested capital was safe; you would want to know what it would likely earn from the time dividends will be declared—March, 1903—and for scores of years thereafter.

CAPITAL

10,000 shares 7 per cent. Cumulative Preferred Stock, par value $100 each........$1,000,000 00
50,000 shares Common Stock, par value $100 each, issued and fully paid........$5,000,000 00
Total Capitalization........$6,000,000 00

Issue of $1,000 000 7% Preferred Stock in 10,000 Shares o $100 each at par.

This Stock is preferred both as to Assets and Dividends.

The shares are entitled to cumulative preferred dividends from the net earnings of the Company, at the rate of 7 per cent per annum, payable half-yearly on the first days of April and October. They may, at the option of the holder, be exchanged for common shar s. They are subject to be called in, in whole or in part, by the Company, at 15.00 per share, at any time on or after 1st January 1909.

The total issue of Preferred Stoc. is only $1,000,000.00, the whole of which is now offered.

Subscriptions for 10,000 shares of $100 each of the 7 per cent Preferred Stock of the CANADIAN STEEL AND COAL COMPANY will now be received at par, that is, $100 for each $100 share as follows:—

5 per cent on application.
25 per cent on allotment.
35 per cent 30 days thereafter.
35 per cent 60 days thereafter.

One share of common, par value $100.00, given with each share of preferred.

The whole of the instalments remaining unpaid at any time may be prepaid in full. A discount of one per cent will be allowed upon the par of each share if prepaid at time of allotment.

Notice of allotment will be sent promptly by ordinary letter.

COAL

PROPERTY IN FULL OPERATION

Company owns 9,600 acres of coal property known throughout the coal trade as the New Campbellton Colliery, located on Bras D'Or Bay, County of Victoria, Cape Breton, Nova Scotia. Mine is fully equipped, producing and marketing 100 tons of coal a day at a net profit of $1.00 a ton. Improvements are now being made that will increase the output to over 1,000 tons a day. On present output, figuring 300 working days in year, the net result will more than pay interest on entire issue of preferred, with output of 1,000 tons a day net result will be $300,000 per annum.

IRON

RICHEST ORE IN THE WORLD

Company owns in fee simple, free and clear of all incumbrances, 4,000 acres of iron ore deposit, located at Natashquan (tidewater) situate on North shore of Gulf of St. Lawrence, in the County of Saguenay, province of Quebec.

Deposits contain 20,000,000 tons of ore ABOVE SEA LEVEL ALONE.

Quality of ore is highest ever discovered, running from 69 to 72 per cent. in metallic iron.

More orders for the sale of this ore have been received by the Company than can possibly be accepted, and at a price netting the Company a profit of $2 a ton F. O. B. vessels at Company's docks.

GEO. G. HALDEMAN, Director.

REPORT BY EX-SUPERINTENDENT OF MINE

Cecil R. Gold Mining and Milling Co., Los Angeles, California.

Ballarat, Cal., Nov. 1st, 1902.

Gentlemen,—Your request for my opinion as to the "[illegible]" group of mines and [illegible] claims in which you are interested in this territory, to hand, and in reply will say:

The "[illegible]" group, which is located southeast of Ballarat some three and a half miles, consists of twelve claims, equal to 240 acres. The ledge crops out, more or less the full length of these claims, showing the same character and formation of rock as where development work has been done. In [illegible] of the [illegible] it shows highly mineralized rock, with [illegible] of iron, mica, schist, slate, [illegible] porphyry, gouge, quartz and [illegible], all bearing more or less. Where work has been done, it shows a very marked improvement in both quantity and quality of gold-bearing rock. [illegible] with the [illegible], the ore [illegible] much iron and copper stain. All mill tests show [illegible] are commencing with the surface; in fact, I milled for several days and recovered [illegible] and [illegible] per ton, yet the milling process does not pay more than two-thirds of the value of the ore, the tailings [illegible] as high as [illegible] per ton, and [illegible] than [illegible]. To save the entire value of your ore it will be necessary to install either concentrators or a cyanide plant. From careful study and [illegible] examination of the surface of the ground, and down as far as has been opened below the surface, I am highly pleased with the property. It is certainly a fine property, and as good as any I have ever had the pleasure of examining. Considering your mill site, with [illegible] facilities added, water, fuel, and cheapness of mining the ore, the Cecil R. will be capable of paying continuous dividends when your capacity for milling is increased to what it ought to be.

Wishing you every success, I remain, Yours very truly,

(Signed) G. W. FLEMING,

Ex-Mine Supt. Cecil R. Gold Mining and Milling Company.

[illegible] is now [illegible] cents a share, and we offer [illegible] shares at this price, but it may be advanced by January 1st, 1903, to [illegible] a share.

Market Activity Increasing

It now would appear as if there was a revival of speculation at hand, stocks are again waking up and becoming more active while prices are hardening. Many issues are now selling at exceedingly attractive prices, warranting purchasing. An increase in volume of business at present brings higher prices.

We will be pleased to notate upon request the most desirable issues for immediate purchase.

For an account with us amounting to $100.00, we will purchase and carry for you 10 shares of any active stocks, 2,000 bushels of grain or 100 Bales of cotton; larger amounts, in proportion. We solicit your investment, banking or speculative account. Let us send you for a while, our

"Daily Market Letter,"
And present you with our

SIOCK MARKETS

COTTON AND THE SOUTHERN ROADS

New York, Feb. 13—The recent sharp and well merited rise in cotton is going to have an extremely bullish effect upon the stocks of the various southern railway lines. Cotton has advanced about one cent per pound. A perusal of the files of these letters and of one of our special weekly cotton letters will show how correctly they at the proper time foreshadowed the advance. The gain figuring 500 pounds to the bale, and a crop of 11,000,000 bales, means an increase in the wealth of the south of 55,000,000. This will give them that additional amount of purchasing power, and will inure to the benefit of the railways of the southwest. It will be a great stimulus to all southern issues. We are very bullish, as a consequence, upon Katy, and Texas and Pacific and all of the southern issues. The south shows a relative larger percentage of gain proportionately than does any other section of the country. More money has gone into these states from the north in the past year or so than ever before. They never were in such excellent financial shape. Another favorable feature having an important bearing upon the future of values is the way legislation is shaping at Washington. The Aldrich bill, if it become a law, and it now looks as if it will, obviate any further difficulty and its market effect will be both instantaneous and marked easy money. Good prices for crops, growing railway traffic, all the time are bound to bring their one market effect. What won't go down must go up in Wall street. Things cannot remain stagnated there for any length of time. As every effort recently made to depress prices has fallen flat and listless, it is fair to anticipate that efforts to advance prices will meet with every encouragement.

Summary—London came depressed early this morning apparently upon the announcement of the new Erie Bond issue made public over the holiday. Quick sellers of Erie might consider however what happened after the Atchison announcement of a new bond issue. After an early depression the stock advanced over 14 points. We deem it unwise to sell Erie but would advise its purchase when weak. Copper kept pretty close to 70 all day and Peoples' Gas held around 107. Leather preferred after falling to 88 3-4 again crossed 94. It is going higher. Smelters crossed 66. The railways opened down also, then advanced later. The following issues look like unusually good purchases at present. Mo. P., Manhattan, B. & O., Atch., the Readings, Eries, Tex. Pac., Wabash, R. I. and Soft Coalers. We remain bullish. Tomorrow's letter, "Buy Mo. P., Gould Stocks, Market Features." Money closed 3 per cent.

THEY ARE A MARVEL

Dr. Clarke's Little Red Pills the Greatest Wonder of the Age

Editor of the Morning Times:

Sir,—I am only too pleased to write a letter to the press, as I firmly believe that all who suffer from rheumatism or any troubles of the blood can get sure and certain relief. I was ill for many years, and am now entirely well. Dr. Clarke's Little Red Pills are without doubt the greatest wonder of the age in medicine. They cured me, and I know they will cure others who are even worse than I was. I write this of my own accord in the hope that it will do some good. Esma Blair, G. T. R. News Agent, Union Station, Toronto.

A. R. Logan, Stanstead, Que., writes "Six boxes of Dr. Clarke's Little Red Pills entirely cured me of indigestion after years of torture."

Dr. Clarke's Little Red Pills are positive and certain cure for rheumatism, asthma, paralysis, coughs, lame back, indigestion, all stomach and liver troubles, female complaints, even when the diseases have been standing for many years; the most stubborn case will yield. Sold by Ormond & Walsh, Peterborough, price 50c. per box.

Dr. Clarke's Sure Cure for Catarrh and Dr. Clarke's Sure Cure for Eczema, same price. $500 will be paid for any case that it will not permanently cure.

THE IRRECONCILABLES ARE DWINDLING

Line of Cleavage in South Africa More Clearly Drawn Since Saturday

London, Feb. 12—The Times' correspondent at Springfontein says the line of cleavage in the ranks of the Boer extremists who waited on Mr. Chamberlain on Friday, has been clearly defined since Saturday's banquet. The irreconcilables are reduced in number. A memorial is being signed deprecating the lack of courtesy shown Mr. Chamberlain by some of the delegates and will be forwarded to him at Cape Town.

The scheme of settlement of the compensation scheme does not meet with complete favor, however, even among the loyalists. Local Magistrates, who will be the commissioners to carry out this plan, have caused many complaints and in some cases have proved incompetent. The resident magistrates in out-lying are ordinary inhabitants. The British Government, therefore, should exercise great care in selecting the. It is no use preaching conciliation if the administration of law in the out-lying districts is [illegible] the inhabitants to justly [illegible].

INTERNATIONAL ELECTRIC MINING Co

185 SUMMER ST., - BOSTON, MASS.

A Dividend Payer for the Past Five Years.

12 PER CENT GUARANTEED

Capital Stock, $500,000. Par, $1.00, full paid and non-assessable

Over eight thousand tons of $60.00 ore mined and smelted from this group of mines.

A limited number of shares of the stock of this Company now offered at seventy-five cents per share. This price will shortly be increased to par. Stock registered by the International Trust Company, Boston, who is also the transfer agent.

This Company has a small capital stock.

The International Electric Mining Company owns seven mines and milling plant.

The Brooklyn and New York mines of this Company lie north of and join the Victor and the Hoodlum—two rich mines that are now being worked by California parties. On the west lies the Electric Mining Company's mines. In these mines are millions of dollars' worth of rich ore in sight. On the south, adjoining the Berlin mine of this Company, is the Montazuma and Clipper. From the Montazuma over three million dollars has been taken within 80 feet of the grass roots.

This Company owns free and clear seven mines of twenty acres each, all containing rich ore, located in the Arabia and Trinity mining districts, Humboldt County, Nevada. The Company has worked these mines for the past five years, and is now driving a tunnel to cut out a rich ledge about 500 feet from the surface. The Arabia mining district, in which these mines are located, is a lively district—a great many men being employed there. The tunnel now being driven on the Brooklyn mine has about 250 feet already completed. When the tunnel cuts the main ledge, which has just been reached by the Victor tunnel about 500 feet, the Brooklyn will have about 300 feet stoping ground, which runs high in gold and silver, over $60.00 per ton.

The Company is offering for a short time a limited amount of stock for the enlargement of its plant and the working force at the mines and for the completion of the Brooklyn tunnel.

This Company has thousands of tons of rich ore in sight.

We are not making a lot of talk, because it is unnecessary. What the investor wants is dividends, which we have paid for the past five years. Now if you want a safe 12 per cent. investment, let us hear from you.

INTERNATIONAL ELECTRIC MINING Co.
185 Summer Street, Boston, Mass.

References furnished upon application.

THE OLD COMSTOCK

A California mining paper has this to say: "Nevada, that grand old stamping ground of mushroom millionaires, who plucked enough wealth from her prolific fields to build mansions, banks, and big hotels in San Francisco, and palatial residences in Paris and London, is again astonishing the world by making more millionaires and by yielding millions in gold and silver from a new field which rivals the old Comstock lode in the days of its pristine splendor. Not only in Tonopah and Arabia districts, where within the past year nearly ten millions have been exposed, are operations active, but in every mining district in the Silver State are operations active, and Nevada will once more take her place among the big producers, the peer of any of them."

Daily Nevada State Journal, January 4, 1903.

Lovelock, Nev., October 6, 1902.

International Electric Mining Co.,
Boston, Mass.

Gentlemen,—If you wish to sell your Brooklyn mine I can get you a good price for it. If it was mine I would not sell it at any price, as you have more than a million dollars of ore in sight.

G. W. OSTRANDER, Supt.

Boston, Mass., December 1, 1902.

Mr. Geo. D. Burton, Treas.,
International Electric Mining Co.,
Boston, Mass.

Dear Sir,—During the six months of October and November of this year I visited the mines of the International Electric Mining Company, situated in Arabia and Trinity mining districts, Humboldt County, Nevada. I found the country remarkably mineralized; in fact, the possibilities of the country as a mineral producing country are yet unknown. For years it certainly has produced well. The work now being done in the Arabia and Trinity districts establishes the fact that they are fine producers.

I also found that there is a great deal of interest being taken in these properties, which have produced a great deal of wealth the past quarter of a century.

M. A. LATHROP, Mining Engineer.

Here is where Hundreds have been made Millionairs.

THE ELECTRIC SPARK GOLD MINING COMPANY

Is in this famous little kingdom, and is surrounded by mines that are making their owners wealthy.

CAPITAL STOCK $200,000 Par Value $1.00

We are working this mine every day doing a great amount of development work which will enable us to commence regular shipping very soon. Our shaft is now 175 feet deep, with a streak of pay ore starting at the grass roots, the vein is over 3 feet wide at the bottom of shaft, and runs from $45.00 to $85.00 per ton, mostly gold. We are only three-quarters of a mile from railroad and have a well traveled wagon road from mine to depot. There are thirteen stamp mills at Black Hawk, three-quarters of a mile from this property. Our company is managed on conservative lines by practical mining men who understand the business and are familiar with this field of gold.

We have placed a small block of this stock on the market at 20 cents per share which will be worth $1.00 in a short time. Now is the time to buy.

The Electric Spark Gold Mining Company,
NEBRASKA TELEPHONE BLDG, OMAHA, NEB.
C. H. J. MITCHELL, Fiscal Agent, Peterborough, Ont.

"THE FRIDAY MINE"

Located at Pearl, Willow Creek, Boise County, Idaho

About 28 Miles Northwest of Boise City

THE FRIDAY GOLD MINING CO. is a corporation duly organiz d under the laws of the State of Oregon, with head office at Sumpter, Oregon, owning and controlling "The Friday Mine." Capital Stock, $1,000,000, divided into 1,000,000 shares. Par value $1.00 per share, fully paid and non-assessable, no personal liability. 250,000 shares have been set aside and placed in the treasury of the Company to be sold for the purpose of equipping the "Friday Mine" with machinery. It is for this purpose we are offering you stock in this great mine. This plant will handle 60 tons of Friday ore every 24 hours. The general average of the Friday ore is over $20 per ton. The ore as it was shipped to the smelters at Salt Lake averaging over $35.00 per ton. The Friday is highly developed, great quantities of ore blocked out and in sight ready for the mill. As soon as the mill is completed the Friday Mine will again pay dividends.

Large ore bodies which will net to the company $50,000, for the first few months, are now blocked out ready for the mill. As soon as the mill is completed you will draw your regular monthly dividend. It is safe, certain and conservative.

We are not soliciting your money for the purpose of developing the mine, but only for the purpose of erecting a mill to work the ore bodies in the mine. The company is officered by men of well known business ability, mining experience and strict integrity.

Hon. Martin H. Jacobs, State Mining Inspector of mines, for the State of Idaho says: "The Friday has a large amount of good ore in sight, and there is no question about its being a good paying property."

Make all your cheques and drafts payable to

NEIL J. SORENSEN,
Financial Agents, SUMPTER, OREGON

or

R. J. KIDD, Fiscal Agent,
348 George Street, Peterborough.

Thunder Mountain!

is the richest gold producing camp in the United States, and also the largest. The Thunder Mountain district, in central Idaho, is twenty miles wide and forty miles long. In comparison with this we have Cripple Creek, four miles wide and seven miles long. In many of the Thunder Mountain mines ore has already been reached that carries ONE THOUSAND DOLLARS IN GOLD TO THE TON. All of the Thunder Mountain ore is free milling, which means that it can be treated by the cheapest extraction process known—the ordinary stamp mill. It can be both mined and milled at a cost not to exceed $2 a ton. The past years operations in the several working mines have opened up millions of tons of ore that will give a net profit of from $10 to $30 a ton, enabling the respective companies to pay dividends at a rate never before equalled. Such is the showing and the prospect of the

EAST DEWEY GOLD MINING CO.

which unless all indications are at fault, will become the largest producer in the district. The EAST DEWEY mine, which it owns outright, is located directly on Thunder Mountain, just east of the famous "Dewey" mine, which already has 500,000,000 of ore in sight. The surface area of the East Dewey mine is one hundred and twenty acres—six full quartz claims. The company has also secured the big GOLDEN GATE mine, in the Big Creek section of the Thunder Mountain district—which has been so aptly termed "The Pot of Gold"—and is now developing the mine with all possible speed. For a distance of 9,000 feet, nearly two miles, the Golden Gate mines cover a mineralized ledge that is 900 feet wide, with an average height above the tunnel level of 500 feet, thus giving it the largest exposed tonnage of any mine in the west.

If you would share in the enormous profits which these figures indicate and which these developments promise, invest your money in "East Dewey" Stock. It can be bought to-day for 10 Cents a Share. Its par value is $1.

If the East Dewey mines are what they appear to be, and there is absolutely no reason to doubt or question these indications, this stock will eventually be worth at least $10 a share, and to-day you can buy it for ten cents. PRICE ADVANCES TO FIFTEEN CENTS ON FEBRUARY 28th. 5% discount allowed for cash. Stock sold at flat price of 10 cents on deferred payments, 10% with application, and 10% monthly until paid. Full particulars, prospectus, etc., on request.

BUY ! WHY ?

BECAUSE

THE SOUR LAKE OIL CO.

Has placed four-fifths of its stock in the treasury for development work; and because

Oil is reached in less than half the depth required on Spindletop Heights in Beaumont;

The people in Canada are well acquainted with the management, which is in the hands of HON. JOHN L. BITTINGER, United States Consul General to Canada; F. S. Ashley, Vice-President of the Massachusetts Securities Co., and W. L. Marston, Vice-President of the American Union Oil and Refining Co.

These gentlemen have made a dividend payer out of one company and have raised the value of its stock from 5c per share to par value, or 25c, within a very short time;

The company is operating in the Sour Lake field, where fewer wells will tap the oil than at Spindletop; this insures a greater flow of oil, and it is of a better quality;

This is the first allotment of shares at the present price of TEN CENTS PER SHARE; it is the lowest price at which you can buy, and the time left in which to buy at TEN CENTS is short.

Make remittances and inquiries direct to

Colonial Securities Company,
62 Wall Street, New York City.

PETERBOROUGH, FEB. 14, 1903

TOWN AND COUNTY NEWS

DASHES HERE AND THERE BY TIMES' REPORTERS

Our Fire Loss has been adjusted—will be Opened in a few days—A. W. CRESSMAN

A Good Canvasser Wanted

We want a good, steady man to canvas for The Times, to whom we will pay a good salary. None but a man with experience need apply. Apply at Times Bookstore.

St. Luke's Church

The Mission Band will meet this afternoon at 3.30 o'clock. The members of the choir are requested to attend a special meeting to-night at 8 o'clock in the church. A choir practice will be held.

FIRE SALE.

On Tuesday Morning at 9 O'clock.

What remains of our DRY GOODS and CLOTHING Stock will be put on sale as the premises have to be in the hands of the contractors in 2 weeks. The sale will be

SHORT & SHARP.

Both stores will be utilized for this sale.

A. W. CRESSMAN.

385 and 387, George street.

The Delineator

The Delineator for March has reached us, and is as usual brim full of good things for the fair sex. As a fashion magazine and ladies' companion this popular periodical has no equal. For sale at The Times Bookstore, 15 cents per copy, or $1 per year.

—That Winnipeg man who called the Scotch Curlers down for drinking too much must remember that the roarin' game o' curlin' has been identified with thirst for about 100 years.

THERE IS A COLD SNAP COMING

but a WARM SNAP in prices at the old reliable firm of PETE SIMONS & CO. will make matters right. He quotes the following red hot prices:

$ 7.00 Overcoats reduced to $ 4.00
20.00 Overcoats reduced to 14.00
4.50 Peajackets reduced to 2.50
7.00 Peajackets reduced to 4.50

OPEN ON MONDAY

Mr. Robt. Fair's Store Again Ready for Business

Having succeeded in arriving at a satisfactory settlement for the damage done to their premises during the recent fire at Mr. Cressman's store, Messrs. R. Fair & Co.'s store will open for business on Monday morning next at 9.30 o'clock.

The company has been at a loss since Saturday last on account of having their store closed to the public while the negotiations for the settlement were going on.

AT THE FACTORIES

The Evangelists Have Addressed Noon-Day Meetings

Through the courtesy of the managers of the larger factories of Peterborough, services have been held for the employees at 12.40, noon hour. The Wm. Hamilton Company, the Peter Hamilton Company, and the Cereal Works have all been visited this week. The evangelists have won the men's hearts by their sweet singing and their helpful speaking.

YOUNG MEN'S GUILDS

Meeting in Charlotte Street Sunday School Room

A joint meeting of the Young Men's Guilds of the town took place last evening in Charlotte street Sunday school room. A most interesting debate was conducted on the topic "Resolved that Trades Unions should be incorporated."

THE NEW SAW MILL

Timber Being Procured for the New Dickson Company Mill

The timber and other material required for the new saw mill, which the Dickson Company propose to erect on Burnham's Point, is being hauled to the ground. The mill will be erected as quickly as possible, and will be in operation early in the season.

Men are also at work putting in buoys and cribs, to which booms for holding logs will be attached when the ice disappears. The company will have a splendid piling ground, and will be connected with both Grand Trunk and C.P.R.

Coal Dealers in Trouble

The criminal charge which is being pressed against the coal dealers of Brantford, for entering into a conspiracy to keep up the price of coal, is likely to be imitated in Ottawa. It is alleged that the dealers in the Capital are members of the Association. The Times is informed that Peterborough dealers are in no way implicated, not being connected with the combine, which has its ramifications in many towns and cities throughout the province.

Horses Wanted

Mr. W. J. Pearson will be at the following places for the purpose of buying a carload of good, sound, fat horses of every description - White's Hotel, Peterborough, Wednesday, Feb. 18th; Simpson's hotel, Lindsay, on Thursday morning, Feb. 19th; Brooks' hotel, Fenelon Falls, Thursday afternoon, February 19th. Mr. Pearson pays the highest possible prices for all kinds of horses.

Wanted One With a Hand Saw

A verdant youth who had just completed his apprenticeship as a carpenter, dropped into Alex. Gibson's jewelry store the other day, and after looking at some fraternity pins, asked, "How much is this with the squares and compasses on?" pointing to a Masonic pin. "Five dollars," said the clerk. "You haven't got one with a hand saw on it have you? I'm just out as a carpenter and joiner, and I'd like to have something to wear so people would know what I'm doing. I'll take it though I'd like to have one with a hand saw, but I guess this one is plain enough. The compass is to mark out our work and the square is to measure it out and every gol durn fool knows that G stands for gimlet." He bought the pin.

Died at Niagara Falls

The death occurred at Nigara Falls, U.S., on Friday, Feb. 6th, of Jessie E. Adams, wife of Mr. R. G. Cotton and daughter of Mr. William Adams, of Lakefield, at the age of 41 years. Deceased had been suffering for some time past from cancer, from the effects of which death resulted. A husband and two sons survive, Copeland and Fred. The remains were taken to the residence of her father, the funeral taking place on Monday last to the Lakefield cemetery. Among the floral offerings were two beautiful set pieces, one from the employees of the International Railway Company of Niagara Falls with which company Mr. Cotton is employed as conductor, and the other was sent by employees of the International Paper Company, where Copeland Cotton is employed.

LITTLE LOCAL LINES

—This is St. Valentine's day.

—A couple of boys are wanted at the Times Office.

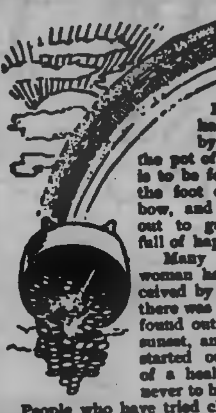
—Pedestrians are still obliged to take to the middle of the road in many parts of the town.

—Mr. Frank Sandford, of the Fenelon Falls Wooden Ware Works, has converted his business into a joint stock company with $50,000 capital. Of that sum $30,000 is outside capital. The village of Fenelon Falls proposes to take $15,000 of preferred stock paying 5 per cent. and fix the assessment at $5,000. A by-law providing for these things will be submitted. The plant will be enlarged and improved and about 50 hands employed.

—The Belleville City Council at their sitting last Monday night rearranged the civic offices and fixed salaries as follows: City Clerk, $700 per year; city solicitor, $400; city treasurer, $700; with $200 additional for waterworks; city surveyor and town commissioner, $700, and $300 as manager of the waterworks; engineer for fire department, $450; assistant chief, $300; medical health officer, $100. A reduction of about $1,000 is thus made. The Council will grant $800 a year to the Public Library on condition that the board guarantee that no debts be left at the end of the year.

BIRTH

BARRY—At Ashburnham, on 6th instant, a daughter born to Mr. and Mrs. Joseph Barry.



Many a child has been fooled by the story of the pot of gold which is to be found just at the foot of the rainbow, and has started out to gather riches full of happy dreams.

Many a man and woman have been deceived by the tale that there was health to be found out beyond the sunset, and they have started out dreaming of a healthful future, never to be realized.

People who have tried change of climate in vain for the cure of weak lungs have been perfectly and permanently cured by the use of Dr. Pierce's Golden Medical Discovery. It cures deep-seated coughs, bronchitis, bleeding lungs, emaciation, and other conditions which, if neglected or unskilfully treated, find a fatal end in consumption.

"Last spring I had a severe attack of pneumonia which left me with a very bad cough, and also left my lungs in a very bad condition," writes John M. Russell, Esq., of Brent, Cherokee Nat., Ind. Ty. "I had no appetite and was so weak I could scarcely walk. My breast was all sore with running sores. I got two bottles of Dr. Pierce's Golden Medical Discovery, which I believe saved my life. I cannot express my gratitude to you. I am able now to do very good work."

Any substitute offered as "just as good" as "Golden Medical Discovery" is a shadow of that medicine. There are cures behind every claim made for the "Discovery," which no "just as good" medicine can show.

The People's Common Sense Medical Adviser, a book containing 1008 pages, is given away. Send 31 one-cent stamps, for expense of customs and mailing *only*, for the book in paper covers, or 50 stamps for the volume bound in cloth. Address Dr. R. V. Pierce, Buffalo, N. Y.

Childrens' Aid Society

CHILDRENS' AID SOCIETY Peterborough for the care of neglected and ill-treated children. Incorporated by Act of Legislature 1893. Information requested. Informants names kept strictly private. Office hours 10 to 12 a. m., 4 to 5 p. m. George Cochrane, agent and assistant secretary. Office Division Court buildings.

WANTED

Applications will be received by the undersigned up to February 25, 1903, for the position of Street Commissioner of the Town of Peterborough. State qualifications, experience in asphalt, macadam and concrete sidewalk work, and salary. S. R. ARMSTRONG, Town Clerk.

135 CHURCH ST., TORONTO

COUNTY POLICE COURT

Two Cases Tried at Havelock Police Court on Thursday

A session of the County Police Court was held on Thursday at Havelock, and the following cases were brought up before County Police Magistrate Edmison:

Inspector Crowe laid a complaint against James Moloney for selling liquor without a license.

The County Police Magistrate deemed the evidence insufficient and dismissed the case.

Nathan Hubbs charged George A Parcels with a breach of the game law. A number of witnesses were heard, and it transpired that Parcels had cut open four muskrat houses, and had placed traps in them. Two of the witnesses were unable to appear, as they had been summoned on too short notice, and the case was enlarged for a week, in order that the remaining evidence might be heard.

Telephone Rates

It is estimated that the Bell Telephone Companies of the United States will expend $25,000,000 during 1903 in extending their business, and that at least 200,000 new subscribers will be added to the exchanges.

The Cuyahoga (Ind.) Telephone Company, of Cleveland, having made application to the City Council for the right to increase its rates and been refused, now propose to go ahead with the increase without permission of the Civic Government. The officials of the company stated before the Council that they must get higher rates or go out of business. The proposed increase is for residence $36 to $44, and for business $48 to $60 per annum. These rates are interesting to Canadian Telephone users who have been getting service at less rates than the above without the expense and nuisance of competition.

The net output of telephones by the American Bell Telephone Company during 1902 was 624,714 being the largest in the history of the company. The company has now in operation in the United States 3,150,320 telephone and the number of subscribers is increasing at a tremendous rate requiring an enormous increase in capital.

SOCIAL AND PERSONAL

—Miss Eva Whitten is making a short visit at Whitby and Oshawa.

—Miss Smiley, who has been visiting her sister, Mrs. Fred Taylor, of Ashburnham, returned home to Toronto yesterday.

—Mrs. J. S. LeHane, of Rochester, is in town for a few days, the guest of her sister, Mrs. J. H. O'Shea, Commercial house.

—Mr. Robert Cunningham, of Messrs. Richard Hall & Sons, has accepted a position in Madill Bros' store, Napanee, as manager of the carpet department. His many friends will wish him every success in his future undertakings.

The Floating Hells of the Atlantic.

If the sensational charges made in a book recently published in London ("At the Closed Door," by Robert H. Sherrard) have any foundation, there are indescribably hellish scenes enacted in the strange cabins of many of the Atlantic liners. The book is reviewed and some extracts given in "Truth." In order to spy out the nakedness of the land, Mr. Sherrard took steerage passage in a French liner to find the ship a floating hell to those who were too poor to bribe the stewards:

"One of the most cruel weapons used by the steerage stewards to bring to reason persons who were unreasonable as to paying the fee they were ordered not to pay, was the privation of drinking water. The women and little children suffered dreadfully for want of it during the throes of sea-sickness. Yet water there was in plenty. On the night of the 14th a body of women, with children in their arms, went aft, surrounded the padlocked cistern, and clamored for water. They were driven off with abuse and violence."

Hence water for washing was, of course, unobtainable—if it was wanted; but such was the indescribable, inconceivable filth of many of Mr. Sherrard's fellow-passengers that they would not have washed at Elisha's bidding in Jordan itself. "Of all animals in creation," he says, speaking from the depths of this poignant experience, "man, when he is dirty, is the very dirtiest." But the unwashen Jews found their way to the front of this crowd and crush with their usual sinuous and pushing perseverance:

"The timid and diffident went to the wall; the others, and amongst these the Jews, were noticeably prominent, encroached, and widely extended their privileges. There were three hideous little Jewish boys, whom I saw during the whole of the voyage, laden with delicacies from first-class kitchens. I often noticed them walking about on the first-class deck."

The sufferings of this "middle passage," however, were as nothing to the sufferings which—according to Mr. Sherrard—the penniless emigrants had to endure on Ellis Island, where they are detained by the New York authorities for weeks and even months together, before being packed back, as destitutes, to Europe. "From Havre onwards we had been treated much as sheep, or, perhaps, as pigs; but on landing we might consider ourselves dangerous and maleficent animals." In truth, men, women and children were bludgeoned—their jailers were all armed with bludgeons—on little or no provocation. Here is one specimen scene:

"At five o'clock we were ordered upstairs for supper. A man with filthy hands filled our hats or handkerchiefs with mouldy prunes. Another thrust two lumps of bread into our hands. Supervising the distribution was a foul-mouthed Bowery rough in his shirt-sleeves, who danced upon one of the tables and poured forth upon us torrents of obscene and blasphemous abuse. Nor did he content himself with this demonstration of the contempt in which he held us, for I saw him drag one old man, a long-bearded Polish Jew in a gaberdine, past the barrel of prunes by the hair of the face, and I saw him kick another emigrant, a German, on the head with his heavy boot."

Perhaps it may be said that these penniless people had no business to give the States Government the trouble of reshipping them to their homes. But, in the first place, many of the telegrams entrusted to the jailers for forwarding to well-to-do relatives in New York were burked, and the money—often a gross overcharge—pocketed; and, in the second place, these hapless wretches on this Devil's Island were lured to New York by an unscrupulous emigration agent:

"In the many conversations I had that afternoon with various people of various nationalities, in almost every instance I heard the blame for all suffering laid on the agent who had sold the steamship ticket without troubling to explain the [illegible]

CAUGHT BY THE GRIP.
RELEASED BY PE-RU-NA.

Congressman Geo. H. White's Case.
A Noted Sculptress Cured.

D. L. WALLACE
MRS. M. C. COOPER.
MRS. T. W. COLLINS.
MRS. THEO. SCHMIDT.
MRS. C. COVELL.
LIEUT. CLARICE HUNT.

The world of medicine recognizes Grip as epidemic catarrh. - - Medical Talk.

LA GRIPPE is epidemic catarrh. It spares no class or nationality. The cultured and the ignorant, the aristocrat and the pauper, the masses and the classes are alike subject to la grippe. None are exempt—all are liable.

Have you the grip? Or, rather, has the grip got you? Grip is well named. The original French term, la grippe, has been shortened by the busy American to read "grip." Without intending to do so a new word has been coined that exactly describes the case. As if some hideous giant with awful Grip had clutched us in its fatal clasp. Men, women, children, whole towns and cities are caught in the baneful grip of a terrible monster.

Pe-ru-na for Grip.

Mrs. Theophile Schmitt, wife of the Ex-Secretary of the German Consulate, writes the following letter from 3417 Wabash avenue, Chicago, Ill.:

"I suffered this winter with a severe attack of la grippe. After using three bottles of Peruna I found the grip had disappeared."—Mrs. T. Schmitt.

Mrs. Celeste Covell writes from 219 N. avenue, Aurora, Ill.:

"Only those who have suffered with la grippe and been cured can appreciate how grateful I feel that such a splendid medicine as Peruna has been placed at the door of every suffering person."—Mrs. C. Covell.

Noted Sculptress Cured of Grip.

Mrs. M. C. Cooper, of the Royal Academy of Arts, of London, England, now residing in Washington, D. C., is one of the greatest living sculptors and painters of the world. She says:

"I take pleasure in recommending Peruna for catarrh and la grippe. I have suffered for months, and after the use of one bottle of Peruna I am entirely well."—Mrs. M. C. Cooper.

D. L. Wallace, a charter member of the International Barber's Union, writes from 15 Western avenue, Minneapolis, Minn.:

"Following a severe attack of la grippe I seemed to be affected badly all over.

"One of my customers who was greatly helped by Peruna advised me to try it, and I procured a bottle the same day. Now my head is clear, my nerves are steady, I enjoy food and rest well. Peruna has been worth a dollar a dose to me."—D. L. Wallace.

Lieutenant Clarice Hunt, of the Salt Lake City Barracks of the Salvation Army, writes from Ogden, Utah:

"Two months ago I was suffering with so severe a cold that I could hardly speak.

"Our captain advised me to try Peruna and procured a bottle for me, and truly it worked wonders. Within two weeks I was entirely well."—Clarice Hunt.

Congressman White's Letter.

Tarboro, N. C.

Gentlemen:—I am more than satisfied with Peruna and find it to be an excellent remedy for the grip and catarrh. I have used it in my family and they all join me in recommending it as an excellent remedy."—George H. White, Member of Congress.

Mrs. T. W. Collins, Treasurer Independent Order of Good Templars, of Everett, Wash., writes:

"After having a severe attack of la grippe I continued in a feeble condition even after the doctors called me cured. My blood seemed poisoned. Peruna cured me."—Mrs. T. W. Collins.

If you do not derive prompt and satisfactory results from the use of Peruna, write at once to Dr. Hartman, giving a full statement of your case and he will be pleased to give you his valuable advice gratis.

Address Dr. Hartman, President of The Hartman Sanitarium, Columbus, O.

Business Opportunities

A FORTUNE IN MAY CORN—May corn is now selling 20 cents per bushel less than it was last year at this time. On account of the greater demand for export and manufacturing purposes, it should be selling considerably above. You never saw such a situation in your life, and those who take advantage of the opportunity offered by the low price of May corn at this time, should soon double their money. We predict that May corn will sell for 65c. in February and 75c. in May. Large capital is not necessary to take advantage of this opportunity. Buy now and stand to make a fortune. $25.00 will margin 1,250 bushels, 2 cents, $50.00 will margin 2,500 bushels, and $100.00 will margin 5,000 bushels. Experience on your part is unnecessary. We will take complete charge of your account and charge but 10 per cent. of the profit we make for you. We devote all our time working corn and when we say Buy May Corn, we know what we are talking about and are confident corn will advance in price. Now is the time to make a purchase. Do not delay a day, but telegraph us your order at once, and allow your remittance to follow by mail. Write for free booklet, giving valuable information on the grain markets. Our methods have made many a fortune. Merchants Brokerage & Commission Co., St. Louis Mo.

ENCOURAGING

"I got the Bird Bread last Monday, and a ready (Thursday) a favorite singer who, since moulting, seemed to have lost his voice, has begun to sing, and all my birds seem more cheerful." Mr. E. B. Moodie, Chesterville, Ont. Nov. 4, 1897. (127)
